Skill 04

Spot Hidden Assumptions

What's Assumed?

160 Items	**1-5** Levels	**Find the unstated idea the argument needs.** Objective

Essential question. What unstated idea must be true for the reason to support the conclusion?

This PDF is designed for classroom use. It gives teachers a rigorous introduction to the skill, a repeatable solving routine, likely student confusions, a worked example, and the full XiXteen item set with choice-level feedback.

Generated from the current XiXteen corpus on 2026-10-29.

Skill 04

Spot Hidden Assumptions

What's Assumed?

Find the unstated idea the argument needs. Objective	**160** Items	**Levels 1-5** Difficulty bands

Essential question	What unstated idea must be true for the reason to support the conclusion?
Why it matters	Many arguments fail not because a stated sentence is false, but because an unstated bridge is missing. Assumptions are the silent hinges that let a reason swing toward a conclusion.
Conceptual core	An assumption is not merely something unstated; it is an unstated bridge the argument needs. Students should learn to avoid both extremes: choosing an assumption so broad it would make almost any argument work, or choosing a detail that is true but not necessary for this argument. The best assumption usually connects the specific evidence to the specific conclusion.
Student method	Put the reason and conclusion side by side. Then ask what must also be true for the reason to count as support. The best assumption is usually narrower than a huge universal claim.
Analogy	A hidden assumption is a bridge over a gap. If the bridge is weak, even true facts may not get you to the conclusion.
Assessment focus	A good answer supplies a necessary bridge and avoids choices that are mere background, evidence, or overconfident guarantees.

Teaching Sequence

1. Put the stated reason and conclusion next to each other.

2. Ask what must be true for that reason to count in favor of that conclusion.

3. Prefer a narrow bridge over a sweeping guarantee.

4. Use the denial test: if this assumption were false, would the argument weaken?

Common Confusions To Watch For

1. Students may choose a statement that would be nice to know but is not required.

2. Students may choose a much stronger claim than the argument needs.

3. Students may confuse evidence with the assumption that lets the evidence matter.

Teacher Prompts

1. What is the missing bridge between these two sentences?

2. Would the conclusion still be supported if this choice were false?

3. Is this answer just helpful, or is it needed?

Worked Example

Scenario	A store's weekend trial of a new checkout line reduced waiting times, so the store should use that checkout setup every day.
Teacher think-aloud	The argument assumes weekend customers and weekday customers are similar enough, or that the checkout setup would still reduce waits under normal daily conditions.
Student takeaway	Assumptions connect the evidence to the conclusion without adding more than the argument needs.

Guided Classroom Exercise

Invented case. Use only the facts below; write on paper. Try the steps and check your work before reading the model answer. Different wording can be equally adequate.

Situation. A store tests a checkout arrangement on Saturday and Sunday. Average waits fall from six minutes to four. The manager concludes, 'This arrangement will also reduce waits on weekdays.' No weekday test has been done.

What To Do

1. Copy the observed reason and the prediction separately.

2. Complete: 'The manager assumes that weekday conditions are similar enough in ___ for the weekend result to carry over.' Name a relevant feature such as customer volume or staffing.

3. Describe one possible weekday difference that would weaken that bridge. You are proposing a possibility, not claiming it happened.

Check before reading the answer. Does your assumption connect this weekend result to weekdays, rather than merely say that faster checkout is desirable?

Model Answer

Reason: weekend waits fell from six to four minutes. Prediction: weekday waits will fall too. The manager assumes weekday customer volume and staffing are similar enough for the arrangement to help. If weekdays have much less staff available, the arrangement might not work as it did in the trial.

Why it is adequate. It identifies the needed transfer from one setting to another and tests that assumption with a relevant possible difference.

Item Bank

Items are grouped by level. For each item, read the prompt, predict the answer, choose, and then use the feedback and process commentary to examine the reasoning path.

Level 1

Level 1 establishes the clean version of the skill: the cue is direct, the distractors are visible, and the main task is to learn the contrast.

hidden_assumptions-001 | Level 1 | Answer A

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Riley argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Riley's argument need?

A. The test group is similar enough to the wider group that the result can guide the bigger decision outside the test. correct	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The new buses were repainted blue, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**D.** The city council can explain the plan clearly to people outside the test group before asking for approval. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, transportation, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-002 | Level 1 | Answer B

Prompt. The school board is weighing a proposal aimed at ninth-grade students: require phone lockers during class. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Maya says, "The plan caused that result." Which hidden assumption does Maya's argument need?

A. The lockers are installed near the gym, which describes the setting but does not show what caused the result. choice	**B.** No other major change during the test period better explains the result than the plan does. correct
C. The school board announced the plan before the measured result changed, so the timing should be listed in the report. choice	**D.** The result is important enough to discuss before making a final decision. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, education, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-003 | Level 1 | Answer C

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Sam says, "That means the plan helped patients over 60." Which hidden assumption does Sam's argument need?

A. Patients over 60 noticed the plan during the test period. choice	**B.** The text messages use a green pill icon, which may be true but is not a sign that the target group was helped or that the result mattered. choice
C. The measured result is a reasonable sign that the plan helped the target group, not just an interesting number. correct	**D.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, health, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-004 | Level 1 | Answer D

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. Avery says, "If the plan can reduce staff resignations, then it should be adopted." Which hidden assumption does Avery's argument need?

A. The company should focus on the side detail before asking whether the result matters. choice	**B.** The test calendar starts on a Monday, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The plan is new enough to get public attention. choice	**D.** Reducing staff resignations would matter enough to count in this decision, not just sound nice. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, workplace, d1

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-005 | Level 1 | Answer A

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Taylor says, "The result will continue if the plan becomes permanent." Which hidden assumption does Taylor's argument need?

A. The short-term result will not disappear once the test period ends or the rollout begins. correct	**B.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice
C. The shelf labels use bold black numbers, which may stay true even if the measured result does not last. choice	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, retail, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-006 | Level 1 | Answer B

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Morgan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Morgan's argument need?

A. The library can explain the plan clearly to people outside the test group before asking for approval. choice	**B.** The people in the test are enough like the wider group for the result to matter outside the test. correct
C. The children's-book checkout desk moved six feet, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**D.** The test result is interesting enough to discuss before the wider rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, public services, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-007 | Level 1 | Answer C

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Casey says, "The plan caused that result." Which hidden assumption does Casey's argument need?

A. The login button changed from green to blue, which describes the setting but does not show what caused the result. choice	**B.** The platform announced the plan before the measured result changed, so the timing should be listed in the report. choice
C. Nothing else important changed during the same test period in a way that better explains the result. correct	**D.** The result is important enough to discuss before making a final decision. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, technology, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-008 | Level 1 | Answer D

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Jordan says, "That means the plan helped residents on Maple Street." Which hidden assumption does Jordan's argument need?

A. Residents on Maple Street noticed the plan during the test period. choice	**B.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice
C. The new light poles are made of aluminum, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**D.** The result being measured is the right kind of evidence for whether the plan helped the group. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, public safety, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-009 | Level 1 | Answer A

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. Riley says, "If the plan can increase course pass rates, then it should be adopted." Which hidden assumption does Riley's argument need?

A. Increasing course pass rates is important enough to help justify the plan, not just decorate it. correct	**B.** The tutoring room has new chairs, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The plan is new enough to get public attention. choice	**D.** The university should focus on the side detail before asking whether the result matters. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, education, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-010 | Level 1 | Answer B

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Maya says, "The result will continue if the plan becomes permanent." Which hidden assumption does Maya's argument need?

A. The lunch menus are printed on thicker paper, which may stay true even if the measured result does not last. choice	**B.** The result from the short test will last long enough to matter after the rollout begins. correct
C. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, nutrition, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-011 | Level 1 | Answer D

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Sam argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Sam's argument need?

A. The test result is interesting enough to discuss before the wider rollout. choice	**B.** The bank can explain the plan clearly to people outside the test group before asking for approval. choice
C. The warning texts arrive from a short code, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**D.** The small test is close enough to the real rollout to count as useful evidence for the wider plan. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, finance, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-012 | Level 1 | Answer C

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Avery says, "The plan caused that result." Which hidden assumption does Avery's argument need?

A. The park service announced the plan before the measured result changed, so the timing should be listed in the report. choice	**B.** The result is important enough to discuss before making a final decision. choice
C. The result is not better explained by another change that happened during the same test period. correct	**D.** The digital passes include a small trail map, which describes the setting but does not show what caused the result. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, environment, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-013 | Level 1 | Answer B

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Taylor says, "That means the plan helped local families." Which hidden assumption does Taylor's argument need?

A. The Friday tickets are scanned at the east door, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**B.** Improvement in the tracked result would count as a real sign of help for the target group. correct
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** Local families noticed the plan during the test period. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, culture, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-014 | Level 1 | Answer A

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. Morgan says, "If the plan can reduce repeat head injuries, then it should be adopted." Which hidden assumption does Morgan's argument need?

A. A real change in repeat head injuries would be valuable enough to matter for this decision, not just be noticed. correct	**B.** The concussion checklist is printed on yellow paper, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The sports league should focus on the side detail before asking whether the result matters. choice	**D.** The plan is new enough to get public attention. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, sports, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-015 | Level 1 | Answer D

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Casey says, "The result will continue if the plan becomes permanent." Which hidden assumption does Casey's argument need?

A. The short test is easy to summarize in one meeting. choice	**B.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice
C. The receipt email subject line changed, which may stay true even if the measured result does not last. choice	**D.** The test result is not just a temporary bump that fades when the test is over. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, nonprofit, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-016 | Level 1 | Answer C

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Jordan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Jordan's argument need?

A. The training room has a ceiling-mounted projector, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The wider group is enough like the test group that the result is a fair clue for the decision outside the test. correct	**D.** The warehouse can explain the plan clearly to people outside the test group before asking for approval. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, workplace safety, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-017 | Level 1 | Answer B

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Riley says, "The plan caused that result." Which hidden assumption does Riley's argument need?

A. The city sanitation office announced the plan before the measured result changed, so the timing should be listed in the report. choice	**B.** Other changes during the test were not strong enough to explain the result better than the plan. correct
C. The result is important enough to discuss before making a final decision. choice	**D.** The lobby compost bins have foot pedals, which describes the setting but does not show what caused the result. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, environment, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-018 | Level 1 | Answer A

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Maya says, "That means the plan helped new app users." Which hidden assumption does Maya's argument need?

A. The measurement is close enough to the goal to show whether the group was actually helped. correct	**B.** The privacy screen uses a shield icon, which may be true but is not a sign that the target group was helped or that the result mattered. choice
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** New app users noticed the plan during the test period. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, technology, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-019 | Level 1 | Answer D

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. Sam says, "If the plan can reduce patient no-show rates, then it should be adopted." Which hidden assumption does Sam's argument need?

A. The clinic should focus on the side detail before asking whether the result matters. choice	**B.** The appointment cards are white, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The plan is new enough to get public attention. choice	**D.** The goal of reducing patient no-show rates is important enough to help decide what to do. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, health, d1

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-020 | Level 1 | Answer C

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Avery says, "The result will continue if the plan becomes permanent." Which hidden assumption does Avery's argument need?

A. The gate signs are backlit, which may stay true even if the measured result does not last. choice	**B.** The short test is easy to summarize in one meeting. choice
C. The improvement seen during the test will continue if the plan becomes permanent. correct	**D.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, travel, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-021 | Level 1 | Answer C

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Taylor argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Taylor's argument need?

A. The landlord can explain the plan clearly to people outside the test group before asking for approval. choice	**B.** The repair portal uses a house logo, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice
C. The test setting matches the bigger decision closely enough for the result to matter beyond the trial. correct	**D.** The test result is interesting enough to discuss before the wider rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, housing, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-022 | Level 1 | Answer D

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Morgan says, "The plan caused that result." Which hidden assumption does Morgan's argument need?

A. The result is important enough to discuss before making a final decision. choice	**B.** The cafeteria announced the plan before the measured result changed, so the timing should be listed in the report. choice
C. The fruit bowls are ceramic, which describes the setting but does not show what caused the result. choice	**D.** The plan is the best explanation of the result, not some other change during the same test period. correct

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, food, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-023 | Level 1 | Answer A

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Casey says, "That means the plan helped support agents." Which hidden assumption does Casey's argument need?

A. The tracked result is a fair way to judge whether the plan helped the people involved. correct	**B.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice
C. Support agents noticed the plan during the test period. choice	**D.** The coaching slides use blue headers, which may be true but is not a sign that the target group was helped or that the result mattered. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, customer support, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-024 | Level 1 | Answer B

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. Jordan says, "If the plan can reduce average household water use, then it should be adopted." Which hidden assumption does Jordan's argument need?

A. The water-leak alert screen includes a blue droplet icon, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**B.** Average household water use matters enough that improving it could be a serious reason for the plan. correct
C. The plan is new enough to get public attention. choice	**D.** The water utility should focus on the side detail before asking whether the result matters. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, utilities, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-025 | Level 1 | Answer C

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Riley says, "The result will continue if the plan becomes permanent." Which hidden assumption does Riley's argument need?

A. The reminder tone is two beeps, which may stay true even if the measured result does not last. choice	**B.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice
C. The four-week result is stable enough to be useful for a longer-term decision. correct	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, governance, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-026 | Level 1 | Answer D

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Maya argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Maya's argument need?

A. The test result is interesting enough to discuss before the wider rollout. choice	**B.** The election office can explain the plan clearly to people outside the test group before asking for approval. choice
C. The ballot-tracking page uses county colors, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**D.** The test group is similar enough to the wider group that the result can guide the bigger decision outside the test. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, election administration, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-027 | Level 1 | Answer B

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Sam says, "The plan caused that result." Which hidden assumption does Sam's argument need?

A. The review prompts use a bell icon, which describes the setting but does not show what caused the result. choice	**B.** No other major change during the test period better explains the result than the plan does. correct
C. The tutoring app announced the plan before the measured result changed, so the timing should be listed in the report. choice	**D.** The result is important enough to discuss before making a final decision. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, learning, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-028 | Level 1 | Answer D

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Avery says, "That means the plan helped new gym members." Which hidden assumption does Avery's argument need?

A. New gym members noticed the plan during the test period. choice	**B.** The orientation mats are black, which may be true but is not a sign that the target group was helped or that the result mattered. choice
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** The measured result is a reasonable sign that the plan helped the target group, not just an interesting number. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, fitness, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-029 | Level 1 | Answer A

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. Taylor says, "If the plan can reduce reported minor crashes, then it should be adopted." Which hidden assumption does Taylor's argument need?

A. Reducing reported minor crashes would matter enough to count in this decision, not just sound nice. correct	**B.** The feedback dashboard uses star ratings, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The insurer should focus on the side detail before asking whether the result matters. choice	**D.** The plan is new enough to get public attention. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, insurance, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-030 | Level 1 | Answer B

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Morgan says, "The result will continue if the plan becomes permanent." Which hidden assumption does Morgan's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The short-term result will not disappear once the test period ends or the rollout begins. correct
C. The correction box has a gray border, which may stay true even if the measured result does not last. choice	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, media, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-031 | Level 1 | Answer C

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Casey argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Casey's argument need?

A. The stall price signs are laminated, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The people in the test are enough like the wider group for the result to matter outside the test. correct	**D.** The farmers market can explain the plan clearly to people outside the test group before asking for approval. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, local commerce, d1

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-032 | Level 1 | Answer A

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Jordan says, "The plan caused that result." Which hidden assumption does Jordan's argument need?

A. Nothing else important changed during the same test period in a way that better explains the result. correct	**B.** The result is important enough to discuss before making a final decision. choice
C. The quiet-hours text reminder uses a small moon icon, which describes the setting but does not show what caused the result. choice	**D.** The hotel announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, hospitality, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

Level 2

Level 2 keeps the same skill but adds more realistic wording and more tempting distractors.

hidden_assumptions-033 | Level 2 | Answer B

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Maya says, "The plan caused that result." Which hidden assumption does Maya's argument need?

A. The new buses were repainted blue, which describes the setting but does not show what caused the result. choice	**B.** Nothing else important changed during the same test period in a way that better explains the result. correct
C. The result is important enough to discuss before making a final decision. choice	**D.** The city council announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, transportation, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-034 | Level 2 | Answer A

Prompt. The school board is weighing a proposal aimed at ninth-grade students: require phone lockers during class. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Sam says, "That means the plan helped ninth-grade students." Which hidden assumption does Sam's argument need?

A. The result being measured is the right kind of evidence for whether the plan helped the group. correct	**B.** Ninth-grade students noticed the plan during the test period. choice
C. The lockers are installed near the gym, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**D.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, education, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-035 | Level 2 | Answer D

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. Avery says, "If the plan can reduce missed-dose reports, then it should be adopted." Which hidden assumption does Avery's argument need?

A. The text messages use a green pill icon, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**B.** The hospital should focus on the side detail before asking whether the result matters. choice
C. The plan is new enough to get public attention. choice	**D.** Reducing missed-dose reports is important enough to help justify the plan, not just decorate it. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, health, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-036 | Level 2 | Answer C

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Taylor says, "The result will continue if the plan becomes permanent." Which hidden assumption does Taylor's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The test calendar starts on a Monday, which may stay true even if the measured result does not last. choice
C. The result from the short test will last long enough to matter after the rollout begins. correct	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, workplace, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-037 | Level 2 | Answer B

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Morgan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Morgan's argument need?

A. The grocery chain can explain the plan clearly to people outside the test group before asking for approval. choice	**B.** The people in the test are enough like the wider group for the result to matter outside the test. correct
C. The shelf labels use bold black numbers, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**D.** The test result is interesting enough to discuss before the wider rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, retail, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-038 | Level 2 | Answer A

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Casey says, "The plan caused that result." Which hidden assumption does Casey's argument need?

A. The result is not better explained by another change that happened during the same test period. correct	**B.** The children's-book checkout desk moved six feet, which describes the setting but does not show what caused the result. choice
C. The library announced the plan before the measured result changed, so the timing should be listed in the report. choice	**D.** The result is important enough to discuss before making a final decision. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, public services, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-039 | Level 2 | Answer D

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Jordan says, "That means the plan helped site administrators." Which hidden assumption does Jordan's argument need?

A. Site administrators noticed the plan during the test period. choice	**B.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice
C. The login button changed from green to blue, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**D.** Improvement in the tracked result would count as a real sign of help for the target group. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, technology, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-040 | Level 2 | Answer C

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. Riley says, "If the plan can reduce reported thefts, then it should be adopted." Which hidden assumption does Riley's argument need?

A. The plan is new enough to get public attention. choice	**B.** The neighborhood association should focus on the side detail before asking whether the result matters. choice
C. A real change in reported thefts would be valuable enough to matter for this decision, not just be noticed. correct	**D.** The new light poles are made of aluminum, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, public safety, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-041 | Level 2 | Answer D

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Maya says, "The result will continue if the plan becomes permanent." Which hidden assumption does Maya's argument need?

A. The short test is easy to summarize in one meeting. choice	**B.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice
C. The tutoring room has new chairs, which may stay true even if the measured result does not last. choice	**D.** The test result is not just a temporary bump that fades when the test is over. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, education, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-042 | Level 2 | Answer C

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Sam argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Sam's argument need?

A. The restaurant group can explain the plan clearly to people outside the test group before asking for approval. choice	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The small test is close enough to the real rollout to count as useful evidence for the wider plan. correct	**D.** The lunch menus are printed on thicker paper, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, nutrition, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-043 | Level 2 | Answer C

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Avery says, "The plan caused that result." Which hidden assumption does Avery's argument need?

A. The warning texts arrive from a short code, which describes the setting but does not show what caused the result. choice	**B.** The result is important enough to discuss before making a final decision. choice
C. Other changes during the test were not strong enough to explain the result better than the plan. correct	**D.** The bank announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, finance, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-044 | Level 2 | Answer A

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Taylor says, "That means the plan helped weekend trail hikers." Which hidden assumption does Taylor's argument need?

A. The measurement is close enough to the goal to show whether the group was actually helped. correct	**B.** Weekend trail hikers noticed the plan during the test period. choice
C. The digital passes include a small trail map, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**D.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, environment, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-045 | Level 2 | Answer A

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. Morgan says, "If the plan can increase family visits, then it should be adopted." Which hidden assumption does Morgan's argument need?

A. The goal of increasing family visits is important enough to help decide what to do. correct	**B.** The plan is new enough to get public attention. choice
C. The Friday tickets are scanned at the east door, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**D.** The museum should focus on the side detail before asking whether the result matters. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, culture, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-046 | Level 2 | Answer B

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Casey says, "The result will continue if the plan becomes permanent." Which hidden assumption does Casey's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The improvement seen during the test will continue if the plan becomes permanent. correct
C. The short test is easy to summarize in one meeting. choice	**D.** The concussion checklist is printed on yellow paper, which may stay true even if the measured result does not last. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, sports, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-047 | Level 2 | Answer A

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Jordan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Jordan's argument need?

A. The wider group is enough like the test group that the result is a fair clue for the decision outside the test. correct	**B.** The receipt email subject line changed, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice
C. The nonprofit can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The test result is interesting enough to discuss before the wider rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, nonprofit, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-048 | Level 2 | Answer C

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Riley says, "The plan caused that result." Which hidden assumption does Riley's argument need?

A. The training room has a ceiling-mounted projector, which describes the setting but does not show what caused the result. choice	**B.** The result is important enough to discuss before making a final decision. choice
C. The plan is the best explanation of the result, not some other change during the same test period. correct	**D.** The warehouse announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, workplace safety, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-049 | Level 2 | Answer A

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Maya says, "That means the plan helped apartment residents." Which hidden assumption does Maya's argument need?

A. The tracked result is a fair way to judge whether the plan helped the people involved. correct	**B.** The lobby compost bins have foot pedals, which may be true but is not a sign that the target group was helped or that the result mattered. choice
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** Apartment residents noticed the plan during the test period. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, environment, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-050 | Level 2 | Answer C

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. Sam says, "If the plan can reduce publicly visible profiles, then it should be adopted." Which hidden assumption does Sam's argument need?

A. The privacy screen uses a shield icon, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**B.** The app maker should focus on the side detail before asking whether the result matters. choice
C. Publicly visible profiles matters enough that improving it could be a serious reason for the plan. correct	**D.** The plan is new enough to get public attention. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, technology, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-051 | Level 2 | Answer C

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Avery says, "The result will continue if the plan becomes permanent." Which hidden assumption does Avery's argument need?

A. The appointment cards are white, which may stay true even if the measured result does not last. choice	**B.** The short test is easy to summarize in one meeting. choice
C. The four-week result is stable enough to be useful for a longer-term decision. correct	**D.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, health, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-052 | Level 2 | Answer D

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Taylor argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Taylor's argument need?

A. The test result is interesting enough to discuss before the wider rollout. choice	**B.** The gate signs are backlit, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice
C. The airline can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The test setting matches the bigger decision closely enough for the result to matter beyond the trial. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, travel, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-053 | Level 2 | Answer D

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Morgan says, "The plan caused that result." Which hidden assumption does Morgan's argument need?

A. The landlord announced the plan before the measured result changed, so the timing should be listed in the report. choice	**B.** The result is important enough to discuss before making a final decision. choice
C. The repair portal uses a house logo, which describes the setting but does not show what caused the result. choice	**D.** No other major change during the test period better explains the result than the plan does. correct

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, housing, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-054 | Level 2 | Answer C

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Casey says, "That means the plan helped middle-school students." Which hidden assumption does Casey's argument need?

A. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**B.** Middle-school students noticed the plan during the test period. choice
C. The measured result is a reasonable sign that the plan helped the target group, not just an interesting number. correct	**D.** The fruit bowls are ceramic, which may be true but is not a sign that the target group was helped or that the result mattered. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, food, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-055 | Level 2 | Answer B

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. Jordan says, "If the plan can reduce customer complaint rates, then it should be adopted." Which hidden assumption does Jordan's argument need?

A. The coaching slides use blue headers, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**B.** Reducing customer complaint rates would matter enough to count in this decision, not just sound nice. correct
C. The call center should focus on the side detail before asking whether the result matters. choice	**D.** The plan is new enough to get public attention. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, customer support, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-056 | Level 2 | Answer A

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Riley says, "The result will continue if the plan becomes permanent." Which hidden assumption does Riley's argument need?

A. The short-term result will not disappear once the test period ends or the rollout begins. correct	**B.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice
C. The short test is easy to summarize in one meeting. choice	**D.** The water-leak alert screen includes a blue droplet icon, which may stay true even if the measured result does not last. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, utilities, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-057 | Level 2 | Answer D

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Maya argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Maya's argument need?

A. The reminder tone is two beeps, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The police department can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The test group is similar enough to the wider group that the result can guide the bigger decision outside the test. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, governance, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-058 | Level 2 | Answer B

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Sam says, "The plan caused that result." Which hidden assumption does Sam's argument need?

A. The ballot-tracking page uses county colors, which describes the setting but does not show what caused the result. choice	**B.** Nothing else important changed during the same test period in a way that better explains the result. correct
C. The result is important enough to discuss before making a final decision. choice	**D.** The election office announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, election administration, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-059 | Level 2 | Answer D

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Avery says, "That means the plan helped language learners." Which hidden assumption does Avery's argument need?

A. The review prompts use a bell icon, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**B.** Language learners noticed the plan during the test period. choice
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** The result being measured is the right kind of evidence for whether the plan helped the group. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, learning, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-060 | Level 2 | Answer B

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. Taylor says, "If the plan can reduce new-member cancellations, then it should be adopted." Which hidden assumption does Taylor's argument need?

A. The gym should focus on the side detail before asking whether the result matters. choice	**B.** Reducing new-member cancellations is important enough to help justify the plan, not just decorate it. correct
C. The plan is new enough to get public attention. choice	**D.** The orientation mats are black, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, fitness, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-061 | Level 2 | Answer B

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Morgan says, "The result will continue if the plan becomes permanent." Which hidden assumption does Morgan's argument need?

A. The short test is easy to summarize in one meeting. choice	**B.** The result from the short test will last long enough to matter after the rollout begins. correct
C. The feedback dashboard uses star ratings, which may stay true even if the measured result does not last. choice	**D.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, insurance, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-062 | Level 2 | Answer D

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Casey argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Casey's argument need?

A. The correction box has a gray border, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The newsroom can explain the plan clearly to people outside the test group before asking for approval. choice
C. The test result is interesting enough to discuss before the wider rollout. choice	**D.** The people in the test are enough like the wider group for the result to matter outside the test. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, media, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-063 | Level 2 | Answer A

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Jordan says, "The plan caused that result." Which hidden assumption does Jordan's argument need?

A. The result is not better explained by another change that happened during the same test period. correct	**B.** The result is important enough to discuss before making a final decision. choice
C. The stall price signs are laminated, which describes the setting but does not show what caused the result. choice	**D.** The farmers market announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, local commerce, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-064 | Level 2 | Answer B

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Riley says, "That means the plan helped overnight hotel guests." Which hidden assumption does Riley's argument need?

A. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**B.** Improvement in the tracked result would count as a real sign of help for the target group. correct
C. Overnight hotel guests noticed the plan during the test period. choice	**D.** The quiet-hours text reminder uses a small moon icon, which may be true but is not a sign that the target group was helped or that the result mattered. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, hospitality, d2

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Level 3

Level 3 asks for steadier discrimination: the right answer is still objective, but the wrong answers often sound plausible.

hidden_assumptions-065 | Level 3 | Answer C

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Sam says, "That means the plan helped late-shift workers." Which hidden assumption does Sam's argument need?

A. Late-shift workers noticed the plan during the test period. choice	**B.** The new buses were repainted blue, which may be true but is not a sign that the target group was helped or that the result mattered. choice
C. Improvement in the tracked result would count as a real sign of help for the target group. correct	**D.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, transportation, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-066 | Level 3 | Answer D

Prompt. The school board is weighing a proposal aimed at ninth-grade students: require phone lockers during class. Avery says, "If the plan can reduce classroom disruption reports, then it should be adopted." Which hidden assumption does Avery's argument need?

A. The plan is new enough to get public attention. choice	**B.** The lockers are installed near the gym, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The school board should focus on the side detail before asking whether the result matters. choice	**D.** A real change in classroom disruption reports would be valuable enough to matter for this decision, not just be noticed. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, education, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-067 | Level 3 | Answer A

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Taylor says, "The result will continue if the plan becomes permanent." Which hidden assumption does Taylor's argument need?

A. The test result is not just a temporary bump that fades when the test is over. correct	**B.** The short test is easy to summarize in one meeting. choice
C. The text messages use a green pill icon, which may stay true even if the measured result does not last. choice	**D.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, health, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-068 | Level 3 | Answer B

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Morgan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Morgan's argument need?

A. The test calendar starts on a Monday, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The small test is close enough to the real rollout to count as useful evidence for the wider plan. correct
C. The company can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The test result is interesting enough to discuss before the wider rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, workplace, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-069 | Level 3 | Answer C

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Casey says, "The plan caused that result." Which hidden assumption does Casey's argument need?

A. The grocery chain announced the plan before the measured result changed, so the timing should be listed in the report. choice	**B.** The result is important enough to discuss before making a final decision. choice
C. The result is not better explained by another change that happened during the same test period. correct	**D.** The shelf labels use bold black numbers, which describes the setting but does not show what caused the result. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, retail, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-070 | Level 3 | Answer D

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Jordan says, "That means the plan helped families checking out children's books." Which hidden assumption does Jordan's argument need?

A. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**B.** Families checking out children's books noticed the plan during the test period. choice
C. The children's-book checkout desk moved six feet, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**D.** The measurement is close enough to the goal to show whether the group was actually helped. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, public services, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-071 | Level 3 | Answer A

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. Riley says, "If the plan can reduce admin account takeovers, then it should be adopted." Which hidden assumption does Riley's argument need?

A. The goal of reducing admin account takeovers is important enough to help decide what to do. correct	**B.** The login button changed from green to blue, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The platform should focus on the side detail before asking whether the result matters. choice	**D.** The plan is new enough to get public attention. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, technology, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-072 | Level 3 | Answer B

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Maya says, "The result will continue if the plan becomes permanent." Which hidden assumption does Maya's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The improvement seen during the test will continue if the plan becomes permanent. correct
C. The new light poles are made of aluminum, which may stay true even if the measured result does not last. choice	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, public safety, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-073 | Level 3 | Answer C

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Sam argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Sam's argument need?

A. The tutoring room has new chairs, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The wider group is enough like the test group that the result is a fair clue for the decision outside the test. correct	**D.** The university can explain the plan clearly to people outside the test group before asking for approval. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, education, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-074 | Level 3 | Answer D

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Avery says, "The plan caused that result." Which hidden assumption does Avery's argument need?

A. The lunch menus are printed on thicker paper, which describes the setting but does not show what caused the result. choice	**B.** The restaurant group announced the plan before the measured result changed, so the timing should be listed in the report. choice
C. The result is important enough to discuss before making a final decision. choice	**D.** Other changes during the test were not strong enough to explain the result better than the plan. correct

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, nutrition, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-075 | Level 3 | Answer B

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Taylor says, "That means the plan helped checking-account customers." Which hidden assumption does Taylor's argument need?

A. Checking-account customers noticed the plan during the test period. choice	**B.** The tracked result is a fair way to judge whether the plan helped the people involved. correct
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** The warning texts arrive from a short code, which may be true but is not a sign that the target group was helped or that the result mattered. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, finance, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-076 | Level 3 | Answer A

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. Morgan says, "If the plan can reduce trail crowding complaints, then it should be adopted." Which hidden assumption does Morgan's argument need?

A. Trail crowding complaints matters enough that improving it could be a serious reason for the plan. correct	**B.** The digital passes include a small trail map, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The plan is new enough to get public attention. choice	**D.** The park service should focus on the side detail before asking whether the result matters. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, environment, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-077 | Level 3 | Answer D

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Casey says, "The result will continue if the plan becomes permanent." Which hidden assumption does Casey's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The Friday tickets are scanned at the east door, which may stay true even if the measured result does not last. choice
C. The short test is easy to summarize in one meeting. choice	**D.** The four-week result is stable enough to be useful for a longer-term decision. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, culture, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-078 | Level 3 | Answer C

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Jordan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Jordan's argument need?

A. The concussion checklist is printed on yellow paper, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The test setting matches the bigger decision closely enough for the result to matter beyond the trial. correct	**D.** The sports league can explain the plan clearly to people outside the test group before asking for approval. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, sports, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-079 | Level 3 | Answer B

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Riley says, "The plan caused that result." Which hidden assumption does Riley's argument need?

A. The result is important enough to discuss before making a final decision. choice	**B.** The plan is the best explanation of the result, not some other change during the same test period. correct
C. The receipt email subject line changed, which describes the setting but does not show what caused the result. choice	**D.** The nonprofit announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, nonprofit, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-080 | Level 3 | Answer A

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Maya says, "That means the plan helped warehouse staff." Which hidden assumption does Maya's argument need?

A. The measured result is a reasonable sign that the plan helped the target group, not just an interesting number. correct	**B.** Warehouse staff noticed the plan during the test period. choice
C. The training room has a ceiling-mounted projector, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**D.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, workplace safety, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-081 | Level 3 | Answer D

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. Sam says, "If the plan can reduce landfill waste from participating buildings, then it should be adopted." Which hidden assumption does Sam's argument need?

A. The plan is new enough to get public attention. choice	**B.** The city sanitation office should focus on the side detail before asking whether the result matters. choice
C. The lobby compost bins have foot pedals, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**D.** Reducing landfill waste from participating buildings would matter enough to count in this decision, not just sound nice. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, environment, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-082 | Level 3 | Answer C

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Avery says, "The result will continue if the plan becomes permanent." Which hidden assumption does Avery's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The short test is easy to summarize in one meeting. choice
C. The short-term result will not disappear once the test period ends or the rollout begins. correct	**D.** The privacy screen uses a shield icon, which may stay true even if the measured result does not last. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, technology, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-083 | Level 3 | Answer B

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Taylor argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Taylor's argument need?

A. The test result is interesting enough to discuss before the wider rollout. choice	**B.** The test group is similar enough to the wider group that the result can guide the bigger decision outside the test. correct
C. The appointment cards are white, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**D.** The clinic can explain the plan clearly to people outside the test group before asking for approval. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, health, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-084 | Level 3 | Answer A

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Morgan says, "The plan caused that result." Which hidden assumption does Morgan's argument need?

A. No other major change during the test period better explains the result than the plan does. correct	**B.** The result is important enough to discuss before making a final decision. choice
C. The gate signs are backlit, which describes the setting but does not show what caused the result. choice	**D.** The airline announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, travel, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-085 | Level 3 | Answer A

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Casey says, "That means the plan helped apartment tenants." Which hidden assumption does Casey's argument need?

A. The result being measured is the right kind of evidence for whether the plan helped the group. correct	**B.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice
C. Apartment tenants noticed the plan during the test period. choice	**D.** The repair portal uses a house logo, which may be true but is not a sign that the target group was helped or that the result mattered. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, housing, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-086 | Level 3 | Answer B

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. Jordan says, "If the plan can increase fruit purchases, then it should be adopted." Which hidden assumption does Jordan's argument need?

A. The plan is new enough to get public attention. choice	**B.** Increasing fruit purchases is important enough to help justify the plan, not just decorate it. correct
C. The fruit bowls are ceramic, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**D.** The cafeteria should focus on the side detail before asking whether the result matters. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, food, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-087 | Level 3 | Answer C

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Riley says, "The result will continue if the plan becomes permanent." Which hidden assumption does Riley's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The coaching slides use blue headers, which may stay true even if the measured result does not last. choice
C. The result from the short test will last long enough to matter after the rollout begins. correct	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, customer support, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-088 | Level 3 | Answer D

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Maya argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Maya's argument need?

A. The test result is interesting enough to discuss before the wider rollout. choice	**B.** The water-leak alert screen includes a blue droplet icon, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice
C. The water utility can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The people in the test are enough like the wider group for the result to matter outside the test. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, utilities, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-089 | Level 3 | Answer A

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Sam says, "The plan caused that result." Which hidden assumption does Sam's argument need?

A. Nothing else important changed during the same test period in a way that better explains the result. correct	**B.** The reminder tone is two beeps, which describes the setting but does not show what caused the result. choice
C. The police department announced the plan before the measured result changed, so the timing should be listed in the report. choice	**D.** The result is important enough to discuss before making a final decision. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, governance, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-090 | Level 3 | Answer B

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Avery says, "That means the plan helped mail voters." Which hidden assumption does Avery's argument need?

A. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**B.** Improvement in the tracked result would count as a real sign of help for the target group. correct
C. The ballot-tracking page uses county colors, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**D.** Mail voters noticed the plan during the test period. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, election administration, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-091 | Level 3 | Answer C

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. Taylor says, "If the plan can increase vocabulary retention quiz scores, then it should be adopted." Which hidden assumption does Taylor's argument need?

A. The plan is new enough to get public attention. choice	**B.** The tutoring app should focus on the side detail before asking whether the result matters. choice
C. A real change in vocabulary retention quiz scores would be valuable enough to matter for this decision, not just be noticed. correct	**D.** The review prompts use a bell icon, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, learning, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-092 | Level 3 | Answer D

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Morgan says, "The result will continue if the plan becomes permanent." Which hidden assumption does Morgan's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The orientation mats are black, which may stay true even if the measured result does not last. choice
C. The short test is easy to summarize in one meeting. choice	**D.** The test result is not just a temporary bump that fades when the test is over. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, fitness, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-093 | Level 3 | Answer A

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Casey argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Casey's argument need?

A. The small test is close enough to the real rollout to count as useful evidence for the wider plan. correct	**B.** The insurer can explain the plan clearly to people outside the test group before asking for approval. choice
C. The test result is interesting enough to discuss before the wider rollout. choice	**D.** The feedback dashboard uses star ratings, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, insurance, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-094 | Level 3 | Answer B

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Jordan says, "The plan caused that result." Which hidden assumption does Jordan's argument need?

A. The newsroom announced the plan before the measured result changed, so the timing should be listed in the report. choice	**B.** The result is not better explained by another change that happened during the same test period. correct
C. The result is important enough to discuss before making a final decision. choice	**D.** The correction box has a gray border, which describes the setting but does not show what caused the result. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, media, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-095 | Level 3 | Answer D

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Riley says, "That means the plan helped weekend farmers market shoppers." Which hidden assumption does Riley's argument need?

A. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**B.** Weekend farmers market shoppers noticed the plan during the test period. choice
C. The stall price signs are laminated, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**D.** The measurement is close enough to the goal to show whether the group was actually helped. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, local commerce, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-096 | Level 3 | Answer C

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. Maya says, "If the plan can reduce noise complaints from guest rooms, then it should be adopted." Which hidden assumption does Maya's argument need?

A. The quiet-hours text reminder uses a small moon icon, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**B.** The hotel should focus on the side detail before asking whether the result matters. choice
C. The goal of reducing noise complaints from guest rooms is important enough to help decide what to do. correct	**D.** The plan is new enough to get public attention. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, hospitality, d3

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Level 4

Level 4 asks learners to hold more context in mind while applying the same method.

hidden_assumptions-097 | Level 4 | Answer D

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. Avery says, "If the plan can reduce late-shift commute complaints, then it should be adopted." Which hidden assumption does Avery's argument need?

A. The city council should focus on the side detail before asking whether the result matters. choice	**B.** The new buses were repainted blue, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The plan is new enough to get public attention. choice	**D.** The goal of reducing late-shift commute complaints is important enough to help decide what to do. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, transportation, d4

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-098 | Level 4 | Answer C

Prompt. The school board is weighing a proposal aimed at ninth-grade students: require phone lockers during class. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Taylor says, "The result will continue if the plan becomes permanent." Which hidden assumption does Taylor's argument need?

A. The short test is easy to summarize in one meeting. choice	**B.** The lockers are installed near the gym, which may stay true even if the measured result does not last. choice
C. The improvement seen during the test will continue if the plan becomes permanent. correct	**D.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, education, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-099 | Level 4 | Answer B

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Morgan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Morgan's argument need?

A. The test result is interesting enough to discuss before the wider rollout. choice	**B.** The wider group is enough like the test group that the result is a fair clue for the decision outside the test. correct
C. The text messages use a green pill icon, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**D.** The hospital can explain the plan clearly to people outside the test group before asking for approval. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, health, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-100 | Level 4 | Answer A

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Casey says, "The plan caused that result." Which hidden assumption does Casey's argument need?

A. Other changes during the test were not strong enough to explain the result better than the plan. correct	**B.** The test calendar starts on a Monday, which describes the setting but does not show what caused the result. choice
C. The company announced the plan before the measured result changed, so the timing should be listed in the report. choice	**D.** The result is important enough to discuss before making a final decision. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, workplace, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-101 | Level 4 | Answer D

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Jordan says, "That means the plan helped weekly grocery shoppers." Which hidden assumption does Jordan's argument need?

A. The shelf labels use bold black numbers, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**B.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice
C. Weekly grocery shoppers noticed the plan during the test period. choice	**D.** The measurement is close enough to the goal to show whether the group was actually helped. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, retail, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-102 | Level 4 | Answer C

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. Riley says, "If the plan can increase library card renewals, then it should be adopted." Which hidden assumption does Riley's argument need?

A. The plan is new enough to get public attention. choice	**B.** The library should focus on the side detail before asking whether the result matters. choice
C. Library card renewals matters enough that improving it could be a serious reason for the plan. correct	**D.** The children's-book checkout desk moved six feet, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, public services, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-103 | Level 4 | Answer B

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Maya says, "The result will continue if the plan becomes permanent." Which hidden assumption does Maya's argument need?

A. The login button changed from green to blue, which may stay true even if the measured result does not last. choice	**B.** The four-week result is stable enough to be useful for a longer-term decision. correct
C. The short test is easy to summarize in one meeting. choice	**D.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, technology, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-104 | Level 4 | Answer A

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Sam argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Sam's argument need?

A. The test setting matches the bigger decision closely enough for the result to matter beyond the trial. correct	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The new light poles are made of aluminum, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**D.** The neighborhood association can explain the plan clearly to people outside the test group before asking for approval. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, public safety, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-105 | Level 4 | Answer D

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Avery says, "The plan caused that result." Which hidden assumption does Avery's argument need?

A. The university announced the plan before the measured result changed, so the timing should be listed in the report. choice	**B.** The tutoring room has new chairs, which describes the setting but does not show what caused the result. choice
C. The result is important enough to discuss before making a final decision. choice	**D.** The plan is the best explanation of the result, not some other change during the same test period. correct

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, education, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-106 | Level 4 | Answer C

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Taylor says, "That means the plan helped lunch customers." Which hidden assumption does Taylor's argument need?

A. Lunch customers noticed the plan during the test period. choice	**B.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice
C. The tracked result is a fair way to judge whether the plan helped the people involved. correct	**D.** The lunch menus are printed on thicker paper, which may be true but is not a sign that the target group was helped or that the result mattered. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, nutrition, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-107 | Level 4 | Answer C

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. Morgan says, "If the plan can reduce overdraft fees, then it should be adopted." Which hidden assumption does Morgan's argument need?

A. The bank should focus on the side detail before asking whether the result matters. choice	**B.** The plan is new enough to get public attention. choice
C. Reducing overdraft fees would matter enough to count in this decision, not just sound nice. correct	**D.** The warning texts arrive from a short code, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, finance, d4

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-108 | Level 4 | Answer D

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Casey says, "The result will continue if the plan becomes permanent." Which hidden assumption does Casey's argument need?

A. The short test is easy to summarize in one meeting. choice	**B.** The digital passes include a small trail map, which may stay true even if the measured result does not last. choice
C. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**D.** The short-term result will not disappear once the test period ends or the rollout begins. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, environment, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-109 | Level 4 | Answer A

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Jordan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Jordan's argument need?

A. The test group is similar enough to the wider group that the result can guide the bigger decision outside the test. correct	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The museum can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The Friday tickets are scanned at the east door, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, culture, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-110 | Level 4 | Answer B

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Riley says, "The plan caused that result." Which hidden assumption does Riley's argument need?

A. The concussion checklist is printed on yellow paper, which describes the setting but does not show what caused the result. choice	**B.** No other major change during the test period better explains the result than the plan does. correct
C. The result is important enough to discuss before making a final decision. choice	**D.** The sports league announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, sports, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-111 | Level 4 | Answer C

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Maya says, "That means the plan helped first-time donors." Which hidden assumption does Maya's argument need?

A. First-time donors noticed the plan during the test period. choice	**B.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice
C. The measured result is a reasonable sign that the plan helped the target group, not just an interesting number. correct	**D.** The receipt email subject line changed, which may be true but is not a sign that the target group was helped or that the result mattered. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, nonprofit, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-112 | Level 4 | Answer D

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. Sam says, "If the plan can reduce back-injury claims, then it should be adopted." Which hidden assumption does Sam's argument need?

A. The plan is new enough to get public attention. choice	**B.** The training room has a ceiling-mounted projector, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The warehouse should focus on the side detail before asking whether the result matters. choice	**D.** Reducing back-injury claims is important enough to help justify the plan, not just decorate it. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, workplace safety, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-113 | Level 4 | Answer A

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Avery says, "The result will continue if the plan becomes permanent." Which hidden assumption does Avery's argument need?

A. The result from the short test will last long enough to matter after the rollout begins. correct	**B.** The lobby compost bins have foot pedals, which may stay true even if the measured result does not last. choice
C. The short test is easy to summarize in one meeting. choice	**D.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, environment, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-114 | Level 4 | Answer B

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Taylor argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Taylor's argument need?

A. The privacy screen uses a shield icon, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The people in the test are enough like the wider group for the result to matter outside the test. correct
C. The app maker can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The test result is interesting enough to discuss before the wider rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, technology, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-115 | Level 4 | Answer A

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Morgan says, "The plan caused that result." Which hidden assumption does Morgan's argument need?

A. Nothing else important changed during the same test period in a way that better explains the result. correct	**B.** The clinic announced the plan before the measured result changed, so the timing should be listed in the report. choice
C. The appointment cards are white, which describes the setting but does not show what caused the result. choice	**D.** The result is important enough to discuss before making a final decision. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, health, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-116 | Level 4 | Answer B

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Casey says, "That means the plan helped domestic flight passengers." Which hidden assumption does Casey's argument need?

A. The gate signs are backlit, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**B.** The result being measured is the right kind of evidence for whether the plan helped the group. correct
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** Domestic flight passengers noticed the plan during the test period. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, travel, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-117 | Level 4 | Answer D

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. Jordan says, "If the plan can reduce unresolved repair requests, then it should be adopted." Which hidden assumption does Jordan's argument need?

A. The plan is new enough to get public attention. choice	**B.** The landlord should focus on the side detail before asking whether the result matters. choice
C. The repair portal uses a house logo, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**D.** A real change in unresolved repair requests would be valuable enough to matter for this decision, not just be noticed. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, housing, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-118 | Level 4 | Answer C

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Riley says, "The result will continue if the plan becomes permanent." Which hidden assumption does Riley's argument need?

A. The short test is easy to summarize in one meeting. choice	**B.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice
C. The test result is not just a temporary bump that fades when the test is over. correct	**D.** The fruit bowls are ceramic, which may stay true even if the measured result does not last. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, food, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-119 | Level 4 | Answer B

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Maya argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Maya's argument need?

A. The coaching slides use blue headers, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The small test is close enough to the real rollout to count as useful evidence for the wider plan. correct
C. The call center can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The test result is interesting enough to discuss before the wider rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, customer support, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-120 | Level 4 | Answer A

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Sam says, "The plan caused that result." Which hidden assumption does Sam's argument need?

A. The result is not better explained by another change that happened during the same test period. correct	**B.** The water-leak alert screen includes a blue droplet icon, which describes the setting but does not show what caused the result. choice
C. The result is important enough to discuss before making a final decision. choice	**D.** The water utility announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, utilities, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-121 | Level 4 | Answer D

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Avery says, "That means the plan helped patrol officers." Which hidden assumption does Avery's argument need?

A. The reminder tone is two beeps, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**B.** Patrol officers noticed the plan during the test period. choice
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** Improvement in the tracked result would count as a real sign of help for the target group. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, governance, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-122 | Level 4 | Answer C

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. Taylor says, "If the plan can reduce phone calls asking ballot status, then it should be adopted." Which hidden assumption does Taylor's argument need?

A. The ballot-tracking page uses county colors, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**B.** The plan is new enough to get public attention. choice
C. The goal of reducing phone calls asking ballot status is important enough to help decide what to do. correct	**D.** The election office should focus on the side detail before asking whether the result matters. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, election administration, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-123 | Level 4 | Answer B

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Morgan says, "The result will continue if the plan becomes permanent." Which hidden assumption does Morgan's argument need?

A. The review prompts use a bell icon, which may stay true even if the measured result does not last. choice	**B.** The improvement seen during the test will continue if the plan becomes permanent. correct
C. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, learning, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-124 | Level 4 | Answer A

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Casey argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Casey's argument need?

A. The wider group is enough like the test group that the result is a fair clue for the decision outside the test. correct	**B.** The orientation mats are black, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice
C. The gym can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The test result is interesting enough to discuss before the wider rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, fitness, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-125 | Level 4 | Answer D

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Jordan says, "The plan caused that result." Which hidden assumption does Jordan's argument need?

A. The result is important enough to discuss before making a final decision. choice	**B.** The feedback dashboard uses star ratings, which describes the setting but does not show what caused the result. choice
C. The insurer announced the plan before the measured result changed, so the timing should be listed in the report. choice	**D.** Other changes during the test were not strong enough to explain the result better than the plan. correct

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, insurance, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-126 | Level 4 | Answer C

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Riley says, "That means the plan helped newsletter readers." Which hidden assumption does Riley's argument need?

A. The correction box has a gray border, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**B.** Newsletter readers noticed the plan during the test period. choice
C. The measurement is close enough to the goal to show whether the group was actually helped. correct	**D.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, media, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-127 | Level 4 | Answer A

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. Maya says, "If the plan can reduce price disputes, then it should be adopted." Which hidden assumption does Maya's argument need?

A. Price disputes matters enough that improving it could be a serious reason for the plan. correct	**B.** The stall price signs are laminated, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The farmers market should focus on the side detail before asking whether the result matters. choice	**D.** The plan is new enough to get public attention. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, local commerce, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-128 | Level 4 | Answer B

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Sam says, "The result will continue if the plan becomes permanent." Which hidden assumption does Sam's argument need?

A. The quiet-hours text reminder uses a small moon icon, which may stay true even if the measured result does not last. choice	**B.** The four-week result is stable enough to be useful for a longer-term decision. correct
C. The short test is easy to summarize in one meeting. choice	**D.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, hospitality, d4

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

Level 5

Level 5 is for fluency: the learner should now name the thinking move and explain the elimination path.

hidden_assumptions-129 | Level 5 | Answer C

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Taylor says, "The result will continue if the plan becomes permanent." Which hidden assumption does Taylor's argument need?

A. The new buses were repainted blue, which may stay true even if the measured result does not last. choice	**B.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice
C. The four-week result is stable enough to be useful for a longer-term decision. correct	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, transportation, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-130 | Level 5 | Answer D

Prompt. The school board is weighing a proposal aimed at ninth-grade students: require phone lockers during class. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Morgan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Morgan's argument need?

A. The lockers are installed near the gym, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The school board can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The test setting matches the bigger decision closely enough for the result to matter beyond the trial. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, education, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-131 | Level 5 | Answer A

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Casey says, "The plan caused that result." Which hidden assumption does Casey's argument need?

A. The plan is the best explanation of the result, not some other change during the same test period. correct	**B.** The result is important enough to discuss before making a final decision. choice
C. The text messages use a green pill icon, which describes the setting but does not show what caused the result. choice	**D.** The hospital announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, health, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-132 | Level 5 | Answer B

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Jordan says, "That means the plan helped software engineers." Which hidden assumption does Jordan's argument need?

A. The test calendar starts on a Monday, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**B.** The tracked result is a fair way to judge whether the plan helped the people involved. correct
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** Software engineers noticed the plan during the test period. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, workplace, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-133 | Level 5 | Answer C

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. Riley says, "If the plan can reduce shopper overpayment complaints, then it should be adopted." Which hidden assumption does Riley's argument need?

A. The plan is new enough to get public attention. choice	**B.** The grocery chain should focus on the side detail before asking whether the result matters. choice
C. Shopper overpayment complaints matters enough that improving it could be a serious reason for the plan. correct	**D.** The shelf labels use bold black numbers, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, retail, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-134 | Level 5 | Answer D

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Maya says, "The result will continue if the plan becomes permanent." Which hidden assumption does Maya's argument need?

A. The children's-book checkout desk moved six feet, which may stay true even if the measured result does not last. choice	**B.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice
C. The short test is easy to summarize in one meeting. choice	**D.** The short-term result will not disappear once the test period ends or the rollout begins. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, public services, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-135 | Level 5 | Answer A

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Sam argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Sam's argument need?

A. The test group is similar enough to the wider group that the result can guide the bigger decision outside the test. correct	**B.** The login button changed from green to blue, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice
C. The platform can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The test result is interesting enough to discuss before the wider rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, technology, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-136 | Level 5 | Answer B

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Avery says, "The plan caused that result." Which hidden assumption does Avery's argument need?

A. The neighborhood association announced the plan before the measured result changed, so the timing should be listed in the report. choice	**B.** No other major change during the test period better explains the result than the plan does. correct
C. The new light poles are made of aluminum, which describes the setting but does not show what caused the result. choice	**D.** The result is important enough to discuss before making a final decision. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, public safety, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-137 | Level 5 | Answer A

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Taylor says, "That means the plan helped first-year statistics students." Which hidden assumption does Taylor's argument need?

A. The measured result is a reasonable sign that the plan helped the target group, not just an interesting number. correct	**B.** The tutoring room has new chairs, which may be true but is not a sign that the target group was helped or that the result mattered. choice
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** First-year statistics students noticed the plan during the test period. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, education, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-138 | Level 5 | Answer B

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. Morgan says, "If the plan can reduce dessert orders, then it should be adopted." Which hidden assumption does Morgan's argument need?

A. The lunch menus are printed on thicker paper, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**B.** Reducing dessert orders would matter enough to count in this decision, not just sound nice. correct
C. The plan is new enough to get public attention. choice	**D.** The restaurant group should focus on the side detail before asking whether the result matters. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, nutrition, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-139 | Level 5 | Answer D

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Casey says, "The result will continue if the plan becomes permanent." Which hidden assumption does Casey's argument need?

A. The warning texts arrive from a short code, which may stay true even if the measured result does not last. choice	**B.** The short test is easy to summarize in one meeting. choice
C. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**D.** The result from the short test will last long enough to matter after the rollout begins. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, finance, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-140 | Level 5 | Answer C

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Jordan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Jordan's argument need?

A. The park service can explain the plan clearly to people outside the test group before asking for approval. choice	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The people in the test are enough like the wider group for the result to matter outside the test. correct	**D.** The digital passes include a small trail map, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, environment, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-141 | Level 5 | Answer B

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Riley says, "The plan caused that result." Which hidden assumption does Riley's argument need?

A. The result is important enough to discuss before making a final decision. choice	**B.** Nothing else important changed during the same test period in a way that better explains the result. correct
C. The Friday tickets are scanned at the east door, which describes the setting but does not show what caused the result. choice	**D.** The museum announced the plan before the measured result changed, so the timing should be listed in the report. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, culture, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-142 | Level 5 | Answer A

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Maya says, "That means the plan helped youth soccer players." Which hidden assumption does Maya's argument need?

A. The result being measured is the right kind of evidence for whether the plan helped the group. correct	**B.** Youth soccer players noticed the plan during the test period. choice
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** The concussion checklist is printed on yellow paper, which may be true but is not a sign that the target group was helped or that the result mattered. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, sports, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-143 | Level 5 | Answer D

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. Sam says, "If the plan can increase donor retention, then it should be adopted." Which hidden assumption does Sam's argument need?

A. The receipt email subject line changed, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**B.** The plan is new enough to get public attention. choice
C. The nonprofit should focus on the side detail before asking whether the result matters. choice	**D.** Increasing donor retention is important enough to help justify the plan, not just decorate it. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, nonprofit, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-144 | Level 5 | Answer C

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Avery says, "The result will continue if the plan becomes permanent." Which hidden assumption does Avery's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The training room has a ceiling-mounted projector, which may stay true even if the measured result does not last. choice
C. The test result is not just a temporary bump that fades when the test is over. correct	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, workplace safety, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-145 | Level 5 | Answer B

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Taylor argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Taylor's argument need?

A. The lobby compost bins have foot pedals, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The small test is close enough to the real rollout to count as useful evidence for the wider plan. correct
C. The city sanitation office can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The test result is interesting enough to discuss before the wider rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, environment, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-146 | Level 5 | Answer A

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Morgan says, "The plan caused that result." Which hidden assumption does Morgan's argument need?

A. The result is not better explained by another change that happened during the same test period. correct	**B.** The result is important enough to discuss before making a final decision. choice
C. The app maker announced the plan before the measured result changed, so the timing should be listed in the report. choice	**D.** The privacy screen uses a shield icon, which describes the setting but does not show what caused the result. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, technology, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-147 | Level 5 | Answer D

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Casey says, "That means the plan helped primary-care patients." Which hidden assumption does Casey's argument need?

A. Primary-care patients noticed the plan during the test period. choice	**B.** The appointment cards are white, which may be true but is not a sign that the target group was helped or that the result mattered. choice
C. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**D.** Improvement in the tracked result would count as a real sign of help for the target group. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, health, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-148 | Level 5 | Answer C

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. Jordan says, "If the plan can reduce average boarding time, then it should be adopted." Which hidden assumption does Jordan's argument need?

A. The plan is new enough to get public attention. choice	**B.** The airline should focus on the side detail before asking whether the result matters. choice
C. A real change in average boarding time would be valuable enough to matter for this decision, not just be noticed. correct	**D.** The gate signs are backlit, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, travel, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-149 | Level 5 | Answer C

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Riley says, "The result will continue if the plan becomes permanent." Which hidden assumption does Riley's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The repair portal uses a house logo, which may stay true even if the measured result does not last. choice
C. The improvement seen during the test will continue if the plan becomes permanent. correct	**D.** The short test is easy to summarize in one meeting. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, housing, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-150 | Level 5 | Answer D

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Maya argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Maya's argument need?

A. The fruit bowls are ceramic, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The cafeteria can explain the plan clearly to people outside the test group before asking for approval. choice	**D.** The wider group is enough like the test group that the result is a fair clue for the decision outside the test. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, food, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-151 | Level 5 | Answer A

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Sam says, "The plan caused that result." Which hidden assumption does Sam's argument need?

A. Other changes during the test were not strong enough to explain the result better than the plan. correct	**B.** The call center announced the plan before the measured result changed, so the timing should be listed in the report. choice
C. The result is important enough to discuss before making a final decision. choice	**D.** The coaching slides use blue headers, which describes the setting but does not show what caused the result. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, customer support, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-152 | Level 5 | Answer B

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Avery says, "That means the plan helped local homeowners." Which hidden assumption does Avery's argument need?

A. Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice	**B.** The measurement is close enough to the goal to show whether the group was actually helped. correct
C. The water-leak alert screen includes a blue droplet icon, which may be true but is not a sign that the target group was helped or that the result mattered. choice	**D.** Local homeowners noticed the plan during the test period. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, utilities, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-153 | Level 5 | Answer C

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. Taylor says, "If the plan can reduce missing-camera-footage reports, then it should be adopted." Which hidden assumption does Taylor's argument need?

A. The police department should focus on the side detail before asking whether the result matters. choice	**B.** The reminder tone is two beeps, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice
C. The goal of reducing missing-camera-footage reports is important enough to help decide what to do. correct	**D.** The plan is new enough to get public attention. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, governance, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-154 | Level 5 | Answer D

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Morgan says, "The result will continue if the plan becomes permanent." Which hidden assumption does Morgan's argument need?

A. The plan can be started quickly if people approve it, so the first few weeks matter most. choice	**B.** The short test is easy to summarize in one meeting. choice
C. The ballot-tracking page uses county colors, which may stay true even if the measured result does not last. choice	**D.** The four-week result is stable enough to be useful for a longer-term decision. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, election administration, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-155 | Level 5 | Answer A

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Casey argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Casey's argument need?

A. The test setting matches the bigger decision closely enough for the result to matter beyond the trial. correct	**B.** The test result is interesting enough to discuss before the wider rollout. choice
C. The review prompts use a bell icon, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice	**D.** The tutoring app can explain the plan clearly to people outside the test group before asking for approval. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, learning, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-156 | Level 5 | Answer B

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Jordan says, "The plan caused that result." Which hidden assumption does Jordan's argument need?

A. The gym announced the plan before the measured result changed, so the timing should be listed in the report. choice	**B.** The plan is the best explanation of the result, not some other change during the same test period. correct
C. The result is important enough to discuss before making a final decision. choice	**D.** The orientation mats are black, which describes the setting but does not show what caused the result. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, fitness, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-157 | Level 5 | Answer A

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Riley says, "That means the plan helped auto-insurance policyholders." Which hidden assumption does Riley's argument need?

A. The tracked result is a fair way to judge whether the plan helped the people involved. correct	**B.** The feedback dashboard uses star ratings, which may be true but is not a sign that the target group was helped or that the result mattered. choice
C. Auto-insurance policyholders noticed the plan during the test period. choice	**D.** Any positive-looking number is enough to show the plan helped, even if the number tracks the wrong thing. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, insurance, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-158 | Level 5 | Answer B

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. Maya says, "If the plan can increase reader trust ratings, then it should be adopted." Which hidden assumption does Maya's argument need?

A. The newsroom should focus on the side detail before asking whether the result matters. choice	**B.** Reader trust ratings matters enough that improving it could be a serious reason for the plan. correct
C. The correction box has a gray border, which may affect presentation but does not show that the goal is worth pursuing or important enough. choice	**D.** The plan is new enough to get public attention. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, media, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-159 | Level 5 | Answer D

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Sam says, "The result will continue if the plan becomes permanent." Which hidden assumption does Sam's argument need?

A. The stall price signs are laminated, which may stay true even if the measured result does not last. choice	**B.** The plan can be started quickly if people approve it, so the first few weeks matter most. choice
C. The short test is easy to summarize in one meeting. choice	**D.** The short-term result will not disappear once the test period ends or the rollout begins. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, local commerce, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-160 | Level 5 | Answer C

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Avery argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Avery's argument need?

A. The test result is interesting enough to discuss before the wider rollout. choice	**B.** The hotel can explain the plan clearly to people outside the test group before asking for approval. choice
C. The test group is similar enough to the wider group that the result can guide the bigger decision outside the test. correct	**D.** The quiet-hours text reminder uses a small moon icon, which is an easy-to-notice detail about the plan but not a bridge from test to rollout. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, hospitality, d5

A feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This does not supply the missing bridge in the argument. The hidden assumption is that the test is a fair guide to the bigger decision.
