Skill 03

Find the Argument

What's the Argument?

160 Items	**1-5** Levels	**Find the conclusion, reason, evidence, example, or side comment.** Objective

Essential question. What role does each sentence play in the argument?

This PDF is designed for classroom use. It gives teachers a rigorous introduction to the skill, a repeatable solving routine, likely student confusions, a worked example, and the full XiXteen item set with choice-level feedback.

Generated from the current XiXteen corpus on 2026-10-29.

Skill 03

Find the Argument

What's the Argument?

Find the conclusion, reason, evidence, example, or side comment. Objective	**160** Items	**Levels 1-5** Difficulty bands

Essential question	What role does each sentence play in the argument?
Why it matters	Arguments are built from parts: conclusion, reason, background, example, and side comment. Naming those parts keeps readers from treating every sentence as equally important.
Conceptual core	Finding the argument means mapping the relationship among sentences. Students learn to distinguish conclusion, reason, evidence, example, context, and irrelevant detail. This is a structural skill: the same sentence can be evidence in one argument and conclusion in another. The key is the job it performs in the immediate passage.
Student method	Ask which sentence is being supported, then ask which sentence does the supporting. Conclusion indicators such as therefore help, but the real test is the role the sentence plays.
Analogy	An argument is like a table: the conclusion is the tabletop, and the reasons are the legs. Background facts may be in the room, but they are not holding the table up.
Assessment focus	A good answer identifies the conclusion, reason, or other requested role without being pulled toward the most interesting sentence.

Teaching Sequence

1. Identify the sentence that other sentences are meant to support.

2. Mark evidence or reasons that point toward that conclusion.

3. Treat examples as illustrations unless they are the main point being defended.

4. Ignore signal words if the sentence's actual role points the other way.

Common Confusions To Watch For

1. Students often treat the first fact as the conclusion because it appears first.

2. Students may mistake a topic sentence for an argued conclusion.

3. Students may choose a true background statement even when it is not doing argumentative work.

Teacher Prompts

1. Which sentence answers 'so what should we believe or do?'

2. Which sentence answers 'why should we believe that?'

3. If we removed this sentence, would the argument lose its support, its conclusion, or only some background?

Worked Example

Scenario	A school club says its bake sale raised more money than the car wash, so next month the club should run another bake sale.
Teacher think-aloud	The money comparison supports the recommendation. The conclusion is the action the club should take. The topic is fundraising, but the argument is the move from past result to future plan.
Student takeaway	The conclusion is the supported point; the reason is the support.

Guided Classroom Exercise

Invented case. Use only the facts below; write on paper. Try the steps and check your work before reading the model answer. Different wording can be equally adequate.

Situation. A club member writes: 'Our club meets on Tuesdays. Last month's bake sale earned $300 after costs, while the car wash earned $180. Therefore, we should hold another bake sale next month.'

What To Do

1. Label each sentence background, reason, or conclusion.

2. Draw an arrow from the reason to the conclusion, or write 'reason -> conclusion' using the actual sentences.

3. Explain in one sentence why the Tuesday meeting detail is not support for the fundraising recommendation.

Check before reading the answer. Does your arrow show which statement supports which? The most detailed sentence need not be the conclusion.

Model Answer

Tuesday meetings are background. The $300 versus $180 earnings comparison is the reason. Holding another bake sale is the conclusion. Draw the arrow from the earnings comparison to the recommendation. Meeting on Tuesday supplies no comparison of the two fundraising options.

Why it is adequate. The answer maps the argument's structure and explains why a true detail is not necessarily a reason.

Item Bank

Items are grouped by level. For each item, read the prompt, predict the answer, choose, and then use the feedback and process commentary to examine the reasoning path.

Level 1

Level 1 establishes the clean version of the skill: the cue is direct, the distractors are visible, and the main task is to learn the contrast.

Question 1

Level 1

At a meeting about evening bus service for late-shift workers, Riley says, "The new buses were repainted blue. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Therefore, the city council should extend evening bus service until midnight. The proposal is meant mainly for late-shift workers." Which sentence is Riley's conclusion?

A. The city council should extend evening bus service until midnight.	**B.** The new buses were repainted blue.
C. The proposal is meant mainly for late-shift workers.	**D.** A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test.

Answer: A. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The city council should extend evening bus service until midnight. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 2

Level 1

At a meeting about classroom phone lockers, Maya says, "The lockers are installed near the gym. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Therefore, the school board should require phone lockers during class. The proposal is meant mainly for ninth-grade students." Which sentence is Maya's conclusion?

A. The proposal is meant mainly for ninth-grade students.	**B.** The school board should require phone lockers during class.
C. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test.	**D.** The lockers are installed near the gym.

Answer: B. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The school board should require phone lockers during class. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 3

Level 1

At a meeting about medication reminder texts for older patients, Sam says, "The text messages use a green pill icon. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Therefore, the hospital should send medication reminder texts before evening doses. The proposal is meant mainly for patients over 60." Which sentence is Sam's conclusion?

A. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test.	**B.** The text messages use a green pill icon.
C. The hospital should send medication reminder texts before evening doses.	**D.** The proposal is meant mainly for patients over 60.

Answer: C. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The hospital should send medication reminder texts before evening doses. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 4

Level 1

At a meeting about a four-day workweek test for software engineers, Avery says, "The test calendar starts on a Monday. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Therefore, the company should test a Monday-through-Thursday workweek. The proposal is meant mainly for software engineers." Which sentence is Avery's conclusion?

A. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test.	**B.** The test calendar starts on a Monday.
C. The proposal is meant mainly for software engineers.	**D.** The company should test a Monday-through-Thursday workweek.

Answer: D. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The company should test a Monday-through-Thursday workweek. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 5

Level 1

At a meeting about larger grocery unit-price labels, Taylor says, "The shelf labels use bold black numbers. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Therefore, the grocery chain should add larger unit-price labels on shelf tags. The proposal is meant mainly for weekly grocery shoppers." Which sentence is Taylor's conclusion?

A. The grocery chain should add larger unit-price labels on shelf tags.	**B.** A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test.
C. The shelf labels use bold black numbers.	**D.** The proposal is meant mainly for weekly grocery shoppers.

Answer: A. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The grocery chain should add larger unit-price labels on shelf tags. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 6

Level 1

At a meeting about late fines on children's books, Morgan says, "The children's-book checkout desk moved six feet. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Therefore, the library should waive late fines for children's books. The proposal is meant mainly for families checking out children's books." Which sentence is Morgan's conclusion?

A. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test.	**B.** The library should waive late fines for children's books.
C. The children's-book checkout desk moved six feet.	**D.** The proposal is meant mainly for families checking out children's books.

Answer: B. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The library should waive late fines for children's books. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 7

Level 1

At a meeting about two-factor login for site administrators, Casey says, "The login button changed from green to blue. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Therefore, the platform should require two-factor login for site administrators. The proposal is meant mainly for site administrators." Which sentence is Casey's conclusion?

A. The proposal is meant mainly for site administrators.	**B.** A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test.
C. The platform should require two-factor login for site administrators.	**D.** The login button changed from green to blue.

Answer: C. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The platform should require two-factor login for site administrators. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 8

Level 1

At a meeting about brighter streetlights on Maple Street, Jordan says, "The new light poles are made of aluminum. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Therefore, the neighborhood association should add brighter LED streetlights on Maple Street. The proposal is meant mainly for residents on Maple Street." Which sentence is Jordan's conclusion?

A. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test.	**B.** The proposal is meant mainly for residents on Maple Street.
C. The new light poles are made of aluminum.	**D.** The neighborhood association should add brighter LED streetlights on Maple Street.

Answer: D. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The neighborhood association should add brighter LED streetlights on Maple Street. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 9

Level 1

At a meeting about peer tutoring for first-year statistics students, Riley says, "The tutoring room has new chairs. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Therefore, the university should expand peer tutoring in statistics. The proposal is meant mainly for first-year statistics students." Which sentence is Riley's conclusion?

A. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test.	**B.** The proposal is meant mainly for first-year statistics students.
C. The university should expand peer tutoring in statistics.	**D.** The tutoring room has new chairs.

Answer: C. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The university should expand peer tutoring in statistics. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 10

Level 1

At a meeting about calorie labels on restaurant menus, Maya says, "The lunch menus are printed on thicker paper. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Therefore, the restaurant group should show calorie labels on printed lunch menus. The proposal is meant mainly for lunch customers." Which sentence is Maya's conclusion?

A. The proposal is meant mainly for lunch customers.	**B.** A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test.
C. The lunch menus are printed on thicker paper.	**D.** The restaurant group should show calorie labels on printed lunch menus.

Answer: D. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The restaurant group should show calorie labels on printed lunch menus. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 11

Level 1

At a meeting about bank overdraft warning texts, Sam says, "The warning texts arrive from a short code. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Therefore, the bank should send overdraft warning texts before fees post. The proposal is meant mainly for checking-account customers." Which sentence is Sam's conclusion?

A. The warning texts arrive from a short code.	**B.** The proposal is meant mainly for checking-account customers.
C. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test.	**D.** The bank should send overdraft warning texts before fees post.

Answer: D. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The bank should send overdraft warning texts before fees post. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 12

Level 1

At a meeting about timed-entry passes for weekend park trails, Avery says, "The digital passes include a small trail map. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Therefore, the park service should use timed-entry passes for weekend trail visits. The proposal is meant mainly for weekend trail hikers." Which sentence is Avery's conclusion?

A. The digital passes include a small trail map.	**B.** The park service should use timed-entry passes for weekend trail visits.
C. The proposal is meant mainly for weekend trail hikers.	**D.** A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test.

Answer: B. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The park service should use timed-entry passes for weekend trail visits. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 13

Level 1

At a meeting about free Friday museum admission, Taylor says, "The Friday tickets are scanned at the east door. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Therefore, the museum should offer free admission on Fridays. The proposal is meant mainly for local families." Which sentence is Taylor's conclusion?

A. The Friday tickets are scanned at the east door.	**B.** The proposal is meant mainly for local families.
C. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test.	**D.** The museum should offer free admission on Fridays.

Answer: D. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The museum should offer free admission on Fridays. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 14

Level 1

At a meeting about youth soccer concussion checks, Morgan says, "The concussion checklist is printed on yellow paper. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Therefore, the sports league should add mandatory sideline concussion checks. The proposal is meant mainly for youth soccer players." Which sentence is Morgan's conclusion?

A. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test.	**B.** The concussion checklist is printed on yellow paper.
C. The sports league should add mandatory sideline concussion checks.	**D.** The proposal is meant mainly for youth soccer players.

Answer: C. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The sports league should add mandatory sideline concussion checks. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 15

Level 1

At a meeting about same-day donation receipts, Casey says, "The receipt email subject line changed. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Therefore, the nonprofit should send donation receipts within one day. The proposal is meant mainly for first-time donors." Which sentence is Casey's conclusion?

A. The receipt email subject line changed.	**B.** A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test.
C. The proposal is meant mainly for first-time donors.	**D.** The nonprofit should send donation receipts within one day.

Answer: D. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The nonprofit should send donation receipts within one day. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 16

Level 1

At a meeting about warehouse ergonomic training, Jordan says, "The training room has a ceiling-mounted projector. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Therefore, the warehouse should offer monthly lifting-safety and ergonomic training. The proposal is meant mainly for warehouse staff." Which sentence is Jordan's conclusion?

A. The training room has a ceiling-mounted projector.	**B.** The warehouse should offer monthly lifting-safety and ergonomic training.
C. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test.	**D.** The proposal is meant mainly for warehouse staff.

Answer: B. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The warehouse should offer monthly lifting-safety and ergonomic training. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 17

Level 1

At a meeting about apartment-lobby compost bins, Riley says, "The lobby compost bins have foot pedals. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Therefore, the city sanitation office should place compost bins in apartment lobbies. The proposal is meant mainly for apartment residents." Which sentence is Riley's conclusion?

A. The lobby compost bins have foot pedals.	**B.** A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test.
C. The proposal is meant mainly for apartment residents.	**D.** The city sanitation office should place compost bins in apartment lobbies.

Answer: D. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The city sanitation office should place compost bins in apartment lobbies. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 18

Level 1

At a meeting about private-by-default app profiles, Maya says, "The privacy screen uses a shield icon. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Therefore, the app maker should make new user profiles private by default. The proposal is meant mainly for new app users." Which sentence is Maya's conclusion?

A. The privacy screen uses a shield icon.	**B.** The app maker should make new user profiles private by default.
C. The proposal is meant mainly for new app users.	**D.** A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test.

Answer: B. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The app maker should make new user profiles private by default. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 19

Level 1

At a meeting about same-day clinic appointment slots, Sam says, "The appointment cards are white. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Therefore, the clinic should reserve same-day appointment slots. The proposal is meant mainly for primary-care patients." Which sentence is Sam's conclusion?

A. The proposal is meant mainly for primary-care patients.	**B.** The clinic should reserve same-day appointment slots.
C. The appointment cards are white.	**D.** A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test.

Answer: B. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The clinic should reserve same-day appointment slots. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 20

Level 1

At a meeting about seat-zone airline boarding, Avery says, "The gate signs are backlit. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Therefore, the airline should board passengers by seat zone. The proposal is meant mainly for domestic flight passengers." Which sentence is Avery's conclusion?

A. The airline should board passengers by seat zone.	**B.** The gate signs are backlit.
C. The proposal is meant mainly for domestic flight passengers.	**D.** A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test.

Answer: A. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The airline should board passengers by seat zone. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 21

Level 1

At a meeting about an online apartment repair portal, Taylor says, "The repair portal uses a house logo. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Therefore, the landlord should launch an online apartment repair portal. The proposal is meant mainly for apartment tenants." Which sentence is Taylor's conclusion?

A. The repair portal uses a house logo.	**B.** The proposal is meant mainly for apartment tenants.
C. The landlord should launch an online apartment repair portal.	**D.** A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test.

Answer: C. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The landlord should launch an online apartment repair portal. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 22

Level 1

At a meeting about fruit placement in a school cafeteria line, Morgan says, "The fruit bowls are ceramic. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Therefore, the cafeteria should move fruit bowls to the front of the cafeteria line. The proposal is meant mainly for middle-school students." Which sentence is Morgan's conclusion?

A. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test.	**B.** The fruit bowls are ceramic.
C. The proposal is meant mainly for middle-school students.	**D.** The cafeteria should move fruit bowls to the front of the cafeteria line.

Answer: D. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The cafeteria should move fruit bowls to the front of the cafeteria line. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 23

Level 1

At a meeting about weekly call-center script coaching, Casey says, "The coaching slides use blue headers. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Therefore, the call center should give support agents weekly script coaching. The proposal is meant mainly for support agents." Which sentence is Casey's conclusion?

A. The call center should give support agents weekly script coaching.	**B.** A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test.
C. The proposal is meant mainly for support agents.	**D.** The coaching slides use blue headers.

Answer: A. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The call center should give support agents weekly script coaching. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 24

Level 1

At a meeting about household water-leak alerts, Jordan says, "The water-leak alert screen includes a blue droplet icon. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Therefore, the water utility should send automatic household water-leak alerts. The proposal is meant mainly for local homeowners." Which sentence is Jordan's conclusion?

A. The water-leak alert screen includes a blue droplet icon.	**B.** The water utility should send automatic household water-leak alerts.
C. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test.	**D.** The proposal is meant mainly for local homeowners.

Answer: B. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The water utility should send automatic household water-leak alerts. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 25

Level 1

At a meeting about body-camera activation reminders, Riley says, "The reminder tone is two beeps. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Therefore, the police department should send body-camera activation reminders before patrol shifts. The proposal is meant mainly for patrol officers." Which sentence is Riley's conclusion?

A. The police department should send body-camera activation reminders before patrol shifts.	**B.** The reminder tone is two beeps.
C. The proposal is meant mainly for patrol officers.	**D.** A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test.

Answer: A. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The police department should send body-camera activation reminders before patrol shifts. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 26

Level 1

At a meeting about county mail-ballot tracking, Maya says, "The ballot-tracking page uses county colors. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Therefore, the election office should offer online mail-ballot tracking. The proposal is meant mainly for mail voters." Which sentence is Maya's conclusion?

A. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test.	**B.** The proposal is meant mainly for mail voters.
C. The election office should offer online mail-ballot tracking.	**D.** The ballot-tracking page uses county colors.

Answer: C. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The election office should offer online mail-ballot tracking. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 27

Level 1

At a meeting about language-learning spaced-review prompts, Sam says, "The review prompts use a bell icon. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Therefore, the tutoring app should send spaced-review prompts for language vocabulary. The proposal is meant mainly for language learners." Which sentence is Sam's conclusion?

A. The tutoring app should send spaced-review prompts for language vocabulary.	**B.** The proposal is meant mainly for language learners.
C. The review prompts use a bell icon.	**D.** A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test.

Answer: A. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The tutoring app should send spaced-review prompts for language vocabulary. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 28

Level 1

At a meeting about a beginner gym orientation, Avery says, "The orientation mats are black. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Therefore, the gym should offer a beginner gym orientation. The proposal is meant mainly for new gym members." Which sentence is Avery's conclusion?

A. The proposal is meant mainly for new gym members.	**B.** The orientation mats are black.
C. The gym should offer a beginner gym orientation.	**D.** A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test.

Answer: C. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The gym should offer a beginner gym orientation. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 29

Level 1

At a meeting about safe-driving feedback for policyholders, Taylor says, "The feedback dashboard uses star ratings. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Therefore, the insurer should send weekly safe-driving feedback. The proposal is meant mainly for auto-insurance policyholders." Which sentence is Taylor's conclusion?

A. The insurer should send weekly safe-driving feedback.	**B.** A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test.
C. The proposal is meant mainly for auto-insurance policyholders.	**D.** The feedback dashboard uses star ratings.

Answer: A. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The insurer should send weekly safe-driving feedback. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 30

Level 1

At a meeting about top-of-article correction boxes, Morgan says, "The correction box has a gray border. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Therefore, the newsroom should place corrections at the top of articles. The proposal is meant mainly for newsletter readers." Which sentence is Morgan's conclusion?

A. The proposal is meant mainly for newsletter readers.	**B.** A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test.
C. The newsroom should place corrections at the top of articles.	**D.** The correction box has a gray border.

Answer: C. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The newsroom should place corrections at the top of articles. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 31

Level 1

At a meeting about clearer farmers market price signs, Casey says, "The stall price signs are laminated. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Therefore, the farmers market should require clearer price signs at vendor stalls. The proposal is meant mainly for weekend farmers market shoppers." Which sentence is Casey's conclusion?

A. The stall price signs are laminated.	**B.** The farmers market should require clearer price signs at vendor stalls.
C. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test.	**D.** The proposal is meant mainly for weekend farmers market shoppers.

Answer: B. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The farmers market should require clearer price signs at vendor stalls. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 32

Level 1

At a meeting about hotel quiet-hours text reminders, Jordan says, "The quiet-hours text reminder uses a small moon icon. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Therefore, the hotel should send quiet-hours text reminders to hotel guests. The proposal is meant mainly for overnight hotel guests." Which sentence is Jordan's conclusion?

A. The hotel should send quiet-hours text reminders to hotel guests.	**B.** A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test.
C. The quiet-hours text reminder uses a small moon icon.	**D.** The proposal is meant mainly for overnight hotel guests.

Answer: A. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The hotel should send quiet-hours text reminders to hotel guests. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Level 2

Level 2 keeps the same skill but adds more realistic wording and more tempting distractors.

Question 33

Level 2

At a meeting about evening bus service for late-shift workers, Maya says, "The new buses were repainted blue. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Therefore, the city council should extend evening bus service until midnight. The proposal is meant mainly for late-shift workers." Which sentence is Maya's conclusion?

A. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test.	**B.** The city council should extend evening bus service until midnight.
C. The proposal is meant mainly for late-shift workers.	**D.** The new buses were repainted blue.

Answer: B. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The city council should extend evening bus service until midnight. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 34

Level 2

At a meeting about classroom phone lockers, Sam says, "The lockers are installed near the gym. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Therefore, the school board should require phone lockers during class. The proposal is meant mainly for ninth-grade students." Which sentence is Sam's conclusion?

A. The school board should require phone lockers during class.	**B.** The lockers are installed near the gym.
C. The proposal is meant mainly for ninth-grade students.	**D.** A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test.

Answer: A. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The school board should require phone lockers during class. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 35

Level 2

At a meeting about medication reminder texts for older patients, Avery says, "The text messages use a green pill icon. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Therefore, the hospital should send medication reminder texts before evening doses. The proposal is meant mainly for patients over 60." Which sentence is Avery's conclusion?

A. The proposal is meant mainly for patients over 60.	**B.** A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test.
C. The text messages use a green pill icon.	**D.** The hospital should send medication reminder texts before evening doses.

Answer: D. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The hospital should send medication reminder texts before evening doses. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 36

Level 2

At a meeting about a four-day workweek test for software engineers, Taylor says, "The test calendar starts on a Monday. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Therefore, the company should test a Monday-through-Thursday workweek. The proposal is meant mainly for software engineers." Which sentence is Taylor's conclusion?

A. The test calendar starts on a Monday.	**B.** The proposal is meant mainly for software engineers.
C. The company should test a Monday-through-Thursday workweek.	**D.** A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test.

Answer: C. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The company should test a Monday-through-Thursday workweek. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 37

Level 2

At a meeting about larger grocery unit-price labels, Morgan says, "The shelf labels use bold black numbers. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Therefore, the grocery chain should add larger unit-price labels on shelf tags. The proposal is meant mainly for weekly grocery shoppers." Which sentence is Morgan's conclusion?

A. The shelf labels use bold black numbers.	**B.** The grocery chain should add larger unit-price labels on shelf tags.
C. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test.	**D.** The proposal is meant mainly for weekly grocery shoppers.

Answer: B. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The grocery chain should add larger unit-price labels on shelf tags. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 38

Level 2

At a meeting about late fines on children's books, Casey says, "The children's-book checkout desk moved six feet. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Therefore, the library should waive late fines for children's books. The proposal is meant mainly for families checking out children's books." Which sentence is Casey's conclusion?

A. The library should waive late fines for children's books.	**B.** The children's-book checkout desk moved six feet.
C. The proposal is meant mainly for families checking out children's books.	**D.** A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test.

Answer: A. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The library should waive late fines for children's books. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 39

Level 2

At a meeting about two-factor login for site administrators, Jordan says, "The login button changed from green to blue. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Therefore, the platform should require two-factor login for site administrators. The proposal is meant mainly for site administrators." Which sentence is Jordan's conclusion?

A. The login button changed from green to blue.	**B.** A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test.
C. The proposal is meant mainly for site administrators.	**D.** The platform should require two-factor login for site administrators.

Answer: D. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The platform should require two-factor login for site administrators. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 40

Level 2

At a meeting about brighter streetlights on Maple Street, Riley says, "The new light poles are made of aluminum. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Therefore, the neighborhood association should add brighter LED streetlights on Maple Street. The proposal is meant mainly for residents on Maple Street." Which sentence is Riley's conclusion?

A. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test.	**B.** The proposal is meant mainly for residents on Maple Street.
C. The neighborhood association should add brighter LED streetlights on Maple Street.	**D.** The new light poles are made of aluminum.

Answer: C. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The neighborhood association should add brighter LED streetlights on Maple Street. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 41

Level 2

At a meeting about peer tutoring for first-year statistics students, Maya says, "The tutoring room has new chairs. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Therefore, the university should expand peer tutoring in statistics. The proposal is meant mainly for first-year statistics students." Which sentence is Maya's conclusion?

A. The proposal is meant mainly for first-year statistics students.	**B.** A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test.
C. The tutoring room has new chairs.	**D.** The university should expand peer tutoring in statistics.

Answer: D. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The university should expand peer tutoring in statistics. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 42

Level 2

At a meeting about calorie labels on restaurant menus, Sam says, "The lunch menus are printed on thicker paper. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Therefore, the restaurant group should show calorie labels on printed lunch menus. The proposal is meant mainly for lunch customers." Which sentence is Sam's conclusion?

A. The proposal is meant mainly for lunch customers.	**B.** A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test.
C. The restaurant group should show calorie labels on printed lunch menus.	**D.** The lunch menus are printed on thicker paper.

Answer: C. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The restaurant group should show calorie labels on printed lunch menus. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 43

Level 2

At a meeting about bank overdraft warning texts, Avery says, "The warning texts arrive from a short code. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Therefore, the bank should send overdraft warning texts before fees post. The proposal is meant mainly for checking-account customers." Which sentence is Avery's conclusion?

A. The bank should send overdraft warning texts before fees post.	**B.** The warning texts arrive from a short code.
C. The proposal is meant mainly for checking-account customers.	**D.** A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test.

Answer: A. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The bank should send overdraft warning texts before fees post. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 44

Level 2

At a meeting about timed-entry passes for weekend park trails, Taylor says, "The digital passes include a small trail map. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Therefore, the park service should use timed-entry passes for weekend trail visits. The proposal is meant mainly for weekend trail hikers." Which sentence is Taylor's conclusion?

A. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test.	**B.** The park service should use timed-entry passes for weekend trail visits.
C. The proposal is meant mainly for weekend trail hikers.	**D.** The digital passes include a small trail map.

Answer: B. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The park service should use timed-entry passes for weekend trail visits. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 45

Level 2

At a meeting about free Friday museum admission, Morgan says, "The Friday tickets are scanned at the east door. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Therefore, the museum should offer free admission on Fridays. The proposal is meant mainly for local families." Which sentence is Morgan's conclusion?

A. The Friday tickets are scanned at the east door.	**B.** A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test.
C. The museum should offer free admission on Fridays.	**D.** The proposal is meant mainly for local families.

Answer: C. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The museum should offer free admission on Fridays. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 46

Level 2

At a meeting about youth soccer concussion checks, Casey says, "The concussion checklist is printed on yellow paper. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Therefore, the sports league should add mandatory sideline concussion checks. The proposal is meant mainly for youth soccer players." Which sentence is Casey's conclusion?

A. The concussion checklist is printed on yellow paper.	**B.** A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test.
C. The proposal is meant mainly for youth soccer players.	**D.** The sports league should add mandatory sideline concussion checks.

Answer: D. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The sports league should add mandatory sideline concussion checks. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 47

Level 2

At a meeting about same-day donation receipts, Jordan says, "The receipt email subject line changed. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Therefore, the nonprofit should send donation receipts within one day. The proposal is meant mainly for first-time donors." Which sentence is Jordan's conclusion?

A. The nonprofit should send donation receipts within one day.	**B.** A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test.
C. The proposal is meant mainly for first-time donors.	**D.** The receipt email subject line changed.

Answer: A. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The nonprofit should send donation receipts within one day. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 48

Level 2

At a meeting about warehouse ergonomic training, Riley says, "The training room has a ceiling-mounted projector. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Therefore, the warehouse should offer monthly lifting-safety and ergonomic training. The proposal is meant mainly for warehouse staff." Which sentence is Riley's conclusion?

A. The training room has a ceiling-mounted projector.	**B.** The warehouse should offer monthly lifting-safety and ergonomic training.
C. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test.	**D.** The proposal is meant mainly for warehouse staff.

Answer: B. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The warehouse should offer monthly lifting-safety and ergonomic training. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 49

Level 2

At a meeting about apartment-lobby compost bins, Maya says, "The lobby compost bins have foot pedals. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Therefore, the city sanitation office should place compost bins in apartment lobbies. The proposal is meant mainly for apartment residents." Which sentence is Maya's conclusion?

A. The lobby compost bins have foot pedals.	**B.** A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test.
C. The city sanitation office should place compost bins in apartment lobbies.	**D.** The proposal is meant mainly for apartment residents.

Answer: C. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The city sanitation office should place compost bins in apartment lobbies. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 50

Level 2

At a meeting about private-by-default app profiles, Sam says, "The privacy screen uses a shield icon. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Therefore, the app maker should make new user profiles private by default. The proposal is meant mainly for new app users." Which sentence is Sam's conclusion?

A. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test.	**B.** The privacy screen uses a shield icon.
C. The proposal is meant mainly for new app users.	**D.** The app maker should make new user profiles private by default.

Answer: D. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The app maker should make new user profiles private by default. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 51

Level 2

At a meeting about same-day clinic appointment slots, Avery says, "The appointment cards are white. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Therefore, the clinic should reserve same-day appointment slots. The proposal is meant mainly for primary-care patients." Which sentence is Avery's conclusion?

A. The clinic should reserve same-day appointment slots.	**B.** A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test.
C. The appointment cards are white.	**D.** The proposal is meant mainly for primary-care patients.

Answer: A. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The clinic should reserve same-day appointment slots. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 52

Level 2

At a meeting about seat-zone airline boarding, Taylor says, "The gate signs are backlit. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Therefore, the airline should board passengers by seat zone. The proposal is meant mainly for domestic flight passengers." Which sentence is Taylor's conclusion?

A. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test.	**B.** The airline should board passengers by seat zone.
C. The proposal is meant mainly for domestic flight passengers.	**D.** The gate signs are backlit.

Answer: B. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The airline should board passengers by seat zone. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 53

Level 2

At a meeting about an online apartment repair portal, Morgan says, "The repair portal uses a house logo. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Therefore, the landlord should launch an online apartment repair portal. The proposal is meant mainly for apartment tenants." Which sentence is Morgan's conclusion?

A. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test.	**B.** The landlord should launch an online apartment repair portal.
C. The repair portal uses a house logo.	**D.** The proposal is meant mainly for apartment tenants.

Answer: B. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The landlord should launch an online apartment repair portal. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 54

Level 2

At a meeting about fruit placement in a school cafeteria line, Casey says, "The fruit bowls are ceramic. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Therefore, the cafeteria should move fruit bowls to the front of the cafeteria line. The proposal is meant mainly for middle-school students." Which sentence is Casey's conclusion?

A. The cafeteria should move fruit bowls to the front of the cafeteria line.	**B.** A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test.
C. The fruit bowls are ceramic.	**D.** The proposal is meant mainly for middle-school students.

Answer: A. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The cafeteria should move fruit bowls to the front of the cafeteria line. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 55

Level 2

At a meeting about weekly call-center script coaching, Jordan says, "The coaching slides use blue headers. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Therefore, the call center should give support agents weekly script coaching. The proposal is meant mainly for support agents." Which sentence is Jordan's conclusion?

A. The coaching slides use blue headers.	**B.** The proposal is meant mainly for support agents.
C. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test.	**D.** The call center should give support agents weekly script coaching.

Answer: D. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The call center should give support agents weekly script coaching. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 56

Level 2

At a meeting about household water-leak alerts, Riley says, "The water-leak alert screen includes a blue droplet icon. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Therefore, the water utility should send automatic household water-leak alerts. The proposal is meant mainly for local homeowners." Which sentence is Riley's conclusion?

A. The water-leak alert screen includes a blue droplet icon.	**B.** The proposal is meant mainly for local homeowners.
C. The water utility should send automatic household water-leak alerts.	**D.** A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test.

Answer: C. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The water utility should send automatic household water-leak alerts. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 57

Level 2

At a meeting about body-camera activation reminders, Maya says, "The reminder tone is two beeps. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Therefore, the police department should send body-camera activation reminders before patrol shifts. The proposal is meant mainly for patrol officers." Which sentence is Maya's conclusion?

A. The proposal is meant mainly for patrol officers.	**B.** The police department should send body-camera activation reminders before patrol shifts.
C. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test.	**D.** The reminder tone is two beeps.

Answer: B. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The police department should send body-camera activation reminders before patrol shifts. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 58

Level 2

At a meeting about county mail-ballot tracking, Sam says, "The ballot-tracking page uses county colors. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Therefore, the election office should offer online mail-ballot tracking. The proposal is meant mainly for mail voters." Which sentence is Sam's conclusion?

A. The election office should offer online mail-ballot tracking.	**B.** A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test.
C. The proposal is meant mainly for mail voters.	**D.** The ballot-tracking page uses county colors.

Answer: A. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The election office should offer online mail-ballot tracking. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 59

Level 2

At a meeting about language-learning spaced-review prompts, Avery says, "The review prompts use a bell icon. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Therefore, the tutoring app should send spaced-review prompts for language vocabulary. The proposal is meant mainly for language learners." Which sentence is Avery's conclusion?

A. The proposal is meant mainly for language learners.	**B.** A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test.
C. The review prompts use a bell icon.	**D.** The tutoring app should send spaced-review prompts for language vocabulary.

Answer: D. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The tutoring app should send spaced-review prompts for language vocabulary. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 60

Level 2

At a meeting about a beginner gym orientation, Taylor says, "The orientation mats are black. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Therefore, the gym should offer a beginner gym orientation. The proposal is meant mainly for new gym members." Which sentence is Taylor's conclusion?

A. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test.	**B.** The proposal is meant mainly for new gym members.
C. The gym should offer a beginner gym orientation.	**D.** The orientation mats are black.

Answer: C. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The gym should offer a beginner gym orientation. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 61

Level 2

At a meeting about safe-driving feedback for policyholders, Morgan says, "The feedback dashboard uses star ratings. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Therefore, the insurer should send weekly safe-driving feedback. The proposal is meant mainly for auto-insurance policyholders." Which sentence is Morgan's conclusion?

A. The proposal is meant mainly for auto-insurance policyholders.	**B.** The insurer should send weekly safe-driving feedback.
C. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test.	**D.** The feedback dashboard uses star ratings.

Answer: B. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The insurer should send weekly safe-driving feedback. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 62

Level 2

At a meeting about top-of-article correction boxes, Casey says, "The correction box has a gray border. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Therefore, the newsroom should place corrections at the top of articles. The proposal is meant mainly for newsletter readers." Which sentence is Casey's conclusion?

A. The newsroom should place corrections at the top of articles.	**B.** The correction box has a gray border.
C. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test.	**D.** The proposal is meant mainly for newsletter readers.

Answer: A. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The newsroom should place corrections at the top of articles. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 63

Level 2

At a meeting about clearer farmers market price signs, Jordan says, "The stall price signs are laminated. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Therefore, the farmers market should require clearer price signs at vendor stalls. The proposal is meant mainly for weekend farmers market shoppers." Which sentence is Jordan's conclusion?

A. The proposal is meant mainly for weekend farmers market shoppers.	**B.** A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test.
C. The farmers market should require clearer price signs at vendor stalls.	**D.** The stall price signs are laminated.

Answer: C. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The farmers market should require clearer price signs at vendor stalls. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 64

Level 2

At a meeting about hotel quiet-hours text reminders, Riley says, "The quiet-hours text reminder uses a small moon icon. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Therefore, the hotel should send quiet-hours text reminders to hotel guests. The proposal is meant mainly for overnight hotel guests." Which sentence is Riley's conclusion?

A. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test.	**B.** The quiet-hours text reminder uses a small moon icon.
C. The proposal is meant mainly for overnight hotel guests.	**D.** The hotel should send quiet-hours text reminders to hotel guests.

Answer: D. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The hotel should send quiet-hours text reminders to hotel guests. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Level 3

Level 3 asks for steadier discrimination: the right answer is still objective, but the wrong answers often sound plausible.

Question 65

Level 3

At a meeting about evening bus service for late-shift workers, Sam says, "The new buses were repainted blue. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Therefore, the city council should extend evening bus service until midnight. The proposal is meant mainly for late-shift workers." Which sentence is Sam's conclusion?

A. The proposal is meant mainly for late-shift workers.	**B.** A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test.
C. The city council should extend evening bus service until midnight.	**D.** The new buses were repainted blue.

Answer: C. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The city council should extend evening bus service until midnight. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 66

Level 3

At a meeting about classroom phone lockers, Avery says, "The lockers are installed near the gym. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Therefore, the school board should require phone lockers during class. The proposal is meant mainly for ninth-grade students." Which sentence is Avery's conclusion?

A. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test.	**B.** The lockers are installed near the gym.
C. The proposal is meant mainly for ninth-grade students.	**D.** The school board should require phone lockers during class.

Answer: D. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The school board should require phone lockers during class. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 67

Level 3

At a meeting about medication reminder texts for older patients, Taylor says, "The text messages use a green pill icon. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Therefore, the hospital should send medication reminder texts before evening doses. The proposal is meant mainly for patients over 60." Which sentence is Taylor's conclusion?

A. The text messages use a green pill icon.	**B.** The proposal is meant mainly for patients over 60.
C. The hospital should send medication reminder texts before evening doses.	**D.** A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test.

Answer: C. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The hospital should send medication reminder texts before evening doses. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 68

Level 3

At a meeting about a four-day workweek test for software engineers, Morgan says, "The test calendar starts on a Monday. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Therefore, the company should test a Monday-through-Thursday workweek. The proposal is meant mainly for software engineers." Which sentence is Morgan's conclusion?

A. The company should test a Monday-through-Thursday workweek.	**B.** The test calendar starts on a Monday.
C. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test.	**D.** The proposal is meant mainly for software engineers.

Answer: A. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The company should test a Monday-through-Thursday workweek. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 69

Level 3

At a meeting about larger grocery unit-price labels, Casey says, "The shelf labels use bold black numbers. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Therefore, the grocery chain should add larger unit-price labels on shelf tags. The proposal is meant mainly for weekly grocery shoppers." Which sentence is Casey's conclusion?

A. The proposal is meant mainly for weekly grocery shoppers.	**B.** The shelf labels use bold black numbers.
C. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test.	**D.** The grocery chain should add larger unit-price labels on shelf tags.

Answer: D. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The grocery chain should add larger unit-price labels on shelf tags. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 70

Level 3

At a meeting about late fines on children's books, Jordan says, "The children's-book checkout desk moved six feet. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Therefore, the library should waive late fines for children's books. The proposal is meant mainly for families checking out children's books." Which sentence is Jordan's conclusion?

A. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test.	**B.** The library should waive late fines for children's books.
C. The children's-book checkout desk moved six feet.	**D.** The proposal is meant mainly for families checking out children's books.

Answer: B. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The library should waive late fines for children's books. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 71

Level 3

At a meeting about two-factor login for site administrators, Riley says, "The login button changed from green to blue. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Therefore, the platform should require two-factor login for site administrators. The proposal is meant mainly for site administrators." Which sentence is Riley's conclusion?

A. The proposal is meant mainly for site administrators.	**B.** A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test.
C. The login button changed from green to blue.	**D.** The platform should require two-factor login for site administrators.

Answer: D. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The platform should require two-factor login for site administrators. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 72

Level 3

At a meeting about brighter streetlights on Maple Street, Maya says, "The new light poles are made of aluminum. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Therefore, the neighborhood association should add brighter LED streetlights on Maple Street. The proposal is meant mainly for residents on Maple Street." Which sentence is Maya's conclusion?

A. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test.	**B.** The neighborhood association should add brighter LED streetlights on Maple Street.
C. The proposal is meant mainly for residents on Maple Street.	**D.** The new light poles are made of aluminum.

Answer: B. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The neighborhood association should add brighter LED streetlights on Maple Street. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 73

Level 3

At a meeting about peer tutoring for first-year statistics students, Sam says, "The tutoring room has new chairs. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Therefore, the university should expand peer tutoring in statistics. The proposal is meant mainly for first-year statistics students." Which sentence is Sam's conclusion?

A. The tutoring room has new chairs.	**B.** A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test.
C. The proposal is meant mainly for first-year statistics students.	**D.** The university should expand peer tutoring in statistics.

Answer: D. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The university should expand peer tutoring in statistics. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 74

Level 3

At a meeting about calorie labels on restaurant menus, Avery says, "The lunch menus are printed on thicker paper. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Therefore, the restaurant group should show calorie labels on printed lunch menus. The proposal is meant mainly for lunch customers." Which sentence is Avery's conclusion?

A. The lunch menus are printed on thicker paper.	**B.** The restaurant group should show calorie labels on printed lunch menus.
C. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test.	**D.** The proposal is meant mainly for lunch customers.

Answer: B. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The restaurant group should show calorie labels on printed lunch menus. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 75

Level 3

At a meeting about bank overdraft warning texts, Taylor says, "The warning texts arrive from a short code. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Therefore, the bank should send overdraft warning texts before fees post. The proposal is meant mainly for checking-account customers." Which sentence is Taylor's conclusion?

A. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test.	**B.** The bank should send overdraft warning texts before fees post.
C. The proposal is meant mainly for checking-account customers.	**D.** The warning texts arrive from a short code.

Answer: B. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The bank should send overdraft warning texts before fees post. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 76

Level 3

At a meeting about timed-entry passes for weekend park trails, Morgan says, "The digital passes include a small trail map. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Therefore, the park service should use timed-entry passes for weekend trail visits. The proposal is meant mainly for weekend trail hikers." Which sentence is Morgan's conclusion?

A. The park service should use timed-entry passes for weekend trail visits.	**B.** The proposal is meant mainly for weekend trail hikers.
C. The digital passes include a small trail map.	**D.** A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test.

Answer: A. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The park service should use timed-entry passes for weekend trail visits. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 77

Level 3

At a meeting about free Friday museum admission, Casey says, "The Friday tickets are scanned at the east door. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Therefore, the museum should offer free admission on Fridays. The proposal is meant mainly for local families." Which sentence is Casey's conclusion?

A. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test.	**B.** The Friday tickets are scanned at the east door.
C. The proposal is meant mainly for local families.	**D.** The museum should offer free admission on Fridays.

Answer: D. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The museum should offer free admission on Fridays. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 78

Level 3

At a meeting about youth soccer concussion checks, Jordan says, "The concussion checklist is printed on yellow paper. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Therefore, the sports league should add mandatory sideline concussion checks. The proposal is meant mainly for youth soccer players." Which sentence is Jordan's conclusion?

A. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test.	**B.** The proposal is meant mainly for youth soccer players.
C. The sports league should add mandatory sideline concussion checks.	**D.** The concussion checklist is printed on yellow paper.

Answer: C. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The sports league should add mandatory sideline concussion checks. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 79

Level 3

At a meeting about same-day donation receipts, Riley says, "The receipt email subject line changed. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Therefore, the nonprofit should send donation receipts within one day. The proposal is meant mainly for first-time donors." Which sentence is Riley's conclusion?

A. The receipt email subject line changed.	**B.** The nonprofit should send donation receipts within one day.
C. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test.	**D.** The proposal is meant mainly for first-time donors.

Answer: B. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The nonprofit should send donation receipts within one day. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 80

Level 3

At a meeting about warehouse ergonomic training, Maya says, "The training room has a ceiling-mounted projector. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Therefore, the warehouse should offer monthly lifting-safety and ergonomic training. The proposal is meant mainly for warehouse staff." Which sentence is Maya's conclusion?

A. The warehouse should offer monthly lifting-safety and ergonomic training.	**B.** The proposal is meant mainly for warehouse staff.
C. The training room has a ceiling-mounted projector.	**D.** A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test.

Answer: A. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The warehouse should offer monthly lifting-safety and ergonomic training. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 81

Level 3

At a meeting about apartment-lobby compost bins, Sam says, "The lobby compost bins have foot pedals. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Therefore, the city sanitation office should place compost bins in apartment lobbies. The proposal is meant mainly for apartment residents." Which sentence is Sam's conclusion?

A. The proposal is meant mainly for apartment residents.	**B.** A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test.
C. The lobby compost bins have foot pedals.	**D.** The city sanitation office should place compost bins in apartment lobbies.

Answer: D. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The city sanitation office should place compost bins in apartment lobbies. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 82

Level 3

At a meeting about private-by-default app profiles, Avery says, "The privacy screen uses a shield icon. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Therefore, the app maker should make new user profiles private by default. The proposal is meant mainly for new app users." Which sentence is Avery's conclusion?

A. The proposal is meant mainly for new app users.	**B.** The privacy screen uses a shield icon.
C. The app maker should make new user profiles private by default.	**D.** A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test.

Answer: C. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The app maker should make new user profiles private by default. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 83

Level 3

At a meeting about same-day clinic appointment slots, Taylor says, "The appointment cards are white. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Therefore, the clinic should reserve same-day appointment slots. The proposal is meant mainly for primary-care patients." Which sentence is Taylor's conclusion?

A. The proposal is meant mainly for primary-care patients.	**B.** The appointment cards are white.
C. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test.	**D.** The clinic should reserve same-day appointment slots.

Answer: D. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The clinic should reserve same-day appointment slots. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 84

Level 3

At a meeting about seat-zone airline boarding, Morgan says, "The gate signs are backlit. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Therefore, the airline should board passengers by seat zone. The proposal is meant mainly for domestic flight passengers." Which sentence is Morgan's conclusion?

A. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test.	**B.** The gate signs are backlit.
C. The airline should board passengers by seat zone.	**D.** The proposal is meant mainly for domestic flight passengers.

Answer: C. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The airline should board passengers by seat zone. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 85

Level 3

At a meeting about an online apartment repair portal, Casey says, "The repair portal uses a house logo. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Therefore, the landlord should launch an online apartment repair portal. The proposal is meant mainly for apartment tenants." Which sentence is Casey's conclusion?

A. The proposal is meant mainly for apartment tenants.	**B.** A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test.
C. The landlord should launch an online apartment repair portal.	**D.** The repair portal uses a house logo.

Answer: C. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The landlord should launch an online apartment repair portal. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 86

Level 3

At a meeting about fruit placement in a school cafeteria line, Jordan says, "The fruit bowls are ceramic. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Therefore, the cafeteria should move fruit bowls to the front of the cafeteria line. The proposal is meant mainly for middle-school students." Which sentence is Jordan's conclusion?

A. The cafeteria should move fruit bowls to the front of the cafeteria line.	**B.** A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test.
C. The proposal is meant mainly for middle-school students.	**D.** The fruit bowls are ceramic.

Answer: A. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The cafeteria should move fruit bowls to the front of the cafeteria line. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 87

Level 3

At a meeting about weekly call-center script coaching, Riley says, "The coaching slides use blue headers. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Therefore, the call center should give support agents weekly script coaching. The proposal is meant mainly for support agents." Which sentence is Riley's conclusion?

A. The coaching slides use blue headers.	**B.** A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test.
C. The call center should give support agents weekly script coaching.	**D.** The proposal is meant mainly for support agents.

Answer: C. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The call center should give support agents weekly script coaching. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 88

Level 3

At a meeting about household water-leak alerts, Maya says, "The water-leak alert screen includes a blue droplet icon. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Therefore, the water utility should send automatic household water-leak alerts. The proposal is meant mainly for local homeowners." Which sentence is Maya's conclusion?

A. The water utility should send automatic household water-leak alerts.	**B.** The proposal is meant mainly for local homeowners.
C. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test.	**D.** The water-leak alert screen includes a blue droplet icon.

Answer: A. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The water utility should send automatic household water-leak alerts. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 89

Level 3

At a meeting about body-camera activation reminders, Sam says, "The reminder tone is two beeps. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Therefore, the police department should send body-camera activation reminders before patrol shifts. The proposal is meant mainly for patrol officers." Which sentence is Sam's conclusion?

A. The police department should send body-camera activation reminders before patrol shifts.	**B.** The reminder tone is two beeps.
C. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test.	**D.** The proposal is meant mainly for patrol officers.

Answer: A. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The police department should send body-camera activation reminders before patrol shifts. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 90

Level 3

At a meeting about county mail-ballot tracking, Avery says, "The ballot-tracking page uses county colors. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Therefore, the election office should offer online mail-ballot tracking. The proposal is meant mainly for mail voters." Which sentence is Avery's conclusion?

A. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test.	**B.** The election office should offer online mail-ballot tracking.
C. The ballot-tracking page uses county colors.	**D.** The proposal is meant mainly for mail voters.

Answer: B. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The election office should offer online mail-ballot tracking. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 91

Level 3

At a meeting about language-learning spaced-review prompts, Taylor says, "The review prompts use a bell icon. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Therefore, the tutoring app should send spaced-review prompts for language vocabulary. The proposal is meant mainly for language learners." Which sentence is Taylor's conclusion?

A. The review prompts use a bell icon.	**B.** The proposal is meant mainly for language learners.
C. The tutoring app should send spaced-review prompts for language vocabulary.	**D.** A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test.

Answer: C. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The tutoring app should send spaced-review prompts for language vocabulary. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 92

Level 3

At a meeting about a beginner gym orientation, Morgan says, "The orientation mats are black. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Therefore, the gym should offer a beginner gym orientation. The proposal is meant mainly for new gym members." Which sentence is Morgan's conclusion?

A. The gym should offer a beginner gym orientation.	**B.** A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test.
C. The proposal is meant mainly for new gym members.	**D.** The orientation mats are black.

Answer: A. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The gym should offer a beginner gym orientation. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 93

Level 3

At a meeting about safe-driving feedback for policyholders, Casey says, "The feedback dashboard uses star ratings. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Therefore, the insurer should send weekly safe-driving feedback. The proposal is meant mainly for auto-insurance policyholders." Which sentence is Casey's conclusion?

A. The insurer should send weekly safe-driving feedback.	**B.** The proposal is meant mainly for auto-insurance policyholders.
C. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test.	**D.** The feedback dashboard uses star ratings.

Answer: A. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The insurer should send weekly safe-driving feedback. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 94

Level 3

At a meeting about top-of-article correction boxes, Jordan says, "The correction box has a gray border. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Therefore, the newsroom should place corrections at the top of articles. The proposal is meant mainly for newsletter readers." Which sentence is Jordan's conclusion?

A. The proposal is meant mainly for newsletter readers.	**B.** The newsroom should place corrections at the top of articles.
C. The correction box has a gray border.	**D.** A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test.

Answer: B. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The newsroom should place corrections at the top of articles. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 95

Level 3

At a meeting about clearer farmers market price signs, Riley says, "The stall price signs are laminated. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Therefore, the farmers market should require clearer price signs at vendor stalls. The proposal is meant mainly for weekend farmers market shoppers." Which sentence is Riley's conclusion?

A. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test.	**B.** The farmers market should require clearer price signs at vendor stalls.
C. The stall price signs are laminated.	**D.** The proposal is meant mainly for weekend farmers market shoppers.

Answer: B. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The farmers market should require clearer price signs at vendor stalls. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 96

Level 3

At a meeting about hotel quiet-hours text reminders, Maya says, "The quiet-hours text reminder uses a small moon icon. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Therefore, the hotel should send quiet-hours text reminders to hotel guests. The proposal is meant mainly for overnight hotel guests." Which sentence is Maya's conclusion?

A. The quiet-hours text reminder uses a small moon icon.	**B.** A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test.
C. The proposal is meant mainly for overnight hotel guests.	**D.** The hotel should send quiet-hours text reminders to hotel guests.

Answer: D. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The hotel should send quiet-hours text reminders to hotel guests. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Level 4

Level 4 asks learners to hold more context in mind while applying the same method.

Question 97

Level 4

At a meeting about evening bus service for late-shift workers, Avery says, "The new buses were repainted blue. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Therefore, the city council should extend evening bus service until midnight. The proposal is meant mainly for late-shift workers." Which sentence is Avery's conclusion?

A. The proposal is meant mainly for late-shift workers.	**B.** The new buses were repainted blue.
C. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test.	**D.** The city council should extend evening bus service until midnight.

Answer: D. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The city council should extend evening bus service until midnight. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 98

Level 4

At a meeting about classroom phone lockers, Taylor says, "The lockers are installed near the gym. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Therefore, the school board should require phone lockers during class. The proposal is meant mainly for ninth-grade students." Which sentence is Taylor's conclusion?

A. The proposal is meant mainly for ninth-grade students.	**B.** The lockers are installed near the gym.
C. The school board should require phone lockers during class.	**D.** A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test.

Answer: C. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The school board should require phone lockers during class. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 99

Level 4

At a meeting about medication reminder texts for older patients, Morgan says, "The text messages use a green pill icon. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Therefore, the hospital should send medication reminder texts before evening doses. The proposal is meant mainly for patients over 60." Which sentence is Morgan's conclusion?

A. The text messages use a green pill icon.	**B.** The hospital should send medication reminder texts before evening doses.
C. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test.	**D.** The proposal is meant mainly for patients over 60.

Answer: B. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The hospital should send medication reminder texts before evening doses. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 100

Level 4

At a meeting about a four-day workweek test for software engineers, Casey says, "The test calendar starts on a Monday. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Therefore, the company should test a Monday-through-Thursday workweek. The proposal is meant mainly for software engineers." Which sentence is Casey's conclusion?

A. The company should test a Monday-through-Thursday workweek.	**B.** The test calendar starts on a Monday.
C. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test.	**D.** The proposal is meant mainly for software engineers.

Answer: A. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The company should test a Monday-through-Thursday workweek. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 101

Level 4

At a meeting about larger grocery unit-price labels, Jordan says, "The shelf labels use bold black numbers. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Therefore, the grocery chain should add larger unit-price labels on shelf tags. The proposal is meant mainly for weekly grocery shoppers." Which sentence is Jordan's conclusion?

A. The shelf labels use bold black numbers.	**B.** The grocery chain should add larger unit-price labels on shelf tags.
C. The proposal is meant mainly for weekly grocery shoppers.	**D.** A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test.

Answer: B. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The grocery chain should add larger unit-price labels on shelf tags. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 102

Level 4

At a meeting about late fines on children's books, Riley says, "The children's-book checkout desk moved six feet. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Therefore, the library should waive late fines for children's books. The proposal is meant mainly for families checking out children's books." Which sentence is Riley's conclusion?

A. The proposal is meant mainly for families checking out children's books.	**B.** A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test.
C. The children's-book checkout desk moved six feet.	**D.** The library should waive late fines for children's books.

Answer: D. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The library should waive late fines for children's books. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 103

Level 4

At a meeting about two-factor login for site administrators, Maya says, "The login button changed from green to blue. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Therefore, the platform should require two-factor login for site administrators. The proposal is meant mainly for site administrators." Which sentence is Maya's conclusion?

A. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test.	**B.** The platform should require two-factor login for site administrators.
C. The proposal is meant mainly for site administrators.	**D.** The login button changed from green to blue.

Answer: B. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The platform should require two-factor login for site administrators. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 104

Level 4

At a meeting about brighter streetlights on Maple Street, Sam says, "The new light poles are made of aluminum. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Therefore, the neighborhood association should add brighter LED streetlights on Maple Street. The proposal is meant mainly for residents on Maple Street." Which sentence is Sam's conclusion?

A. The neighborhood association should add brighter LED streetlights on Maple Street.	**B.** A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test.
C. The new light poles are made of aluminum.	**D.** The proposal is meant mainly for residents on Maple Street.

Answer: A. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The neighborhood association should add brighter LED streetlights on Maple Street. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 105

Level 4

At a meeting about peer tutoring for first-year statistics students, Avery says, "The tutoring room has new chairs. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Therefore, the university should expand peer tutoring in statistics. The proposal is meant mainly for first-year statistics students." Which sentence is Avery's conclusion?

A. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test.	**B.** The tutoring room has new chairs.
C. The proposal is meant mainly for first-year statistics students.	**D.** The university should expand peer tutoring in statistics.

Answer: D. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The university should expand peer tutoring in statistics. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 106

Level 4

At a meeting about calorie labels on restaurant menus, Taylor says, "The lunch menus are printed on thicker paper. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Therefore, the restaurant group should show calorie labels on printed lunch menus. The proposal is meant mainly for lunch customers." Which sentence is Taylor's conclusion?

A. The lunch menus are printed on thicker paper.	**B.** A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test.
C. The restaurant group should show calorie labels on printed lunch menus.	**D.** The proposal is meant mainly for lunch customers.

Answer: C. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The restaurant group should show calorie labels on printed lunch menus. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 107

Level 4

At a meeting about bank overdraft warning texts, Morgan says, "The warning texts arrive from a short code. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Therefore, the bank should send overdraft warning texts before fees post. The proposal is meant mainly for checking-account customers." Which sentence is Morgan's conclusion?

A. The bank should send overdraft warning texts before fees post.	**B.** The proposal is meant mainly for checking-account customers.
C. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test.	**D.** The warning texts arrive from a short code.

Answer: A. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The bank should send overdraft warning texts before fees post. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 108

Level 4

At a meeting about timed-entry passes for weekend park trails, Casey says, "The digital passes include a small trail map. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Therefore, the park service should use timed-entry passes for weekend trail visits. The proposal is meant mainly for weekend trail hikers." Which sentence is Casey's conclusion?

A. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test.	**B.** The park service should use timed-entry passes for weekend trail visits.
C. The proposal is meant mainly for weekend trail hikers.	**D.** The digital passes include a small trail map.

Answer: B. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The park service should use timed-entry passes for weekend trail visits. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 109

Level 4

At a meeting about free Friday museum admission, Jordan says, "The Friday tickets are scanned at the east door. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Therefore, the museum should offer free admission on Fridays. The proposal is meant mainly for local families." Which sentence is Jordan's conclusion?

A. The proposal is meant mainly for local families.	**B.** A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test.
C. The museum should offer free admission on Fridays.	**D.** The Friday tickets are scanned at the east door.

Answer: C. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The museum should offer free admission on Fridays. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 110

Level 4

At a meeting about youth soccer concussion checks, Riley says, "The concussion checklist is printed on yellow paper. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Therefore, the sports league should add mandatory sideline concussion checks. The proposal is meant mainly for youth soccer players." Which sentence is Riley's conclusion?

A. The proposal is meant mainly for youth soccer players.	**B.** A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test.
C. The concussion checklist is printed on yellow paper.	**D.** The sports league should add mandatory sideline concussion checks.

Answer: D. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The sports league should add mandatory sideline concussion checks. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 111

Level 4

At a meeting about same-day donation receipts, Maya says, "The receipt email subject line changed. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Therefore, the nonprofit should send donation receipts within one day. The proposal is meant mainly for first-time donors." Which sentence is Maya's conclusion?

A. The proposal is meant mainly for first-time donors.	**B.** The receipt email subject line changed.
C. The nonprofit should send donation receipts within one day.	**D.** A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test.

Answer: C. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The nonprofit should send donation receipts within one day. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 112

Level 4

At a meeting about warehouse ergonomic training, Sam says, "The training room has a ceiling-mounted projector. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Therefore, the warehouse should offer monthly lifting-safety and ergonomic training. The proposal is meant mainly for warehouse staff." Which sentence is Sam's conclusion?

A. The warehouse should offer monthly lifting-safety and ergonomic training.	**B.** A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test.
C. The proposal is meant mainly for warehouse staff.	**D.** The training room has a ceiling-mounted projector.

Answer: A. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The warehouse should offer monthly lifting-safety and ergonomic training. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 113

Level 4

At a meeting about apartment-lobby compost bins, Avery says, "The lobby compost bins have foot pedals. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Therefore, the city sanitation office should place compost bins in apartment lobbies. The proposal is meant mainly for apartment residents." Which sentence is Avery's conclusion?

A. The lobby compost bins have foot pedals.	**B.** The proposal is meant mainly for apartment residents.
C. The city sanitation office should place compost bins in apartment lobbies.	**D.** A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test.

Answer: C. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The city sanitation office should place compost bins in apartment lobbies. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 114

Level 4

At a meeting about private-by-default app profiles, Taylor says, "The privacy screen uses a shield icon. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Therefore, the app maker should make new user profiles private by default. The proposal is meant mainly for new app users." Which sentence is Taylor's conclusion?

A. The app maker should make new user profiles private by default.	**B.** The proposal is meant mainly for new app users.
C. The privacy screen uses a shield icon.	**D.** A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test.

Answer: A. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The app maker should make new user profiles private by default. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 115

Level 4

At a meeting about same-day clinic appointment slots, Morgan says, "The appointment cards are white. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Therefore, the clinic should reserve same-day appointment slots. The proposal is meant mainly for primary-care patients." Which sentence is Morgan's conclusion?

A. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test.	**B.** The proposal is meant mainly for primary-care patients.
C. The clinic should reserve same-day appointment slots.	**D.** The appointment cards are white.

Answer: C. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The clinic should reserve same-day appointment slots. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 116

Level 4

At a meeting about seat-zone airline boarding, Casey says, "The gate signs are backlit. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Therefore, the airline should board passengers by seat zone. The proposal is meant mainly for domestic flight passengers." Which sentence is Casey's conclusion?

A. The airline should board passengers by seat zone.	**B.** A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test.
C. The gate signs are backlit.	**D.** The proposal is meant mainly for domestic flight passengers.

Answer: A. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The airline should board passengers by seat zone. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 117

Level 4

At a meeting about an online apartment repair portal, Jordan says, "The repair portal uses a house logo. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Therefore, the landlord should launch an online apartment repair portal. The proposal is meant mainly for apartment tenants." Which sentence is Jordan's conclusion?

A. The proposal is meant mainly for apartment tenants.	**B.** The landlord should launch an online apartment repair portal.
C. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test.	**D.** The repair portal uses a house logo.

Answer: B. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The landlord should launch an online apartment repair portal. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 118

Level 4

At a meeting about fruit placement in a school cafeteria line, Riley says, "The fruit bowls are ceramic. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Therefore, the cafeteria should move fruit bowls to the front of the cafeteria line. The proposal is meant mainly for middle-school students." Which sentence is Riley's conclusion?

A. The proposal is meant mainly for middle-school students.	**B.** The fruit bowls are ceramic.
C. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test.	**D.** The cafeteria should move fruit bowls to the front of the cafeteria line.

Answer: D. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The cafeteria should move fruit bowls to the front of the cafeteria line. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 119

Level 4

At a meeting about weekly call-center script coaching, Maya says, "The coaching slides use blue headers. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Therefore, the call center should give support agents weekly script coaching. The proposal is meant mainly for support agents." Which sentence is Maya's conclusion?

A. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test.	**B.** The call center should give support agents weekly script coaching.
C. The proposal is meant mainly for support agents.	**D.** The coaching slides use blue headers.

Answer: B. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The call center should give support agents weekly script coaching. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 120

Level 4

At a meeting about household water-leak alerts, Sam says, "The water-leak alert screen includes a blue droplet icon. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Therefore, the water utility should send automatic household water-leak alerts. The proposal is meant mainly for local homeowners." Which sentence is Sam's conclusion?

A. The water utility should send automatic household water-leak alerts.	**B.** The water-leak alert screen includes a blue droplet icon.
C. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test.	**D.** The proposal is meant mainly for local homeowners.

Answer: A. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The water utility should send automatic household water-leak alerts. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 121

Level 4

At a meeting about body-camera activation reminders, Avery says, "The reminder tone is two beeps. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Therefore, the police department should send body-camera activation reminders before patrol shifts. The proposal is meant mainly for patrol officers." Which sentence is Avery's conclusion?

A. The reminder tone is two beeps.	**B.** The police department should send body-camera activation reminders before patrol shifts.
C. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test.	**D.** The proposal is meant mainly for patrol officers.

Answer: B. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The police department should send body-camera activation reminders before patrol shifts. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 122

Level 4

At a meeting about county mail-ballot tracking, Taylor says, "The ballot-tracking page uses county colors. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Therefore, the election office should offer online mail-ballot tracking. The proposal is meant mainly for mail voters." Which sentence is Taylor's conclusion?

A. The ballot-tracking page uses county colors.	**B.** The proposal is meant mainly for mail voters.
C. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test.	**D.** The election office should offer online mail-ballot tracking.

Answer: D. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The election office should offer online mail-ballot tracking. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 123

Level 4

At a meeting about language-learning spaced-review prompts, Morgan says, "The review prompts use a bell icon. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Therefore, the tutoring app should send spaced-review prompts for language vocabulary. The proposal is meant mainly for language learners." Which sentence is Morgan's conclusion?

A. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test.	**B.** The tutoring app should send spaced-review prompts for language vocabulary.
C. The review prompts use a bell icon.	**D.** The proposal is meant mainly for language learners.

Answer: B. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The tutoring app should send spaced-review prompts for language vocabulary. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 124

Level 4

At a meeting about a beginner gym orientation, Casey says, "The orientation mats are black. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Therefore, the gym should offer a beginner gym orientation. The proposal is meant mainly for new gym members." Which sentence is Casey's conclusion?

A. The proposal is meant mainly for new gym members.	**B.** A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test.
C. The orientation mats are black.	**D.** The gym should offer a beginner gym orientation.

Answer: D. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The gym should offer a beginner gym orientation. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 125

Level 4

At a meeting about safe-driving feedback for policyholders, Jordan says, "The feedback dashboard uses star ratings. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Therefore, the insurer should send weekly safe-driving feedback. The proposal is meant mainly for auto-insurance policyholders." Which sentence is Jordan's conclusion?

A. The insurer should send weekly safe-driving feedback.	**B.** A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test.
C. The feedback dashboard uses star ratings.	**D.** The proposal is meant mainly for auto-insurance policyholders.

Answer: A. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The insurer should send weekly safe-driving feedback. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 126

Level 4

At a meeting about top-of-article correction boxes, Riley says, "The correction box has a gray border. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Therefore, the newsroom should place corrections at the top of articles. The proposal is meant mainly for newsletter readers." Which sentence is Riley's conclusion?

A. The proposal is meant mainly for newsletter readers.	**B.** A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test.
C. The newsroom should place corrections at the top of articles.	**D.** The correction box has a gray border.

Answer: C. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The newsroom should place corrections at the top of articles. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 127

Level 4

At a meeting about clearer farmers market price signs, Maya says, "The stall price signs are laminated. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Therefore, the farmers market should require clearer price signs at vendor stalls. The proposal is meant mainly for weekend farmers market shoppers." Which sentence is Maya's conclusion?

A. The stall price signs are laminated.	**B.** The proposal is meant mainly for weekend farmers market shoppers.
C. The farmers market should require clearer price signs at vendor stalls.	**D.** A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test.

Answer: C. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The farmers market should require clearer price signs at vendor stalls. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 128

Level 4

At a meeting about hotel quiet-hours text reminders, Sam says, "The quiet-hours text reminder uses a small moon icon. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Therefore, the hotel should send quiet-hours text reminders to hotel guests. The proposal is meant mainly for overnight hotel guests." Which sentence is Sam's conclusion?

A. The quiet-hours text reminder uses a small moon icon.	**B.** The proposal is meant mainly for overnight hotel guests.
C. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test.	**D.** The hotel should send quiet-hours text reminders to hotel guests.

Answer: D. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The hotel should send quiet-hours text reminders to hotel guests. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Level 5

Level 5 is for fluency: the learner should now name the thinking move and explain the elimination path.

Question 129

Level 5

At a meeting about evening bus service for late-shift workers, Taylor says, "The new buses were repainted blue. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Therefore, the city council should extend evening bus service until midnight. The proposal is meant mainly for late-shift workers." Which sentence is Taylor's conclusion?

A. The proposal is meant mainly for late-shift workers.	**B.** The new buses were repainted blue.
C. The city council should extend evening bus service until midnight.	**D.** A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test.

Answer: C. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The city council should extend evening bus service until midnight. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 130

Level 5

At a meeting about classroom phone lockers, Morgan says, "The lockers are installed near the gym. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test. Therefore, the school board should require phone lockers during class. The proposal is meant mainly for ninth-grade students." Which sentence is Morgan's conclusion?

A. A four-week test with ninth-grade students found that classroom disruption reports fell by 31% compared with the four weeks before the test.	**B.** The lockers are installed near the gym.
C. The proposal is meant mainly for ninth-grade students.	**D.** The school board should require phone lockers during class.

Answer: D. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The school board should require phone lockers during class. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 131

Level 5

At a meeting about medication reminder texts for older patients, Casey says, "The text messages use a green pill icon. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Therefore, the hospital should send medication reminder texts before evening doses. The proposal is meant mainly for patients over 60." Which sentence is Casey's conclusion?

A. The hospital should send medication reminder texts before evening doses.	**B.** A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test.
C. The text messages use a green pill icon.	**D.** The proposal is meant mainly for patients over 60.

Answer: A. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The hospital should send medication reminder texts before evening doses. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 132

Level 5

At a meeting about a four-day workweek test for software engineers, Jordan says, "The test calendar starts on a Monday. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Therefore, the company should test a Monday-through-Thursday workweek. The proposal is meant mainly for software engineers." Which sentence is Jordan's conclusion?

A. The proposal is meant mainly for software engineers.	**B.** The company should test a Monday-through-Thursday workweek.
C. The test calendar starts on a Monday.	**D.** A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test.

Answer: B. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The company should test a Monday-through-Thursday workweek. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 133

Level 5

At a meeting about larger grocery unit-price labels, Riley says, "The shelf labels use bold black numbers. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Therefore, the grocery chain should add larger unit-price labels on shelf tags. The proposal is meant mainly for weekly grocery shoppers." Which sentence is Riley's conclusion?

A. The shelf labels use bold black numbers.	**B.** The proposal is meant mainly for weekly grocery shoppers.
C. The grocery chain should add larger unit-price labels on shelf tags.	**D.** A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test.

Answer: C. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The grocery chain should add larger unit-price labels on shelf tags. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 134

Level 5

At a meeting about late fines on children's books, Maya says, "The children's-book checkout desk moved six feet. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Therefore, the library should waive late fines for children's books. The proposal is meant mainly for families checking out children's books." Which sentence is Maya's conclusion?

A. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test.	**B.** The children's-book checkout desk moved six feet.
C. The proposal is meant mainly for families checking out children's books.	**D.** The library should waive late fines for children's books.

Answer: D. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The library should waive late fines for children's books. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 135

Level 5

At a meeting about two-factor login for site administrators, Sam says, "The login button changed from green to blue. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Therefore, the platform should require two-factor login for site administrators. The proposal is meant mainly for site administrators." Which sentence is Sam's conclusion?

A. The platform should require two-factor login for site administrators.	**B.** The login button changed from green to blue.
C. The proposal is meant mainly for site administrators.	**D.** A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test.

Answer: A. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The platform should require two-factor login for site administrators. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 136

Level 5

At a meeting about brighter streetlights on Maple Street, Avery says, "The new light poles are made of aluminum. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Therefore, the neighborhood association should add brighter LED streetlights on Maple Street. The proposal is meant mainly for residents on Maple Street." Which sentence is Avery's conclusion?

A. The proposal is meant mainly for residents on Maple Street.	**B.** The neighborhood association should add brighter LED streetlights on Maple Street.
C. The new light poles are made of aluminum.	**D.** A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test.

Answer: B. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The neighborhood association should add brighter LED streetlights on Maple Street. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 137

Level 5

At a meeting about peer tutoring for first-year statistics students, Taylor says, "The tutoring room has new chairs. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Therefore, the university should expand peer tutoring in statistics. The proposal is meant mainly for first-year statistics students." Which sentence is Taylor's conclusion?

A. The university should expand peer tutoring in statistics.	**B.** The tutoring room has new chairs.
C. The proposal is meant mainly for first-year statistics students.	**D.** A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test.

Answer: A. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The university should expand peer tutoring in statistics. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 138

Level 5

At a meeting about calorie labels on restaurant menus, Morgan says, "The lunch menus are printed on thicker paper. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Therefore, the restaurant group should show calorie labels on printed lunch menus. The proposal is meant mainly for lunch customers." Which sentence is Morgan's conclusion?

A. The lunch menus are printed on thicker paper.	**B.** The restaurant group should show calorie labels on printed lunch menus.
C. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test.	**D.** The proposal is meant mainly for lunch customers.

Answer: B. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The restaurant group should show calorie labels on printed lunch menus. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 139

Level 5

At a meeting about bank overdraft warning texts, Casey says, "The warning texts arrive from a short code. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Therefore, the bank should send overdraft warning texts before fees post. The proposal is meant mainly for checking-account customers." Which sentence is Casey's conclusion?

A. The proposal is meant mainly for checking-account customers.	**B.** The warning texts arrive from a short code.
C. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test.	**D.** The bank should send overdraft warning texts before fees post.

Answer: D. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The bank should send overdraft warning texts before fees post. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 140

Level 5

At a meeting about timed-entry passes for weekend park trails, Jordan says, "The digital passes include a small trail map. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Therefore, the park service should use timed-entry passes for weekend trail visits. The proposal is meant mainly for weekend trail hikers." Which sentence is Jordan's conclusion?

A. The proposal is meant mainly for weekend trail hikers.	**B.** The park service should use timed-entry passes for weekend trail visits.
C. The digital passes include a small trail map.	**D.** A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test.

Answer: B. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The park service should use timed-entry passes for weekend trail visits. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 141

Level 5

At a meeting about free Friday museum admission, Riley says, "The Friday tickets are scanned at the east door. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Therefore, the museum should offer free admission on Fridays. The proposal is meant mainly for local families." Which sentence is Riley's conclusion?

A. The Friday tickets are scanned at the east door.	**B.** A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test.
C. The proposal is meant mainly for local families.	**D.** The museum should offer free admission on Fridays.

Answer: D. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The museum should offer free admission on Fridays. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 142

Level 5

At a meeting about youth soccer concussion checks, Maya says, "The concussion checklist is printed on yellow paper. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Therefore, the sports league should add mandatory sideline concussion checks. The proposal is meant mainly for youth soccer players." Which sentence is Maya's conclusion?

A. The proposal is meant mainly for youth soccer players.	**B.** A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test.
C. The sports league should add mandatory sideline concussion checks.	**D.** The concussion checklist is printed on yellow paper.

Answer: C. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The sports league should add mandatory sideline concussion checks. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 143

Level 5

At a meeting about same-day donation receipts, Sam says, "The receipt email subject line changed. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Therefore, the nonprofit should send donation receipts within one day. The proposal is meant mainly for first-time donors." Which sentence is Sam's conclusion?

A. The proposal is meant mainly for first-time donors.	**B.** The nonprofit should send donation receipts within one day.
C. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test.	**D.** The receipt email subject line changed.

Answer: B. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The nonprofit should send donation receipts within one day. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 144

Level 5

At a meeting about warehouse ergonomic training, Avery says, "The training room has a ceiling-mounted projector. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Therefore, the warehouse should offer monthly lifting-safety and ergonomic training. The proposal is meant mainly for warehouse staff." Which sentence is Avery's conclusion?

A. The warehouse should offer monthly lifting-safety and ergonomic training.	**B.** The proposal is meant mainly for warehouse staff.
C. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test.	**D.** The training room has a ceiling-mounted projector.

Answer: A. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The warehouse should offer monthly lifting-safety and ergonomic training. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 145

Level 5

At a meeting about apartment-lobby compost bins, Taylor says, "The lobby compost bins have foot pedals. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Therefore, the city sanitation office should place compost bins in apartment lobbies. The proposal is meant mainly for apartment residents." Which sentence is Taylor's conclusion?

A. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test.	**B.** The proposal is meant mainly for apartment residents.
C. The lobby compost bins have foot pedals.	**D.** The city sanitation office should place compost bins in apartment lobbies.

Answer: D. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The city sanitation office should place compost bins in apartment lobbies. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 146

Level 5

At a meeting about private-by-default app profiles, Morgan says, "The privacy screen uses a shield icon. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Therefore, the app maker should make new user profiles private by default. The proposal is meant mainly for new app users." Which sentence is Morgan's conclusion?

A. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test.	**B.** The proposal is meant mainly for new app users.
C. The app maker should make new user profiles private by default.	**D.** The privacy screen uses a shield icon.

Answer: C. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The app maker should make new user profiles private by default. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 147

Level 5

At a meeting about same-day clinic appointment slots, Casey says, "The appointment cards are white. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Therefore, the clinic should reserve same-day appointment slots. The proposal is meant mainly for primary-care patients." Which sentence is Casey's conclusion?

A. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test.	**B.** The clinic should reserve same-day appointment slots.
C. The appointment cards are white.	**D.** The proposal is meant mainly for primary-care patients.

Answer: B. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The clinic should reserve same-day appointment slots. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 148

Level 5

At a meeting about seat-zone airline boarding, Jordan says, "The gate signs are backlit. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Therefore, the airline should board passengers by seat zone. The proposal is meant mainly for domestic flight passengers." Which sentence is Jordan's conclusion?

A. The proposal is meant mainly for domestic flight passengers.	**B.** The gate signs are backlit.
C. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test.	**D.** The airline should board passengers by seat zone.

Answer: D. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The airline should board passengers by seat zone. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 149

Level 5

At a meeting about an online apartment repair portal, Riley says, "The repair portal uses a house logo. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Therefore, the landlord should launch an online apartment repair portal. The proposal is meant mainly for apartment tenants." Which sentence is Riley's conclusion?

A. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test.	**B.** The proposal is meant mainly for apartment tenants.
C. The landlord should launch an online apartment repair portal.	**D.** The repair portal uses a house logo.

Answer: C. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The landlord should launch an online apartment repair portal. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 150

Level 5

At a meeting about fruit placement in a school cafeteria line, Maya says, "The fruit bowls are ceramic. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Therefore, the cafeteria should move fruit bowls to the front of the cafeteria line. The proposal is meant mainly for middle-school students." Which sentence is Maya's conclusion?

A. The cafeteria should move fruit bowls to the front of the cafeteria line.	**B.** The fruit bowls are ceramic.
C. The proposal is meant mainly for middle-school students.	**D.** A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test.

Answer: A. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The cafeteria should move fruit bowls to the front of the cafeteria line. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 151

Level 5

At a meeting about weekly call-center script coaching, Sam says, "The coaching slides use blue headers. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Therefore, the call center should give support agents weekly script coaching. The proposal is meant mainly for support agents." Which sentence is Sam's conclusion?

A. The call center should give support agents weekly script coaching.	**B.** A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test.
C. The coaching slides use blue headers.	**D.** The proposal is meant mainly for support agents.

Answer: A. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The call center should give support agents weekly script coaching. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 152

Level 5

At a meeting about household water-leak alerts, Avery says, "The water-leak alert screen includes a blue droplet icon. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Therefore, the water utility should send automatic household water-leak alerts. The proposal is meant mainly for local homeowners." Which sentence is Avery's conclusion?

A. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test.	**B.** The water utility should send automatic household water-leak alerts.
C. The water-leak alert screen includes a blue droplet icon.	**D.** The proposal is meant mainly for local homeowners.

Answer: B. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The water utility should send automatic household water-leak alerts. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 153

Level 5

At a meeting about body-camera activation reminders, Taylor says, "The reminder tone is two beeps. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Therefore, the police department should send body-camera activation reminders before patrol shifts. The proposal is meant mainly for patrol officers." Which sentence is Taylor's conclusion?

A. The police department should send body-camera activation reminders before patrol shifts.	**B.** The reminder tone is two beeps.
C. The proposal is meant mainly for patrol officers.	**D.** A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test.

Answer: A. The conclusion is Taylor's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The police department should send body-camera activation reminders before patrol shifts. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 154

Level 5

At a meeting about county mail-ballot tracking, Morgan says, "The ballot-tracking page uses county colors. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Therefore, the election office should offer online mail-ballot tracking. The proposal is meant mainly for mail voters." Which sentence is Morgan's conclusion?

A. The proposal is meant mainly for mail voters.	**B.** The election office should offer online mail-ballot tracking.
C. The ballot-tracking page uses county colors.	**D.** A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test.

Answer: B. The conclusion is Morgan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is B: The election office should offer online mail-ballot tracking. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 155

Level 5

At a meeting about language-learning spaced-review prompts, Casey says, "The review prompts use a bell icon. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Therefore, the tutoring app should send spaced-review prompts for language vocabulary. The proposal is meant mainly for language learners." Which sentence is Casey's conclusion?

A. The proposal is meant mainly for language learners.	**B.** The review prompts use a bell icon.
C. The tutoring app should send spaced-review prompts for language vocabulary.	**D.** A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test.

Answer: C. The conclusion is Casey's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The tutoring app should send spaced-review prompts for language vocabulary. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

Question 156

Level 5

At a meeting about a beginner gym orientation, Jordan says, "The orientation mats are black. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Therefore, the gym should offer a beginner gym orientation. The proposal is meant mainly for new gym members." Which sentence is Jordan's conclusion?

A. The orientation mats are black.	**B.** The proposal is meant mainly for new gym members.
C. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test.	**D.** The gym should offer a beginner gym orientation.

Answer: D. The conclusion is Jordan's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The gym should offer a beginner gym orientation. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 157

Level 5

At a meeting about safe-driving feedback for policyholders, Riley says, "The feedback dashboard uses star ratings. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Therefore, the insurer should send weekly safe-driving feedback. The proposal is meant mainly for auto-insurance policyholders." Which sentence is Riley's conclusion?

A. The insurer should send weekly safe-driving feedback.	**B.** The proposal is meant mainly for auto-insurance policyholders.
C. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test.	**D.** The feedback dashboard uses star ratings.

Answer: A. The conclusion is Riley's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is A: The insurer should send weekly safe-driving feedback. Treat evidence and background as helpers, not as the conclusion itself.

A. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

D. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

Question 158

Level 5

At a meeting about top-of-article correction boxes, Maya says, "The correction box has a gray border. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Therefore, the newsroom should place corrections at the top of articles. The proposal is meant mainly for newsletter readers." Which sentence is Maya's conclusion?

A. The correction box has a gray border.	**B.** A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test.
C. The newsroom should place corrections at the top of articles.	**D.** The proposal is meant mainly for newsletter readers.

Answer: C. The conclusion is Maya's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The newsroom should place corrections at the top of articles. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

Question 159

Level 5

At a meeting about clearer farmers market price signs, Sam says, "The stall price signs are laminated. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Therefore, the farmers market should require clearer price signs at vendor stalls. The proposal is meant mainly for weekend farmers market shoppers." Which sentence is Sam's conclusion?

A. The proposal is meant mainly for weekend farmers market shoppers.	**B.** A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test.
C. The stall price signs are laminated.	**D.** The farmers market should require clearer price signs at vendor stalls.

Answer: D. The conclusion is Sam's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is D: The farmers market should require clearer price signs at vendor stalls. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

B. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.

C. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

D. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

Question 160

Level 5

At a meeting about hotel quiet-hours text reminders, Avery says, "The quiet-hours text reminder uses a small moon icon. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Therefore, the hotel should send quiet-hours text reminders to hotel guests. The proposal is meant mainly for overnight hotel guests." Which sentence is Avery's conclusion?

A. The quiet-hours text reminder uses a small moon icon.	**B.** The proposal is meant mainly for overnight hotel guests.
C. The hotel should send quiet-hours text reminders to hotel guests.	**D.** A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test.

Answer: C. The conclusion is Avery's point. The test result is a reason offered to support it.

How to work it out. To uncover the answer, ask which sentence is being supported by the others. The correct choice is C: The hotel should send quiet-hours text reminders to hotel guests. Treat evidence and background as helpers, not as the conclusion itself.

A. Not correct. This is a background detail. The conclusion is the sentence that follows from the reasons and says what should be accepted.

B. Not correct. This is background about the proposal's audience. It helps set the scene, but it is not the point being argued for.

C. Correct. This sentence is the conclusion: the point being supported. The other sentences are evidence, background, or information about who the proposal is meant to help.

D. Not correct. This sentence gives a reason or evidence. A conclusion is the point that reason is meant to support.
