Skill 09

# Recognize Common Fallacies

What's the Fallacy?

| | | |
|---|---|---|
| **160**<br>Items | **1-5**<br>Levels | **Match a bad argument to its mistake.**<br>Objective |

**Essential question.** What recognizable bad move does this argument make?

This PDF is designed for classroom use. It gives teachers a rigorous introduction to the skill, a repeatable solving routine, likely student confusions, a worked example, and the full XiXteen item set with choice-level feedback.

Generated from the current XiXteen corpus on 2026-10-29.

Skill 09

# Recognize Common Fallacies

## What's the Fallacy?

| | | |
|---|---|---|
| **Match a bad argument to its mistake.**<br>Objective | **160**<br>Items | **Levels 1-5**<br>Difficulty bands |

| | |
|---|---|
| **Essential question** | What recognizable bad move does this argument make? |
| **Why it matters** | Fallacy labels are useful when they name a precise pattern, not when they are used as insults. The goal is to diagnose the bad move so the discussion can return to the actual issue. |
| **Conceptual core** | Fallacy work should improve reasoning, not turn discussion into name-calling. Students should first describe the move in plain language, then attach the label. The label is useful only if it identifies the structure: attacking a person instead of the argument, pretending there are only two options, misrepresenting an opponent, changing the subject, appealing to popularity, or assuming the conclusion. |
| **Student method** | Identify the move made by the speaker: attacking the person, reducing options to two, changing the subject, exaggerating an opponent, treating popularity as proof, or assuming what needs proof. |
| **Analogy** | A fallacy is a recognizable wrong turn in reasoning. The label is the road sign, but the real skill is seeing the turn. |
| **Assessment focus** | A good answer selects the fallacy whose structure matches the scenario and rejects labels that are only topically related. |
| **Resource note** | The quiz feedback links fallacy items to corresponding LogFall articles when a direct article match is available. |

## Teaching Sequence

**1.** Describe what the speaker does in ordinary language.

**2.** Match that move to the fallacy label.

**3.** Use the wrong choices as contrast cases rather than memorized vocabulary.

**4.** Explain how the argument could return to the real issue.

## Common Confusions To Watch For

**1.** Students may label any bad argument with a familiar fallacy name.

**2.** Students may confuse a harsh tone with ad hominem when the evidence is still addressed.

**3.** Students may spot the topic but miss the argumentative move.

## Teacher Prompts

**1.** What move did the speaker make?

**2.** Did the reply address the claim or dodge it?

**3.** How would you describe the error without using a fallacy label?

## Worked Example

| | |
|---|---|
| **Scenario** | A student asks whether a new schedule has evidence behind it. Another student replies, you just hate change and want the school to fail. |
| **Teacher think-aloud** | The reply attacks the person's attitude instead of answering the evidence question. That is an ad hominem style move, not a response to the argument. |
| **Student takeaway** | Name the pattern only after you can describe the bad reasoning move. |

## Guided Classroom Exercise

Invented case. Use only the facts below; write on paper. Try the steps and check your work before reading the model answer. Different wording can be equally adequate.

**Situation.** Maya asks, 'What evidence shows the new timetable improves attendance?' Lee replies, 'You just hate change and want our school to fail.' No attendance results have been supplied.

## What To Do

**1.** State Maya's question in your own words.

**2.** Explain what Lee discusses instead and why that does not answer the question.

**3.** Rewrite Lee's reply in two sentences: acknowledge the missing evidence and propose a relevant comparison. Do not invent a successful result.

**Check before reading the answer.** Have you addressed attendance rather than guessed Maya's motives? A label such as 'personal attack' is optional; explain the error.

## Model Answer

Maya asks whether the timetable improves attendance. Lee attacks her motives instead of supplying attendance evidence. Better reply: 'We have not yet shown that attendance improves. We should compare attendance under the new and old schedules while checking other changes, such as transport availability.'

**Why it is adequate.** It identifies the diversion and replaces it with a relevant, honest response rather than an invented justification.

## Item Bank

Items are grouped by level. For each item, read the prompt, predict the answer, choose, and then use the feedback and process commentary to examine the reasoning path.

## Level 1

Level 1 establishes the clean version of the skill: the cue is direct, the distractors are visible, and the main task is to learn the contrast.

### fallacies-001 | Level 1 | Answer B

**Prompt.** During a debate about evening bus service for late-shift workers, Riley asks for one more small test before the city council decides. Avery replies, "Riley wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>correct |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, transportation, d1

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches straw man.
Study link: LogFall - False dilemma

**B feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches straw man.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches straw man.
Study link: LogFall - Hasty generalization

### fallacies-002 | Level 1 | Answer A

**Prompt.** During a debate about classroom phone lockers, Maya says, "Either the school board must require phone lockers during class right now, or it does not care about ninth-grade students at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>correct | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** Red herring: changes the subject instead of addressing the issue<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, education, d1

**A feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches false dilemma.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches false dilemma.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches false dilemma.
Study link: LogFall - Red herring

### fallacies-003 | Level 1 | Answer D

**Prompt.** During a debate about medication reminder texts for older patients, Sam rejects Morgan's proposal to send medication reminder texts before evening doses because Morgan once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>correct |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, health, d1

**A feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches ad hominem.
Study link: LogFall - Appeal to tradition

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches ad hominem.
Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches ad hominem.
Study link: LogFall - False dilemma

**D feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

### fallacies-004 | Level 1 | Answer C

**Prompt.** During a debate about a four-day workweek test for software engineers, Avery says, "If the company agrees to test a Monday-through-Thursday workweek, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>correct | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, workplace, d1

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches slippery slope.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches slippery slope.
Study link: LogFall - Argumentum ad populum

**C feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches slippery slope.

Study link: LogFall - Hasty generalization

### fallacies-005 | Level 1 | Answer B

**Prompt.** During a debate about larger grocery unit-price labels, Taylor says the grocery chain should add larger unit-price labels on shelf tags because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, retail, d1

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to popularity.
Study link: LogFall - Red herring

**B feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to popularity.
Study link: LogFall - Begging the question

### fallacies-006 | Level 1 | Answer A

**Prompt.** During a debate about late fines on children's books, Morgan writes that the library should waive late fines for children's books because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>correct | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, public services, d1

**A feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches circular reasoning.
Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches circular reasoning.
Study link: LogFall - Straw man argument

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches circular reasoning.
Study link: LogFall - False dilemma

### fallacies-007 | Level 1 | Answer D

**Prompt.** During a debate about two-factor login for site administrators, Casey points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>correct |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, technology, d1

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches hasty generalization.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches hasty generalization.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches hasty generalization.
Study link: LogFall - Slippery slope

**D feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

### fallacies-008 | Level 1 | Answer C

**Prompt.** During a debate about brighter streetlights on Maple Street, Sam asks whether adding brighter LED streetlights on Maple Street would affect reported thefts. Jordan answers by talking about this side detail: the new light poles are made of aluminum. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>correct | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, public safety, d1

**A feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches red herring.
Study link: LogFall - Appeal to tradition

**B feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches red herring.
Study link: LogFall - Hasty generalization

**C feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.

Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches red herring.
Study link: LogFall - Argumentum ad populum

### fallacies-009 | Level 1 | Answer B

**Prompt.** During a debate about peer tutoring for first-year statistics students, Riley says the university should not expand peer tutoring in statistics because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>correct |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, education, d1

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to tradition.
Study link: LogFall - Red herring

**B feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to tradition.
Study link: LogFall - False dilemma

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches appeal to tradition.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-010 | Level 1 | Answer A

**Prompt.** During a debate about calorie labels on restaurant menus, Maya says, "Dessert orders fell by 16% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>correct | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, nutrition, d1

**A feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches post hoc.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches post hoc.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches post hoc.
Study link: LogFall - False dilemma

### fallacies-011 | Level 1 | Answer A

**Prompt.** During a debate about bank overdraft warning texts, Sam asks for one more small test before the bank decides. Morgan replies, "Sam wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>correct | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, finance, d1

**A feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches straw man.
Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches straw man.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches straw man.
Study link: LogFall - Begging the question

### fallacies-012 | Level 1 | Answer B

**Prompt.** During a debate about timed-entry passes for weekend park trails, Avery says, "Either the park service must use timed-entry passes for weekend trail visits right now, or it does not care about weekend trail hikers at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>correct |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, environment, d1

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches false dilemma.
Study link: LogFall - Red herring

**B feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.

Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches false dilemma.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches false dilemma.
Study link: LogFall - Argumentum ad populum

### fallacies-013 | Level 1 | Answer C

**Prompt.** During a debate about free Friday museum admission, Taylor rejects Jordan's proposal to offer free admission on Fridays because Jordan once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>correct | **D.** Slippery slope: predicts a chain reaction without enough support<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, culture, d1

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches ad hominem.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches ad hominem.
Study link: LogFall - Argumentum ad populum

**C feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches ad hominem.
Study link: LogFall - Slippery slope

### fallacies-014 | Level 1 | Answer D

**Prompt.** During a debate about youth soccer concussion checks, Morgan says, "If the sports league agrees to add mandatory sideline concussion checks, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** Slippery slope: predicts a chain reaction without enough support<br>correct |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, sports, d1

**A feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches slippery slope.
Study link: LogFall - Appeal to tradition

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches slippery slope.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches slippery slope.
Study link: LogFall - Red herring

**D feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

### fallacies-015 | Level 1 | Answer A

**Prompt.** During a debate about same-day donation receipts, Casey says the nonprofit should send donation receipts within one day because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, nonprofit, d1

**A feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to popularity.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches appeal to popularity.
Study link: LogFall - Ad hominem

### fallacies-016 | Level 1 | Answer B

**Prompt.** During a debate about warehouse ergonomic training, Jordan writes that the warehouse should offer monthly lifting-safety and ergonomic training because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>correct |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, workplace safety, d1

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches circular reasoning.

Study link: LogFall - Argumentum ad populum

**B feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches circular reasoning.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches circular reasoning.
Study link: LogFall - Post hoc ergo propter hoc

---

### fallacies-017 | Level 1 | Answer C

**Prompt.** During a debate about apartment-lobby compost bins, Riley points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>correct | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, environment, d1

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches hasty generalization.
Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches hasty generalization.
Study link: LogFall - Appeal to tradition

**C feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches hasty generalization.
Study link: LogFall - False dilemma

---

### fallacies-018 | Level 1 | Answer D

**Prompt.** During a debate about private-by-default app profiles, Taylor asks whether making new user profiles private by default would affect publicly visible profiles. Maya answers by talking about this side detail: the privacy screen uses a shield icon. Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Red herring: changes the subject instead of addressing the issue<br>correct |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, technology, d1

**A feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches red herring.
Study link: LogFall - Straw man argument

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches red herring.
Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches red herring.
Study link: LogFall - Appeal to tradition

**D feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

---

### fallacies-019 | Level 1 | Answer A

**Prompt.** During a debate about same-day clinic appointment slots, Sam says the clinic should not reserve same-day appointment slots because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to tradition: treats old habits as proof the claim is right<br>correct | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, health, d1

**A feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches appeal to tradition.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches appeal to tradition.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches appeal to tradition.
Study link: LogFall - Post hoc ergo propter hoc

---

### fallacies-020 | Level 1 | Answer B

**Prompt.** During a debate about seat-zone airline boarding, Avery says, "Average boarding time fell by 9% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>choice | **B.** Post hoc: treats timing as enough proof of cause by itself<br>correct |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, travel, d1

**A feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches post hoc.
Study link: LogFall - Straw man argument

**B feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches post hoc.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches post hoc.
Study link: LogFall - Hasty generalization

### fallacies-021 | Level 1 | Answer B

**Prompt.** During a debate about an online apartment repair portal, Taylor asks for one more small test before the landlord decides. Jordan replies, "Taylor wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>correct |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, housing, d1

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches straw man.
Study link: LogFall - Begging the question

**B feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches straw man.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches straw man.
Study link: LogFall - Argumentum ad populum

### fallacies-022 | Level 1 | Answer A

**Prompt.** During a debate about fruit placement in a school cafeteria line, Morgan says, "Either the cafeteria must move fruit bowls to the front of the cafeteria line right now, or it does not care about middle-school students at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>correct | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as

contrast cases.

Tags: fallacies, fallacy, false-dilemma, food, d1

**A feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches false dilemma.
Study link: LogFall - Hasty generalization

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches false dilemma.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches false dilemma.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-023 | Level 1 | Answer D

**Prompt.** During a debate about weekly call-center script coaching, Casey rejects Maya's proposal to give support agents weekly script coaching because Maya once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>correct |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, customer support, d1

**A feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches ad hominem.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches ad hominem.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches ad hominem.
Study link: LogFall - False dilemma

**D feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

### fallacies-024 | Level 1 | Answer C

**Prompt.** During a debate about household water-leak alerts, Jordan says, "If the water utility agrees to send automatic household water-leak alerts, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>correct | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as

contrast cases.

Tags: fallacies, fallacy, slippery-slope, utilities, d1

**A feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches slippery slope.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches slippery slope.
Study link: LogFall - False dilemma

**C feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches slippery slope.
Study link: LogFall - Hasty generalization

---

### fallacies-025 | Level 1 | Answer B

**Prompt.** During a debate about body-camera activation reminders, Riley says the police department should send body-camera activation reminders before patrol shifts because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, governance, d1

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to popularity.
Study link: LogFall - Red herring

**B feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

**D feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches appeal to popularity.
Study link: LogFall - Ad hominem

### fallacies-026 | Level 1 | Answer A

**Prompt.** During a debate about county mail-ballot tracking, Maya writes that the election office should offer online mail-ballot tracking because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>correct | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, election administration, d1

**A feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches circular reasoning.
Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches circular reasoning.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches circular reasoning.
Study link: LogFall - Straw man argument

### fallacies-027 | Level 1 | Answer D

**Prompt.** During a debate about language-learning spaced-review prompts, Sam points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>correct |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, learning, d1

**A feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches hasty generalization.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches hasty generalization.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches hasty generalization.
Study link: LogFall - Begging the question

**D feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

### fallacies-028 | Level 1 | Answer C

**Prompt.** During a debate about a beginner gym orientation, Casey asks whether offering a beginner gym orientation would affect new-member cancellations. Avery answers by talking about this side detail: the orientation mats are black. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>correct | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, fitness, d1

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches red herring.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches red herring.
Study link: LogFall - Appeal to tradition

**C feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches red herring.
Study link: LogFall - Straw man argument

### fallacies-029 | Level 1 | Answer D

**Prompt.** During a debate about safe-driving feedback for policyholders, Taylor says the insurer should not send weekly safe-driving feedback because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>correct |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, insurance, d1

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches appeal to tradition.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to tradition.
Study link: LogFall - Begging the question

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to tradition.
Study link: LogFall - False dilemma

**D feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.

Study link: LogFall - Appeal to tradition

### fallacies-030 | Level 1 | Answer C

**Prompt.** During a debate about top-of-article correction boxes, Morgan says, "Reader trust ratings rose by 7% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>correct | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, media, d1

**A feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches post hoc.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches post hoc.
Study link: LogFall - Begging the question

**C feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches post hoc.
Study link: LogFall - Argumentum ad populum

### fallacies-031 | Level 1 | Answer C

**Prompt.** During a debate about clearer farmers market price signs, Casey asks for one more small test before the farmers market decides. Maya replies, "Casey wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>correct | **D.** Slippery slope: predicts a chain reaction without enough support<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, local commerce, d1

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches straw man.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches straw man.
Study link: LogFall - Ad hominem

**C feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.

Study link: LogFall - Straw man argument

**D feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches straw man.
Study link: LogFall - Slippery slope

### fallacies-032 | Level 1 | Answer D

**Prompt.** During a debate about hotel quiet-hours text reminders, Jordan says, "Either the hotel must send quiet-hours text reminders to hotel guests right now, or it does not care about overnight hotel guests at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>correct |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, hospitality, d1

**A feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches false dilemma.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches false dilemma.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches false dilemma.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

# Level 2

Level 2 keeps the same skill but adds more realistic wording and more tempting distractors.

### fallacies-033 | Level 2 | Answer A

**Prompt.** During a debate about evening bus service for late-shift workers, Maya says, "Either the city council must extend evening bus service until midnight right now, or it does not care about late-shift workers at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>correct | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, transportation, d2

**A feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches false dilemma.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches false dilemma.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches false dilemma.
Study link: LogFall - Post hoc ergo propter hoc

---

### fallacies-034 | Level 2 | Answer B

**Prompt.** During a debate about classroom phone lockers, Sam rejects Morgan's proposal to require phone lockers during class because Morgan once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>correct |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, education, d2

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches ad hominem.
Study link: LogFall - Begging the question

**B feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches ad hominem.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches ad hominem.
Study link: LogFall - False dilemma

---

### fallacies-035 | Level 2 | Answer C

**Prompt.** During a debate about medication reminder texts for older patients, Avery says, "If the hospital agrees to send medication reminder texts before evening doses, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>correct | **D.** Red herring: changes the subject instead of addressing the issue<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, health, d2

**A feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches slippery slope.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches slippery slope.
Study link: LogFall - False dilemma

**C feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches slippery slope.
Study link: LogFall - Red herring

### fallacies-036 | Level 2 | Answer D

**Prompt.** During a debate about a four-day workweek test for software engineers, Taylor says the company should test a Monday-through-Thursday workweek because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, workplace, d2

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to popularity.
Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to popularity.
Study link: LogFall - Begging the question

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

**D feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

### fallacies-037 | Level 2 | Answer A

**Prompt.** During a debate about larger grocery unit-price labels, Morgan writes that the grocery chain should add larger unit-price labels on shelf tags because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>correct | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, retail, d2

**A feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches circular reasoning.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches circular reasoning.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches circular reasoning.
Study link: LogFall - False dilemma

---

### fallacies-038 | Level 2 | Answer B

**Prompt.** During a debate about late fines on children's books, Casey points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>correct |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, public services, d2

**A feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches hasty generalization.
Study link: LogFall - Appeal to tradition

**B feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches hasty generalization.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches hasty generalization.
Study link: LogFall - Straw man argument

### fallacies-039 | Level 2 | Answer C

**Prompt.** During a debate about two-factor login for site administrators, Sam asks whether requiring two-factor login for site administrators would affect admin account takeovers. Jordan answers by talking about this side detail: the login button changed from green to blue. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>correct | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, technology, d2

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches red herring.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches red herring.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches red herring.
Study link: LogFall - Straw man argument

### fallacies-040 | Level 2 | Answer D

**Prompt.** During a debate about brighter streetlights on Maple Street, Riley says the neighborhood association should not add brighter LED streetlights on Maple Street because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>correct |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, public safety, d2

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to tradition.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches appeal to tradition.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches appeal to tradition.
Study link: LogFall - Argumentum ad populum

**D feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

### fallacies-041 | Level 2 | Answer C

**Prompt.** During a debate about peer tutoring for first-year statistics students, Maya says, "Course pass rates rose by 11% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>correct | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, education, d2

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches post hoc.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches post hoc.
Study link: LogFall - Hasty generalization

**C feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches post hoc.
Study link: LogFall - False dilemma

### fallacies-042 | Level 2 | Answer D

**Prompt.** During a debate about calorie labels on restaurant menus, Sam asks for one more small test before the restaurant group decides. Morgan replies, "Sam wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Red herring: changes the subject instead of addressing the issue<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>correct |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, nutrition, d2

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches straw man.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches straw man.
Study link: LogFall - Red herring

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches straw man.
Study link: LogFall - Argumentum ad populum

**D feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

### fallacies-043 | Level 2 | Answer B

**Prompt.** During a debate about bank overdraft warning texts, Avery says, "Either the bank must send overdraft warning texts before fees post right now, or it does not care about checking-account customers at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>correct |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, finance, d2

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches false dilemma.
Study link: LogFall - Red herring

**B feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches false dilemma.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches false dilemma.
Study link: LogFall - Hasty generalization

### fallacies-044 | Level 2 | Answer D

**Prompt.** During a debate about timed-entry passes for weekend park trails, Taylor rejects Jordan's proposal to use timed-entry passes for weekend trail visits because Jordan once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>correct |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, environment, d2

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches ad hominem.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches ad hominem.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches ad hominem.
Study link: LogFall - Appeal to tradition

**D feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

### fallacies-045 | Level 2 | Answer B

**Prompt.** During a debate about free Friday museum admission, Morgan says, "If the museum agrees to offer free admission on Fridays, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>correct |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, culture, d2

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches slippery slope.
Study link: LogFall - False dilemma

**B feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches slippery slope.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches slippery slope.
Study link: LogFall - Begging the question

### fallacies-046 | Level 2 | Answer A

**Prompt.** During a debate about youth soccer concussion checks, Casey says the sports league should add mandatory sideline concussion checks because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, sports, d2

**A feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches appeal to popularity.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches appeal to popularity.
Study link: LogFall - Ad hominem

### fallacies-047 | Level 2 | Answer D

**Prompt.** During a debate about same-day donation receipts, Jordan writes that the nonprofit should send donation receipts within one day because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>correct |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, nonprofit, d2

**A feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches circular reasoning.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches circular reasoning.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches circular reasoning.
Study link: LogFall - Appeal to tradition

**D feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

### fallacies-048 | Level 2 | Answer C

**Prompt.** During a debate about warehouse ergonomic training, Riley points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>correct | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, workplace safety, d2

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches hasty generalization.

Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches hasty generalization.
Study link: LogFall - Ad hominem

**C feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches hasty generalization.
Study link: LogFall - Argumentum ad populum

### fallacies-049 | Level 2 | Answer B

**Prompt.** During a debate about apartment-lobby compost bins, Taylor asks whether placing compost bins in apartment lobbies would affect landfill waste from participating buildings. Maya answers by talking about this side detail: the lobby compost bins have foot pedals. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Red herring: changes the subject instead of addressing the issue<br>correct |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, environment, d2

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches red herring.
Study link: LogFall - Begging the question

**B feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches red herring.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches red herring.
Study link: LogFall - Argumentum ad populum

### fallacies-050 | Level 2 | Answer A

**Prompt.** During a debate about private-by-default app profiles, Sam says the app maker should not make new user profiles private by default because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to tradition: treats old habits as proof the claim is right<br>correct | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Slippery slope: predicts a chain reaction without enough support<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, technology, d2

**A feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to tradition.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to tradition.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches appeal to tradition.
Study link: LogFall - Slippery slope

---

### fallacies-051 | Level 2 | Answer D

**Prompt.** During a debate about same-day clinic appointment slots, Avery says, "Patient no-show rates fell by 13% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>correct |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, health, d2

**A feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches post hoc.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches post hoc.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches post hoc.
Study link: LogFall - Hasty generalization

**D feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

---

### fallacies-052 | Level 2 | Answer B

**Prompt.** During a debate about seat-zone airline boarding, Taylor asks for one more small test before the airline decides. Jordan replies, "Taylor wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>correct |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, travel, d2

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches straw man.
Study link: LogFall - Hasty generalization

**B feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches straw man.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches straw man.
Study link: LogFall - Post hoc ergo propter hoc

---

### fallacies-053 | Level 2 | Answer A

**Prompt.** During a debate about an online apartment repair portal, Morgan says, "Either the landlord must launch an online apartment repair portal right now, or it does not care about apartment tenants at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>correct | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Slippery slope: predicts a chain reaction without enough support<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, housing, d2

**A feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches false dilemma.
Study link: LogFall - Begging the question

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches false dilemma.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches false dilemma.
Study link: LogFall - Slippery slope

---

### fallacies-054 | Level 2 | Answer C

**Prompt.** During a debate about fruit placement in a school cafeteria line, Casey rejects Maya's proposal to move fruit bowls to the front of the cafeteria line because Maya once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>correct | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as

contrast cases.

Tags: fallacies, fallacy, ad-hominem, food, d2

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches ad hominem.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches ad hominem.
Study link: LogFall - False dilemma

**C feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches ad hominem.
Study link: LogFall - Appeal to tradition

### fallacies-055 | Level 2 | Answer C

**Prompt.** During a debate about weekly call-center script coaching, Jordan says, "If the call center agrees to give support agents weekly script coaching, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>correct | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, customer support, d2

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches slippery slope.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches slippery slope.
Study link: LogFall - Ad hominem

**C feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches slippery slope.
Study link: LogFall - Straw man argument

### fallacies-056 | Level 2 | Answer D

**Prompt.** During a debate about household water-leak alerts, Riley says the water utility should send automatic household water-leak alerts because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as

contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, utilities, d2

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches appeal to popularity.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches appeal to popularity.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to popularity.
Study link: LogFall - Hasty generalization

**D feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

---

### fallacies-057 | Level 2 | Answer C

**Prompt.** During a debate about body-camera activation reminders, Maya writes that the police department should send body-camera activation reminders before patrol shifts because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>correct | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, governance, d2

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches circular reasoning.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches circular reasoning.
Study link: LogFall - Slippery slope

**C feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches circular reasoning.
Study link: LogFall - Straw man argument

### fallacies-058 | Level 2 | Answer D

**Prompt.** During a debate about county mail-ballot tracking, Sam points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>correct |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, election administration, d2

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches hasty generalization.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches hasty generalization.
Study link: LogFall - Begging the question

**C feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches hasty generalization.
Study link: LogFall - Straw man argument

**D feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

### fallacies-059 | Level 2 | Answer A

**Prompt.** During a debate about language-learning spaced-review prompts, Casey asks whether sending spaced-review prompts for language vocabulary would affect vocabulary retention quiz scores. Avery answers by talking about this side detail: the review prompts use a bell icon. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>correct | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, learning, d2

**A feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches red herring.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches red herring.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches red herring.
Study link: LogFall - False dilemma

### fallacies-060 | Level 2 | Answer B

**Prompt.** During a debate about a beginner gym orientation, Taylor says the gym should not offer a beginner gym orientation because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>correct |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** Slippery slope: predicts a chain reaction without enough support<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, fitness, d2

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to tradition.
Study link: LogFall - Hasty generalization

**B feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to tradition.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches appeal to tradition.
Study link: LogFall - Slippery slope

### fallacies-061 | Level 2 | Answer C

**Prompt.** During a debate about safe-driving feedback for policyholders, Morgan says, "Reported minor crashes fell by 8% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>correct | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, insurance, d2

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches post hoc.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches post hoc.
Study link: LogFall - Straw man argument

**C feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches post hoc.

Study link: LogFall - False dilemma

### fallacies-062 | Level 2 | Answer A

**Prompt.** During a debate about top-of-article correction boxes, Casey asks for one more small test before the newsroom decides. Maya replies, "Casey wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>correct | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, media, d2

**A feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches straw man.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches straw man.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches straw man.
Study link: LogFall - Hasty generalization

### fallacies-063 | Level 2 | Answer B

**Prompt.** During a debate about clearer farmers market price signs, Jordan says, "Either the farmers market must require clearer price signs at vendor stalls right now, or it does not care about weekend farmers market shoppers at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>correct |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, local commerce, d2

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches false dilemma.
Study link: LogFall - Begging the question

**B feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches false dilemma.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches false dilemma.
Study link: LogFall - Ad hominem

### fallacies-064 | Level 2 | Answer A

**Prompt.** During a debate about hotel quiet-hours text reminders, Riley rejects Avery's proposal to send quiet-hours text reminders to hotel guests because Avery once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>correct | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, hospitality, d2

**A feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches ad hominem.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches ad hominem.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches ad hominem.
Study link: LogFall - Begging the question

## Level 3

Level 3 asks for steadier discrimination: the right answer is still objective, but the wrong answers often sound plausible.

### fallacies-065 | Level 3 | Answer D

**Prompt.** During a debate about evening bus service for late-shift workers, Sam rejects Morgan's proposal to extend evening bus service until midnight because Morgan once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>correct |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, transportation, d3

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches ad hominem.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches ad hominem.

Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches ad hominem.
Study link: LogFall - Hasty generalization

**D feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

### fallacies-066 | Level 3 | Answer C

**Prompt.** During a debate about classroom phone lockers, Avery says, "If the school board agrees to require phone lockers during class, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>correct | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, education, d3

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches slippery slope.
Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches slippery slope.
Study link: LogFall - False dilemma

**C feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches slippery slope.
Study link: LogFall - Begging the question

### fallacies-067 | Level 3 | Answer B

**Prompt.** During a debate about medication reminder texts for older patients, Taylor says the hospital should send medication reminder texts before evening doses because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, health, d3

**A feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches appeal to popularity.
Study link: LogFall - Straw man argument

**B feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to popularity.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

### fallacies-068 | Level 3 | Answer A

**Prompt.** During a debate about a four-day workweek test for software engineers, Morgan writes that the company should test a Monday-through-Thursday workweek because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>correct | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, workplace, d3

**A feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches circular reasoning.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches circular reasoning.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches circular reasoning.
Study link: LogFall - Hasty generalization

### fallacies-069 | Level 3 | Answer D

**Prompt.** During a debate about larger grocery unit-price labels, Casey points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **B.** Red herring: changes the subject instead of addressing the issue<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>correct |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, retail, d3

**A feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches hasty generalization.

Study link: LogFall - Appeal to tradition

**B feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches hasty generalization.
Study link: LogFall - Red herring

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches hasty generalization.
Study link: LogFall - Ad hominem

**D feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

### fallacies-070 | Level 3 | Answer C

**Prompt.** During a debate about late fines on children's books, Sam asks whether waiving late fines for children's books would affect library card renewals. Jordan answers by talking about this side detail: the children's-book checkout desk moved six feet. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>correct | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, public services, d3

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches red herring.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches red herring.
Study link: LogFall - False dilemma

**C feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches red herring.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-071 | Level 3 | Answer B

**Prompt.** During a debate about two-factor login for site administrators, Riley says the platform should not require two-factor login for site administrators because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>correct |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, technology, d3

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to tradition.
Study link: LogFall - Begging the question

**B feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to tradition.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to tradition.
Study link: LogFall - Hasty generalization

### fallacies-072 | Level 3 | Answer A

**Prompt.** During a debate about brighter streetlights on Maple Street, Maya says, "Reported thefts fell by 12% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>correct | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, public safety, d3

**A feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches post hoc.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches post hoc.
Study link: LogFall - Straw man argument

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches post hoc.
Study link: LogFall - False dilemma

### fallacies-073 | Level 3 | Answer D

**Prompt.** During a debate about peer tutoring for first-year statistics students, Sam asks for one more small test before the university decides. Morgan replies, "Sam wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>correct |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, education, d3

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches straw man.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches straw man.
Study link: LogFall - Begging the question

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches straw man.
Study link: LogFall - Appeal to tradition

**D feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

---

### fallacies-074 | Level 3 | Answer C

**Prompt.** During a debate about calorie labels on restaurant menus, Avery says, "Either the restaurant group must show calorie labels on printed lunch menus right now, or it does not care about lunch customers at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>correct | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, nutrition, d3

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches false dilemma.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches false dilemma.
Study link: LogFall - Ad hominem

**C feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches false dilemma.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-075 | Level 3 | Answer A

**Prompt.** During a debate about bank overdraft warning texts, Taylor rejects Jordan's proposal to send overdraft warning texts before fees post because Jordan once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>correct | **B.** Red herring: changes the subject instead of addressing the issue<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, finance, d3

**A feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches ad hominem.
Study link: LogFall - Red herring

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches ad hominem.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches ad hominem.
Study link: LogFall - Appeal to tradition

### fallacies-076 | Level 3 | Answer B

**Prompt.** During a debate about timed-entry passes for weekend park trails, Morgan says, "If the park service agrees to use timed-entry passes for weekend trail visits, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>correct |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, environment, d3

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches slippery slope.
Study link: LogFall - Begging the question

**B feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches slippery slope.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches slippery slope.
Study link: LogFall - False dilemma

### fallacies-077 | Level 3 | Answer C

**Prompt.** During a debate about free Friday museum admission, Casey says the museum should offer free admission on Fridays because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, culture, d3

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to popularity.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to popularity.
Study link: LogFall - Begging the question

**C feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

### fallacies-078 | Level 3 | Answer D

**Prompt.** During a debate about youth soccer concussion checks, Jordan writes that the sports league should add mandatory sideline concussion checks because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>correct |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, sports, d3

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches circular reasoning.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches circular reasoning.
Study link: LogFall - Ad hominem

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches circular reasoning.
Study link: LogFall - Slippery slope

**D feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

### fallacies-079 | Level 3 | Answer C

**Prompt.** During a debate about same-day donation receipts, Riley points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>correct | **D.** Red herring: changes the subject instead of addressing the issue<br>choice |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, nonprofit, d3

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches hasty generalization.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches hasty generalization.
Study link: LogFall - False dilemma

**C feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches hasty generalization.
Study link: LogFall - Red herring

### fallacies-080 | Level 3 | Answer A

**Prompt.** During a debate about warehouse ergonomic training, Taylor asks whether offering monthly lifting-safety and ergonomic training would affect back-injury claims. Maya answers by talking about this side detail: the training room has a ceiling-mounted projector. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>correct | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, workplace safety, d3

**A feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches red herring.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches red herring.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches red herring.

Study link: LogFall - Post hoc ergo propter hoc

### fallacies-081 | Level 3 | Answer C

**Prompt.** During a debate about apartment-lobby compost bins, Sam says the city sanitation office should not place compost bins in apartment lobbies because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>correct | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, environment, d3

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to tradition.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches appeal to tradition.
Study link: LogFall - Argumentum ad populum

**C feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to tradition.
Study link: LogFall - Begging the question

### fallacies-082 | Level 3 | Answer A

**Prompt.** During a debate about private-by-default app profiles, Avery says, "Publicly visible profiles fell by 48% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>correct | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, technology, d3

**A feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches post hoc.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches post hoc.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches post hoc.
Study link: LogFall - Appeal to tradition

### fallacies-083 | Level 3 | Answer C

**Prompt.** During a debate about same-day clinic appointment slots, Taylor asks for one more small test before the clinic decides. Jordan replies, "Taylor wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>correct | **D.** Ad hominem: attacks the person rather than answering the argument<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, health, d3

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches straw man.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches straw man.
Study link: LogFall - Begging the question

**C feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**D feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches straw man.
Study link: LogFall - Ad hominem

### fallacies-084 | Level 3 | Answer A

**Prompt.** During a debate about seat-zone airline boarding, Morgan says, "Either the airline must board passengers by seat zone right now, or it does not care about domestic flight passengers at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>correct | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, travel, d3

**A feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches false dilemma.
Study link: LogFall - Hasty generalization

**C feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches false dilemma.
Study link: LogFall - Straw man argument

**D feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches false dilemma.
Study link: LogFall - Argumentum ad populum

### fallacies-085 | Level 3 | Answer B

**Prompt.** During a debate about an online apartment repair portal, Casey rejects Maya's proposal to launch an online apartment repair portal because Maya once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>correct |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, housing, d3

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches ad hominem.
Study link: LogFall - Hasty generalization

**B feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches ad hominem.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches ad hominem.
Study link: LogFall - Straw man argument

### fallacies-086 | Level 3 | Answer D

**Prompt.** During a debate about fruit placement in a school cafeteria line, Jordan says, "If the cafeteria agrees to move fruit bowls to the front of the cafeteria line, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>choice | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Slippery slope: predicts a chain reaction without enough support<br>correct |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, food, d3

**A feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches slippery slope.
Study link: LogFall - Straw man argument

**B feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches slippery slope.
Study link: LogFall - Hasty generalization

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches slippery slope.
Study link: LogFall - False dilemma

**D feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

### fallacies-087 | Level 3 | Answer B

**Prompt.** During a debate about weekly call-center script coaching, Riley says the call center should give support agents weekly script coaching because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, customer support, d3

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

**B feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches appeal to popularity.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches appeal to popularity.
Study link: LogFall - Appeal to tradition

### fallacies-088 | Level 3 | Answer A

**Prompt.** During a debate about household water-leak alerts, Maya writes that the water utility should send automatic household water-leak alerts because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>correct | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, utilities, d3

**A feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches circular reasoning.
Study link: LogFall - Hasty generalization

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches circular reasoning.

Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches circular reasoning.
Study link: LogFall - Appeal to tradition

### fallacies-089 | Level 3 | Answer B

**Prompt.** During a debate about body-camera activation reminders, Sam points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>correct |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, governance, d3

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches hasty generalization.
Study link: LogFall - Argumentum ad populum

**B feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches hasty generalization.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches hasty generalization.
Study link: LogFall - Appeal to tradition

### fallacies-090 | Level 3 | Answer D

**Prompt.** During a debate about county mail-ballot tracking, Casey asks whether offering online mail-ballot tracking would affect phone calls asking ballot status. Avery answers by talking about this side detail: the ballot-tracking page uses county colors. Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **D.** Red herring: changes the subject instead of addressing the issue<br>correct |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, election administration, d3

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches red herring.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches red herring.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches red herring.
Study link: LogFall - Begging the question

**D feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

### fallacies-091 | Level 3 | Answer B

**Prompt.** During a debate about language-learning spaced-review prompts, Taylor says the tutoring app should not send spaced-review prompts for language vocabulary because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>correct |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, learning, d3

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to tradition.
Study link: LogFall - Red herring

**B feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to tradition.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to tradition.
Study link: LogFall - Begging the question

### fallacies-092 | Level 3 | Answer D

**Prompt.** During a debate about a beginner gym orientation, Morgan says, "New-member cancellations fell by 19% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>correct |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, fitness, d3

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches post hoc.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches post hoc.
Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches post hoc.
Study link: LogFall - False dilemma

**D feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-093 | Level 3 | Answer B

**Prompt.** During a debate about safe-driving feedback for policyholders, Casey asks for one more small test before the insurer decides. Maya replies, "Casey wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>correct |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, insurance, d3

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches straw man.
Study link: LogFall - Begging the question

**B feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches straw man.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches straw man.
Study link: LogFall - False dilemma

### fallacies-094 | Level 3 | Answer A

**Prompt.** During a debate about top-of-article correction boxes, Jordan says, "Either the newsroom must place corrections at the top of articles right now, or it does not care about newsletter readers at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>correct | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, media, d3

**A feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.

Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches false dilemma.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches false dilemma.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches false dilemma.
Study link: LogFall - Argumentum ad populum

### fallacies-095 | Level 3 | Answer C

**Prompt.** During a debate about clearer farmers market price signs, Riley rejects Avery's proposal to require clearer price signs at vendor stalls because Avery once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>correct | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, local commerce, d3

**A feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches ad hominem.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches ad hominem.
Study link: LogFall - Begging the question

**C feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches ad hominem.
Study link: LogFall - Hasty generalization

### fallacies-096 | Level 3 | Answer D

**Prompt.** During a debate about hotel quiet-hours text reminders, Maya says, "If the hotel agrees to send quiet-hours text reminders to hotel guests, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Slippery slope: predicts a chain reaction without enough support<br>correct |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, hospitality, d3

**A feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches slippery slope.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches slippery slope.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches slippery slope.
Study link: LogFall - False dilemma

**D feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

# Level 4

Level 4 asks learners to hold more context in mind while applying the same method.

### fallacies-097 | Level 4 | Answer C

**Prompt.** During a debate about evening bus service for late-shift workers, Avery says, "If the city council agrees to extend evening bus service until midnight, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>choice | **B.** Red herring: changes the subject instead of addressing the issue<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>correct | **D.** Ad hominem: attacks the person rather than answering the argument<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, transportation, d4

**A feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches slippery slope.
Study link: LogFall - Straw man argument

**B feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches slippery slope.
Study link: LogFall - Red herring

**C feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches slippery slope.
Study link: LogFall - Ad hominem

### fallacies-098 | Level 4 | Answer D

**Prompt.** During a debate about classroom phone lockers, Taylor says the school board should require phone lockers during class because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, education, d4

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to popularity.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches appeal to popularity.
Study link: LogFall - Straw man argument

**D feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

### fallacies-099 | Level 4 | Answer A

**Prompt.** During a debate about medication reminder texts for older patients, Morgan writes that the hospital should send medication reminder texts before evening doses because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>correct | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, health, d4

**A feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches circular reasoning.
Study link: LogFall - Ad hominem

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches circular reasoning.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches circular reasoning.
Study link: LogFall - Hasty generalization

### fallacies-100 | Level 4 | Answer B

**Prompt.** During a debate about a four-day workweek test for software engineers, Casey points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>correct |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, workplace, d4

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches hasty generalization.
Study link: LogFall - Red herring

**B feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches hasty generalization.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches hasty generalization.
Study link: LogFall - Straw man argument

### fallacies-101 | Level 4 | Answer C

**Prompt.** During a debate about larger grocery unit-price labels, Sam asks whether adding larger unit-price labels on shelf tags would affect shopper overpayment complaints. Jordan answers by talking about this side detail: the shelf labels use bold black numbers. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>correct | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, retail, d4

**A feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches red herring.
Study link: LogFall - Appeal to tradition

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches red herring.
Study link: LogFall - Slippery slope

**C feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches red herring.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-102 | Level 4 | Answer D

**Prompt.** During a debate about late fines on children's books, Riley says the library should not waive late fines for children's books because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>correct |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, public services, d4

**A feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches appeal to tradition.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches appeal to tradition.
Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches appeal to tradition.
Study link: LogFall - Ad hominem

**D feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

### fallacies-103 | Level 4 | Answer A

**Prompt.** During a debate about two-factor login for site administrators, Maya says, "Admin account takeovers fell by 44% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>correct | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, technology, d4

**A feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches post hoc.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches post hoc.

Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches post hoc.
Study link: LogFall - False dilemma

### fallacies-104 | Level 4 | Answer B

**Prompt.** During a debate about brighter streetlights on Maple Street, Sam asks for one more small test before the neighborhood association decides. Morgan replies, "Sam wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>correct |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, public safety, d4

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches straw man.
Study link: LogFall - Slippery slope

**B feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches straw man.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches straw man.
Study link: LogFall - Begging the question

### fallacies-105 | Level 4 | Answer C

**Prompt.** During a debate about peer tutoring for first-year statistics students, Avery says, "Either the university must expand peer tutoring in statistics right now, or it does not care about first-year statistics students at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>correct | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, education, d4

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches false dilemma.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches false dilemma.

Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches false dilemma.
Study link: LogFall - Begging the question

### fallacies-106 | Level 4 | Answer D

**Prompt.** During a debate about calorie labels on restaurant menus, Taylor rejects Jordan's proposal to show calorie labels on printed lunch menus because Jordan once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Red herring: changes the subject instead of addressing the issue<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>correct |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, nutrition, d4

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches ad hominem.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches ad hominem.
Study link: LogFall - Red herring

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches ad hominem.
Study link: LogFall - Hasty generalization

**D feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

### fallacies-107 | Level 4 | Answer D

**Prompt.** During a debate about bank overdraft warning texts, Morgan says, "If the bank agrees to send overdraft warning texts before fees post, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Slippery slope: predicts a chain reaction without enough support<br>correct |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, finance, d4

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches slippery slope.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches slippery slope.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches slippery slope.
Study link: LogFall - False dilemma

**D feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

---

### fallacies-108 | Level 4 | Answer C

**Prompt.** During a debate about timed-entry passes for weekend park trails, Casey says the park service should use timed-entry passes for weekend trail visits because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, environment, d4

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches appeal to popularity.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches appeal to popularity.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches appeal to popularity.
Study link: LogFall - Straw man argument

---

### fallacies-109 | Level 4 | Answer B

**Prompt.** During a debate about free Friday museum admission, Jordan writes that the museum should offer free admission on Fridays because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>correct |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **D.** Red herring: changes the subject instead of addressing the issue<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, culture, d4

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches circular reasoning.
Study link: LogFall - Slippery slope

**B feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**C feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches circular reasoning.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches circular reasoning.
Study link: LogFall - Red herring

---

### fallacies-110 | Level 4 | Answer A

**Prompt.** During a debate about youth soccer concussion checks, Riley points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>correct | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, sports, d4

**A feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches hasty generalization.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches hasty generalization.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches hasty generalization.
Study link: LogFall - Straw man argument

---

### fallacies-111 | Level 4 | Answer D

**Prompt.** During a debate about same-day donation receipts, Taylor asks whether sending donation receipts within one day would affect donor retention. Maya answers by talking about this side detail: the receipt email subject line changed. Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **D.** Red herring: changes the subject instead of addressing the issue<br>correct |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, nonprofit, d4

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches red herring.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches red herring.
Study link: LogFall - Hasty generalization

**C feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches red herring.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

---

### fallacies-112 | Level 4 | Answer C

**Prompt.** During a debate about warehouse ergonomic training, Sam says the warehouse should not offer monthly lifting-safety and ergonomic training because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>correct | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, workplace safety, d4

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches appeal to tradition.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches appeal to tradition.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches appeal to tradition.
Study link: LogFall - Straw man argument

---

### fallacies-113 | Level 4 | Answer B

**Prompt.** During a debate about apartment-lobby compost bins, Avery says, "Landfill waste from participating buildings fell by 17% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Post hoc: treats timing as enough proof of cause by itself<br>correct |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Red herring: changes the subject instead of addressing the issue<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast

cases.

Tags: fallacies, fallacy, post-hoc, environment, d4

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches post hoc.
Study link: LogFall - False dilemma

**B feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches post hoc.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches post hoc.
Study link: LogFall - Red herring

### fallacies-114 | Level 4 | Answer A

**Prompt.** During a debate about private-by-default app profiles, Taylor asks for one more small test before the app maker decides. Jordan replies, "Taylor wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>correct | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** Red herring: changes the subject instead of addressing the issue<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, technology, d4

**A feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches straw man.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches straw man.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches straw man.
Study link: LogFall - Red herring

### fallacies-115 | Level 4 | Answer B

**Prompt.** During a debate about same-day clinic appointment slots, Morgan says, "Either the clinic must reserve same-day appointment slots right now, or it does not care about primary-care patients at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>correct |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, health, d4

**A feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches false dilemma.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches false dilemma.
Study link: LogFall - Begging the question

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches false dilemma.
Study link: LogFall - Straw man argument

---

### fallacies-116 | Level 4 | Answer A

**Prompt.** During a debate about seat-zone airline boarding, Casey rejects Maya's proposal to board passengers by seat zone because Maya once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>correct | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, travel, d4

**A feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches ad hominem.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches ad hominem.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches ad hominem.
Study link: LogFall - Begging the question

### fallacies-117 | Level 4 | Answer A

**Prompt.** During a debate about an online apartment repair portal, Jordan says, "If the landlord agrees to launch an online apartment repair portal, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>correct | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, housing, d4

**A feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches slippery slope.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches slippery slope.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches slippery slope.
Study link: LogFall - False dilemma

### fallacies-118 | Level 4 | Answer B

**Prompt.** During a debate about fruit placement in a school cafeteria line, Riley says the cafeteria should move fruit bowls to the front of the cafeteria line because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, food, d4

**A feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches appeal to popularity.
Study link: LogFall - Ad hominem

**B feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to popularity.
Study link: LogFall - Begging the question

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

### fallacies-119 | Level 4 | Answer C

**Prompt.** During a debate about weekly call-center script coaching, Maya writes that the call center should give support agents weekly script coaching because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Red herring: changes the subject instead of addressing the issue<br>choice |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>correct | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, customer support, d4

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches circular reasoning.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches circular reasoning.
Study link: LogFall - Red herring

**C feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches circular reasoning.
Study link: LogFall - Appeal to tradition

### fallacies-120 | Level 4 | Answer D

**Prompt.** During a debate about household water-leak alerts, Sam points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>correct |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, utilities, d4

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches hasty generalization.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches hasty generalization.
Study link: LogFall - Ad hominem

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches hasty generalization.
Study link: LogFall - Red herring

**D feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.

Study link: LogFall - Hasty generalization

### fallacies-121 | Level 4 | Answer A

**Prompt.** During a debate about body-camera activation reminders, Casey asks whether sending body-camera activation reminders before patrol shifts would affect missing-camera-footage reports. Avery answers by talking about this side detail: the reminder tone is two beeps. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>correct | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, governance, d4

**A feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches red herring.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches red herring.
Study link: LogFall - Begging the question

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches red herring.
Study link: LogFall - Hasty generalization

### fallacies-122 | Level 4 | Answer B

**Prompt.** During a debate about county mail-ballot tracking, Taylor says the election office should not offer online mail-ballot tracking because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>correct |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>choice | **D.** Red herring: changes the subject instead of addressing the issue<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, election administration, d4

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to tradition.
Study link: LogFall - Begging the question

**B feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches appeal to tradition.
Study link: LogFall - Straw man argument

**D feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to tradition.
Study link: LogFall - Red herring

### fallacies-123 | Level 4 | Answer C

**Prompt.** During a debate about language-learning spaced-review prompts, Morgan says, "Vocabulary retention quiz scores rose by 12% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>correct | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, learning, d4

**A feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches post hoc.
Study link: LogFall - Appeal to tradition

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches post hoc.
Study link: LogFall - Straw man argument

**C feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches post hoc.
Study link: LogFall - False dilemma

### fallacies-124 | Level 4 | Answer D

**Prompt.** During a debate about a beginner gym orientation, Casey asks for one more small test before the gym decides. Maya replies, "Casey wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>correct |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, fitness, d4

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches straw man.
Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches straw man.
Study link: LogFall - Begging the question

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches straw man.

Study link: LogFall - Ad hominem

**D feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

### fallacies-125 | Level 4 | Answer C

**Prompt.** During a debate about safe-driving feedback for policyholders, Jordan says, "Either the insurer must send weekly safe-driving feedback right now, or it does not care about auto-insurance policyholders at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>correct | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, insurance, d4

**A feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches false dilemma.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches false dilemma.
Study link: LogFall - Slippery slope

**C feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches false dilemma.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-126 | Level 4 | Answer D

**Prompt.** During a debate about top-of-article correction boxes, Riley rejects Avery's proposal to place corrections at the top of articles because Avery once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>correct |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, media, d4

**A feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches ad hominem.
Study link: LogFall - Appeal to tradition

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches ad hominem.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches ad hominem.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

### fallacies-127 | Level 4 | Answer B

**Prompt.** During a debate about clearer farmers market price signs, Maya says, "If the farmers market agrees to require clearer price signs at vendor stalls, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Slippery slope: predicts a chain reaction without enough support<br>correct |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, local commerce, d4

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches slippery slope.
Study link: LogFall - Red herring

**B feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**C feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches slippery slope.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches slippery slope.
Study link: LogFall - Begging the question

### fallacies-128 | Level 4 | Answer A

**Prompt.** During a debate about hotel quiet-hours text reminders, Sam says the hotel should send quiet-hours text reminders to hotel guests because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, hospitality, d4

**A feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches appeal to popularity.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to popularity.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches appeal to popularity.
Study link: LogFall - Straw man argument

# Level 5

Level 5 is for fluency: the learner should now name the thinking move and explain the elimination path.

### fallacies-129 | Level 5 | Answer D

**Prompt.** During a debate about evening bus service for late-shift workers, Taylor says the city council should extend evening bus service until midnight because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, transportation, d5

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches appeal to popularity.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to popularity.
Study link: LogFall - Red herring

**D feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

### fallacies-130 | Level 5 | Answer C

**Prompt.** During a debate about classroom phone lockers, Morgan writes that the school board should require phone lockers during class because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>correct | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, education, d5

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches circular reasoning.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches circular reasoning.
Study link: LogFall - Ad hominem

**C feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches circular reasoning.
Study link: LogFall - Appeal to tradition

### fallacies-131 | Level 5 | Answer B

**Prompt.** During a debate about medication reminder texts for older patients, Casey points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Hasty generalization: jumps from little evidence to a broad claim<br>correct |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>choice |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, health, d5

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches hasty generalization.
Study link: LogFall - Red herring

**B feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches hasty generalization.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches hasty generalization.
Study link: LogFall - Ad hominem

### fallacies-132 | Level 5 | Answer A

**Prompt.** During a debate about a four-day workweek test for software engineers, Sam asks whether testing a Monday-through-Thursday workweek would affect staff resignations. Jordan answers by talking about this side detail: the test calendar starts on a Monday. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>correct | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** Slippery slope: predicts a chain reaction without enough support<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, workplace, d5

**A feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches red herring.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches red herring.
Study link: LogFall - Slippery slope

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches red herring.
Study link: LogFall - Appeal to tradition

### fallacies-133 | Level 5 | Answer D

**Prompt.** During a debate about larger grocery unit-price labels, Riley says the grocery chain should not add larger unit-price labels on shelf tags because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Red herring: changes the subject instead of addressing the issue<br>choice |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>correct |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, retail, d5

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to tradition.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches appeal to tradition.
Study link: LogFall - Red herring

**C feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to tradition.
Study link: LogFall - Begging the question

**D feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

### fallacies-134 | Level 5 | Answer C

**Prompt.** During a debate about late fines on children's books, Maya says, "Library card renewals rose by 19% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>correct | **D.** Ad hominem: attacks the person rather than answering the argument<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast

cases.

Tags: fallacies, fallacy, post-hoc, public services, d5

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches post hoc.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches post hoc.
Study link: LogFall - Argumentum ad populum

**C feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches post hoc.
Study link: LogFall - Ad hominem

### fallacies-135 | Level 5 | Answer B

**Prompt.** During a debate about two-factor login for site administrators, Sam asks for one more small test before the platform decides. Morgan replies, "Sam wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>correct |
| **C.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, technology, d5

**A feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches straw man.
Study link: LogFall - Ad hominem

**B feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**C feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches straw man.
Study link: LogFall - Post hoc ergo propter hoc

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches straw man.
Study link: LogFall - Hasty generalization

### fallacies-136 | Level 5 | Answer A

**Prompt.** During a debate about brighter streetlights on Maple Street, Avery says, "Either the neighborhood association must add brighter LED streetlights on Maple Street right now, or it does not care about residents on Maple Street at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>correct | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, public safety, d5

**A feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches false dilemma.
Study link: LogFall - Ad hominem

**C feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches false dilemma.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches false dilemma.
Study link: LogFall - Begging the question

---

### fallacies-137 | Level 5 | Answer B

**Prompt.** During a debate about peer tutoring for first-year statistics students, Taylor rejects Jordan's proposal to expand peer tutoring in statistics because Jordan once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>correct |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, education, d5

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches ad hominem.
Study link: LogFall - False dilemma

**B feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**C feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches ad hominem.
Study link: LogFall - Straw man argument

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches ad hominem.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-138 | Level 5 | Answer A

**Prompt.** During a debate about calorie labels on restaurant menus, Morgan says, "If the restaurant group agrees to show calorie labels on printed lunch menus, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>correct | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, nutrition, d5

**A feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches slippery slope.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches slippery slope.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches slippery slope.
Study link: LogFall - Straw man argument

### fallacies-139 | Level 5 | Answer C

**Prompt.** During a debate about bank overdraft warning texts, Casey says the bank should send overdraft warning texts before fees post because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Straw man: misstates a view before attacking it as if it were real<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, finance, d5

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches appeal to popularity.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches appeal to popularity.
Study link: LogFall - Straw man argument

**C feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches appeal to popularity.
Study link: LogFall - False dilemma

### fallacies-140 | Level 5 | Answer D

**Prompt.** During a debate about timed-entry passes for weekend park trails, Jordan writes that the park service should use timed-entry passes for weekend trail visits because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>correct |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, environment, d5

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches circular reasoning.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches circular reasoning.
Study link: LogFall - Ad hominem

**C feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches circular reasoning.
Study link: LogFall - Straw man argument

**D feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

### fallacies-141 | Level 5 | Answer A

**Prompt.** During a debate about free Friday museum admission, Riley points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>correct | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, culture, d5

**A feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches hasty generalization.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches hasty generalization.
Study link: LogFall - Begging the question

**D feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches hasty generalization.
Study link: LogFall - Argumentum ad populum

### fallacies-142 | Level 5 | Answer B

**Prompt.** During a debate about youth soccer concussion checks, Taylor asks whether adding mandatory sideline concussion checks would affect repeat head injuries. Maya answers by talking about this side detail: the concussion checklist is printed on yellow paper. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **B.** Red herring: changes the subject instead of addressing the issue<br>correct |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, sports, d5

**A feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches red herring.
Study link: LogFall - Begging the question

**B feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches red herring.
Study link: LogFall - False dilemma

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches red herring.
Study link: LogFall - Appeal to tradition

### fallacies-143 | Level 5 | Answer C

**Prompt.** During a debate about same-day donation receipts, Sam says the nonprofit should not send donation receipts within one day because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** Appeal to tradition: treats old habits as proof the claim is right<br>correct | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, nonprofit, d5

**A feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches appeal to tradition.
Study link: LogFall - Straw man argument

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to tradition.
Study link: LogFall - Begging the question

**C feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**D feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to tradition.

Study link: LogFall - Hasty generalization

### fallacies-144 | Level 5 | Answer D

**Prompt.** During a debate about warehouse ergonomic training, Avery says, "Back-injury claims fell by 20% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>correct |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, workplace safety, d5

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches post hoc.
Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches post hoc.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches post hoc.
Study link: LogFall - Hasty generalization

**D feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-145 | Level 5 | Answer A

**Prompt.** During a debate about apartment-lobby compost bins, Taylor asks for one more small test before the city sanitation office decides. Jordan replies, "Taylor wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>correct | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, environment, d5

**A feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches straw man.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches straw man.

Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches straw man.
Study link: LogFall - Begging the question

### fallacies-146 | Level 5 | Answer B

**Prompt.** During a debate about private-by-default app profiles, Morgan says, "Either the app maker must make new user profiles private by default right now, or it does not care about new app users at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>correct |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Circular reasoning: uses the conclusion itself as its main support<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, technology, d5

**A feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches false dilemma.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches false dilemma.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches false dilemma.
Study link: LogFall - Begging the question

### fallacies-147 | Level 5 | Answer C

**Prompt.** During a debate about same-day clinic appointment slots, Casey rejects Maya's proposal to reserve same-day appointment slots because Maya once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **B.** Red herring: changes the subject instead of addressing the issue<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>correct | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, health, d5

**A feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches ad hominem.
Study link: LogFall - Hasty generalization

**B feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches ad hominem.
Study link: LogFall - Red herring

**C feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches ad hominem.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-148 | Level 5 | Answer D

**Prompt.** During a debate about seat-zone airline boarding, Jordan says, "If the airline agrees to board passengers by seat zone, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** False dilemma: pretends two choices are the only realistic options<br>choice |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **D.** Slippery slope: predicts a chain reaction without enough support<br>correct |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, slippery-slope, travel, d5

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches slippery slope.
Study link: LogFall - Red herring

**B feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches slippery slope.
Study link: LogFall - False dilemma

**C feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches slippery slope.
Study link: LogFall - Begging the question

**D feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

### fallacies-149 | Level 5 | Answer B

**Prompt.** During a debate about an online apartment repair portal, Riley says the landlord should launch an online apartment repair portal because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-popularity, housing, d5

**A feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches appeal to popularity.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Correct):** Correct. Appeal to popularity: Popularity is treated as proof that the idea is correct. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Argumentum ad populum

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches appeal to popularity.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches appeal to popularity.
Study link: LogFall - Appeal to tradition

### fallacies-150 | Level 5 | Answer A

**Prompt.** During a debate about fruit placement in a school cafeteria line, Maya writes that the cafeteria should move fruit bowls to the front of the cafeteria line because it is the right move, and it is the right move because it should be done. Which fallacy is showing up?

| | |
|---|---|
| **A.** Circular reasoning: uses the conclusion itself as its main support<br>correct | **B.** Post hoc: treats timing as enough proof of cause by itself<br>choice |
| **C.** Hasty generalization: jumps from little evidence to a broad claim<br>choice | **D.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |

**Core explanation.** Circular reasoning: The conclusion is used as its own support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Circular reasoning: uses the conclusion itself as its main support. Use the other labels as contrast cases.

Tags: fallacies, fallacy, circular-reasoning, food, d5

**A feedback (Correct):** Correct. Circular reasoning: The conclusion is used as its own support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Begging the question

**B feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches circular reasoning.
Study link: LogFall - Post hoc ergo propter hoc

**C feedback (Distractor):** Not quite. Hasty generalization would involve a different mistake: it jumps from little evidence to a broad claim. The debate instead matches circular reasoning.
Study link: LogFall - Hasty generalization

**D feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches circular reasoning.
Study link: LogFall - Argumentum ad populum

### fallacies-151 | Level 5 | Answer D

**Prompt.** During a debate about weekly call-center script coaching, Sam points to one group that reported success with a similar change and says the same result will happen everywhere. Which fallacy is showing up?

| | |
|---|---|
| **A.** Ad hominem: attacks the person rather than answering the argument<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>choice | **D.** Hasty generalization: jumps from little evidence to a broad claim<br>correct |

**Core explanation.** Hasty generalization: A broad conclusion is drawn from too little evidence.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Hasty generalization: jumps from little evidence to a broad claim. Use the other labels as contrast cases.

Tags: fallacies, fallacy, hasty-generalization, customer support, d5

**A feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches hasty generalization.
Study link: LogFall - Ad hominem

**B feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches hasty generalization.

Study link: LogFall - Begging the question

**C feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches hasty generalization.
Study link: LogFall - False dilemma

**D feedback (Correct):** Correct. Hasty generalization: A broad conclusion is drawn from too little evidence. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Hasty generalization

### fallacies-152 | Level 5 | Answer C

**Prompt.** During a debate about household water-leak alerts, Casey asks whether sending automatic household water-leak alerts would affect average household water use. Avery answers by talking about this side detail: the water-leak alert screen includes a blue droplet icon. Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>choice |
| **C.** Red herring: changes the subject instead of addressing the issue<br>correct | **D.** Slippery slope: predicts a chain reaction without enough support<br>choice |

**Core explanation.** Red herring: The response shifts attention to an irrelevant issue.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Red herring: changes the subject instead of addressing the issue. Use the other labels as contrast cases.

Tags: fallacies, fallacy, red-herring, utilities, d5

**A feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches red herring.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches red herring.
Study link: LogFall - Ad hominem

**C feedback (Correct):** Correct. Red herring: The response shifts attention to an irrelevant issue. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Red herring

**D feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches red herring.
Study link: LogFall - Slippery slope

### fallacies-153 | Level 5 | Answer B

**Prompt.** During a debate about body-camera activation reminders, Taylor says the police department should not send body-camera activation reminders before patrol shifts because the old way has been used for many years. Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>correct |
| **C.** Circular reasoning: uses the conclusion itself as its main support<br>choice | **D.** Post hoc: treats timing as enough proof of cause by itself<br>choice |

**Core explanation.** Appeal to tradition: The argument treats age or tradition as enough proof.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Appeal to tradition: treats old habits as proof the claim is right. Use the other labels as contrast cases.

Tags: fallacies, fallacy, appeal-to-tradition, governance, d5

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches appeal to tradition.

Study link: LogFall - Slippery slope

**B feedback (Correct):** Correct. Appeal to tradition: The argument treats age or tradition as enough proof. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Circular reasoning would involve a different mistake: it uses the conclusion itself as its main support. The debate instead matches appeal to tradition.
Study link: LogFall - Begging the question

**D feedback (Distractor):** Not quite. Post hoc would involve a different mistake: it treats timing as enough proof of cause by itself. The debate instead matches appeal to tradition.
Study link: LogFall - Post hoc ergo propter hoc

### fallacies-154 | Level 5 | Answer A

**Prompt.** During a debate about county mail-ballot tracking, Morgan says, "Phone calls asking ballot status fell by 42% in the four weeks after the plan began compared with the four weeks before it, so the policy must have caused the change." Which fallacy is showing up?

| | |
|---|---|
| **A.** Post hoc: treats timing as enough proof of cause by itself<br>correct | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Post hoc: The argument assumes that because one event came after another, the first caused the second.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Post hoc: treats timing as enough proof of cause by itself. Use the other labels as contrast cases.

Tags: fallacies, fallacy, post-hoc, election administration, d5

**A feedback (Correct):** Correct. Post hoc: The argument assumes that because one event came after another, the first caused the second. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Post hoc ergo propter hoc

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches post hoc.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches post hoc.
Study link: LogFall - Argumentum ad populum

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches post hoc.
Study link: LogFall - False dilemma

### fallacies-155 | Level 5 | Answer D

**Prompt.** During a debate about language-learning spaced-review prompts, Casey asks for one more small test before the tutoring app decides. Maya replies, "Casey wants to block every improvement forever." Which fallacy is showing up?

| | |
|---|---|
| **A.** False dilemma: pretends two choices are the only realistic options<br>choice | **B.** Red herring: changes the subject instead of addressing the issue<br>choice |
| **C.** Ad hominem: attacks the person rather than answering the argument<br>choice | **D.** Straw man: misstates a view before attacking it as if it were real<br>correct |

**Core explanation.** Straw man: The reply attacks an exaggerated version of the other person's view.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is D because the scenario matches that pattern: Straw man: misstates a view before attacking it as if it were real. Use the other labels as contrast cases.

Tags: fallacies, fallacy, straw-man, learning, d5

**A feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches straw man.
Study link: LogFall - False dilemma

**B feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches straw man.
Study link: LogFall - Red herring

**C feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches straw man.
Study link: LogFall - Ad hominem

**D feedback (Correct):** Correct. Straw man: The reply attacks an exaggerated version of the other person's view. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Straw man argument

---

### fallacies-156 | Level 5 | Answer C

**Prompt.** During a debate about a beginner gym orientation, Jordan says, "Either the gym must offer a beginner gym orientation right now, or it does not care about new gym members at all." Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>choice | **B.** Appeal to popularity: treats popularity as proof the claim is correct<br>choice |
| **C.** False dilemma: pretends two choices are the only realistic options<br>correct | **D.** Ad hominem: attacks the person rather than answering the argument<br>choice |

**Core explanation.** False dilemma: The argument acts like there are only two choices when there may be more.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: False dilemma: pretends two choices are the only realistic options. Use the other labels as contrast cases.

Tags: fallacies, fallacy, false-dilemma, fitness, d5

**A feedback (Distractor):** Not quite. Slippery slope would involve a different mistake: it predicts a chain reaction without enough support. The debate instead matches false dilemma.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Appeal to popularity would involve a different mistake: it treats popularity as proof the claim is correct. The debate instead matches false dilemma.
Study link: LogFall - Argumentum ad populum

**C feedback (Correct):** Correct. False dilemma: The argument acts like there are only two choices when there may be more. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - False dilemma

**D feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches false dilemma.
Study link: LogFall - Ad hominem

---

### fallacies-157 | Level 5 | Answer B

**Prompt.** During a debate about safe-driving feedback for policyholders, Riley rejects Avery's proposal to send weekly safe-driving feedback because Avery once made a budgeting mistake. Which fallacy is showing up?

| | |
|---|---|
| **A.** Red herring: changes the subject instead of addressing the issue<br>choice | **B.** Ad hominem: attacks the person rather than answering the argument<br>correct |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>choice | **D.** False dilemma: pretends two choices are the only realistic options<br>choice |

**Core explanation.** Ad hominem: The response attacks the person instead of the argument.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is B because the scenario matches that pattern: Ad hominem: attacks the person rather than answering the argument. Use the other labels as contrast cases.

Tags: fallacies, fallacy, ad-hominem, insurance, d5

**A feedback (Distractor):** Not quite. Red herring would involve a different mistake: it changes the subject instead of addressing the issue. The debate instead matches ad hominem.
Study link: LogFall - Red herring

**B feedback (Correct):** Correct. Ad hominem: The response attacks the person instead of the argument. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Ad hominem

**C feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches ad hominem.
Study link: LogFall - Straw man argument

**D feedback (Distractor):** Not quite. False dilemma would involve a different mistake: it pretends two choices are the only realistic options. The debate instead matches ad hominem.

### fallacies-158 | Level 5 | Answer A

**Prompt.** During a debate about top-of-article correction boxes, Maya says, "If the newsroom agrees to place corrections at the top of articles, soon every related rule will fall apart." Which fallacy is showing up?

| | |
|---|---|
| **A.** Slippery slope: predicts a chain reaction without enough support<br>correct | **B.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |
| **C.** Straw man: misstates a view before attacking it as if it were real<br>choice | **D.** Ad hominem: attacks the person rather than answering the argument<br>choice |

**Core explanation.** Slippery slope: The argument predicts an extreme chain reaction without support.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is A because the scenario matches that pattern: Slippery slope: predicts a chain reaction without enough support. Use the other labels as contrast cases.

**A feedback (Correct):** Correct. Slippery slope: The argument predicts an extreme chain reaction without support. The wording of the choice names the same mistake shown in the debate.
Study link: LogFall - Slippery slope

**B feedback (Distractor):** Not quite. Appeal to tradition would involve a different mistake: it treats old habits as proof the claim is right. The debate instead matches slippery slope.
Study link: LogFall - Appeal to tradition

**C feedback (Distractor):** Not quite. Straw man would involve a different mistake: it misstates a view before attacking it as if it were real. The debate instead matches slippery slope.
Study link: LogFall - Straw man argument

**D feedback (Distractor):** Not quite. Ad hominem would involve a different mistake: it attacks the person rather than answering the argument. The debate instead matches slippery slope.
Study link: LogFall - Ad hominem

### fallacies-159 | Level 5 | Answer C

**Prompt.** During a debate about clearer farmers market price signs, Sam says the farmers market should require clearer price signs at vendor stalls because the idea received the most likes in an online poll. Which fallacy is showing up?

| | |
|---|---|
| **A.** Straw man: misstates a view before attacking it as if it were real<br>choice | **B.** Circular reasoning: uses the conclusion itself as its main support<br>choice |
| **C.** Appeal to popularity: treats popularity as proof the claim is correct<br>correct | **D.** Appeal to tradition: treats old habits as proof the claim is right<br>choice |

**Core explanation.** Appeal to popularity: Popularity is treated as proof that the idea is correct.

**Process commentary.** To uncover the answer, describe the bad move before naming it. The correct choice is C because the scenario matches that pattern: Appeal to popularity: treats popularity as proof the claim is correct. Use the other labels as

contrast cases.
