Skill 15

Weigh Tradeoffs and Consequences

What Are the Tradeoffs?

160 Items	**1-5** Levels	**Find the clearest cost, benefit, risk, or second effect.** Objective

Essential question. What does this choice gain, and what does it give up or risk?

This PDF is designed for classroom use. It gives teachers a rigorous introduction to the skill, a repeatable solving routine, likely student confusions, a worked example, and the full XiXteen item set with choice-level feedback.

Generated from the current XiXteen corpus on 2026-10-29.

Skill 15

Weigh Tradeoffs and Consequences

What Are the Tradeoffs?

Find the clearest cost, benefit, risk, or second effect. Objective	**160** Items	**Levels 1-5** Difficulty bands

Essential question	What does this choice gain, and what does it give up or risk?
Why it matters	Decisions usually buy one good by spending another. Tradeoff thinking keeps benefits, costs, risks, delays, and second effects in the same frame.
Conceptual core	Tradeoff thinking moves students beyond pro-con lists by asking how goods compete. Time, money, attention, privacy, fairness, speed, safety, accuracy, and flexibility can all be scarce. A tradeoff is not merely a downside; it is a relationship between values or resources. Strong tradeoff answers keep the benefit and the cost in one frame.
Student method	Look for what the plan gains and what it uses up or endangers. A tradeoff is not just a downside; it is the connection between competing values or resources.
Analogy	A tradeoff is a budget for attention, money, time, or risk. Spending in one place leaves less to spend somewhere else.
Assessment focus	A good answer shows the competing benefit and cost, risk, delay, or opportunity cost in the same decision.

Teaching Sequence

1. Identify the main benefit the plan seeks.

2. Identify the resource, value, or opportunity it may use up.

3. Look for second effects on people not centered in the proposal.

4. Avoid answers that mention a cost without linking it to the choice.

Common Confusions To Watch For

1. Students may treat any negative fact as a tradeoff even if it is unrelated.

2. Students may ignore opportunity cost because no money is visibly spent.

3. Students may choose the most emotional consequence rather than the clearest competing value.

Teacher Prompts

1. What is the plan trying to improve?

2. What could get worse, receive less attention, or become riskier?

3. Who benefits, who pays, and who carries the risk?

Worked Example

Scenario	A school wants more test-prep time before exams by reducing open reading time.
Teacher think-aloud	The plan may improve short-term test practice, but it spends time that could support independent reading, curiosity, and long-term literacy. That is the tradeoff.
Student takeaway	A tradeoff names both the gain and what is spent or risked to get it.

Guided Classroom Exercise

Invented case. Use only the facts below; write on paper. Try the steps and check your work before reading the model answer. Different wording can be equally adequate.

Situation. A school has 60 minutes each week for optional study activities. It proposes moving 30 minutes from open reading to test preparation. Teachers expect more exam practice, but no evidence yet shows a score gain. Students who rely on school reading time would lose half that time.

What To Do

1. Make three labelled lines: possible benefit, cost, and affected group. Use the facts and distinguish an expected benefit from a demonstrated result.

2. Propose one alternative allocation of the 60 minutes and explain its tradeoff.

3. Write one question the school should answer before choosing a plan.

Check before reading the answer. Do all allocations total 60 minutes? Have you named who bears the cost rather than calling the proposal simply 'good' or 'bad'?

Model Answer

Possible benefit: more exam practice, with score improvement still unproven. Cost: 30 fewer minutes of open reading. Affected group: especially students dependent on school reading time. An alternative is 15 minutes of preparation and 45 of reading; it preserves more reading but provides less preparation. Ask whether a trial shows gains large enough to justify the lost reading opportunity.

Why it is adequate. It makes the limited resource explicit and compares benefits, costs, and affected students without inventing guaranteed gains.

Item Bank

Items are grouped by level. For each item, read the prompt, predict the answer, choose, and then use the feedback and process commentary to examine the reasoning path.

Level 1

Level 1 establishes the clean version of the skill: the cue is direct, the distractors are visible, and the main task is to learn the contrast.

tradeoffs-001 | Level 1 | Answer D

Prompt. The city council can extend evening bus service until midnight, which may reduce late-shift commute complaints. But the plan requires staff time that could be used for other transportation work. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the new buses were repainted blue, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might reduce late-shift commute complaints, while leaving costs and resource limits for later. choice	**D.** The tradeoff is that the plan may reduce late-shift commute complaints, but it also has the resource cost named in the prompt. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, transportation, d1

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-002 | Level 1 | Answer C

Prompt. The school board can require phone lockers during class, which may reduce classroom disruption reports. But the plan requires staff time that could be used for other education work. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the lockers are installed near the gym, because concrete details are easier to inspect than resource limits. choice
C. The question is whether reducing classroom disruption reports is worth the resources the plan would use, not just whether the benefit sounds good. correct	**D.** The decision should focus only on whether the plan might reduce classroom disruption reports, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, education, d1

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-003 | Level 1 | Answer B

Prompt. The hospital can send medication reminder texts before evening doses, which may reduce missed-dose reports. But the plan requires staff time that could be used for other health work. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the text messages use a green pill icon, because concrete details are easier to inspect than resource limits. choice	**B.** A fair judgment counts both the possible improvement in missed-dose reports and the resources the plan would use. correct
C. The benefit alone should settle the decision. choice	**D.** The decision should focus only on whether the plan might reduce missed-dose reports, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, health, d1

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-004 | Level 1 | Answer A

Prompt. The company can test a Monday-through-Thursday workweek, which may reduce staff resignations. But the plan requires staff time that could be used for other workplace work. Which statement best names the tradeoff?

A. The plan may help software engineers, but another useful need may get less support from the same resources. correct	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might reduce staff resignations, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the test calendar starts on a Monday, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, workplace, d1

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-005 | Level 1 | Answer D

Prompt. The grocery chain can add larger unit-price labels on shelf tags, which may reduce shopper overpayment complaints. But the plan requires staff time that could be used for other retail work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce shopper overpayment complaints, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the shelf labels use bold black numbers, because concrete details are easier to inspect than resource limits. choice	**D.** Both sides stay in view: possible improvement in shopper overpayment complaints and limited resources for other needs. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, retail, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-006 | Level 1 | Answer C

Prompt. The library can waive late fines for children's books, which may increase library card renewals. But the plan requires staff time that could be used for other public services work. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the children's-book checkout desk moved six feet, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The possible gain is increasing library card renewals, and the cost is the resource limit described in the prompt. correct	**D.** The decision should focus only on whether the plan might increase library card renewals, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, public services, d1

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-007 | Level 1 | Answer B

Prompt. The platform can require two-factor login for site administrators, which may reduce admin account takeovers. But the plan requires staff time that could be used for other technology work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce admin account takeovers, while leaving costs and resource limits for later. choice	**B.** The hoped-for result has to be weighed against the resources the prompt says the plan would use, instead of ignoring limits. correct
C. The main tradeoff is the visible side detail: the login button changed from green to blue, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, technology, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-008 | Level 1 | Answer A

Prompt. The neighborhood association can add brighter LED streetlights on Maple Street, which may reduce reported thefts. But the plan requires staff time that could be used for other public safety work. Which statement best names the tradeoff?

A. The benefit matters, but the resource cost named in the prompt also has to be counted in the same decision. correct	**B.** The decision should focus only on whether the plan might reduce reported thefts, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the new light poles are made of aluminum, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, public safety, d1

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-009 | Level 1 | Answer D

Prompt. The university can expand peer tutoring in statistics, which may increase course pass rates. But the plan requires staff time that could be used for other education work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might increase course pass rates, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the tutoring room has new chairs, because concrete details are easier to inspect than resource limits. choice	**D.** The possible help is real, but the plan may push another need or group aside while resources are limited. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, education, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-010 | Level 1 | Answer C

Prompt. The restaurant group can show calorie labels on printed lunch menus, which may reduce dessert orders. But the plan requires staff time that could be used for other nutrition work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce dessert orders, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the lunch menus are printed on thicker paper, because concrete details are easier to inspect than resource limits. choice
C. The possible improvement is weighed against the resource limit described in the prompt, not only the upside. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, nutrition, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-011 | Level 1 | Answer C

Prompt. The bank can send overdraft warning texts before fees post, which may reduce overdraft fees. But the plan requires staff time that could be used for other finance work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce overdraft fees, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the warning texts arrive from a short code, because concrete details are easier to inspect than resource limits. choice
C. The tradeoff is between reducing overdraft fees and the resource cost named in the prompt. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, finance, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-012 | Level 1 | Answer D

Prompt. The park service can use timed-entry passes for weekend trail visits, which may reduce trail crowding complaints. But the plan requires staff time that could be used for other environment work. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might reduce trail crowding complaints, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the digital passes include a small trail map, because concrete details are easier to inspect than resource limits. choice	**D.** The tradeoff compares the result people want with the resources the plan would take from other work. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, environment, d1

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-013 | Level 1 | Answer A

Prompt. The museum can offer free admission on Fridays, which may increase family visits. But the plan requires staff time that could be used for other culture work. Which statement best names the tradeoff?

A. The upside and downside stay together: possible improvement, plus the resources used or delayed by the plan. correct	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might increase family visits, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the Friday tickets are scanned at the east door, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, culture, d1

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-014 | Level 1 | Answer B

Prompt. The sports league can add mandatory sideline concussion checks, which may reduce repeat head injuries. But the plan requires staff time that could be used for other sports work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce repeat head injuries, while leaving costs and resource limits for later. choice	**B.** One goal may improve while another worthwhile goal gets fewer resources from the same pool of limited support. correct
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the concussion checklist is printed on yellow paper, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, sports, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-015 | Level 1 | Answer C

Prompt. The nonprofit can send donation receipts within one day, which may increase donor retention. But the plan requires staff time that could be used for other nonprofit work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might increase donor retention, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The hoped-for gain and the resource limit are both part of the same choice, not separate questions. correct	**D.** The main tradeoff is the visible side detail: the receipt email subject line changed, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, nonprofit, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-016 | Level 1 | Answer D

Prompt. The warehouse can offer monthly lifting-safety and ergonomic training, which may reduce back-injury claims. But the plan requires staff time that could be used for other workplace safety work. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the training room has a ceiling-mounted projector, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce back-injury claims, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The warehouse might get a better result, but only by accepting the resource cost described in the prompt. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, workplace safety, d1

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-017 | Level 1 | Answer A

Prompt. The city sanitation office can place compost bins in apartment lobbies, which may reduce landfill waste from participating buildings. But the plan requires staff time that could be used for other environment work. Which statement best names the tradeoff?

A. Reducing landfill waste from participating buildings matters, but so do the resources used by the plan and not used elsewhere. correct	**B.** The main tradeoff is the visible side detail: the lobby compost bins have foot pedals, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might reduce landfill waste from participating buildings, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, environment, d1

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-018 | Level 1 | Answer B

Prompt. The app maker can make new user profiles private by default, which may reduce publicly visible profiles. But the plan requires staff time that could be used for other technology work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce publicly visible profiles, while leaving costs and resource limits for later. choice	**B.** The plan is judged by what it may gain and by what it would use, delay, or pull from elsewhere. correct
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the privacy screen uses a shield icon, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, technology, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-019 | Level 1 | Answer A

Prompt. The clinic can reserve same-day appointment slots, which may reduce patient no-show rates. But the plan requires staff time that could be used for other health work. Which statement best names the tradeoff?

A. The decision trades a possible gain for primary-care patients against what may be delayed elsewhere. correct	**B.** The decision should focus only on whether the plan might reduce patient no-show rates, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the appointment cards are white, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, health, d1

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-020 | Level 1 | Answer B

Prompt. The airline can board passengers by seat zone, which may reduce average boarding time. But the plan requires staff time that could be used for other travel work. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the gate signs are backlit, because concrete details are easier to inspect than resource limits. choice	**B.** The upside is reducing average boarding time; the limit is that resources still have to be shared. correct
C. The benefit alone should settle the decision. choice	**D.** The decision should focus only on whether the plan might reduce average boarding time, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, travel, d1

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-021 | Level 1 | Answer D

Prompt. The landlord can launch an online apartment repair portal, which may reduce unresolved repair requests. But the plan requires staff time that could be used for other housing work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce unresolved repair requests, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the repair portal uses a house logo, because concrete details are easier to inspect than resource limits. choice	**D.** The plan could help with unresolved repair requests, but it would also use limited resources named in the prompt. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, housing, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-022 | Level 1 | Answer C

Prompt. The cafeteria can move fruit bowls to the front of the cafeteria line, which may increase fruit purchases. But the plan requires staff time that could be used for other food work. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might increase fruit purchases, while leaving costs and resource limits for later. choice
C. The plan's possible payoff is connected to its resource cost, not judged by the payoff alone. correct	**D.** The main tradeoff is the visible side detail: the fruit bowls are ceramic, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, food, d1

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-023 | Level 1 | Answer B

Prompt. The call center can give support agents weekly script coaching, which may reduce customer complaint rates. But the plan requires staff time that could be used for other customer support work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce customer complaint rates, while leaving costs and resource limits for later. choice	**B.** The result could improve, but that does not erase the cost side of the decision. correct
C. The main tradeoff is the visible side detail: the coaching slides use blue headers, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, customer support, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-024 | Level 1 | Answer A

Prompt. The water utility can send automatic household water-leak alerts, which may reduce average household water use. But the plan requires staff time that could be used for other utilities work. Which statement best names the tradeoff?

A. Choosing this plan may help one problem while leaving less support for another useful need. correct	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the water-leak alert screen includes a blue droplet icon, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might reduce average household water use, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, utilities, d1

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-025 | Level 1 | Answer D

Prompt. The police department can send body-camera activation reminders before patrol shifts, which may reduce missing-camera-footage reports. But the plan requires staff time that could be used for other governance work. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the reminder tone is two beeps, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce missing-camera-footage reports, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The plan may improve something important, but it still has to compete with other needs for limited support. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, governance, d1

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-026 | Level 1 | Answer C

Prompt. The election office can offer online mail-ballot tracking, which may reduce phone calls asking ballot status. But the plan requires staff time that could be used for other election administration work. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the ballot-tracking page uses county colors, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce phone calls asking ballot status, while leaving costs and resource limits for later. choice
C. The tradeoff is that the plan may reduce phone calls asking ballot status, but it also has the resource cost named in the prompt. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, election administration, d1

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-027 | Level 1 | Answer B

Prompt. The tutoring app can send spaced-review prompts for language vocabulary, which may increase vocabulary retention quiz scores. But the plan requires staff time that could be used for other learning work. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the review prompts use a bell icon, because concrete details are easier to inspect than resource limits. choice	**B.** The question is whether increasing vocabulary retention quiz scores is worth the resources the plan would use, not just whether the benefit sounds good. correct
C. The decision should focus only on whether the plan might increase vocabulary retention quiz scores, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, learning, d1

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-028 | Level 1 | Answer A

Prompt. The gym can offer a beginner gym orientation, which may reduce new-member cancellations. But the plan requires staff time that could be used for other fitness work. Which statement best names the tradeoff?

A. A fair judgment counts both the possible improvement in new-member cancellations and the resources the plan would use. correct	**B.** The decision should focus only on whether the plan might reduce new-member cancellations, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the orientation mats are black, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, fitness, d1

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-029 | Level 1 | Answer D

Prompt. The insurer can send weekly safe-driving feedback, which may reduce reported minor crashes. But the plan requires staff time that could be used for other insurance work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce reported minor crashes, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the feedback dashboard uses star ratings, because concrete details are easier to inspect than resource limits. choice
C. The benefit alone should settle the decision. choice	**D.** The plan may help auto-insurance policyholders, but another useful need may get less support from the same resources. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, insurance, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-030 | Level 1 | Answer C

Prompt. The newsroom can place corrections at the top of articles, which may increase reader trust ratings. But the plan requires staff time that could be used for other media work. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the correction box has a gray border, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. Both sides stay in view: possible improvement in reader trust ratings and limited resources for other needs. correct	**D.** The decision should focus only on whether the plan might increase reader trust ratings, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, media, d1

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-031 | Level 1 | Answer A

Prompt. The farmers market can require clearer price signs at vendor stalls, which may reduce price disputes. But the plan requires staff time that could be used for other local commerce work. Which statement best names the tradeoff?

A. The possible gain is reducing price disputes, and the cost is the resource limit described in the prompt. correct	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the stall price signs are laminated, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might reduce price disputes, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, local commerce, d1

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-032 | Level 1 | Answer B

Prompt. The hotel can send quiet-hours text reminders to hotel guests, which may reduce noise complaints from guest rooms. But the plan requires staff time that could be used for other hospitality work. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce noise complaints from guest rooms, while leaving costs and resource limits for later. choice	**B.** The hoped-for result has to be weighed against the resources the prompt says the plan would use, instead of ignoring limits. correct
C. The main tradeoff is the visible side detail: the quiet-hours text reminder uses a small moon icon, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, hospitality, d1

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

Level 2

Level 2 keeps the same skill but adds more realistic wording and more tempting distractors.

tradeoffs-033 | Level 2 | Answer D

Prompt. The city council can extend evening bus service until midnight, which may reduce late-shift commute complaints. But the plan uses money that could fund a different transportation need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the new buses were repainted blue, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might reduce late-shift commute complaints, while leaving costs and resource limits for later. choice	**D.** The hoped-for result has to be weighed against the resources the prompt says the plan would use, instead of ignoring limits. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, transportation, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-034 | Level 2 | Answer B

Prompt. The school board can require phone lockers during class, which may reduce classroom disruption reports. But the plan uses money that could fund a different education need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the lockers are installed near the gym, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit matters, but the resource cost named in the prompt also has to be counted in the same decision. correct
C. The benefit alone should settle the decision. choice	**D.** The decision should focus only on whether the plan might reduce classroom disruption reports, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, education, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-035 | Level 2 | Answer C

Prompt. The hospital can send medication reminder texts before evening doses, which may reduce missed-dose reports. But the plan uses money that could fund a different health need. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce missed-dose reports, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the text messages use a green pill icon, because concrete details are easier to inspect than resource limits. choice
C. The possible help is real, but the plan may push another need or group aside while resources are limited. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, health, d2

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-036 | Level 2 | Answer D

Prompt. The company can test a Monday-through-Thursday workweek, which may reduce staff resignations. But the plan uses money that could fund a different workplace need. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce staff resignations, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the test calendar starts on a Monday, because concrete details are easier to inspect than resource limits. choice
C. The benefit alone should settle the decision. choice	**D.** The possible improvement is weighed against the resource limit described in the prompt, not only the upside. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, workplace, d2

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-037 | Level 2 | Answer A

Prompt. The grocery chain can add larger unit-price labels on shelf tags, which may reduce shopper overpayment complaints. But the plan uses money that could fund a different retail need. Which statement best names the tradeoff?

A. The possible gain is reducing shopper overpayment complaints, and the cost is the resource limit described in the prompt. correct	**B.** The decision should focus only on whether the plan might reduce shopper overpayment complaints, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the shelf labels use bold black numbers, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, retail, d2

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-038 | Level 2 | Answer B

Prompt. The library can waive late fines for children's books, which may increase library card renewals. But the plan uses money that could fund a different public services need. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might increase library card renewals, while leaving costs and resource limits for later. choice	**B.** The tradeoff compares the result people want with the resources the plan would take from other work. correct
C. The main tradeoff is the visible side detail: the children's-book checkout desk moved six feet, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, public services, d2

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-039 | Level 2 | Answer C

Prompt. The platform can require two-factor login for site administrators, which may reduce admin account takeovers. But the plan uses money that could fund a different technology need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the login button changed from green to blue, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The upside and downside stay together: possible improvement, plus the resources used or delayed by the plan. correct	**D.** The decision should focus only on whether the plan might reduce admin account takeovers, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, technology, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-040 | Level 2 | Answer A

Prompt. The neighborhood association can add brighter LED streetlights on Maple Street, which may reduce reported thefts. But the plan uses money that could fund a different public safety need. Which statement best names the tradeoff?

A. One goal may improve while another worthwhile goal gets fewer resources from the same pool of limited support. correct	**B.** The decision should focus only on whether the plan might reduce reported thefts, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the new light poles are made of aluminum, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, public safety, d2

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-041 | Level 2 | Answer C

Prompt. The university can expand peer tutoring in statistics, which may increase course pass rates. But the plan uses money that could fund a different education need. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the tutoring room has new chairs, because concrete details are easier to inspect than resource limits. choice
C. The hoped-for gain and the resource limit are both part of the same choice, not separate questions. correct	**D.** The decision should focus only on whether the plan might increase course pass rates, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, education, d2

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-042 | Level 2 | Answer D

Prompt. The restaurant group can show calorie labels on printed lunch menus, which may reduce dessert orders. But the plan uses money that could fund a different nutrition need. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the lunch menus are printed on thicker paper, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might reduce dessert orders, while leaving costs and resource limits for later. choice	**D.** The tradeoff is between reducing dessert orders and the resource cost named in the prompt. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, nutrition, d2

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-043 | Level 2 | Answer B

Prompt. The bank can send overdraft warning texts before fees post, which may reduce overdraft fees. But the plan uses money that could fund a different finance need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the warning texts arrive from a short code, because concrete details are easier to inspect than resource limits. choice	**B.** Reducing overdraft fees matters, but so do the resources used by the plan and not used elsewhere. correct
C. The decision should focus only on whether the plan might reduce overdraft fees, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, finance, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-044 | Level 2 | Answer A

Prompt. The park service can use timed-entry passes for weekend trail visits, which may reduce trail crowding complaints. But the plan uses money that could fund a different environment need. Which statement best names the tradeoff?

A. The plan is judged by what it may gain and by what it would use, delay, or pull from elsewhere. correct	**B.** The main tradeoff is the visible side detail: the digital passes include a small trail map, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might reduce trail crowding complaints, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, environment, d2

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-045 | Level 2 | Answer D

Prompt. The museum can offer free admission on Fridays, which may increase family visits. But the plan uses money that could fund a different culture need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the Friday tickets are scanned at the east door, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might increase family visits, while leaving costs and resource limits for later. choice	**D.** The decision trades a possible gain for local families against what may be delayed elsewhere. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, culture, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-046 | Level 2 | Answer C

Prompt. The sports league can add mandatory sideline concussion checks, which may reduce repeat head injuries. But the plan uses money that could fund a different sports need. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce repeat head injuries, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the concussion checklist is printed on yellow paper, because concrete details are easier to inspect than resource limits. choice
C. The upside is reducing repeat head injuries; the limit is that resources still have to be shared. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, sports, d2

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-047 | Level 2 | Answer B

Prompt. The nonprofit can send donation receipts within one day, which may increase donor retention. But the plan uses money that could fund a different nonprofit need. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The nonprofit might get a better result, but only by accepting the resource cost described in the prompt. correct
C. The decision should focus only on whether the plan might increase donor retention, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the receipt email subject line changed, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, nonprofit, d2

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-048 | Level 2 | Answer D

Prompt. The warehouse can offer monthly lifting-safety and ergonomic training, which may reduce back-injury claims. But the plan uses money that could fund a different workplace safety need. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might reduce back-injury claims, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the training room has a ceiling-mounted projector, because concrete details are easier to inspect than resource limits. choice	**D.** The plan's possible payoff is connected to its resource cost, not judged by the payoff alone. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, workplace safety, d2

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-049 | Level 2 | Answer B

Prompt. The city sanitation office can place compost bins in apartment lobbies, which may reduce landfill waste from participating buildings. But the plan uses money that could fund a different environment need. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The result could improve, but that does not erase the cost side of the decision. correct
C. The main tradeoff is the visible side detail: the lobby compost bins have foot pedals, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might reduce landfill waste from participating buildings, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, environment, d2

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-050 | Level 2 | Answer D

Prompt. The app maker can make new user profiles private by default, which may reduce publicly visible profiles. But the plan uses money that could fund a different technology need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the privacy screen uses a shield icon, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce publicly visible profiles, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** Choosing this plan may help one problem while leaving less support for another useful need. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, technology, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-051 | Level 2 | Answer A

Prompt. The clinic can reserve same-day appointment slots, which may reduce patient no-show rates. But the plan uses money that could fund a different health need. Which statement best names the tradeoff?

A. The plan may improve something important, but it still has to compete with other needs for limited support. correct	**B.** The decision should focus only on whether the plan might reduce patient no-show rates, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the appointment cards are white, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, health, d2

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-052 | Level 2 | Answer B

Prompt. The airline can board passengers by seat zone, which may reduce average boarding time. But the plan uses money that could fund a different travel need. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The plan could help with average boarding time, but it would also use limited resources named in the prompt. correct
C. The main tradeoff is the visible side detail: the gate signs are backlit, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might reduce average boarding time, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, travel, d2

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-053 | Level 2 | Answer A

Prompt. The landlord can launch an online apartment repair portal, which may reduce unresolved repair requests. But the plan uses money that could fund a different housing need. Which statement best names the tradeoff?

A. The question is whether reducing unresolved repair requests is worth the resources the plan would use, not just whether the benefit sounds good. correct	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might reduce unresolved repair requests, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the repair portal uses a house logo, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, housing, d2

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-054 | Level 2 | Answer C

Prompt. The cafeteria can move fruit bowls to the front of the cafeteria line, which may increase fruit purchases. But the plan uses money that could fund a different food need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the fruit bowls are ceramic, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might increase fruit purchases, while leaving costs and resource limits for later. choice
C. A fair judgment counts both the possible improvement in fruit purchases and the resources the plan would use. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, food, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-055 | Level 2 | Answer C

Prompt. The call center can give support agents weekly script coaching, which may reduce customer complaint rates. But the plan uses money that could fund a different customer support need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the coaching slides use blue headers, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The plan may help support agents, but another useful need may get less support from the same resources. correct	**D.** The decision should focus only on whether the plan might reduce customer complaint rates, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, customer support, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-056 | Level 2 | Answer D

Prompt. The water utility can send automatic household water-leak alerts, which may reduce average household water use. But the plan uses money that could fund a different utilities need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the water-leak alert screen includes a blue droplet icon, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce average household water use, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** Both sides stay in view: possible improvement in average household water use and limited resources for other needs. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, utilities, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-057 | Level 2 | Answer C

Prompt. The police department can send body-camera activation reminders before patrol shifts, which may reduce missing-camera-footage reports. But the plan uses money that could fund a different governance need. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce missing-camera-footage reports, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the reminder tone is two beeps, because concrete details are easier to inspect than resource limits. choice
C. The tradeoff is that the plan may reduce missing-camera-footage reports, but it also has the resource cost named in the prompt. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, governance, d2

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-058 | Level 2 | Answer A

Prompt. The election office can offer online mail-ballot tracking, which may reduce phone calls asking ballot status. But the plan uses money that could fund a different election administration need. Which statement best names the tradeoff?

A. The hoped-for result has to be weighed against the resources the prompt says the plan would use, instead of ignoring limits. correct	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the ballot-tracking page uses county colors, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might reduce phone calls asking ballot status, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, election administration, d2

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-059 | Level 2 | Answer C

Prompt. The tutoring app can send spaced-review prompts for language vocabulary, which may increase vocabulary retention quiz scores. But the plan uses money that could fund a different learning need. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the review prompts use a bell icon, because concrete details are easier to inspect than resource limits. choice
C. The benefit matters, but the resource cost named in the prompt also has to be counted in the same decision. correct	**D.** The decision should focus only on whether the plan might increase vocabulary retention quiz scores, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, learning, d2

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-060 | Level 2 | Answer A

Prompt. The gym can offer a beginner gym orientation, which may reduce new-member cancellations. But the plan uses money that could fund a different fitness need. Which statement best names the tradeoff?

A. The possible help is real, but the plan may push another need or group aside while resources are limited. correct	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the orientation mats are black, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might reduce new-member cancellations, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, fitness, d2

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-061 | Level 2 | Answer D

Prompt. The insurer can send weekly safe-driving feedback, which may reduce reported minor crashes. But the plan uses money that could fund a different insurance need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the feedback dashboard uses star ratings, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might reduce reported minor crashes, while leaving costs and resource limits for later. choice	**D.** The possible improvement is weighed against the resource limit described in the prompt, not only the upside. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, insurance, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-062 | Level 2 | Answer B

Prompt. The newsroom can place corrections at the top of articles, which may increase reader trust ratings. But the plan uses money that could fund a different media need. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the correction box has a gray border, because concrete details are easier to inspect than resource limits. choice	**B.** The possible gain is increasing reader trust ratings, and the cost is the resource limit described in the prompt. correct
C. The decision should focus only on whether the plan might increase reader trust ratings, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, media, d2

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-063 | Level 2 | Answer B

Prompt. The farmers market can require clearer price signs at vendor stalls, which may reduce price disputes. But the plan uses money that could fund a different local commerce need. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce price disputes, while leaving costs and resource limits for later. choice	**B.** The tradeoff compares the result people want with the resources the plan would take from other work. correct
C. The main tradeoff is the visible side detail: the stall price signs are laminated, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, local commerce, d2

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-064 | Level 2 | Answer A

Prompt. The hotel can send quiet-hours text reminders to hotel guests, which may reduce noise complaints from guest rooms. But the plan uses money that could fund a different hospitality need. Which statement best names the tradeoff?

A. The upside and downside stay together: possible improvement, plus the resources used or delayed by the plan. correct	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might reduce noise complaints from guest rooms, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the quiet-hours text reminder uses a small moon icon, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, hospitality, d2

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

Level 3

Level 3 asks for steadier discrimination: the right answer is still objective, but the wrong answers often sound plausible.

tradeoffs-065 | Level 3 | Answer D

Prompt. The city council can extend evening bus service until midnight, which may reduce late-shift commute complaints. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce late-shift commute complaints, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the new buses were repainted blue, because concrete details are easier to inspect than resource limits. choice
C. The benefit alone should settle the decision. choice	**D.** The upside and downside stay together: possible improvement, plus the resources used or delayed by the plan. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, transportation, d3

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-066 | Level 3 | Answer C

Prompt. The school board can require phone lockers during class, which may reduce classroom disruption reports. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce classroom disruption reports, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the lockers are installed near the gym, because concrete details are easier to inspect than resource limits. choice
C. One goal may improve while another worthwhile goal gets fewer resources from the same pool of limited support. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, education, d3

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-067 | Level 3 | Answer B

Prompt. The hospital can send medication reminder texts before evening doses, which may reduce missed-dose reports. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the text messages use a green pill icon, because concrete details are easier to inspect than resource limits. choice	**B.** The hoped-for gain and the resource limit are both part of the same choice, not separate questions. correct
C. The decision should focus only on whether the plan might reduce missed-dose reports, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, health, d3

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-068 | Level 3 | Answer A

Prompt. The company can test a Monday-through-Thursday workweek, which may reduce staff resignations. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The tradeoff is between reducing staff resignations and the resource cost named in the prompt. correct	**B.** The decision should focus only on whether the plan might reduce staff resignations, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the test calendar starts on a Monday, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, workplace, d3

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-069 | Level 3 | Answer D

Prompt. The grocery chain can add larger unit-price labels on shelf tags, which may reduce shopper overpayment complaints. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might reduce shopper overpayment complaints, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the shelf labels use bold black numbers, because concrete details are easier to inspect than resource limits. choice	**D.** The tradeoff compares the result people want with the resources the plan would take from other work. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, retail, d3

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-070 | Level 3 | Answer C

Prompt. The library can waive late fines for children's books, which may increase library card renewals. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might increase library card renewals, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the children's-book checkout desk moved six feet, because concrete details are easier to inspect than resource limits. choice
C. The plan is judged by what it may gain and by what it would use, delay, or pull from elsewhere. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, public services, d3

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-071 | Level 3 | Answer B

Prompt. The platform can require two-factor login for site administrators, which may reduce admin account takeovers. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision trades a possible gain for site administrators against what may be delayed elsewhere. correct
C. The decision should focus only on whether the plan might reduce admin account takeovers, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the login button changed from green to blue, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, technology, d3

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-072 | Level 3 | Answer A

Prompt. The neighborhood association can add brighter LED streetlights on Maple Street, which may reduce reported thefts. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The upside is reducing reported thefts; the limit is that resources still have to be shared. correct	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the new light poles are made of aluminum, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might reduce reported thefts, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, public safety, d3

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-073 | Level 3 | Answer D

Prompt. The university can expand peer tutoring in statistics, which may increase course pass rates. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the tutoring room has new chairs, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might increase course pass rates, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The university might get a better result, but only by accepting the resource cost described in the prompt. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, education, d3

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-074 | Level 3 | Answer C

Prompt. The restaurant group can show calorie labels on printed lunch menus, which may reduce dessert orders. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the lunch menus are printed on thicker paper, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. Reducing dessert orders matters, but so do the resources used by the plan and not used elsewhere. correct	**D.** The decision should focus only on whether the plan might reduce dessert orders, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, nutrition, d3

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-075 | Level 3 | Answer A

Prompt. The bank can send overdraft warning texts before fees post, which may reduce overdraft fees. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The result could improve, but that does not erase the cost side of the decision. correct	**B.** The decision should focus only on whether the plan might reduce overdraft fees, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the warning texts arrive from a short code, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, finance, d3

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-076 | Level 3 | Answer B

Prompt. The park service can use timed-entry passes for weekend trail visits, which may reduce trail crowding complaints. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** Choosing this plan may help one problem while leaving less support for another useful need. correct
C. The main tradeoff is the visible side detail: the digital passes include a small trail map, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might reduce trail crowding complaints, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, environment, d3

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-077 | Level 3 | Answer C

Prompt. The museum can offer free admission on Fridays, which may increase family visits. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the Friday tickets are scanned at the east door, because concrete details are easier to inspect than resource limits. choice
C. The plan may improve something important, but it still has to compete with other needs for limited support. correct	**D.** The decision should focus only on whether the plan might increase family visits, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, culture, d3

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-078 | Level 3 | Answer D

Prompt. The sports league can add mandatory sideline concussion checks, which may reduce repeat head injuries. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the concussion checklist is printed on yellow paper, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce repeat head injuries, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The plan could help with repeat head injuries, but it would also use limited resources named in the prompt. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, sports, d3

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-079 | Level 3 | Answer A

Prompt. The nonprofit can send donation receipts within one day, which may increase donor retention. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The plan's possible payoff is connected to its resource cost, not judged by the payoff alone. correct	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might increase donor retention, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the receipt email subject line changed, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, nonprofit, d3

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-080 | Level 3 | Answer B

Prompt. The warehouse can offer monthly lifting-safety and ergonomic training, which may reduce back-injury claims. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** A fair judgment counts both the possible improvement in back-injury claims and the resources the plan would use. correct
C. The decision should focus only on whether the plan might reduce back-injury claims, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the training room has a ceiling-mounted projector, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, workplace safety, d3

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-081 | Level 3 | Answer C

Prompt. The city sanitation office can place compost bins in apartment lobbies, which may reduce landfill waste from participating buildings. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the lobby compost bins have foot pedals, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce landfill waste from participating buildings, while leaving costs and resource limits for later. choice
C. The plan may help apartment residents, but another useful need may get less support from the same resources. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, environment, d3

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-082 | Level 3 | Answer D

Prompt. The app maker can make new user profiles private by default, which may reduce publicly visible profiles. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the privacy screen uses a shield icon, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might reduce publicly visible profiles, while leaving costs and resource limits for later. choice	**D.** Both sides stay in view: possible improvement in publicly visible profiles and limited resources for other needs. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, technology, d3

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-083 | Level 3 | Answer A

Prompt. The clinic can reserve same-day appointment slots, which may reduce patient no-show rates. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The tradeoff is that the plan may reduce patient no-show rates, but it also has the resource cost named in the prompt. correct	**B.** The decision should focus only on whether the plan might reduce patient no-show rates, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the appointment cards are white, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, health, d3

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-084 | Level 3 | Answer B

Prompt. The airline can board passengers by seat zone, which may reduce average boarding time. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The question is whether reducing average boarding time is worth the resources the plan would use, not just whether the benefit sounds good. correct
C. The decision should focus only on whether the plan might reduce average boarding time, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the gate signs are backlit, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, travel, d3

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-085 | Level 3 | Answer B

Prompt. The landlord can launch an online apartment repair portal, which may reduce unresolved repair requests. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the repair portal uses a house logo, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit matters, but the resource cost named in the prompt also has to be counted in the same decision. correct
C. The benefit alone should settle the decision. choice	**D.** The decision should focus only on whether the plan might reduce unresolved repair requests, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, housing, d3

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-086 | Level 3 | Answer A

Prompt. The cafeteria can move fruit bowls to the front of the cafeteria line, which may increase fruit purchases. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The possible help is real, but the plan may push another need or group aside while resources are limited. correct	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the fruit bowls are ceramic, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might increase fruit purchases, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, food, d3

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-087 | Level 3 | Answer D

Prompt. The call center can give support agents weekly script coaching, which may reduce customer complaint rates. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the coaching slides use blue headers, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might reduce customer complaint rates, while leaving costs and resource limits for later. choice	**D.** The possible improvement is weighed against the resource limit described in the prompt, not only the upside. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, customer support, d3

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-088 | Level 3 | Answer C

Prompt. The water utility can send automatic household water-leak alerts, which may reduce average household water use. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the water-leak alert screen includes a blue droplet icon, because concrete details are easier to inspect than resource limits. choice
C. The possible gain is reducing average household water use, and the cost is the resource limit described in the prompt. correct	**D.** The decision should focus only on whether the plan might reduce average household water use, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, utilities, d3

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-089 | Level 3 | Answer B

Prompt. The police department can send body-camera activation reminders before patrol shifts, which may reduce missing-camera-footage reports. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce missing-camera-footage reports, while leaving costs and resource limits for later. choice	**B.** The hoped-for result has to be weighed against the resources the prompt says the plan would use, instead of ignoring limits. correct
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the reminder tone is two beeps, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, governance, d3

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-090 | Level 3 | Answer A

Prompt. The election office can offer online mail-ballot tracking, which may reduce phone calls asking ballot status. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The upside and downside stay together: possible improvement, plus the resources used or delayed by the plan. correct	**B.** The decision should focus only on whether the plan might reduce phone calls asking ballot status, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the ballot-tracking page uses county colors, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, election administration, d3

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-091 | Level 3 | Answer C

Prompt. The tutoring app can send spaced-review prompts for language vocabulary, which may increase vocabulary retention quiz scores. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the review prompts use a bell icon, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. One goal may improve while another worthwhile goal gets fewer resources from the same pool of limited support. correct	**D.** The decision should focus only on whether the plan might increase vocabulary retention quiz scores, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, learning, d3

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-092 | Level 3 | Answer A

Prompt. The gym can offer a beginner gym orientation, which may reduce new-member cancellations. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The hoped-for gain and the resource limit are both part of the same choice, not separate questions. correct	**B.** The main tradeoff is the visible side detail: the orientation mats are black, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might reduce new-member cancellations, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, fitness, d3

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-093 | Level 3 | Answer D

Prompt. The insurer can send weekly safe-driving feedback, which may reduce reported minor crashes. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might reduce reported minor crashes, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the feedback dashboard uses star ratings, because concrete details are easier to inspect than resource limits. choice	**D.** The tradeoff is between reducing reported minor crashes and the resource cost named in the prompt. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, insurance, d3

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-094 | Level 3 | Answer C

Prompt. The newsroom can place corrections at the top of articles, which may increase reader trust ratings. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the correction box has a gray border, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The tradeoff compares the result people want with the resources the plan would take from other work. correct	**D.** The decision should focus only on whether the plan might increase reader trust ratings, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, media, d3

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-095 | Level 3 | Answer B

Prompt. The farmers market can require clearer price signs at vendor stalls, which may reduce price disputes. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce price disputes, while leaving costs and resource limits for later. choice	**B.** The plan is judged by what it may gain and by what it would use, delay, or pull from elsewhere. correct
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the stall price signs are laminated, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, local commerce, d3

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-096 | Level 3 | Answer D

Prompt. The hotel can send quiet-hours text reminders to hotel guests, which may reduce noise complaints from guest rooms. But the plan may move resources away from a smaller group that was not included in the test. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the quiet-hours text reminder uses a small moon icon, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might reduce noise complaints from guest rooms, while leaving costs and resource limits for later. choice	**D.** The decision trades a possible gain for overnight hotel guests against what may be delayed elsewhere. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, hospitality, d3

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

Level 4

Level 4 asks learners to hold more context in mind while applying the same method.

tradeoffs-097 | Level 4 | Answer C

Prompt. The city council can extend evening bus service until midnight, which may reduce late-shift commute complaints. But the plan could create extra work for people who already handle other transportation tasks. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the new buses were repainted blue, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The decision trades a possible gain for late-shift workers against what may be delayed elsewhere. correct	**D.** The decision should focus only on whether the plan might reduce late-shift commute complaints, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, transportation, d4

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-098 | Level 4 | Answer D

Prompt. The school board can require phone lockers during class, which may reduce classroom disruption reports. But the plan could create extra work for people who already handle other education tasks. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the lockers are installed near the gym, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce classroom disruption reports, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The upside is reducing classroom disruption reports; the limit is that resources still have to be shared. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, education, d4

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-099 | Level 4 | Answer A

Prompt. The hospital can send medication reminder texts before evening doses, which may reduce missed-dose reports. But the plan could create extra work for people who already handle other health tasks. Which statement best names the tradeoff?

A. The hospital might get a better result, but only by accepting the resource cost described in the prompt. correct	**B.** The decision should focus only on whether the plan might reduce missed-dose reports, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the text messages use a green pill icon, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, health, d4

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-100 | Level 4 | Answer B

Prompt. The company can test a Monday-through-Thursday workweek, which may reduce staff resignations. But the plan could create extra work for people who already handle other workplace tasks. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** Reducing staff resignations matters, but so do the resources used by the plan and not used elsewhere. correct
C. The decision should focus only on whether the plan might reduce staff resignations, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the test calendar starts on a Monday, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, workplace, d4

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-101 | Level 4 | Answer C

Prompt. The grocery chain can add larger unit-price labels on shelf tags, which may reduce shopper overpayment complaints. But the plan could create extra work for people who already handle other retail tasks. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce shopper overpayment complaints, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The plan is judged by what it may gain and by what it would use, delay, or pull from elsewhere. correct	**D.** The main tradeoff is the visible side detail: the shelf labels use bold black numbers, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, retail, d4

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-102 | Level 4 | Answer D

Prompt. The library can waive late fines for children's books, which may increase library card renewals. But the plan could create extra work for people who already handle other public services tasks. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might increase library card renewals, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the children's-book checkout desk moved six feet, because concrete details are easier to inspect than resource limits. choice	**D.** Choosing this plan may help one problem while leaving less support for another useful need. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, public services, d4

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-103 | Level 4 | Answer A

Prompt. The platform can require two-factor login for site administrators, which may reduce admin account takeovers. But the plan could create extra work for people who already handle other technology tasks. Which statement best names the tradeoff?

A. The plan may improve something important, but it still has to compete with other needs for limited support. correct	**B.** The decision should focus only on whether the plan might reduce admin account takeovers, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the login button changed from green to blue, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, technology, d4

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-104 | Level 4 | Answer B

Prompt. The neighborhood association can add brighter LED streetlights on Maple Street, which may reduce reported thefts. But the plan could create extra work for people who already handle other public safety tasks. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the new light poles are made of aluminum, because concrete details are easier to inspect than resource limits. choice	**B.** The plan could help with reported thefts, but it would also use limited resources named in the prompt. correct
C. The decision should focus only on whether the plan might reduce reported thefts, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, public safety, d4

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-105 | Level 4 | Answer C

Prompt. The university can expand peer tutoring in statistics, which may increase course pass rates. But the plan could create extra work for people who already handle other education tasks. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the tutoring room has new chairs, because concrete details are easier to inspect than resource limits. choice
C. The plan's possible payoff is connected to its resource cost, not judged by the payoff alone. correct	**D.** The decision should focus only on whether the plan might increase course pass rates, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-106 | Level 4 | Answer D

Prompt. The restaurant group can show calorie labels on printed lunch menus, which may reduce dessert orders. But the plan could create extra work for people who already handle other nutrition tasks. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce dessert orders, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the lunch menus are printed on thicker paper, because concrete details are easier to inspect than resource limits. choice
C. The benefit alone should settle the decision. choice	**D.** The result could improve, but that does not erase the cost side of the decision. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, nutrition, d4

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-107 | Level 4 | Answer B

Prompt. The bank can send overdraft warning texts before fees post, which may reduce overdraft fees. But the plan could create extra work for people who already handle other finance tasks. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce overdraft fees, while leaving costs and resource limits for later. choice	**B.** The plan may help checking-account customers, but another useful need may get less support from the same resources. correct
C. The main tradeoff is the visible side detail: the warning texts arrive from a short code, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, finance, d4

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-108 | Level 4 | Answer A

Prompt. The park service can use timed-entry passes for weekend trail visits, which may reduce trail crowding complaints. But the plan could create extra work for people who already handle other environment tasks. Which statement best names the tradeoff?

A. Both sides stay in view: possible improvement in trail crowding complaints and limited resources for other needs. correct	**B.** The decision should focus only on whether the plan might reduce trail crowding complaints, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the digital passes include a small trail map, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, environment, d4

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-109 | Level 4 | Answer D

Prompt. The museum can offer free admission on Fridays, which may increase family visits. But the plan could create extra work for people who already handle other culture tasks. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the Friday tickets are scanned at the east door, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might increase family visits, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The tradeoff is that the plan may increase family visits, but it also has the resource cost named in the prompt. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, culture, d4

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-110 | Level 4 | Answer C

Prompt. The sports league can add mandatory sideline concussion checks, which may reduce repeat head injuries. But the plan could create extra work for people who already handle other sports tasks. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the concussion checklist is printed on yellow paper, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The question is whether reducing repeat head injuries is worth the resources the plan would use, not just whether the benefit sounds good. correct	**D.** The decision should focus only on whether the plan might reduce repeat head injuries, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, sports, d4

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-111 | Level 4 | Answer B

Prompt. The nonprofit can send donation receipts within one day, which may increase donor retention. But the plan could create extra work for people who already handle other nonprofit tasks. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might increase donor retention, while leaving costs and resource limits for later. choice	**B.** A fair judgment counts both the possible improvement in donor retention and the resources the plan would use. correct
C. The main tradeoff is the visible side detail: the receipt email subject line changed, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, nonprofit, d4

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-112 | Level 4 | Answer A

Prompt. The warehouse can offer monthly lifting-safety and ergonomic training, which may reduce back-injury claims. But the plan could create extra work for people who already handle other workplace safety tasks. Which statement best names the tradeoff?

A. The possible help is real, but the plan may push another need or group aside while resources are limited. correct	**B.** The main tradeoff is the visible side detail: the training room has a ceiling-mounted projector, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might reduce back-injury claims, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, workplace safety, d4

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-113 | Level 4 | Answer D

Prompt. The city sanitation office can place compost bins in apartment lobbies, which may reduce landfill waste from participating buildings. But the plan could create extra work for people who already handle other environment tasks. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce landfill waste from participating buildings, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the lobby compost bins have foot pedals, because concrete details are easier to inspect than resource limits. choice
C. The benefit alone should settle the decision. choice	**D.** The possible improvement is weighed against the resource limit described in the prompt, not only the upside. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, environment, d4

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-114 | Level 4 | Answer C

Prompt. The app maker can make new user profiles private by default, which may reduce publicly visible profiles. But the plan could create extra work for people who already handle other technology tasks. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might reduce publicly visible profiles, while leaving costs and resource limits for later. choice
C. The possible gain is reducing publicly visible profiles, and the cost is the resource limit described in the prompt. correct	**D.** The main tradeoff is the visible side detail: the privacy screen uses a shield icon, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, technology, d4

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-115 | Level 4 | Answer B

Prompt. The clinic can reserve same-day appointment slots, which may reduce patient no-show rates. But the plan could create extra work for people who already handle other health tasks. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce patient no-show rates, while leaving costs and resource limits for later. choice	**B.** The hoped-for result has to be weighed against the resources the prompt says the plan would use, instead of ignoring limits. correct
C. The main tradeoff is the visible side detail: the appointment cards are white, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, health, d4

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-116 | Level 4 | Answer A

Prompt. The airline can board passengers by seat zone, which may reduce average boarding time. But the plan could create extra work for people who already handle other travel tasks. Which statement best names the tradeoff?

A. The benefit matters, but the resource cost named in the prompt also has to be counted in the same decision. correct	**B.** The main tradeoff is the visible side detail: the gate signs are backlit, because concrete details are easier to inspect than resource limits. choice
C. The benefit alone should settle the decision. choice	**D.** The decision should focus only on whether the plan might reduce average boarding time, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, travel, d4

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-117 | Level 4 | Answer C

Prompt. The landlord can launch an online apartment repair portal, which may reduce unresolved repair requests. But the plan could create extra work for people who already handle other housing tasks. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might reduce unresolved repair requests, while leaving costs and resource limits for later. choice
C. One goal may improve while another worthwhile goal gets fewer resources from the same pool of limited support. correct	**D.** The main tradeoff is the visible side detail: the repair portal uses a house logo, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, housing, d4

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-118 | Level 4 | Answer D

Prompt. The cafeteria can move fruit bowls to the front of the cafeteria line, which may increase fruit purchases. But the plan could create extra work for people who already handle other food tasks. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the fruit bowls are ceramic, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might increase fruit purchases, while leaving costs and resource limits for later. choice	**D.** The hoped-for gain and the resource limit are both part of the same choice, not separate questions. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, food, d4

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-119 | Level 4 | Answer A

Prompt. The call center can give support agents weekly script coaching, which may reduce customer complaint rates. But the plan could create extra work for people who already handle other customer support tasks. Which statement best names the tradeoff?

A. The tradeoff is between reducing customer complaint rates and the resource cost named in the prompt. correct	**B.** The decision should focus only on whether the plan might reduce customer complaint rates, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the coaching slides use blue headers, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, customer support, d4

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-120 | Level 4 | Answer B

Prompt. The water utility can send automatic household water-leak alerts, which may reduce average household water use. But the plan could create extra work for people who already handle other utilities tasks. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce average household water use, while leaving costs and resource limits for later. choice	**B.** The tradeoff compares the result people want with the resources the plan would take from other work. correct
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the water-leak alert screen includes a blue droplet icon, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, utilities, d4

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-121 | Level 4 | Answer C

Prompt. The police department can send body-camera activation reminders before patrol shifts, which may reduce missing-camera-footage reports. But the plan could create extra work for people who already handle other governance tasks. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce missing-camera-footage reports, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The upside and downside stay together: possible improvement, plus the resources used or delayed by the plan. correct	**D.** The main tradeoff is the visible side detail: the reminder tone is two beeps, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, governance, d4

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-122 | Level 4 | Answer D

Prompt. The election office can offer online mail-ballot tracking, which may reduce phone calls asking ballot status. But the plan could create extra work for people who already handle other election administration tasks. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the ballot-tracking page uses county colors, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce phone calls asking ballot status, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The decision trades a possible gain for mail voters against what may be delayed elsewhere. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, election administration, d4

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-123 | Level 4 | Answer A

Prompt. The tutoring app can send spaced-review prompts for language vocabulary, which may increase vocabulary retention quiz scores. But the plan could create extra work for people who already handle other learning tasks. Which statement best names the tradeoff?

A. The upside is increasing vocabulary retention quiz scores; the limit is that resources still have to be shared. correct	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might increase vocabulary retention quiz scores, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the review prompts use a bell icon, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, learning, d4

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-124 | Level 4 | Answer B

Prompt. The gym can offer a beginner gym orientation, which may reduce new-member cancellations. But the plan could create extra work for people who already handle other fitness tasks. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The gym might get a better result, but only by accepting the resource cost described in the prompt. correct
C. The decision should focus only on whether the plan might reduce new-member cancellations, while leaving costs and resource limits for later. choice	**D.** The main tradeoff is the visible side detail: the orientation mats are black, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, fitness, d4

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-125 | Level 4 | Answer A

Prompt. The insurer can send weekly safe-driving feedback, which may reduce reported minor crashes. But the plan could create extra work for people who already handle other insurance tasks. Which statement best names the tradeoff?

A. Reducing reported minor crashes matters, but so do the resources used by the plan and not used elsewhere. correct	**B.** The main tradeoff is the visible side detail: the feedback dashboard uses star ratings, because concrete details are easier to inspect than resource limits. choice
C. The benefit alone should settle the decision. choice	**D.** The decision should focus only on whether the plan might reduce reported minor crashes, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, insurance, d4

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-126 | Level 4 | Answer B

Prompt. The newsroom can place corrections at the top of articles, which may increase reader trust ratings. But the plan could create extra work for people who already handle other media tasks. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might increase reader trust ratings, while leaving costs and resource limits for later. choice	**B.** The plan is judged by what it may gain and by what it would use, delay, or pull from elsewhere. correct
C. The main tradeoff is the visible side detail: the correction box has a gray border, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, media, d4

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-127 | Level 4 | Answer D

Prompt. The farmers market can require clearer price signs at vendor stalls, which may reduce price disputes. But the plan could create extra work for people who already handle other local commerce tasks. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might reduce price disputes, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the stall price signs are laminated, because concrete details are easier to inspect than resource limits. choice	**D.** Choosing this plan may help one problem while leaving less support for another useful need. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, local commerce, d4

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-128 | Level 4 | Answer C

Prompt. The hotel can send quiet-hours text reminders to hotel guests, which may reduce noise complaints from guest rooms. But the plan could create extra work for people who already handle other hospitality tasks. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the quiet-hours text reminder uses a small moon icon, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce noise complaints from guest rooms, while leaving costs and resource limits for later. choice
C. The plan may improve something important, but it still has to compete with other needs for limited support. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, hospitality, d4

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

Level 5

Level 5 is for fluency: the learner should now name the thinking move and explain the elimination path.

tradeoffs-129 | Level 5 | Answer B

Prompt. The city council can extend evening bus service until midnight, which may reduce late-shift commute complaints. But the plan may help late-shift workers while making another group's problem wait longer. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the new buses were repainted blue, because concrete details are easier to inspect than resource limits. choice	**B.** The plan may improve something important, but it still has to compete with other needs for limited support. correct
C. The benefit alone should settle the decision. choice	**D.** The decision should focus only on whether the plan might reduce late-shift commute complaints, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, transportation, d5

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-130 | Level 5 | Answer D

Prompt. The school board can require phone lockers during class, which may reduce classroom disruption reports. But the plan may help ninth-grade students while making another group's problem wait longer. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the lockers are installed near the gym, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might reduce classroom disruption reports, while leaving costs and resource limits for later. choice	**D.** The plan could help with classroom disruption reports, but it would also use limited resources named in the prompt. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, education, d5

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-131 | Level 5 | Answer D

Prompt. The hospital can send medication reminder texts before evening doses, which may reduce missed-dose reports. But the plan may help patients over 60 while making another group's problem wait longer. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might reduce missed-dose reports, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the text messages use a green pill icon, because concrete details are easier to inspect than resource limits. choice	**D.** The plan's possible payoff is connected to its resource cost, not judged by the payoff alone. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, health, d5

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-132 | Level 5 | Answer C

Prompt. The company can test a Monday-through-Thursday workweek, which may reduce staff resignations. But the plan may help software engineers while making another group's problem wait longer. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce staff resignations, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The result could improve, but that does not erase the cost side of the decision. correct	**D.** The main tradeoff is the visible side detail: the test calendar starts on a Monday, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, workplace, d5

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-133 | Level 5 | Answer B

Prompt. The grocery chain can add larger unit-price labels on shelf tags, which may reduce shopper overpayment complaints. But the plan may help weekly grocery shoppers while making another group's problem wait longer. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce shopper overpayment complaints, while leaving costs and resource limits for later. choice	**B.** Choosing this plan may help one problem while leaving less support for another useful need. correct
C. The main tradeoff is the visible side detail: the shelf labels use bold black numbers, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, retail, d5

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-134 | Level 5 | Answer A

Prompt. The library can waive late fines for children's books, which may increase library card renewals. But the plan may help families checking out children's books while making another group's problem wait longer. Which statement best names the tradeoff?

A. Both sides stay in view: possible improvement in library card renewals and limited resources for other needs. correct	**B.** The main tradeoff is the visible side detail: the children's-book checkout desk moved six feet, because concrete details are easier to inspect than resource limits. choice
C. The benefit alone should settle the decision. choice	**D.** The decision should focus only on whether the plan might increase library card renewals, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, public services, d5

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-135 | Level 5 | Answer D

Prompt. The platform can require two-factor login for site administrators, which may reduce admin account takeovers. But the plan may help site administrators while making another group's problem wait longer. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the login button changed from green to blue, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The decision should focus only on whether the plan might reduce admin account takeovers, while leaving costs and resource limits for later. choice	**D.** The tradeoff is that the plan may reduce admin account takeovers, but it also has the resource cost named in the prompt. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, technology, d5

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-136 | Level 5 | Answer C

Prompt. The neighborhood association can add brighter LED streetlights on Maple Street, which may reduce reported thefts. But the plan may help residents on Maple Street while making another group's problem wait longer. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might reduce reported thefts, while leaving costs and resource limits for later. choice
C. The question is whether reducing reported thefts is worth the resources the plan would use, not just whether the benefit sounds good. correct	**D.** The main tradeoff is the visible side detail: the new light poles are made of aluminum, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, public safety, d5

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-137 | Level 5 | Answer D

Prompt. The university can expand peer tutoring in statistics, which may increase course pass rates. But the plan may help first-year statistics students while making another group's problem wait longer. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might increase course pass rates, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the tutoring room has new chairs, because concrete details are easier to inspect than resource limits. choice	**D.** A fair judgment counts both the possible improvement in course pass rates and the resources the plan would use. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, education, d5

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-138 | Level 5 | Answer B

Prompt. The restaurant group can show calorie labels on printed lunch menus, which may reduce dessert orders. But the plan may help lunch customers while making another group's problem wait longer. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the lunch menus are printed on thicker paper, because concrete details are easier to inspect than resource limits. choice	**B.** The plan may help lunch customers, but another useful need may get less support from the same resources. correct
C. The benefit alone should settle the decision. choice	**D.** The decision should focus only on whether the plan might reduce dessert orders, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, nutrition, d5

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-139 | Level 5 | Answer A

Prompt. The bank can send overdraft warning texts before fees post, which may reduce overdraft fees. But the plan may help checking-account customers while making another group's problem wait longer. Which statement best names the tradeoff?

A. The possible improvement is weighed against the resource limit described in the prompt, not only the upside. correct	**B.** The main tradeoff is the visible side detail: the warning texts arrive from a short code, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might reduce overdraft fees, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, finance, d5

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-140 | Level 5 | Answer B

Prompt. The park service can use timed-entry passes for weekend trail visits, which may reduce trail crowding complaints. But the plan may help weekend trail hikers while making another group's problem wait longer. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce trail crowding complaints, while leaving costs and resource limits for later. choice	**B.** The possible gain is reducing trail crowding complaints, and the cost is the resource limit described in the prompt. correct
C. The main tradeoff is the visible side detail: the digital passes include a small trail map, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, environment, d5

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-141 | Level 5 | Answer C

Prompt. The museum can offer free admission on Fridays, which may increase family visits. But the plan may help local families while making another group's problem wait longer. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might increase family visits, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The hoped-for result has to be weighed against the resources the prompt says the plan would use, instead of ignoring limits. correct	**D.** The main tradeoff is the visible side detail: the Friday tickets are scanned at the east door, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, culture, d5

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-142 | Level 5 | Answer D

Prompt. The sports league can add mandatory sideline concussion checks, which may reduce repeat head injuries. But the plan may help youth soccer players while making another group's problem wait longer. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the concussion checklist is printed on yellow paper, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce repeat head injuries, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The benefit matters, but the resource cost named in the prompt also has to be counted in the same decision. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, sports, d5

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-143 | Level 5 | Answer A

Prompt. The nonprofit can send donation receipts within one day, which may increase donor retention. But the plan may help first-time donors while making another group's problem wait longer. Which statement best names the tradeoff?

A. The possible help is real, but the plan may push another need or group aside while resources are limited. correct	**B.** The main tradeoff is the visible side detail: the receipt email subject line changed, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might increase donor retention, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, nonprofit, d5

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-144 | Level 5 | Answer B

Prompt. The warehouse can offer monthly lifting-safety and ergonomic training, which may reduce back-injury claims. But the plan may help warehouse staff while making another group's problem wait longer. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the training room has a ceiling-mounted projector, because concrete details are easier to inspect than resource limits. choice	**B.** The hoped-for gain and the resource limit are both part of the same choice, not separate questions. correct
C. The decision should focus only on whether the plan might reduce back-injury claims, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-145 | Level 5 | Answer C

Prompt. The city sanitation office can place compost bins in apartment lobbies, which may reduce landfill waste from participating buildings. But the plan may help apartment residents while making another group's problem wait longer. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the lobby compost bins have foot pedals, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. The tradeoff is between reducing landfill waste from participating buildings and the resource cost named in the prompt. correct	**D.** The decision should focus only on whether the plan might reduce landfill waste from participating buildings, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, environment, d5

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-146 | Level 5 | Answer D

Prompt. The app maker can make new user profiles private by default, which may reduce publicly visible profiles. But the plan may help new app users while making another group's problem wait longer. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce publicly visible profiles, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the privacy screen uses a shield icon, because concrete details are easier to inspect than resource limits. choice	**D.** The tradeoff compares the result people want with the resources the plan would take from other work. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, technology, d5

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-147 | Level 5 | Answer C

Prompt. The clinic can reserve same-day appointment slots, which may reduce patient no-show rates. But the plan may help primary-care patients while making another group's problem wait longer. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce patient no-show rates, while leaving costs and resource limits for later. choice	**B.** The benefit alone should settle the decision. choice
C. The upside and downside stay together: possible improvement, plus the resources used or delayed by the plan. correct	**D.** The main tradeoff is the visible side detail: the appointment cards are white, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, health, d5

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-148 | Level 5 | Answer D

Prompt. The airline can board passengers by seat zone, which may reduce average boarding time. But the plan may help domestic flight passengers while making another group's problem wait longer. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The main tradeoff is the visible side detail: the gate signs are backlit, because concrete details are easier to inspect than resource limits. choice
C. The decision should focus only on whether the plan might reduce average boarding time, while leaving costs and resource limits for later. choice	**D.** One goal may improve while another worthwhile goal gets fewer resources from the same pool of limited support. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, travel, d5

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-149 | Level 5 | Answer C

Prompt. The landlord can launch an online apartment repair portal, which may reduce unresolved repair requests. But the plan may help apartment tenants while making another group's problem wait longer. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The decision should focus only on whether the plan might reduce unresolved repair requests, while leaving costs and resource limits for later. choice
C. The upside is reducing unresolved repair requests; the limit is that resources still have to be shared. correct	**D.** The main tradeoff is the visible side detail: the repair portal uses a house logo, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, housing, d5

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-150 | Level 5 | Answer A

Prompt. The cafeteria can move fruit bowls to the front of the cafeteria line, which may increase fruit purchases. But the plan may help middle-school students while making another group's problem wait longer. Which statement best names the tradeoff?

A. The cafeteria might get a better result, but only by accepting the resource cost described in the prompt. correct	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the fruit bowls are ceramic, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might increase fruit purchases, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, food, d5

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-151 | Level 5 | Answer B

Prompt. The call center can give support agents weekly script coaching, which may reduce customer complaint rates. But the plan may help support agents while making another group's problem wait longer. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the coaching slides use blue headers, because concrete details are easier to inspect than resource limits. choice	**B.** Reducing customer complaint rates matters, but so do the resources used by the plan and not used elsewhere. correct
C. The decision should focus only on whether the plan might reduce customer complaint rates, while leaving costs and resource limits for later. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, customer support, d5

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-152 | Level 5 | Answer A

Prompt. The water utility can send automatic household water-leak alerts, which may reduce average household water use. But the plan may help local homeowners while making another group's problem wait longer. Which statement best names the tradeoff?

A. The plan is judged by what it may gain and by what it would use, delay, or pull from elsewhere. correct	**B.** The decision should focus only on whether the plan might reduce average household water use, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the water-leak alert screen includes a blue droplet icon, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, utilities, d5

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-153 | Level 5 | Answer D

Prompt. The police department can send body-camera activation reminders before patrol shifts, which may reduce missing-camera-footage reports. But the plan may help patrol officers while making another group's problem wait longer. Which statement best names the tradeoff?

A. The decision should focus only on whether the plan might reduce missing-camera-footage reports, while leaving costs and resource limits for later. choice	**B.** The main tradeoff is the visible side detail: the reminder tone is two beeps, because concrete details are easier to inspect than resource limits. choice
C. The benefit alone should settle the decision. choice	**D.** The decision trades a possible gain for patrol officers against what may be delayed elsewhere. correct

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is D because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, governance, d5

A feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

B feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

tradeoffs-154 | Level 5 | Answer C

Prompt. The election office can offer online mail-ballot tracking, which may reduce phone calls asking ballot status. But the plan may help mail voters while making another group's problem wait longer. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the ballot-tracking page uses county colors, because concrete details are easier to inspect than resource limits. choice	**B.** The decision should focus only on whether the plan might reduce phone calls asking ballot status, while leaving costs and resource limits for later. choice
C. The plan may improve something important, but it still has to compete with other needs for limited support. correct	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, election administration, d5

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-155 | Level 5 | Answer B

Prompt. The tutoring app can send spaced-review prompts for language vocabulary, which may increase vocabulary retention quiz scores. But the plan may help language learners while making another group's problem wait longer. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The plan could help with vocabulary retention quiz scores, but it would also use limited resources named in the prompt. correct
C. The main tradeoff is the visible side detail: the review prompts use a bell icon, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might increase vocabulary retention quiz scores, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, learning, d5

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-156 | Level 5 | Answer A

Prompt. The gym can offer a beginner gym orientation, which may reduce new-member cancellations. But the plan may help new gym members while making another group's problem wait longer. Which statement best names the tradeoff?

A. The plan's possible payoff is connected to its resource cost, not judged by the payoff alone. correct	**B.** The benefit alone should settle the decision. choice
C. The main tradeoff is the visible side detail: the orientation mats are black, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might reduce new-member cancellations, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, fitness, d5

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-157 | Level 5 | Answer A

Prompt. The insurer can send weekly safe-driving feedback, which may reduce reported minor crashes. But the plan may help auto-insurance policyholders while making another group's problem wait longer. Which statement best names the tradeoff?

A. The result could improve, but that does not erase the cost side of the decision. correct	**B.** The decision should focus only on whether the plan might reduce reported minor crashes, while leaving costs and resource limits for later. choice
C. The benefit alone should settle the decision. choice	**D.** The main tradeoff is the visible side detail: the feedback dashboard uses star ratings, because concrete details are easier to inspect than resource limits. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, insurance, d5

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

D feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

tradeoffs-158 | Level 5 | Answer C

Prompt. The newsroom can place corrections at the top of articles, which may increase reader trust ratings. But the plan may help newsletter readers while making another group's problem wait longer. Which statement best names the tradeoff?

A. The main tradeoff is the visible side detail: the correction box has a gray border, because concrete details are easier to inspect than resource limits. choice	**B.** The benefit alone should settle the decision. choice
C. Choosing this plan may help one problem while leaving less support for another useful need. correct	**D.** The decision should focus only on whether the plan might increase reader trust ratings, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is C because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, media, d5

A feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

B feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

C feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

tradeoffs-159 | Level 5 | Answer A

Prompt. The farmers market can require clearer price signs at vendor stalls, which may reduce price disputes. But the plan may help weekend farmers market shoppers while making another group's problem wait longer. Which statement best names the tradeoff?

A. Both sides stay in view: possible improvement in price disputes and limited resources for other needs. correct	**B.** The decision should focus only on whether the plan might reduce price disputes, while leaving costs and resource limits for later. choice
C. The main tradeoff is the visible side detail: the stall price signs are laminated, because concrete details are easier to inspect than resource limits. choice	**D.** The benefit alone should settle the decision. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is A because it shows what is gained and what is given up, delayed, or risked.

A feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

B feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

tradeoffs-160 | Level 5 | Answer B

Prompt. The hotel can send quiet-hours text reminders to hotel guests, which may reduce noise complaints from guest rooms. But the plan may help overnight hotel guests while making another group's problem wait longer. Which statement best names the tradeoff?

A. The benefit alone should settle the decision. choice	**B.** The tradeoff is that the plan may reduce noise complaints from guest rooms, but it also has the resource cost named in the prompt. correct
C. The main tradeoff is the visible side detail: the quiet-hours text reminder uses a small moon icon, because concrete details are easier to inspect than resource limits. choice	**D.** The decision should focus only on whether the plan might reduce noise complaints from guest rooms, while leaving costs and resource limits for later. choice

Core explanation. A tradeoff compares what you gain with what you give up or risk.

Process commentary. To uncover the answer, hold the possible gain and the possible cost in the same sentence. The correct choice is B because it shows what is gained and what is given up, delayed, or risked.

Tags: tradeoffs, tradeoff, hospitality, d5

A feedback (Distractor): Not quite. A real benefit is only one side of a tradeoff. The cost, delay, or resource limit still has to be weighed.

B feedback (Correct): Correct. This answer keeps both sides of the decision in view: what the plan might improve and what it would cost, delay, or risk.

C feedback (Distractor): Not quite. A random visible detail is not the tradeoff. The tradeoff is between the plan's possible benefit and its cost or risk.

D feedback (Distractor): Not quite. A tradeoff looks at both the possible benefit and what the plan uses, costs, or delays.
