Skill 01

Clarify the Claim

What's the Claim?

160 Items	**1-5** Levels	**Find the exact claim being made.** Objective

Essential question. What exactly is the speaker asking us to accept?

This PDF is designed for classroom use. It gives teachers a rigorous introduction to the skill, a repeatable solving routine, likely student confusions, a worked example, and the full XiXteen item set with choice-level feedback.

Generated from the current XiXteen corpus on 2026-10-29.

Skill 01

Clarify the Claim

What's the Claim?

Find the exact claim being made. Objective	**160** Items	**Levels 1-5** Difficulty bands

Essential question	What exactly is the speaker asking us to accept?
Why it matters	Every argument is easier to judge once you know exactly what someone is asking you to accept. Without this skill, people waste time attacking side details, stories, or evidence while the real point quietly escapes inspection.
Conceptual core	This skill trains students to locate the target of judgment before judging it. A prompt may include background, measurements, motives, vivid details, and a speaker's conclusion. The claim is the statement that would need support after the background has been cleared away. Students should learn that claims can be descriptive, predictive, causal, evaluative, or practical recommendations, and that each type requires different later tests.
Student method	Look for the sentence that would still need support if all the background details were removed. Separate the recommendation from the reason, the measured result, the audience, and any claim that goes beyond what the speaker actually said.
Analogy	Think of a claim as the destination on a map. Evidence is the road, scenery is background, and exaggerations are roads to somewhere else.
Assessment focus	A good answer names the exact point being supported and rejects answers that are merely supporting facts, side details, or overclaims.

Teaching Sequence

1. Find the speaker and mark the sentence that sounds like the point of the argument.

2. Separate the claim from the evidence that is offered for it.

3. Check whether an answer overstates the claim by adding always, only, proven, everyone, or everywhere.

4. Restate the claim in plain language before choosing an answer.

Common Confusions To Watch For

1. Students often pick the most concrete fact because it feels important, even when it is only evidence.

2. Students may pick an extreme version of the claim because it sounds more decisive than the actual conclusion.

3. Students sometimes confuse the issue being discussed with the position someone takes on that issue.

Teacher Prompts

1. Who is trying to persuade whom?

2. Which sentence would the speaker need to defend if challenged?

3. Which choices are evidence, background, or exaggeration rather than the claim?

Worked Example

Scenario	A city tests later library hours and visits rise from 400 to 460 per week. A council member says, because of that test, the city should keep the later hours.
Teacher think-aloud	The visit count is evidence. The issue is library hours. The council member's claim is the recommendation to keep later hours. A choice saying the test proves later hours always work would go beyond the claim.
Student takeaway	The main claim is the point being defended, not the measurement used to defend it.

Guided Classroom Exercise

Invented case. Use only the facts below; write on paper. Try the steps and check your work before reading the model answer. Different wording can be equally adequate.

Situation. A student writes: 'Our library closes at 5 p.m. During a four-week trial of closing at 7 p.m., weekly visits rose from 400 to 460. The council should keep the later closing time.'

What To Do

1. Copy the main claim: the proposal the writer wants the council to accept.

2. Copy the supporting evidence and label the remaining sentence as background.

3. Write one sentence explaining why the visit count is not itself the main claim.

Check before reading the answer. Have you separated the proposed action from the fact used to support it? Do not add 'always' or claim that the trial proves the policy works everywhere.

Model Answer

Claim: the council should keep the later closing time. Evidence: weekly visits rose from 400 to 460 during the trial. Background: the library normally closes at 5 p.m. The count supports the proposal; it is not the proposed action.

Why it is adequate. The answer names the roles of all three sentences without strengthening what the writer said.

Item Bank

Items are grouped by level. For each item, read the prompt, predict the answer, choose, and then use the feedback and process commentary to examine the reasoning path.

Level 1

Level 1 establishes the clean version of the skill: the cue is direct, the distractors are visible, and the main task is to learn the contrast.

clarify_claim-001 | Level 1 | Answer A

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the city council should extend evening bus service until midnight." Which claim is Riley asking people to accept?

A. The city council should extend evening bus service until midnight. correct	**B.** The city council has proven the idea will work everywhere without needing more evidence. choice
C. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. choice	**D.** The new buses were repainted blue. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The city council should extend evening bus service until midnight.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, transportation, d1

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-002 | Level 1 | Answer C

Prompt. The school board is weighing a proposal aimed at ninth-grade students: require phone lockers during class. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the school board should require phone lockers during class." Which claim is Maya asking people to accept?

A. The school board has proven the idea will work everywhere without needing more evidence. choice	**B.** Ninth-grade students are the only ones affected, so no other concern matters. choice
C. The school board should require phone lockers during class. correct	**D.** The lockers are installed near the gym. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The school board should require phone lockers during class.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, education, d1

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-003 | Level 1 | Answer A

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the hospital should send medication reminder texts before evening doses." Which claim is Sam asking people to accept?

A. The hospital should send medication reminder texts before evening doses. correct	**B.** A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. choice
C. The text messages use a green pill icon. choice	**D.** The hospital has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The hospital should send medication reminder texts before evening doses.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, health, d1

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-004 | Level 1 | Answer C

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the company should test a Monday-through-Thursday workweek." Which claim is Avery asking people to accept?

A. The test calendar starts on a Monday. choice	**B.** The company has proven the idea will work everywhere without needing more evidence. choice
C. The company should test a Monday-through-Thursday workweek. correct	**D.** A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The company should test a Monday-through-Thursday workweek.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, workplace, d1

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-005 | Level 1 | Answer B

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the grocery chain should add larger unit-price labels on shelf tags." Which claim is Taylor asking people to accept?

A. The grocery chain has proven the idea will work everywhere without needing more evidence. choice	**B.** The grocery chain should add larger unit-price labels on shelf tags. correct
C. Weekly grocery shoppers are the only ones affected, so no other concern matters. choice	**D.** A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The grocery chain should add larger unit-price labels on shelf tags.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, retail, d1

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-006 | Level 1 | Answer C

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the library should waive late fines for children's books." Which claim is Morgan asking people to accept?

A. The library has proven the idea will work everywhere without needing more evidence. choice	**B.** Families checking out children's books are the only ones affected, so no other concern matters. choice
C. The library should waive late fines for children's books. correct	**D.** A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The library should waive late fines for children's books.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, public services, d1

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-007 | Level 1 | Answer C

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the platform should require two-factor login for site administrators." Which claim is Casey asking people to accept?

A. The login button changed from green to blue. choice	**B.** The platform has proven the idea will work everywhere without needing more evidence. choice
C. The platform should require two-factor login for site administrators. correct	**D.** A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The platform should require two-factor login for site administrators.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, technology, d1

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-008 | Level 1 | Answer A

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the neighborhood association should add brighter LED streetlights on Maple Street." Which claim is Jordan asking people to accept?

A. The neighborhood association should add brighter LED streetlights on Maple Street. correct	**B.** A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. choice
C. Residents on Maple Street are the only ones affected, so no other concern matters. choice	**D.** The neighborhood association has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The neighborhood association should add brighter LED streetlights on Maple Street.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, public safety, d1

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-009 | Level 1 | Answer D

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the university should expand peer tutoring in statistics." Which claim is Riley asking people to accept?

A. The university has proven the idea will work everywhere without needing more evidence. choice	**B.** The tutoring room has new chairs. choice
C. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. choice	**D.** The university should expand peer tutoring in statistics. correct

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The university should expand peer tutoring in statistics.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, education, d1

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-010 | Level 1 | Answer A

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the restaurant group should show calorie labels on printed lunch menus." Which claim is Maya asking people to accept?

A. The restaurant group should show calorie labels on printed lunch menus. correct	**B.** The lunch menus are printed on thicker paper. choice
C. The restaurant group has proven the idea will work everywhere without needing more evidence. choice	**D.** A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The restaurant group should show calorie labels on printed lunch menus.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, nutrition, d1

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-011 | Level 1 | Answer A

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the bank should send overdraft warning texts before fees post." Which claim is Sam asking people to accept?

A. The bank should send overdraft warning texts before fees post. correct	**B.** The warning texts arrive from a short code. choice
C. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. choice	**D.** Checking-account customers are the only ones affected, so no other concern matters. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The bank should send overdraft warning texts before fees post.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, finance, d1

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-012 | Level 1 | Answer D

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the park service should use timed-entry passes for weekend trail visits." Which claim is Avery asking people to accept?

A. The park service has proven the idea will work everywhere without needing more evidence. choice	**B.** A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. choice
C. The digital passes include a small trail map. choice	**D.** The park service should use timed-entry passes for weekend trail visits. correct

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The park service should use timed-entry passes for weekend trail visits.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, environment, d1

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

---

clarify_claim-013 | Level 1 | Answer C

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the museum should offer free admission on Fridays." Which claim is Taylor asking people to accept?

A. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. choice	**B.** Local families are the only ones affected, so no other concern matters. choice
C. The museum should offer free admission on Fridays. correct	**D.** The museum has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The museum should offer free admission on Fridays.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, culture, d1

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

---

clarify_claim-014 | Level 1 | Answer B

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the sports league should add mandatory sideline concussion checks." Which claim is Morgan asking people to accept?

A. The concussion checklist is printed on yellow paper. choice	**B.** The sports league should add mandatory sideline concussion checks. correct
C. The sports league has proven the idea will work everywhere without needing more evidence. choice	**D.** Youth soccer players are the only ones affected, so no other concern matters. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The sports league should add mandatory sideline concussion checks.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, sports, d1

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

---

clarify_claim-015 | Level 1 | Answer B

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the nonprofit should send donation receipts within one day." Which claim is Casey asking people to accept?

A. The receipt email subject line changed. choice	**B.** The nonprofit should send donation receipts within one day. correct
C. First-time donors are the only ones affected, so no other concern matters. choice	**D.** The nonprofit has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The nonprofit should send donation receipts within one day.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, nonprofit, d1

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

---

clarify_claim-016 | Level 1 | Answer D

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the warehouse should offer monthly lifting-safety and ergonomic training." Which claim is Jordan asking people to accept?

A. The training room has a ceiling-mounted projector. choice	**B.** Warehouse staff are the only ones affected, so no other concern matters. choice
C. The warehouse has proven the idea will work everywhere without needing more evidence. choice	**D.** The warehouse should offer monthly lifting-safety and ergonomic training. correct

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The warehouse should offer monthly lifting-safety and ergonomic training.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, workplace safety, d1

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-017 | Level 1 | Answer B

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the city sanitation office should place compost bins in apartment lobbies." Which claim is Riley asking people to accept?

A. The lobby compost bins have foot pedals. choice	**B.** The city sanitation office should place compost bins in apartment lobbies. correct
C. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. choice	**D.** Apartment residents are the only ones affected, so no other concern matters. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The city sanitation office should place compost bins in apartment lobbies.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-018 | Level 1 | Answer D

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the app maker should make new user profiles private by default." Which claim is Maya asking people to accept?

A. New app users are the only ones affected, so no other concern matters. choice	**B.** The privacy screen uses a shield icon. choice
C. The app maker has proven the idea will work everywhere without needing more evidence. choice	**D.** The app maker should make new user profiles private by default. correct

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The app maker should make new user profiles private by default.. The other options are either support, background, or an overclaim.

clarify_claim-019 | Level 1 | Answer D

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the clinic should reserve same-day appointment slots." Which claim is Sam asking people to accept?

A. The appointment cards are white. choice	**B.** The clinic has proven the idea will work everywhere without needing more evidence. choice
C. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. choice	**D.** The clinic should reserve same-day appointment slots. correct

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The clinic should reserve same-day appointment slots.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

---

clarify_claim-020 | Level 1 | Answer B

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the airline should board passengers by seat zone." Which claim is Avery asking people to accept?

A. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. choice	**B.** The airline should board passengers by seat zone. correct
C. The gate signs are backlit. choice	**D.** Domestic flight passengers are the only ones affected, so no other concern matters. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The airline should board passengers by seat zone.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, travel, d1

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-021 | Level 1 | Answer D

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the landlord should launch an online apartment repair portal." Which claim is Taylor asking people to accept?

A. The landlord has proven the idea will work everywhere without needing more evidence. choice	**B.** A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. choice
C. The repair portal uses a house logo. choice	**D.** The landlord should launch an online apartment repair portal. correct

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The landlord should launch an online apartment repair portal.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, housing, d1

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-022 | Level 1 | Answer A

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the cafeteria should move fruit bowls to the front of the cafeteria line." Which claim is Morgan asking people to accept?

A. The cafeteria should move fruit bowls to the front of the cafeteria line. correct	**B.** Middle-school students are the only ones affected, so no other concern matters. choice
C. The fruit bowls are ceramic. choice	**D.** The cafeteria has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The cafeteria should move fruit bowls to the front of the cafeteria line.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, food, d1

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-023 | Level 1 | Answer B

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the call center should give support agents weekly script coaching." Which claim is Casey asking people to accept?

A. The coaching slides use blue headers. choice	**B.** The call center should give support agents weekly script coaching. correct
C. Support agents are the only ones affected, so no other concern matters. choice	**D.** The call center has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The call center should give support agents weekly script coaching.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, customer support, d1

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-024 | Level 1 | Answer C

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the water utility should send automatic household water-leak alerts." Which claim is Jordan asking people to accept?

A. The water utility has proven the idea will work everywhere without needing more evidence. choice	**B.** Local homeowners are the only ones affected, so no other concern matters. choice
C. The water utility should send automatic household water-leak alerts. correct	**D.** The water-leak alert screen includes a blue droplet icon. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The water utility should send automatic household water-leak alerts.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-025 | Level 1 | Answer D

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the police department should send body-camera activation reminders before patrol shifts." Which claim is Riley asking people to accept?

A. The police department has proven the idea will work everywhere without needing more evidence. choice	**B.** Patrol officers are the only ones affected, so no other concern matters. choice
C. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. choice	**D.** The police department should send body-camera activation reminders before patrol shifts. correct

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The police department should send body-camera activation reminders before patrol shifts.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-026 | Level 1 | Answer A

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the election office should offer online mail-ballot tracking." Which claim is Maya asking people to accept?

A. The election office should offer online mail-ballot tracking. correct	**B.** A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. choice
C. The election office has proven the idea will work everywhere without needing more evidence. choice	**D.** The ballot-tracking page uses county colors. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The election office should offer online mail-ballot tracking.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-027 | Level 1 | Answer B

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the tutoring app should send spaced-review prompts for language vocabulary." Which claim is Sam asking people to accept?

A. The review prompts use a bell icon. choice	**B.** The tutoring app should send spaced-review prompts for language vocabulary. correct
C. Language learners are the only ones affected, so no other concern matters. choice	**D.** The tutoring app has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The tutoring app should send spaced-review prompts for language vocabulary.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-028 | Level 1 | Answer C

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the gym should offer a beginner gym orientation." Which claim is Avery asking people to accept?

A. The gym has proven the idea will work everywhere without needing more evidence. choice	**B.** The orientation mats are black. choice
C. The gym should offer a beginner gym orientation. correct	**D.** A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The gym should offer a beginner gym

orientation.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, fitness, d1

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

---

clarify_claim-029 | Level 1 | Answer B

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the insurer should send weekly safe-driving feedback." Which claim is Taylor asking people to accept?

A. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. choice	**B.** The insurer should send weekly safe-driving feedback. correct
C. Auto-insurance policyholders are the only ones affected, so no other concern matters. choice	**D.** The insurer has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The insurer should send weekly safe-driving feedback.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, insurance, d1

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

---

clarify_claim-030 | Level 1 | Answer C

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the newsroom should place corrections at the top of articles." Which claim is Morgan asking people to accept?

A. The newsroom has proven the idea will work everywhere without needing more evidence. choice	**B.** Newsletter readers are the only ones affected, so no other concern matters. choice
C. The newsroom should place corrections at the top of articles. correct	**D.** The correction box has a gray border. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The newsroom should place corrections at the

top of articles.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, media, d1

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-031 | Level 1 | Answer A

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the farmers market should require clearer price signs at vendor stalls." Which claim is Casey asking people to accept?

A. The farmers market should require clearer price signs at vendor stalls. correct	**B.** The farmers market has proven the idea will work everywhere without needing more evidence. choice
C. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. choice	**D.** Weekend farmers market shoppers are the only ones affected, so no other concern matters. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The farmers market should require clearer price signs at vendor stalls.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, local commerce, d1

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-032 | Level 1 | Answer D

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the hotel should send quiet-hours text reminders to hotel guests." Which claim is Jordan asking people to accept?

A. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. choice	**B.** The hotel has proven the idea will work everywhere without needing more evidence. choice
C. Overnight hotel guests are the only ones affected, so no other concern matters. choice	**D.** The hotel should send quiet-hours text reminders to hotel guests. correct

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The hotel should send quiet-hours text reminders to hotel guests.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, hospitality, d1

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

Level 2

Level 2 keeps the same skill but adds more realistic wording and more tempting distractors.

clarify_claim-033 | Level 2 | Answer B

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the city council should extend evening bus service until midnight." Which claim is Maya asking people to accept?

A. The new buses were repainted blue. choice	**B.** The city council should extend evening bus service until midnight. correct
C. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. choice	**D.** Late-shift workers are the only ones affected, so no other concern matters. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The city council should extend evening bus service until midnight.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, transportation, d2

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-034 | Level 2 | Answer A

Prompt. The school board is weighing a proposal aimed at ninth-grade students: require phone lockers during class. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the school board should require phone lockers during class." Which claim is Sam asking people to accept?

A. The school board should require phone lockers during class. correct	**B.** Ninth-grade students are the only ones affected, so no other concern matters. choice
C. The school board has proven the idea will work everywhere without needing more evidence. choice	**D.** The lockers are installed near the gym. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The school board should require phone lockers during class.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, education, d2

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-035 | Level 2 | Answer D

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the hospital should send medication reminder texts before evening doses." Which claim is Avery asking people to accept?

A. The text messages use a green pill icon. choice	**B.** Patients over 60 are the only ones affected, so no other concern matters. choice
C. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. choice	**D.** The hospital should send medication reminder texts before evening doses. correct

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The hospital should send medication reminder texts before evening doses.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-036 | Level 2 | Answer C

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the company should test a Monday-through-Thursday workweek." Which claim is Taylor asking people to accept?

A. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. choice	**B.** The company has proven the idea will work everywhere without needing more evidence. choice
C. The company should test a Monday-through-Thursday workweek. correct	**D.** Software engineers are the only ones affected, so no other concern matters. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The company should test a Monday-through-Thursday workweek.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-037 | Level 2 | Answer B

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the grocery chain should add larger unit-price labels on shelf tags." Which claim is Morgan asking people to accept?

A. The grocery chain has proven the idea will work everywhere without needing more evidence. choice	**B.** The grocery chain should add larger unit-price labels on shelf tags. correct
C. The shelf labels use bold black numbers. choice	**D.** Weekly grocery shoppers are the only ones affected, so no other concern matters. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The grocery chain should add larger unit-price labels on shelf tags.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, retail, d2

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-038 | Level 2 | Answer A

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the library should waive late fines for children's books." Which claim is Casey asking people to accept?

A. The library should waive late fines for children's books. correct	**B.** The children's-book checkout desk moved six feet. choice
C. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. choice	**D.** Families checking out children's books are the only ones affected, so no other concern matters. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The library should waive late fines for children's books.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, public services, d2

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-039 | Level 2 | Answer D

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the platform should require two-factor login for site administrators." Which claim is Jordan asking people to accept?

A. The platform has proven the idea will work everywhere without needing more evidence. choice	**B.** Site administrators are the only ones affected, so no other concern matters. choice
C. The login button changed from green to blue. choice	**D.** The platform should require two-factor login for site administrators. correct

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The platform should require two-factor login for site administrators.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, technology, d2

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-040 | Level 2 | Answer C

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the neighborhood association should add brighter LED streetlights on Maple Street." Which claim is Riley asking people to accept?

A. The new light poles are made of aluminum. choice	**B.** A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. choice
C. The neighborhood association should add brighter LED streetlights on Maple Street. correct	**D.** Residents on Maple Street are the only ones affected, so no other concern matters. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The neighborhood association should add brighter LED streetlights on Maple Street.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-041 | Level 2 | Answer D

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the university should expand peer tutoring in statistics." Which claim is Maya asking people to accept?

A. The university has proven the idea will work everywhere without needing more evidence. choice	**B.** A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. choice
C. The tutoring room has new chairs. choice	**D.** The university should expand peer tutoring in statistics. correct

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The university should expand peer tutoring in statistics.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, education, d2

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-042 | Level 2 | Answer C

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the restaurant group should show calorie labels on printed lunch menus." Which claim is Sam asking people to accept?

A. The restaurant group has proven the idea will work everywhere without needing more evidence. choice	**B.** The lunch menus are printed on thicker paper. choice
C. The restaurant group should show calorie labels on printed lunch menus. correct	**D.** A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The restaurant group should show calorie labels on printed lunch menus.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, nutrition, d2

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-043 | Level 2 | Answer C

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the bank should send overdraft warning texts before fees post." Which claim is Avery asking people to accept?

A. The bank has proven the idea will work everywhere without needing more evidence. choice	**B.** A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. choice
C. The bank should send overdraft warning texts before fees post. correct	**D.** Checking-account customers are the only ones affected, so no other concern matters. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The bank should send overdraft warning texts before fees post.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-044 | Level 2 | Answer D

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the park service should use timed-entry passes for weekend trail visits." Which claim is Taylor asking people to accept?

A. The park service has proven the idea will work everywhere without needing more evidence. choice	**B.** Weekend trail hikers are the only ones affected, so no other concern matters. choice
C. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. choice	**D.** The park service should use timed-entry passes for weekend trail visits. correct

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The park service should use timed-entry passes for weekend trail visits.. The other options are either support, background, or an overclaim.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-045 | Level 2 | Answer A

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the museum should offer free admission on Fridays." Which claim is Morgan asking people to accept?

A. The museum should offer free admission on Fridays. correct	**B.** The museum has proven the idea will work everywhere without needing more evidence. choice
C. The Friday tickets are scanned at the east door. choice	**D.** Local families are the only ones affected, so no other concern matters. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The museum should offer free admission on Fridays.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, culture, d2

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-046 | Level 2 | Answer B

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the sports league should add mandatory sideline concussion checks." Which claim is Casey asking people to accept?

A. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. choice	**B.** The sports league should add mandatory sideline concussion checks. correct
C. Youth soccer players are the only ones affected, so no other concern matters. choice	**D.** The concussion checklist is printed on yellow paper. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The sports league should add mandatory sideline concussion checks.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, sports, d2

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-047 | Level 2 | Answer C

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the nonprofit should send donation receipts within one day." Which claim is Jordan asking people to accept?

A. First-time donors are the only ones affected, so no other concern matters. choice	**B.** The receipt email subject line changed. choice
C. The nonprofit should send donation receipts within one day. correct	**D.** The nonprofit has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The nonprofit should send donation receipts within one day.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, nonprofit, d2

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-048 | Level 2 | Answer D

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the warehouse should offer monthly lifting-safety and ergonomic training." Which claim is Riley asking people to accept?

A. Warehouse staff are the only ones affected, so no other concern matters. choice	**B.** A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. choice
C. The training room has a ceiling-mounted projector. choice	**D.** The warehouse should offer monthly lifting-safety and ergonomic training. correct

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The warehouse should offer monthly lifting-safety and ergonomic training.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, workplace safety, d2

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-049 | Level 2 | Answer A

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the city sanitation office should place compost bins in apartment lobbies." Which claim is Maya asking people to accept?

A. The city sanitation office should place compost bins in apartment lobbies. correct	**B.** Apartment residents are the only ones affected, so no other concern matters. choice
C. The lobby compost bins have foot pedals. choice	**D.** The city sanitation office has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The city sanitation office should place compost bins in apartment lobbies.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, environment, d2

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-050 | Level 2 | Answer B

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the app maker should make new user profiles private by default." Which claim is Sam asking people to accept?

A. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. choice	**B.** The app maker should make new user profiles private by default. correct
C. The privacy screen uses a shield icon. choice	**D.** The app maker has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The app maker should make new user profiles private by default.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-051 | Level 2 | Answer A

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the clinic should reserve same-day appointment slots." Which claim is Avery asking people to accept?

A. The clinic should reserve same-day appointment slots. correct	**B.** The clinic has proven the idea will work everywhere without needing more evidence. choice
C. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. choice	**D.** Primary-care patients are the only ones affected, so no other concern matters. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The clinic should reserve same-day appointment slots.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, health, d2

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-052 | Level 2 | Answer B

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the airline should board passengers by seat zone." Which claim is Taylor asking people to accept?

A. Domestic flight passengers are the only ones affected, so no other concern matters. choice	**B.** The airline should board passengers by seat zone. correct
C. The airline has proven the idea will work everywhere without needing more evidence. choice	**D.** A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The airline should board passengers by seat zone.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, travel, d2

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-053 | Level 2 | Answer B

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the landlord should launch an online apartment repair portal." Which claim is Morgan asking people to accept?

A. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. choice	**B.** The landlord should launch an online apartment repair portal. correct
C. The repair portal uses a house logo. choice	**D.** Apartment tenants are the only ones affected, so no other concern matters. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The landlord should launch an online apartment repair portal.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

---

clarify_claim-054 | Level 2 | Answer A

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the cafeteria should move fruit bowls to the front of the cafeteria line." Which claim is Casey asking people to accept?

A. The cafeteria should move fruit bowls to the front of the cafeteria line. correct	**B.** The fruit bowls are ceramic. choice
C. Middle-school students are the only ones affected, so no other concern matters. choice	**D.** A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The cafeteria should move fruit bowls to the front of the cafeteria line.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

---

clarify_claim-055 | Level 2 | Answer D

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the call center should give support agents weekly script coaching." Which claim is Jordan asking people to accept?

A. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. choice	**B.** Support agents are the only ones affected, so no other concern matters. choice
C. The coaching slides use blue headers. choice	**D.** The call center should give support agents weekly script coaching. correct

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The call center should give support agents weekly script coaching.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-056 | Level 2 | Answer C

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the water utility should send automatic household water-leak alerts." Which claim is Riley asking people to accept?

A. Local homeowners are the only ones affected, so no other concern matters. choice	**B.** The water-leak alert screen includes a blue droplet icon. choice
C. The water utility should send automatic household water-leak alerts. correct	**D.** A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The water utility should send automatic household water-leak alerts.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-057 | Level 2 | Answer B

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the police department should send body-camera activation reminders before patrol shifts." Which claim is Maya asking people to accept?

A. The reminder tone is two beeps. choice	**B.** The police department should send body-camera activation reminders before patrol shifts. correct
C. Patrol officers are the only ones affected, so no other concern matters. choice	**D.** A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The police department should send body-camera activation reminders before patrol shifts.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, governance, d2

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

---

clarify_claim-058 | Level 2 | Answer A

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the election office should offer online mail-ballot tracking." Which claim is Sam asking people to accept?

A. The election office should offer online mail-ballot tracking. correct	**B.** The ballot-tracking page uses county colors. choice
C. Mail voters are the only ones affected, so no other concern matters. choice	**D.** The election office has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The election office should offer online mail-ballot tracking.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, election administration, d2

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

---

clarify_claim-059 | Level 2 | Answer C

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the tutoring app should send spaced-review prompts for language vocabulary." Which claim is Avery asking people to accept?

A. The review prompts use a bell icon. choice	**B.** The tutoring app has proven the idea will work everywhere without needing more evidence. choice
C. The tutoring app should send spaced-review prompts for language vocabulary. correct	**D.** A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The tutoring app should send spaced-review prompts for language vocabulary.. The other options are either support, background, or an overclaim.

clarify_claim-060 | Level 2 | Answer A

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the gym should offer a beginner gym orientation." Which claim is Taylor asking people to accept?

A. The gym should offer a beginner gym orientation. correct	**B.** New gym members are the only ones affected, so no other concern matters. choice
C. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. choice	**D.** The gym has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The gym should offer a beginner gym orientation.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

---

clarify_claim-061 | Level 2 | Answer D

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the insurer should send weekly safe-driving feedback." Which claim is Morgan asking people to accept?

A. Auto-insurance policyholders are the only ones affected, so no other concern matters. choice	**B.** The insurer has proven the idea will work everywhere without needing more evidence. choice
C. The feedback dashboard uses star ratings. choice	**D.** The insurer should send weekly safe-driving feedback. correct

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The insurer should send weekly safe-driving feedback.. The other options are either support, background, or an overclaim.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

---

clarify_claim-062 | Level 2 | Answer C

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the newsroom should place corrections at the top of articles." Which claim is Casey asking people to accept?

A. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. choice	**B.** The newsroom has proven the idea will work everywhere without needing more evidence. choice
C. The newsroom should place corrections at the top of articles. correct	**D.** Newsletter readers are the only ones affected, so no other concern matters. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The newsroom should place corrections at the top of articles.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

---

clarify_claim-063 | Level 2 | Answer B

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the farmers market should require clearer price signs at vendor stalls." Which claim is Jordan asking people to accept?

A. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. choice	**B.** The farmers market should require clearer price signs at vendor stalls. correct
C. Weekend farmers market shoppers are the only ones affected, so no other concern matters. choice	**D.** The stall price signs are laminated. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The farmers market should require clearer price signs at vendor stalls.. The other options are either support, background, or an overclaim.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

---

clarify_claim-064 | Level 2 | Answer D

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the hotel should send quiet-hours text reminders to hotel guests." Which claim is Riley asking people to accept?

A. The quiet-hours text reminder uses a small moon icon. choice	**B.** A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. choice
C. The hotel has proven the idea will work everywhere without needing more evidence. choice	**D.** The hotel should send quiet-hours text reminders to hotel guests. correct

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The hotel should send quiet-hours text reminders to hotel guests.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, hospitality, d2

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

Level 3

Level 3 asks for steadier discrimination: the right answer is still objective, but the wrong answers often sound plausible.

clarify_claim-065 | Level 3 | Answer C

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the city council should extend evening bus service until midnight." Which claim is Sam asking people to accept?

A. The new buses were repainted blue. choice	**B.** A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. choice
C. The city council should extend evening bus service until midnight. correct	**D.** The city council has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The city council should extend evening bus service until midnight.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-066 | Level 3 | Answer D

Prompt. The school board is weighing a proposal aimed at ninth-grade students: require phone lockers during class. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the school board should require phone lockers during class." Which claim is Avery asking people to accept?

A. The lockers are installed near the gym. choice	**B.** The school board has proven the idea will work everywhere without needing more evidence. choice
C. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. choice	**D.** The school board should require phone lockers during class. correct

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The school board should require phone lockers during class.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-067 | Level 3 | Answer A

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the hospital should send medication reminder texts before evening doses." Which claim is Taylor asking people to accept?

A. The hospital should send medication reminder texts before evening doses. correct	**B.** Patients over 60 are the only ones affected, so no other concern matters. choice
C. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. choice	**D.** The text messages use a green pill icon. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The hospital should send medication reminder texts before evening doses.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, health, d3

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-068 | Level 3 | Answer B

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the company should test a Monday-through-Thursday workweek." Which claim is Morgan asking people to accept?

A. The test calendar starts on a Monday. choice	**B.** The company should test a Monday-through-Thursday workweek. correct
C. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. choice	**D.** The company has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The company should test a Monday-through-Thursday workweek.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, workplace, d3

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-069 | Level 3 | Answer C

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the grocery chain should add larger unit-price labels on shelf tags." Which claim is Casey asking people to accept?

A. The shelf labels use bold black numbers. choice	**B.** Weekly grocery shoppers are the only ones affected, so no other concern matters. choice
C. The grocery chain should add larger unit-price labels on shelf tags. correct	**D.** The grocery chain has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The grocery chain should add larger unit-price labels on shelf tags.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, retail, d3

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-070 | Level 3 | Answer D

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the library should waive late fines for children's books." Which claim is Jordan asking people to accept?

A. The library has proven the idea will work everywhere without needing more evidence. choice	**B.** A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. choice
C. The children's-book checkout desk moved six feet. choice	**D.** The library should waive late fines for children's books. correct

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The library should waive late fines for children's books.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-071 | Level 3 | Answer A

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the platform should require two-factor login for site administrators." Which claim is Riley asking people to accept?

A. The platform should require two-factor login for site administrators. correct	**B.** Site administrators are the only ones affected, so no other concern matters. choice
C. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. choice	**D.** The login button changed from green to blue. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The platform should require two-factor login for site administrators.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-072 | Level 3 | Answer B

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the neighborhood association should add brighter LED streetlights on Maple Street." Which claim is Maya asking people to accept?

A. The neighborhood association has proven the idea will work everywhere without needing more evidence. choice	**B.** The neighborhood association should add brighter LED streetlights on Maple Street. correct
C. Residents on Maple Street are the only ones affected, so no other concern matters. choice	**D.** The new light poles are made of aluminum. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The neighborhood association should add brighter LED streetlights on Maple Street.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-073 | Level 3 | Answer A

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the university should expand peer tutoring in statistics." Which claim is Sam asking people to accept?

A. The university should expand peer tutoring in statistics. correct	**B.** First-year statistics students are the only ones affected, so no other concern matters. choice
C. The tutoring room has new chairs. choice	**D.** A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The university should expand peer tutoring in statistics.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, education, d3

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-074 | Level 3 | Answer B

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the restaurant group should show calorie labels on printed lunch menus." Which claim is Avery asking people to accept?

A. The restaurant group has proven the idea will work everywhere without needing more evidence. choice	**B.** The restaurant group should show calorie labels on printed lunch menus. correct
C. The lunch menus are printed on thicker paper. choice	**D.** Lunch customers are the only ones affected, so no other concern matters. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The restaurant group should show calorie labels on printed lunch menus.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-075 | Level 3 | Answer D

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the bank should send overdraft warning texts before fees post." Which claim is Taylor asking people to accept?

A. The warning texts arrive from a short code. choice	**B.** The bank has proven the idea will work everywhere without needing more evidence. choice
C. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. choice	**D.** The bank should send overdraft warning texts before fees post. correct

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The bank should send overdraft warning texts before fees post.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-076 | Level 3 | Answer B

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the park service should use timed-entry passes for weekend trail visits." Which claim is Morgan asking people to accept?

A. The park service has proven the idea will work everywhere without needing more evidence. choice	**B.** The park service should use timed-entry passes for weekend trail visits. correct
C. Weekend trail hikers are the only ones affected, so no other concern matters. choice	**D.** A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The park service should use timed-entry passes for weekend trail visits.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-078 | Level 3 | Answer C

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the sports league should add mandatory sideline concussion checks." Which claim is Jordan asking people to accept?

A. The concussion checklist is printed on yellow paper. choice	**B.** Youth soccer players are the only ones affected, so no other concern matters. choice
C. The sports league should add mandatory sideline concussion checks. correct	**D.** The sports league has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The sports league should add mandatory sideline concussion checks.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-079 | Level 3 | Answer D

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the nonprofit should send donation receipts within one day." Which claim is Riley asking people to accept?

A. First-time donors are the only ones affected, so no other concern matters. choice	**B.** The nonprofit has proven the idea will work everywhere without needing more evidence. choice
C. The receipt email subject line changed. choice	**D.** The nonprofit should send donation receipts within one day. correct

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The nonprofit should send donation receipts within one day.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, nonprofit, d3

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-080 | Level 3 | Answer B

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the warehouse should offer monthly lifting-safety and ergonomic training." Which claim is Maya asking people to accept?

A. The warehouse has proven the idea will work everywhere without needing more evidence. choice	**B.** The warehouse should offer monthly lifting-safety and ergonomic training. correct
C. The training room has a ceiling-mounted projector. choice	**D.** A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The warehouse should offer monthly lifting-safety and ergonomic training.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-081 | Level 3 | Answer D

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the city sanitation office should place compost bins in apartment lobbies." Which claim is Sam asking people to accept?

A. Apartment residents are the only ones affected, so no other concern matters. choice	**B.** A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. choice
C. The lobby compost bins have foot pedals. choice	**D.** The city sanitation office should place compost bins in apartment lobbies. correct

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The city sanitation office should place compost bins in apartment lobbies.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, environment, d3

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-082 | Level 3 | Answer B

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the app maker should make new user profiles private by default." Which claim is Avery asking people to accept?

A. The app maker has proven the idea will work everywhere without needing more evidence. choice	**B.** The app maker should make new user profiles private by default. correct
C. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. choice	**D.** The privacy screen uses a shield icon. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The app maker should make new user profiles private by default.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-083 | Level 3 | Answer B

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the clinic should reserve same-day appointment slots." Which claim is Taylor asking people to accept?

A. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. choice	**B.** The clinic should reserve same-day appointment slots. correct
C. Primary-care patients are the only ones affected, so no other concern matters. choice	**D.** The appointment cards are white. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The clinic should reserve same-day appointment slots.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-084 | Level 3 | Answer A

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the airline should board passengers by seat zone." Which claim is Morgan asking people to accept?

A. The airline should board passengers by seat zone. correct	**B.** The gate signs are backlit. choice
C. Domestic flight passengers are the only ones affected, so no other concern matters. choice	**D.** A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The airline should board passengers by seat zone.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-085 | Level 3 | Answer C

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the landlord should launch an online apartment repair portal." Which claim is Casey asking people to accept?

A. The landlord has proven the idea will work everywhere without needing more evidence. choice	**B.** Apartment tenants are the only ones affected, so no other concern matters. choice
C. The landlord should launch an online apartment repair portal. correct	**D.** The repair portal uses a house logo. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The landlord should launch an online apartment repair portal.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-086 | Level 3 | Answer D

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the cafeteria should move fruit bowls to the front of the cafeteria line." Which claim is Jordan asking people to accept?

A. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. choice	**B.** Middle-school students are the only ones affected, so no other concern matters. choice
C. The fruit bowls are ceramic. choice	**D.** The cafeteria should move fruit bowls to the front of the cafeteria line. correct

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The cafeteria should move fruit bowls to the front of the cafeteria line.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, food, d3

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-087 | Level 3 | Answer A

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the call center should give support agents weekly script coaching." Which claim is Riley asking people to accept?

A. The call center should give support agents weekly script coaching. correct	**B.** A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. choice
C. The call center has proven the idea will work everywhere without needing more evidence. choice	**D.** Support agents are the only ones affected, so no other concern matters. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The call center should give support agents weekly script coaching.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-088 | Level 3 | Answer B

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the water utility should send automatic household water-leak alerts." Which claim is Maya asking people to accept?

A. Local homeowners are the only ones affected, so no other concern matters. choice	**B.** The water utility should send automatic household water-leak alerts. correct
C. The water utility has proven the idea will work everywhere without needing more evidence. choice	**D.** The water-leak alert screen includes a blue droplet icon. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The water utility should send automatic household water-leak alerts.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-089 | Level 3 | Answer A

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the police department should send body-camera activation reminders before patrol shifts." Which claim is Sam asking people to accept?

A. The police department should send body-camera activation reminders before patrol shifts. correct	**B.** Patrol officers are the only ones affected, so no other concern matters. choice
C. The police department has proven the idea will work everywhere without needing more evidence. choice	**D.** The reminder tone is two beeps. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The police department should send body-camera activation reminders before patrol shifts.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-090 | Level 3 | Answer C

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the election office should offer online mail-ballot tracking." Which claim is Avery asking people to accept?

A. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. choice	**B.** The election office has proven the idea will work everywhere without needing more evidence. choice
C. The election office should offer online mail-ballot tracking. correct	**D.** Mail voters are the only ones affected, so no other concern matters. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The election office should offer online mail-ballot tracking.. The other options are either support, background, or an overclaim.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-091 | Level 3 | Answer A

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the tutoring app should send spaced-review prompts for language vocabulary." Which claim is Taylor asking people to accept?

A. The tutoring app should send spaced-review prompts for language vocabulary. correct	**B.** A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. choice
C. The review prompts use a bell icon. choice	**D.** Language learners are the only ones affected, so no other concern matters. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The tutoring app should send spaced-review prompts for language vocabulary.. The other options are either support, background, or an overclaim.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-092 | Level 3 | Answer C

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the gym should offer a beginner gym orientation." Which claim is Morgan asking people to accept?

A. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. choice	**B.** New gym members are the only ones affected, so no other concern matters. choice
C. The gym should offer a beginner gym orientation. correct	**D.** The orientation mats are black. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The gym should offer a beginner gym

orientation.. The other options are either support, background, or an overclaim.

clarify_claim-095 | Level 3 | Answer D

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the farmers market should require clearer price signs at vendor stalls." Which claim is Riley asking people to accept?

A. The stall price signs are laminated. choice	**B.** The farmers market has proven the idea will work everywhere without needing more evidence. choice
C. Weekend farmers market shoppers are the only ones affected, so no other concern matters. choice	**D.** The farmers market should require clearer price signs at vendor stalls. correct

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The farmers market should require clearer price signs at vendor stalls.. The other options are either support, background, or an overclaim.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

---

clarify_claim-096 | Level 3 | Answer C

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the hotel should send quiet-hours text reminders to hotel guests." Which claim is Maya asking people to accept?

A. The hotel has proven the idea will work everywhere without needing more evidence. choice	**B.** Overnight hotel guests are the only ones affected, so no other concern matters. choice
C. The hotel should send quiet-hours text reminders to hotel guests. correct	**D.** A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The hotel should send quiet-hours text reminders to hotel guests.. The other options are either support, background, or an overclaim.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

Level 4

Level 4 asks learners to hold more context in mind while applying the same method.

clarify_claim-097 | Level 4 | Answer C

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the city council should extend evening bus service until midnight." Which claim is Avery asking people to accept?

A. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. choice	**B.** The new buses were repainted blue. choice
C. The city council should extend evening bus service until midnight. correct	**D.** Late-shift workers are the only ones affected, so no other concern matters. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The city council should extend evening bus service until midnight.. The other options are either support, background, or an overclaim.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-100 | Level 4 | Answer A

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the company should test a Monday-through-Thursday workweek." Which claim is Casey asking people to accept?

A. The company should test a Monday-through-Thursday workweek. correct	**B.** Software engineers are the only ones affected, so no other concern matters. choice
C. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. choice	**D.** The company has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The company should test a Monday-through-Thursday workweek.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, workplace, d4

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-101 | Level 4 | Answer C

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the grocery chain should add larger unit-price labels on shelf tags." Which claim is Jordan asking people to accept?

A. The grocery chain has proven the idea will work everywhere without needing more evidence. choice	**B.** Weekly grocery shoppers are the only ones affected, so no other concern matters. choice
C. The grocery chain should add larger unit-price labels on shelf tags. correct	**D.** A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The grocery chain should add larger unit-price labels on shelf tags.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-102 | Level 4 | Answer A

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the library should waive late fines for children's books." Which claim is Riley asking people to accept?

A. The library should waive late fines for children's books. correct	**B.** The children's-book checkout desk moved six feet. choice
C. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. choice	**D.** Families checking out children's books are the only ones affected, so no other concern matters. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The library should waive late fines for children's books.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-103 | Level 4 | Answer C

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the platform should require two-factor login for site administrators." Which claim is Maya asking people to accept?

A. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. choice	**B.** Site administrators are the only ones affected, so no other concern matters. choice
C. The platform should require two-factor login for site administrators. correct	**D.** The login button changed from green to blue. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The platform should require two-factor login for site administrators.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-104 | Level 4 | Answer A

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the neighborhood association should add brighter LED streetlights on Maple Street." Which claim is Sam asking people to accept?

A. The neighborhood association should add brighter LED streetlights on Maple Street. correct	**B.** Residents on Maple Street are the only ones affected, so no other concern matters. choice
C. The neighborhood association has proven the idea will work everywhere without needing more evidence. choice	**D.** A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The neighborhood association should add brighter LED streetlights on Maple Street.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-105 | Level 4 | Answer B

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the university should expand peer tutoring in statistics." Which claim is Avery asking people to accept?

A. The tutoring room has new chairs. choice	**B.** The university should expand peer tutoring in statistics. correct
C. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. choice	**D.** The university has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The university should expand peer tutoring in statistics.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-106 | Level 4 | Answer A

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the restaurant group should show calorie labels on printed lunch menus." Which claim is Taylor asking people to accept?

A. The restaurant group should show calorie labels on printed lunch menus. correct	**B.** A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. choice
C. The restaurant group has proven the idea will work everywhere without needing more evidence. choice	**D.** Lunch customers are the only ones affected, so no other concern matters. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The restaurant group should show calorie labels on printed lunch menus.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-107 | Level 4 | Answer C

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the bank should send overdraft warning texts before fees post." Which claim is Morgan asking people to accept?

A. The bank has proven the idea will work everywhere without needing more evidence. choice	**B.** The warning texts arrive from a short code. choice
C. The bank should send overdraft warning texts before fees post. correct	**D.** Checking-account customers are the only ones affected, so no other concern matters. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The bank should send overdraft warning texts before fees post.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-108 | Level 4 | Answer D

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the park service should use timed-entry passes for weekend trail visits." Which claim is Casey asking people to accept?

A. The park service has proven the idea will work everywhere without needing more evidence. choice	**B.** Weekend trail hikers are the only ones affected, so no other concern matters. choice
C. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. choice	**D.** The park service should use timed-entry passes for weekend trail visits. correct

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The park service should use timed-entry passes for weekend trail visits.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-109 | Level 4 | Answer A

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the museum should offer free admission on Fridays." Which claim is Jordan asking people to accept?

A. The museum should offer free admission on Fridays. correct	**B.** A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. choice
C. The museum has proven the idea will work everywhere without needing more evidence. choice	**D.** Local families are the only ones affected, so no other concern matters. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The museum should offer free admission on Fridays.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, culture, d4

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-110 | Level 4 | Answer B

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the sports league should add mandatory sideline concussion checks." Which claim is Riley asking people to accept?

A. The sports league has proven the idea will work everywhere without needing more evidence. choice	**B.** The sports league should add mandatory sideline concussion checks. correct
C. The concussion checklist is printed on yellow paper. choice	**D.** A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The sports league should add mandatory sideline concussion checks.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, sports, d4

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-111 | Level 4 | Answer C

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the nonprofit should send donation receipts within one day." Which claim is Maya asking people to accept?

A. First-time donors are the only ones affected, so no other concern matters. choice	**B.** The receipt email subject line changed. choice
C. The nonprofit should send donation receipts within one day. correct	**D.** A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The nonprofit should send donation receipts within one day.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, nonprofit, d4

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-112 | Level 4 | Answer D

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the warehouse should offer monthly lifting-safety and ergonomic training." Which claim is Sam asking people to accept?

A. Warehouse staff are the only ones affected, so no other concern matters. choice	**B.** A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. choice
C. The training room has a ceiling-mounted projector. choice	**D.** The warehouse should offer monthly lifting-safety and ergonomic training. correct

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The warehouse should offer monthly lifting-safety and ergonomic training.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-113 | Level 4 | Answer A

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the city sanitation office should place compost bins in apartment lobbies." Which claim is Avery asking people to accept?

A. The city sanitation office should place compost bins in apartment lobbies. correct	**B.** The lobby compost bins have foot pedals. choice
C. The city sanitation office has proven the idea will work everywhere without needing more evidence. choice	**D.** A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The city sanitation office should place compost bins in apartment lobbies.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, environment, d4

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-114 | Level 4 | Answer B

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the app maker should make new user profiles private by default." Which claim is Taylor asking people to accept?

A. New app users are the only ones affected, so no other concern matters. choice	**B.** The app maker should make new user profiles private by default. correct
C. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. choice	**D.** The app maker has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The app maker should make new user profiles private by default.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-115 | Level 4 | Answer C

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the clinic should reserve same-day appointment slots." Which claim is Morgan asking people to accept?

A. The appointment cards are white. choice	**B.** A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. choice
C. The clinic should reserve same-day appointment slots. correct	**D.** The clinic has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The clinic should reserve same-day appointment slots.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-117 | Level 4 | Answer D

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the landlord should launch an online apartment repair portal." Which claim is Jordan asking people to accept?

A. The repair portal uses a house logo. choice	**B.** The landlord has proven the idea will work everywhere without needing more evidence. choice
C. Apartment tenants are the only ones affected, so no other concern matters. choice	**D.** The landlord should launch an online apartment repair portal. correct

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The landlord should launch an online apartment repair portal.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-118 | Level 4 | Answer B

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the cafeteria should move fruit bowls to the front of the cafeteria line." Which claim is Riley asking people to accept?

A. The fruit bowls are ceramic. choice	**B.** The cafeteria should move fruit bowls to the front of the cafeteria line. correct
C. The cafeteria has proven the idea will work everywhere without needing more evidence. choice	**D.** Middle-school students are the only ones affected, so no other concern matters. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The cafeteria should move fruit bowls to the front of the cafeteria line.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-119 | Level 4 | Answer D

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the call center should give support agents weekly script coaching." Which claim is Maya asking people to accept?

A. Support agents are the only ones affected, so no other concern matters. choice	**B.** The call center has proven the idea will work everywhere without needing more evidence. choice
C. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. choice	**D.** The call center should give support agents weekly script coaching. correct

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The call center should give support agents weekly script coaching.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-120 | Level 4 | Answer B

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the water utility should send automatic household water-leak alerts." Which claim is Sam asking people to accept?

A. The water utility has proven the idea will work everywhere without needing more evidence. choice	**B.** The water utility should send automatic household water-leak alerts. correct
C. Local homeowners are the only ones affected, so no other concern matters. choice	**D.** A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The water utility should send automatic household water-leak alerts.. The other options are either support, background, or an overclaim.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-121 | Level 4 | Answer D

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the police department should send body-camera activation reminders before patrol shifts." Which claim is Avery asking people to accept?

A. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. choice	**B.** The police department has proven the idea will work everywhere without needing more evidence. choice
C. The reminder tone is two beeps. choice	**D.** The police department should send body-camera activation reminders before patrol shifts. correct

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The police department should send body-camera activation reminders before patrol shifts.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, governance, d4

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-122 | Level 4 | Answer B

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the election office should offer online mail-ballot tracking." Which claim is Taylor asking people to accept?

A. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. choice	**B.** The election office should offer online mail-ballot tracking. correct
C. Mail voters are the only ones affected, so no other concern matters. choice	**D.** The ballot-tracking page uses county colors. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The election office should offer online mail-ballot tracking.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-123 | Level 4 | Answer D

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the tutoring app should send spaced-review prompts for language vocabulary." Which claim is Morgan asking people to accept?

A. Language learners are the only ones affected, so no other concern matters. choice	**B.** The review prompts use a bell icon. choice
C. The tutoring app has proven the idea will work everywhere without needing more evidence. choice	**D.** The tutoring app should send spaced-review prompts for language vocabulary. correct

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The tutoring app should send spaced-review prompts for language vocabulary.. The other options are either support, background, or an overclaim.

clarify_claim-124 | Level 4 | Answer B

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the gym should offer a beginner gym orientation." Which claim is Casey asking people to accept?

A. The gym has proven the idea will work everywhere without needing more evidence. choice	**B.** The gym should offer a beginner gym orientation. correct
C. The orientation mats are black. choice	**D.** A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The gym should offer a beginner gym orientation.. The other options are either support, background, or an overclaim.

clarify_claim-125 | Level 4 | Answer B

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the insurer should send weekly safe-driving feedback." Which claim is Jordan asking people to accept?

A. The insurer has proven the idea will work everywhere without needing more evidence. choice	**B.** The insurer should send weekly safe-driving feedback. correct
C. The feedback dashboard uses star ratings. choice	**D.** Auto-insurance policyholders are the only ones affected, so no other concern matters. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The insurer should send weekly safe-driving feedback.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

---

clarify_claim-126 | Level 4 | Answer A

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the newsroom should place corrections at the top of articles." Which claim is Riley asking people to accept?

A. The newsroom should place corrections at the top of articles. correct	**B.** A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. choice
C. Newsletter readers are the only ones affected, so no other concern matters. choice	**D.** The newsroom has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The newsroom should place corrections at the top of articles.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, media, d4

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

---

clarify_claim-127 | Level 4 | Answer C

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the farmers market should require clearer price signs at vendor stalls." Which claim is Maya asking people to accept?

A. Weekend farmers market shoppers are the only ones affected, so no other concern matters. choice	**B.** The farmers market has proven the idea will work everywhere without needing more evidence. choice
C. The farmers market should require clearer price signs at vendor stalls. correct	**D.** A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The farmers market should require clearer price signs at vendor stalls.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, local commerce, d4

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-128 | Level 4 | Answer D

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the hotel should send quiet-hours text reminders to hotel guests." Which claim is Sam asking people to accept?

A. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. choice	**B.** Overnight hotel guests are the only ones affected, so no other concern matters. choice
C. The hotel has proven the idea will work everywhere without needing more evidence. choice	**D.** The hotel should send quiet-hours text reminders to hotel guests. correct

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The hotel should send quiet-hours text reminders to hotel guests.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, hospitality, d4

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

Level 5

Level 5 is for fluency: the learner should now name the thinking move and explain the elimination path.

clarify_claim-129 | Level 5 | Answer C

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the city council should extend evening bus service until midnight." Which claim is Taylor asking people to accept?

A. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. choice	**B.** The new buses were repainted blue. choice
C. The city council should extend evening bus service until midnight. correct	**D.** Late-shift workers are the only ones affected, so no other concern matters. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The city council should extend evening bus service until midnight.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

---

clarify_claim-130 | Level 5 | Answer D

Prompt. The school board is weighing a proposal aimed at ninth-grade students: require phone lockers during class. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the school board should require phone lockers during class." Which claim is Morgan asking people to accept?

A. The lockers are installed near the gym. choice	**B.** A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. choice
C. The school board has proven the idea will work everywhere without needing more evidence. choice	**D.** The school board should require phone lockers during class. correct

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The school board should require phone lockers during class.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-131 | Level 5 | Answer A

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the hospital should send medication reminder texts before evening doses." Which claim is Casey asking people to accept?

A. The hospital should send medication reminder texts before evening doses. correct	**B.** The text messages use a green pill icon. choice
C. Patients over 60 are the only ones affected, so no other concern matters. choice	**D.** The hospital has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The hospital should send medication reminder texts before evening doses.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-132 | Level 5 | Answer B

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the company should test a Monday-through-Thursday workweek." Which claim is Jordan asking people to accept?

A. The test calendar starts on a Monday. choice	**B.** The company should test a Monday-through-Thursday workweek. correct
C. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. choice	**D.** Software engineers are the only ones affected, so no other concern matters. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The company should test a Monday-through-Thursday workweek.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, workplace, d5

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-133 | Level 5 | Answer C

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the grocery chain should add larger unit-price labels on shelf tags." Which claim is Riley asking people to accept?

A. The shelf labels use bold black numbers. choice	**B.** The grocery chain has proven the idea will work everywhere without needing more evidence. choice
C. The grocery chain should add larger unit-price labels on shelf tags. correct	**D.** A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The grocery chain should add larger unit-price labels on shelf tags.. The other options are either support, background, or an overclaim.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-134 | Level 5 | Answer D

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the library should waive late fines for children's books." Which claim is Maya asking people to accept?

A. The children's-book checkout desk moved six feet. choice	**B.** Families checking out children's books are the only ones affected, so no other concern matters. choice
C. The library has proven the idea will work everywhere without needing more evidence. choice	**D.** The library should waive late fines for children's books. correct

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The library should waive late fines for children's books.. The other options are either support, background, or an overclaim.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-135 | Level 5 | Answer A

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the platform should require two-factor login for site administrators." Which claim is Sam asking people to accept?

A. The platform should require two-factor login for site administrators. correct	**B.** The login button changed from green to blue. choice
C. The platform has proven the idea will work everywhere without needing more evidence. choice	**D.** Site administrators are the only ones affected, so no other concern matters. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The platform should require two-factor login for site administrators.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, technology, d5

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-136 | Level 5 | Answer B

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the neighborhood association should add brighter LED streetlights on Maple Street." Which claim is Avery asking people to accept?

A. The new light poles are made of aluminum. choice	**B.** The neighborhood association should add brighter LED streetlights on Maple Street. correct
C. Residents on Maple Street are the only ones affected, so no other concern matters. choice	**D.** A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The neighborhood association should add brighter LED streetlights on Maple Street.. The other options are either support, background, or an overclaim.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-137 | Level 5 | Answer A

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the university should expand peer tutoring in statistics." Which claim is Taylor asking people to accept?

A. The university should expand peer tutoring in statistics. correct	**B.** A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. choice
C. The tutoring room has new chairs. choice	**D.** The university has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The university should expand peer tutoring in statistics.. The other options are either support, background, or an overclaim.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-138 | Level 5 | Answer B

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the restaurant group should show calorie labels on printed lunch menus." Which claim is Morgan asking people to accept?

A. Lunch customers are the only ones affected, so no other concern matters. choice	**B.** The restaurant group should show calorie labels on printed lunch menus. correct
C. The lunch menus are printed on thicker paper. choice	**D.** A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The restaurant group should show calorie labels on printed lunch menus.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, nutrition, d5

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-139 | Level 5 | Answer B

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the bank should send overdraft warning texts before fees post." Which claim is Casey asking people to accept?

A. Checking-account customers are the only ones affected, so no other concern matters. choice	**B.** The bank should send overdraft warning texts before fees post. correct
C. The warning texts arrive from a short code. choice	**D.** A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The bank should send overdraft warning texts before fees post.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

clarify_claim-140 | Level 5 | Answer A

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the park service should use timed-entry passes for weekend trail visits." Which claim is Jordan asking people to accept?

A. The park service should use timed-entry passes for weekend trail visits. correct	**B.** The digital passes include a small trail map. choice
C. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. choice	**D.** Weekend trail hikers are the only ones affected, so no other concern matters. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The park service should use timed-entry passes for weekend trail visits.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-141 | Level 5 | Answer D

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the museum should offer free admission on Fridays." Which claim is Riley asking people to accept?

A. The Friday tickets are scanned at the east door. choice	**B.** The museum has proven the idea will work everywhere without needing more evidence. choice
C. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. choice	**D.** The museum should offer free admission on Fridays. correct

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The museum should offer free admission on Fridays.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-142 | Level 5 | Answer C

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the sports league should add mandatory sideline concussion checks." Which claim is Maya asking people to accept?

A. The concussion checklist is printed on yellow paper. choice	**B.** A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. choice
C. The sports league should add mandatory sideline concussion checks. correct	**D.** Youth soccer players are the only ones affected, so no other concern matters. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The sports league should add mandatory sideline concussion checks.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-143 | Level 5 | Answer B

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the nonprofit should send donation receipts within one day." Which claim is Sam asking people to accept?

A. The nonprofit has proven the idea will work everywhere without needing more evidence. choice	**B.** The nonprofit should send donation receipts within one day. correct
C. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. choice	**D.** The receipt email subject line changed. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The nonprofit should send donation receipts within one day.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-144 | Level 5 | Answer A

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the warehouse should offer monthly lifting-safety and ergonomic training." Which claim is Avery asking people to accept?

A. The warehouse should offer monthly lifting-safety and ergonomic training. correct	**B.** A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. choice
C. The warehouse has proven the idea will work everywhere without needing more evidence. choice	**D.** The training room has a ceiling-mounted projector. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The warehouse should offer monthly lifting-safety and ergonomic training.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, workplace safety, d5

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-145 | Level 5 | Answer D

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the city sanitation office should place compost bins in apartment lobbies." Which claim is Taylor asking people to accept?

A. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. choice	**B.** Apartment residents are the only ones affected, so no other concern matters. choice
C. The lobby compost bins have foot pedals. choice	**D.** The city sanitation office should place compost bins in apartment lobbies. correct

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The city sanitation office should place compost bins in apartment lobbies.. The other options are either support, background, or an overclaim.

Tags: clarify_claim, claim, environment, d5

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

clarify_claim-146 | Level 5 | Answer C

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the app maker should make new user profiles private by default." Which claim is Morgan asking people to accept?

A. The privacy screen uses a shield icon. choice	**B.** The app maker has proven the idea will work everywhere without needing more evidence. choice
C. The app maker should make new user profiles private by default. correct	**D.** A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. choice

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The app maker should make new user profiles private by default.. The other options are either support, background, or an overclaim.

clarify_claim-147 | Level 5 | Answer D

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the clinic should reserve same-day appointment slots." Which claim is Casey asking people to accept?

A. The clinic has proven the idea will work everywhere without needing more evidence. choice	**B.** The appointment cards are white. choice
C. Primary-care patients are the only ones affected, so no other concern matters. choice	**D.** The clinic should reserve same-day appointment slots. correct

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The clinic should reserve same-day appointment slots.. The other options are either support, background, or an overclaim.

clarify_claim-148 | Level 5 | Answer C

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the airline should board passengers by seat zone." Which claim is Jordan asking people to accept?

A. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. choice	**B.** Domestic flight passengers are the only ones affected, so no other concern matters. choice
C. The airline should board passengers by seat zone. correct	**D.** The airline has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The airline should board passengers by seat zone.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-149 | Level 5 | Answer C

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the landlord should launch an online apartment repair portal." Which claim is Riley asking people to accept?

A. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. choice	**B.** The landlord has proven the idea will work everywhere without needing more evidence. choice
C. The landlord should launch an online apartment repair portal. correct	**D.** Apartment tenants are the only ones affected, so no other concern matters. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The landlord should launch an online apartment repair portal.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-150 | Level 5 | Answer D

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the cafeteria should move fruit bowls to the front of the cafeteria line." Which claim is Maya asking people to accept?

A. The fruit bowls are ceramic. choice	**B.** A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. choice
C. The cafeteria has proven the idea will work everywhere without needing more evidence. choice	**D.** The cafeteria should move fruit bowls to the front of the cafeteria line. correct

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The cafeteria should move fruit bowls to the front of the cafeteria line.. The other options are either support, background, or an overclaim.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

clarify_claim-153 | Level 5 | Answer C

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Taylor, who supports the proposal, says, "Because of that test, the police department should send body-camera activation reminders before patrol shifts." Which claim is Taylor asking people to accept?

A. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. choice	**B.** Patrol officers are the only ones affected, so no other concern matters. choice
C. The police department should send body-camera activation reminders before patrol shifts. correct	**D.** The reminder tone is two beeps. choice

Core explanation. Taylor's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The police department should send body-camera activation reminders before patrol shifts.. The other options are either support, background, or an overclaim.

C feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

D feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

clarify_claim-154 | Level 5 | Answer D

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Morgan, who supports the proposal, says, "Because of that test, the election office should offer online mail-ballot tracking." Which claim is Morgan asking people to accept?

A. Mail voters are the only ones affected, so no other concern matters. choice	**B.** The ballot-tracking page uses county colors. choice
C. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. choice	**D.** The election office should offer online mail-ballot tracking. correct

Core explanation. Morgan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The election office should offer online mail-ballot tracking.. The other options are either support, background, or an overclaim.

clarify_claim-155 | Level 5 | Answer B

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Casey, who supports the proposal, says, "Because of that test, the tutoring app should send spaced-review prompts for language vocabulary." Which claim is Casey asking people to accept?

A. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. choice	**B.** The tutoring app should send spaced-review prompts for language vocabulary. correct
C. Language learners are the only ones affected, so no other concern matters. choice	**D.** The review prompts use a bell icon. choice

Core explanation. Casey's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The tutoring app should send spaced-review prompts for language vocabulary.. The other options are either support, background, or an overclaim.

clarify_claim-156 | Level 5 | Answer D

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Jordan, who supports the proposal, says, "Because of that test, the gym should offer a beginner gym orientation." Which claim is Jordan asking people to accept?

A. The orientation mats are black. choice	**B.** New gym members are the only ones affected, so no other concern matters. choice
C. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. choice	**D.** The gym should offer a beginner gym orientation. correct

Core explanation. Jordan's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is D because it states the point the speaker wants accepted: The gym should offer a beginner gym orientation.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is a side detail from the setup. A main claim is the point the speaker wants accepted, not a visible or background detail.

B feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

C feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

D feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Riley, who supports the proposal, says, "Because of that test, the insurer should send weekly safe-driving feedback." Which claim is Riley asking people to accept?

A. The insurer should send weekly safe-driving feedback. correct	**B.** A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. choice
C. Auto-insurance policyholders are the only ones affected, so no other concern matters. choice	**D.** The insurer has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Riley's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The insurer should send weekly safe-driving feedback.. The other options are either support, background, or an overclaim.

A feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

B feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-158 | Level 5 | Answer B

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Maya, who supports the proposal, says, "Because of that test, the newsroom should place corrections at the top of articles." Which claim is Maya asking people to accept?

A. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. choice	**B.** The newsroom should place corrections at the top of articles. correct
C. Newsletter readers are the only ones affected, so no other concern matters. choice	**D.** The newsroom has proven the idea will work everywhere without needing more evidence. choice

Core explanation. Maya's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is B because it states the point the speaker wants accepted: The newsroom should place corrections at the top of articles.. The other options are either support, background, or an overclaim.

A feedback (Distractor): Not quite. This is evidence from the test, so it helps support the speaker's point. It is not the claim the speaker is asking people to accept.

B feedback (Correct): Correct. This is the recommendation the speaker wants people to accept. The test result is only a reason for that recommendation, and the side details do not state what should be done.

C feedback (Distractor): Not quite. This adds an extreme claim about who matters. The speaker's actual claim is the recommendation about the proposal.

D feedback (Distractor): Not quite. This overstates the argument. The speaker recommends the plan, but does not claim it has been proven to work everywhere.

clarify_claim-159 | Level 5 | Answer C

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Sam, who supports the proposal, says, "Because of that test, the farmers market should require clearer price signs at vendor stalls." Which claim is Sam asking people to accept?

A. Weekend farmers market shoppers are the only ones affected, so no other concern matters. choice	**B.** A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. choice
C. The farmers market should require clearer price signs at vendor stalls. correct	**D.** The stall price signs are laminated. choice

Core explanation. Sam's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is C because it states the point the speaker wants accepted: The farmers market should require clearer price signs at vendor stalls.. The other options are either support, background, or an overclaim.

clarify_claim-160 | Level 5 | Answer A

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Avery, who supports the proposal, says, "Because of that test, the hotel should send quiet-hours text reminders to hotel guests." Which claim is Avery asking people to accept?

A. The hotel should send quiet-hours text reminders to hotel guests. correct	**B.** A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. choice
C. Overnight hotel guests are the only ones affected, so no other concern matters. choice	**D.** The quiet-hours text reminder uses a small moon icon. choice

Core explanation. Avery's main claim is the recommendation. The test result is a reason offered for that claim, not the claim itself.

Process commentary. To uncover the answer, separate the speaker's recommendation from the evidence used to support it. The correct choice is A because it states the point the speaker wants accepted: The hotel should send quiet-hours text reminders to hotel guests.. The other options are either support, background, or an overclaim.
