

Skill 04

Spot Hidden Assumptions

What's Assumed?

160 Items	1-5 Levels	Find the unstated idea the argument needs. Objective
--------------	---------------	---

Essential question. What unstated idea must be true for the reason to support the conclusion?

This PDF is designed for classroom use. It gives teachers a rigorous introduction to the skill, a repeatable solving routine, likely student confusions, a worked example, and the full XiXteen item set with choice-level feedback.

Generated from the current XiXteen corpus on 2026-06-19.

Skill 04

Spot Hidden Assumptions

What's Assumed?

Find the unstated idea the argument needs. Objective	160 Items	Levels 1-5 Difficulty bands
--	---------------------	---------------------------------------

Essential question	What unstated idea must be true for the reason to support the conclusion?
Why it matters	Many arguments fail not because a stated sentence is false, but because an unstated bridge is missing. Assumptions are the silent hinges that let a reason swing toward a conclusion.
Conceptual core	An assumption is not merely something unstated; it is an unstated bridge the argument needs. Students should learn to avoid both extremes: choosing an assumption so broad it would make almost any argument work, or choosing a detail that is true but not necessary for this argument. The best assumption usually connects the specific evidence to the specific conclusion.
Student method	Put the reason and conclusion side by side. Then ask what must also be true for the reason to count as support. The best assumption is usually narrower than a huge universal claim.
Analogy	A hidden assumption is a bridge over a gap. If the bridge is weak, even true facts may not get you to the conclusion.
Assessment focus	A good answer supplies a necessary bridge and avoids choices that are mere background, evidence, or overconfident guarantees.

Teaching Sequence

1. Put the stated reason and conclusion next to each other.
2. Ask what must be true for that reason to count in favor of that conclusion.
3. Prefer a narrow bridge over a sweeping guarantee.
4. Use the denial test: if this assumption were false, would the argument weaken?

Common Confusions To Watch For

1. Students may choose a statement that would be nice to know but is not required.
2. Students may choose a much stronger claim than the argument needs.
3. Students may confuse evidence with the assumption that lets the evidence matter.

Teacher Prompts

1. What is the missing bridge between these two sentences?
2. Would the conclusion still be supported if this choice were false?
3. Is this answer just helpful, or is it needed?

Worked Example

Scenario	A store's weekend trial of a new checkout line reduced waiting times, so the store should use that checkout setup every day.
Teacher think-aloud	The argument assumes weekend customers and weekday customers are similar enough, or that the checkout setup would still reduce waits under normal daily conditions.
Student takeaway	Assumptions connect the evidence to the conclusion without adding more than the argument needs.

Classroom extension. Have students write because-therefore sentences and insert the missing assumption between the reason and conclusion.

Item Bank

Items are grouped by level. For each item, read the prompt, predict the answer, choose, and then use the feedback and process commentary to examine the reasoning path.

Level 1

Level 1 establishes the clean version of the skill: the cue is direct, the distractors are visible, and the main task is to learn the contrast.

hidden_assumptions-001 | Level 1 | Answer A

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Riley argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Riley's argument need?

A. The test group is similar enough to the wider group that the result can guide the decision. correct	B. The side detail decides the issue. choice
C. Late-shift commute complaints can never be measured reliably, no matter how carefully people try. choice	D. The city council should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, transportation, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-002 | Level 1 | Answer B

Prompt. The school board is weighing a proposal aimed at ninth-grade classrooms: require phone lockers during class. A four-week test with ninth-grade classrooms found that classroom disruption reports fell by 31% compared with the four weeks before the test. Maya says, "The plan caused that result." Which hidden assumption does Maya's argument need?

A. The school board should reject every alternative before checking any other evidence, even if it is relevant. choice	B. No other major change during the test better explains the result than the plan does. correct
C. The side detail decides the issue. choice	D. Classroom disruption reports can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, education, d1

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-003 | Level 1 | Answer C

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Sam says, "That means the plan helped patients over 60." Which hidden assumption does Sam's argument need?

A. Missed-dose reports can never be measured reliably, no matter how carefully people try. choice	B. The hospital should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The measured result is a reasonable sign that the plan helped the target group. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, health, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-004 | Level 1 | Answer D

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. Avery says, "If the plan can reduce staff resignations, then it should be adopted." Which hidden assumption does Avery's argument need?

A. The side detail decides the issue. choice	B. The company should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Staff resignations can never be measured reliably, no matter how carefully people try. choice	D. Reducing staff resignations would matter enough to count in this decision. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, workplace, d1

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-005 | Level 1 | Answer A

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Taylor says, "The result will continue if the plan becomes permanent." Which hidden assumption does Taylor's argument need?

A. The short-term result will not disappear once the test period ends. correct	B. The side detail decides the issue. choice
C. Shopper overpayment complaints can never be measured reliably, no matter how carefully people try. choice	D. The grocery chain should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, retail, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-006 | Level 1 | Answer B

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Morgan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Morgan's argument need?

A. The side detail decides the issue. choice	B. The people in the test are enough like the wider group for the result to matter. correct
C. The library should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Library card renewals can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, public services, d1

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-007 | Level 1 | Answer C

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Casey says, "The plan caused that result." Which hidden assumption does Casey's argument need?

A. Admin account takeovers can never be measured reliably, no matter how carefully people try. choice	B. The platform should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Nothing else important changed during the test in a way that better explains the result. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, technology, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-008 | Level 1 | Answer D

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Jordan says, "That means the plan helped residents on Maple Street." Which hidden assumption does Jordan's argument need?

A. Reported thefts can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The neighborhood association should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The result being measured is the right kind of evidence for whether the plan helped. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, public safety, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-009 | Level 1 | Answer A

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. Riley says, "If the plan can increase course pass rates, then it should be adopted." Which hidden assumption does Riley's argument need?

A. Increasing course pass rates is important enough to help justify the plan. correct	B. Course pass rates can never be measured reliably, no matter how carefully people try. choice
C. The university should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, education, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-010 | Level 1 | Answer B

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Maya says, "The result will continue if the plan becomes permanent." Which hidden assumption does Maya's argument need?

A. Dessert orders can never be measured reliably, no matter how carefully people try. choice	B. The result from the short test will last long enough to matter after the rollout. correct
C. The restaurant group should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, nutrition, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-011 | Level 1 | Answer D

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Sam argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Sam's argument need?

A. The bank should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. Overdraft fees can never be measured reliably, no matter how carefully people try. choice	D. The small test is close enough to the real rollout to count as useful evidence. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, finance, d1

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-012 | Level 1 | Answer C

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Avery says, "The plan caused that result." Which hidden assumption does Avery's argument need?

A. Trail crowding complaints can never be measured reliably, no matter how carefully people try. choice	B. The park service should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The result is not better explained by another change that happened during the test. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, environment, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-013 | Level 1 | Answer B

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Taylor says, "That means the plan helped local families." Which hidden assumption does Taylor's argument need?

A. Family visits can never be measured reliably, no matter how carefully people try. choice	B. Improvement in the tracked result would count as a real sign of help for the group. correct
C. The museum should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, culture, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-014 | Level 1 | Answer A

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. Morgan says, "If the plan can reduce repeat head injuries, then it should be adopted." Which hidden assumption does Morgan's argument need?

A. A real change in repeat head injuries would be valuable enough to matter for the decision. correct	B. The sports league should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Repeat head injuries can never be measured reliably, no matter how carefully people try. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, sports, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-015 | Level 1 | Answer D

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Casey says, "The result will continue if the plan becomes permanent." Which hidden assumption does Casey's argument need?

A. The side detail decides the issue. choice	B. The nonprofit should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Donor retention can never be measured reliably, no matter how carefully people try. choice	D. The test result is not just a temporary bump that fades when the test is over. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, nonprofit, d1

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-016 | Level 1 | Answer C

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Jordan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Jordan's argument need?

A. Back-injury claims can never be measured reliably, no matter how carefully people try. choice	B. The warehouse should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The wider group is enough like the test group that the result is a fair clue. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, workplace safety, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-017 | Level 1 | Answer B

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Riley says, "The plan caused that result." Which hidden assumption does Riley's argument need?

A. The city sanitation office should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Other changes during the test were not strong enough to explain the result better. correct
C. The side detail decides the issue. choice	D. Landfill waste from participating buildings can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, environment, d1

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-018 | Level 1 | Answer A

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Maya says, "That means the plan helped new app users." Which hidden assumption does Maya's argument need?

A. The measurement is close enough to the goal to show whether the group was helped. correct	B. The side detail decides the issue. choice
C. Publicly visible profiles can never be measured reliably, no matter how carefully people try. choice	D. The app maker should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, technology, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-019 | Level 1 | Answer D

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. Sam says, "If the plan can reduce patient no-show rates, then it should be adopted." Which hidden assumption does Sam's argument need?

A. Patient no-show rates can never be measured reliably, no matter how carefully people try. choice	B. The clinic should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The side detail decides the issue. choice	D. The goal of reducing patient no-show rates is important enough to help decide what to do. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, health, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-020 | Level 1 | Answer C

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Avery says, "The result will continue if the plan becomes permanent." Which hidden assumption does Avery's argument need?

A. Average boarding time can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The improvement seen during the test will continue if the plan becomes permanent. correct	D. The airline should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, travel, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-021 | Level 1 | Answer C

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Taylor argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Taylor's argument need?

A. The side detail decides the issue. choice	B. Unresolved repair requests can never be measured reliably, no matter how carefully people try. choice
C. The test setting matches the bigger decision closely enough for the result to matter. correct	D. The landlord should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, housing, d1

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-022 | Level 1 | Answer D

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Morgan says, "The plan caused that result." Which hidden assumption does Morgan's argument need?

A. Fruit purchases can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The cafeteria should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The plan is the best explanation of the result, not some other change at the same time. correct

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, food, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-023 | Level 1 | Answer A

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Casey says, "That means the plan helped support agents." Which hidden assumption does Casey's argument need?

A. The tracked result is a fair way to judge whether the plan helped the people involved. correct	B. Customer complaint rates can never be measured reliably, no matter how carefully people try. choice
C. The call center should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, customer support, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-024 | Level 1 | Answer B

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. Jordan says, "If the plan can reduce average household water use, then it should be adopted." Which hidden assumption does Jordan's argument need?

A. The side detail decides the issue. choice	B. Average household water use matters enough that improving it could be a serious reason for the plan. correct
C. The water utility should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Average household water use can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, utilities, d1

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-025 | Level 1 | Answer C

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Riley says, "The result will continue if the plan becomes permanent." Which hidden assumption does Riley's argument need?

A. The police department should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Missing-camera-footage reports can never be measured reliably, no matter how carefully people try. choice
C. The four-week result is stable enough to be useful for a longer-term decision. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, governance, d1

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-026 | Level 1 | Answer D

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Maya argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Maya's argument need?

A. Phone calls asking ballot status can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The election office should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The test group is similar enough to the wider group that the result can guide the decision. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, election administration, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-027 | Level 1 | Answer B

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Sam says, "The plan caused that result." Which hidden assumption does Sam's argument need?

A. The side detail decides the issue. choice	B. No other major change during the test better explains the result than the plan does. correct
C. The tutoring app should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Vocabulary retention quiz scores can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, learning, d1

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-028 | Level 1 | Answer D

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Avery says, "That means the plan helped new gym members." Which hidden assumption does Avery's argument need?

A. The side detail decides the issue. choice	B. The gym should reject every alternative before checking any other evidence, even if it is relevant. choice
C. New-member cancellations can never be measured reliably, no matter how carefully people try. choice	D. The measured result is a reasonable sign that the plan helped the target group. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, fitness, d1

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-029 | Level 1 | Answer A

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. Taylor says, "If the plan can reduce reported minor crashes, then it should be adopted." Which hidden assumption does Taylor's argument need?

A. Reducing reported minor crashes would matter enough to count in this decision. correct	B. Reported minor crashes can never be measured reliably, no matter how carefully people try. choice
C. The insurer should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, insurance, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-030 | Level 1 | Answer B

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Morgan says, "The result will continue if the plan becomes permanent." Which hidden assumption does Morgan's argument need?

A. Reader trust ratings can never be measured reliably, no matter how carefully people try. choice	B. The short-term result will not disappear once the test period ends. correct
C. The side detail decides the issue. choice	D. The newsroom should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, media, d1

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-031 | Level 1 | Answer C

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Casey argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Casey's argument need?

A. The farmers market should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. The people in the test are enough like the wider group for the result to matter. correct	D. Price disputes can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, local commerce, d1

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-032 | Level 1 | Answer A

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Jordan says, "The plan caused that result." Which hidden assumption does Jordan's argument need?

A. Nothing else important changed during the test in a way that better explains the result. correct	B. The hotel should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The side detail decides the issue. choice	D. Noise complaints from guest rooms can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, hospitality, d1

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

Level 2

Level 2 keeps the same skill but adds more realistic wording and more tempting distractors.

hidden_assumptions-033 | Level 2 | Answer B

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Maya says, "The plan caused that result." Which hidden assumption does Maya's argument need?

A. The side detail decides the issue. choice	B. Nothing else important changed during the test in a way that better explains the result. correct
C. Late-shift commute complaints can never be measured reliably, no matter how carefully people try. choice	D. The city council should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, transportation, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-034 | Level 2 | Answer A

Prompt. The school board is weighing a proposal aimed at ninth-grade classrooms: require phone lockers during class. A four-week test with ninth-grade classrooms found that classroom disruption reports fell by 31% compared with the four weeks before the test. Sam says, "That means the plan helped ninth-grade classrooms." Which hidden assumption does Sam's argument need?

A. The result being measured is the right kind of evidence for whether the plan helped. correct	B. The side detail decides the issue. choice
C. The school board should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Classroom disruption reports can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, education, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-035 | Level 2 | Answer D

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. Avery says, "If the plan can reduce missed-dose reports, then it should be adopted." Which hidden assumption does Avery's argument need?

A. The side detail decides the issue. choice	B. The hospital should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Missed-dose reports can never be measured reliably, no matter how carefully people try. choice	D. Reducing missed-dose reports is important enough to help justify the plan. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, health, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-036 | Level 2 | Answer C

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Taylor says, "The result will continue if the plan becomes permanent." Which hidden assumption does Taylor's argument need?

A. The company should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Staff resignations can never be measured reliably, no matter how carefully people try. choice
C. The result from the short test will last long enough to matter after the rollout. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, workplace, d2

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-037 | Level 2 | Answer B

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Morgan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Morgan's argument need?

A. The side detail decides the issue. choice	B. The people in the test are enough like the wider group for the result to matter. correct
C. Shopper overpayment complaints can never be measured reliably, no matter how carefully people try. choice	D. The grocery chain should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, retail, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-038 | Level 2 | Answer A

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Casey says, "The plan caused that result." Which hidden assumption does Casey's argument need?

A. The result is not better explained by another change that happened during the test. correct	B. The library should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The side detail decides the issue. choice	D. Library card renewals can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, public services, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-039 | Level 2 | Answer D

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Jordan says, "That means the plan helped site administrators." Which hidden assumption does Jordan's argument need?

A. The platform should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. Admin account takeovers can never be measured reliably, no matter how carefully people try. choice	D. Improvement in the tracked result would count as a real sign of help for the group. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, technology, d2

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-040 | Level 2 | Answer C

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. Riley says, "If the plan can reduce reported thefts, then it should be adopted." Which hidden assumption does Riley's argument need?

A. The neighborhood association should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. A real change in reported thefts would be valuable enough to matter for the decision. correct	D. Reported thefts can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, public safety, d2

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-041 | Level 2 | Answer D

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Maya says, "The result will continue if the plan becomes permanent." Which hidden assumption does Maya's argument need?

A. Course pass rates can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The university should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The test result is not just a temporary bump that fades when the test is over. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, education, d2

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-042 | Level 2 | Answer C

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Sam argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Sam's argument need?

A. The side detail decides the issue. choice	B. Dessert orders can never be measured reliably, no matter how carefully people try. choice
C. The small test is close enough to the real rollout to count as useful evidence. correct	D. The restaurant group should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, nutrition, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-043 | Level 2 | Answer C

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Avery says, "The plan caused that result." Which hidden assumption does Avery's argument need?

A. The side detail decides the issue. choice	B. Overdraft fees can never be measured reliably, no matter how carefully people try. choice
C. Other changes during the test were not strong enough to explain the result better. correct	D. The bank should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, finance, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-044 | Level 2 | Answer A

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Taylor says, "That means the plan helped weekend trail hikers." Which hidden assumption does Taylor's argument need?

A. The measurement is close enough to the goal to show whether the group was helped. correct	B. The side detail decides the issue. choice
C. Trail crowding complaints can never be measured reliably, no matter how carefully people try. choice	D. The park service should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, environment, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-045 | Level 2 | Answer A

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. Morgan says, "If the plan can increase family visits, then it should be adopted." Which hidden assumption does Morgan's argument need?

A. The goal of increasing family visits is important enough to help decide what to do. correct	B. Family visits can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. The museum should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, culture, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-046 | Level 2 | Answer B

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Casey says, "The result will continue if the plan becomes permanent." Which hidden assumption does Casey's argument need?

A. Repeat head injuries can never be measured reliably, no matter how carefully people try. choice	B. The improvement seen during the test will continue if the plan becomes permanent. correct
C. The sports league should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, sports, d2

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-047 | Level 2 | Answer A

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Jordan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Jordan's argument need?

A. The wider group is enough like the test group that the result is a fair clue. correct	B. Donor retention can never be measured reliably, no matter how carefully people try. choice
C. The nonprofit should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, nonprofit, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-048 | Level 2 | Answer C

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Riley says, "The plan caused that result." Which hidden assumption does Riley's argument need?

A. Back-injury claims can never be measured reliably, no matter how carefully people try. choice	B. The warehouse should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The plan is the best explanation of the result, not some other change at the same time. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, workplace safety, d2

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-049 | Level 2 | Answer A

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Maya says, "That means the plan helped apartment residents." Which hidden assumption does Maya's argument need?

A. The tracked result is a fair way to judge whether the plan helped the people involved. correct	B. Landfill waste from participating buildings can never be measured reliably, no matter how carefully people try. choice
C. The city sanitation office should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, environment, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-050 | Level 2 | Answer C

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. Sam says, "If the plan can reduce publicly visible profiles, then it should be adopted." Which hidden assumption does Sam's argument need?

A. Publicly visible profiles can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. Publicly visible profiles matters enough that improving it could be a serious reason for the plan. correct	D. The app maker should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, technology, d2

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-051 | Level 2 | Answer C

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Avery says, "The result will continue if the plan becomes permanent." Which hidden assumption does Avery's argument need?

A. The side detail decides the issue. choice	B. The clinic should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The four-week result is stable enough to be useful for a longer-term decision. correct	D. Patient no-show rates can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, health, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-052 | Level 2 | Answer D

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Taylor argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Taylor's argument need?

A. The airline should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Average boarding time can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. The test setting matches the bigger decision closely enough for the result to matter. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, travel, d2

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-053 | Level 2 | Answer D

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Morgan says, "The plan caused that result." Which hidden assumption does Morgan's argument need?

A. Unresolved repair requests can never be measured reliably, no matter how carefully people try. choice	B. The landlord should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The side detail decides the issue. choice	D. No other major change during the test better explains the result than the plan does. correct

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, housing, d2

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-054 | Level 2 | Answer C

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Casey says, "That means the plan helped middle-school students." Which hidden assumption does Casey's argument need?

A. The side detail decides the issue. choice	B. Fruit purchases can never be measured reliably, no matter how carefully people try. choice
C. The measured result is a reasonable sign that the plan helped the target group. correct	D. The cafeteria should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, food, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-055 | Level 2 | Answer B

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. Jordan says, "If the plan can reduce customer complaint rates, then it should be adopted." Which hidden assumption does Jordan's argument need?

A. The call center should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Reducing customer complaint rates would matter enough to count in this decision. correct
C. The side detail decides the issue. choice	D. Customer complaint rates can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, customer support, d2

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-056 | Level 2 | Answer A

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Riley says, "The result will continue if the plan becomes permanent." Which hidden assumption does Riley's argument need?

A. The short-term result will not disappear once the test period ends. correct	B. Average household water use can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. The water utility should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, utilities, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-057 | Level 2 | Answer D

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Maya argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Maya's argument need?

A. The police department should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Missing-camera-footage reports can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. The test group is similar enough to the wider group that the result can guide the decision. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, governance, d2

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-058 | Level 2 | Answer B

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Sam says, "The plan caused that result." Which hidden assumption does Sam's argument need?

A. The election office should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Nothing else important changed during the test in a way that better explains the result. correct
C. The side detail decides the issue. choice	D. Phone calls asking ballot status can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, election administration, d2

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-059 | Level 2 | Answer D

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Avery says, "That means the plan helped language learners." Which hidden assumption does Avery's argument need?

A. The side detail decides the issue. choice	B. The tutoring app should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Vocabulary retention quiz scores can never be measured reliably, no matter how carefully people try. choice	D. The result being measured is the right kind of evidence for whether the plan helped. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, learning, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-060 | Level 2 | Answer B

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. Taylor says, "If the plan can reduce new-member cancellations, then it should be adopted." Which hidden assumption does Taylor's argument need?

A. New-member cancellations can never be measured reliably, no matter how carefully people try. choice	B. Reducing new-member cancellations is important enough to help justify the plan. correct
C. The side detail decides the issue. choice	D. The gym should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, fitness, d2

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-061 | Level 2 | Answer B

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Morgan says, "The result will continue if the plan becomes permanent." Which hidden assumption does Morgan's argument need?

A. Reported minor crashes can never be measured reliably, no matter how carefully people try. choice	B. The result from the short test will last long enough to matter after the rollout. correct
C. The side detail decides the issue. choice	D. The insurer should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, insurance, d2

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-062 | Level 2 | Answer D

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Casey argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Casey's argument need?

A. The side detail decides the issue. choice	B. The newsroom should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Reader trust ratings can never be measured reliably, no matter how carefully people try. choice	D. The people in the test are enough like the wider group for the result to matter. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, media, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-063 | Level 2 | Answer A

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Jordan says, "The plan caused that result." Which hidden assumption does Jordan's argument need?

A. The result is not better explained by another change that happened during the test. correct	B. Price disputes can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. The farmers market should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, local commerce, d2

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-064 | Level 2 | Answer B

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Riley says, "That means the plan helped overnight hotel guests." Which hidden assumption does Riley's argument need?

A. The side detail decides the issue. choice	B. Improvement in the tracked result would count as a real sign of help for the group. correct
C. The hotel should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Noise complaints from guest rooms can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, hospitality, d2

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

Level 3

Level 3 asks for steadier discrimination: the right answer is still objective, but the wrong answers often sound plausible.

hidden_assumptions-065 | Level 3 | Answer C

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Sam says, "That means the plan helped late-shift workers." Which hidden assumption does Sam's argument need?

A. Late-shift commute complaints can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. Improvement in the tracked result would count as a real sign of help for the group. correct	D. The city council should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, transportation, d3

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-066 | Level 3 | Answer D

Prompt. The school board is weighing a proposal aimed at ninth-grade classrooms: require phone lockers during class. Avery says, "If the plan can reduce classroom disruption reports, then it should be adopted." Which hidden assumption does Avery's argument need?

A. The school board should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. Classroom disruption reports can never be measured reliably, no matter how carefully people try. choice	D. A real change in classroom disruption reports would be valuable enough to matter for the decision. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, education, d3

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-067 | Level 3 | Answer A

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Taylor says, "The result will continue if the plan becomes permanent." Which hidden assumption does Taylor's argument need?

A. The test result is not just a temporary bump that fades when the test is over. correct	B. The hospital should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The side detail decides the issue. choice	D. Missed-dose reports can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, health, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-068 | Level 3 | Answer B

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Morgan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Morgan's argument need?

A. The side detail decides the issue. choice	B. The small test is close enough to the real rollout to count as useful evidence. correct
C. The company should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Staff resignations can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, workplace, d3

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-069 | Level 3 | Answer C

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Casey says, "The plan caused that result." Which hidden assumption does Casey's argument need?

A. The side detail decides the issue. choice	B. The grocery chain should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The result is not better explained by another change that happened during the test. correct	D. Shopper overpayment complaints can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, retail, d3

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-070 | Level 3 | Answer D

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Jordan says, "That means the plan helped families checking out children's books." Which hidden assumption does Jordan's argument need?

A. The library should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. Library card renewals can never be measured reliably, no matter how carefully people try. choice	D. The measurement is close enough to the goal to show whether the group was helped. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, public services, d3

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-071 | Level 3 | Answer A

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. Riley says, "If the plan can reduce admin account takeovers, then it should be adopted." Which hidden assumption does Riley's argument need?

A. The goal of reducing admin account takeovers is important enough to help decide what to do. correct	B. The platform should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Admin account takeovers can never be measured reliably, no matter how carefully people try. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, technology, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-072 | Level 3 | Answer B

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Maya says, "The result will continue if the plan becomes permanent." Which hidden assumption does Maya's argument need?

A. Reported thefts can never be measured reliably, no matter how carefully people try. choice	B. The improvement seen during the test will continue if the plan becomes permanent. correct
C. The neighborhood association should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, public safety, d3

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-073 | Level 3 | Answer C

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Sam argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Sam's argument need?

A. The university should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Course pass rates can never be measured reliably, no matter how carefully people try. choice
C. The wider group is enough like the test group that the result is a fair clue. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, education, d3

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-074 | Level 3 | Answer D

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Avery says, "The plan caused that result." Which hidden assumption does Avery's argument need?

A. Dessert orders can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The restaurant group should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Other changes during the test were not strong enough to explain the result better. correct

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, nutrition, d3

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-075 | Level 3 | Answer B

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Taylor says, "That means the plan helped checking-account customers." Which hidden assumption does Taylor's argument need?

A. The side detail decides the issue. choice	B. The tracked result is a fair way to judge whether the plan helped the people involved. correct
C. The bank should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Overdraft fees can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, finance, d3

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-076 | Level 3 | Answer A

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. Morgan says, "If the plan can reduce trail crowding complaints, then it should be adopted." Which hidden assumption does Morgan's argument need?

A. Trail crowding complaints matters enough that improving it could be a serious reason for the plan. correct	B. The side detail decides the issue. choice
C. The park service should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Trail crowding complaints can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, environment, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-077 | Level 3 | Answer D

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Casey says, "The result will continue if the plan becomes permanent." Which hidden assumption does Casey's argument need?

A. The side detail decides the issue. choice	B. The museum should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Family visits can never be measured reliably, no matter how carefully people try. choice	D. The four-week result is stable enough to be useful for a longer-term decision. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, culture, d3

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-078 | Level 3 | Answer C

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Jordan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Jordan's argument need?

A. The side detail decides the issue. choice	B. The sports league should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The test setting matches the bigger decision closely enough for the result to matter. correct	D. Repeat head injuries can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, sports, d3

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-079 | Level 3 | Answer B

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Riley says, "The plan caused that result." Which hidden assumption does Riley's argument need?

A. The side detail decides the issue. choice	B. The plan is the best explanation of the result, not some other change at the same time. correct
C. Donor retention can never be measured reliably, no matter how carefully people try. choice	D. The nonprofit should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, nonprofit, d3

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-080 | Level 3 | Answer A

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Maya says, "That means the plan helped warehouse staff." Which hidden assumption does Maya's argument need?

A. The measured result is a reasonable sign that the plan helped the target group. correct	B. The side detail decides the issue. choice
C. Back-injury claims can never be measured reliably, no matter how carefully people try. choice	D. The warehouse should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, workplace safety, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-081 | Level 3 | Answer D

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. Sam says, "If the plan can reduce landfill waste from participating buildings, then it should be adopted." Which hidden assumption does Sam's argument need?

A. Landfill waste from participating buildings can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The city sanitation office should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Reducing landfill waste from participating buildings would matter enough to count in this decision. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, environment, d3

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-082 | Level 3 | Answer C

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Avery says, "The result will continue if the plan becomes permanent." Which hidden assumption does Avery's argument need?

A. The app maker should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. The short-term result will not disappear once the test period ends. correct	D. Publicly visible profiles can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, technology, d3

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-083 | Level 3 | Answer B

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Taylor argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Taylor's argument need?

A. Patient no-show rates can never be measured reliably, no matter how carefully people try. choice	B. The test group is similar enough to the wider group that the result can guide the decision. correct
C. The side detail decides the issue. choice	D. The clinic should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, health, d3

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-084 | Level 3 | Answer A

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Morgan says, "The plan caused that result." Which hidden assumption does Morgan's argument need?

A. No other major change during the test better explains the result than the plan does. correct	B. The airline should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The side detail decides the issue. choice	D. Average boarding time can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, travel, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-085 | Level 3 | Answer A

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Casey says, "That means the plan helped apartment tenants." Which hidden assumption does Casey's argument need?

A. The result being measured is the right kind of evidence for whether the plan helped. correct	B. The landlord should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Unresolved repair requests can never be measured reliably, no matter how carefully people try. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, housing, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-086 | Level 3 | Answer B

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. Jordan says, "If the plan can increase fruit purchases, then it should be adopted." Which hidden assumption does Jordan's argument need?

A. The side detail decides the issue. choice	B. Increasing fruit purchases is important enough to help justify the plan. correct
C. The cafeteria should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Fruit purchases can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, food, d3

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-087 | Level 3 | Answer C

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Riley says, "The result will continue if the plan becomes permanent." Which hidden assumption does Riley's argument need?

A. The call center should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. The result from the short test will last long enough to matter after the rollout. correct	D. Customer complaint rates can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, customer support, d3

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-088 | Level 3 | Answer D

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Maya argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Maya's argument need?

A. The side detail decides the issue. choice	B. The water utility should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Average household water use can never be measured reliably, no matter how carefully people try. choice	D. The people in the test are enough like the wider group for the result to matter. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, utilities, d3

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-089 | Level 3 | Answer A

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Sam says, "The plan caused that result." Which hidden assumption does Sam's argument need?

A. Nothing else important changed during the test in a way that better explains the result. correct	B. Missing-camera-footage reports can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. The police department should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, governance, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-090 | Level 3 | Answer B

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Avery says, "That means the plan helped mail voters." Which hidden assumption does Avery's argument need?

A. The election office should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Improvement in the tracked result would count as a real sign of help for the group. correct
C. Phone calls asking ballot status can never be measured reliably, no matter how carefully people try. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, election administration, d3

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-091 | Level 3 | Answer C

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. Taylor says, "If the plan can increase vocabulary retention quiz scores, then it should be adopted." Which hidden assumption does Taylor's argument need?

A. The tutoring app should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. A real change in vocabulary retention quiz scores would be valuable enough to matter for the decision. correct	D. Vocabulary retention quiz scores can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, learning, d3

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-092 | Level 3 | Answer D

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Morgan says, "The result will continue if the plan becomes permanent." Which hidden assumption does Morgan's argument need?

A. The side detail decides the issue. choice	B. The gym should reject every alternative before checking any other evidence, even if it is relevant. choice
C. New-member cancellations can never be measured reliably, no matter how carefully people try. choice	D. The test result is not just a temporary bump that fades when the test is over. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, fitness, d3

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-093 | Level 3 | Answer A

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Casey argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Casey's argument need?

A. The small test is close enough to the real rollout to count as useful evidence. correct	B. The insurer should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Reported minor crashes can never be measured reliably, no matter how carefully people try. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, insurance, d3

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-094 | Level 3 | Answer B

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Jordan says, "The plan caused that result." Which hidden assumption does Jordan's argument need?

A. Reader trust ratings can never be measured reliably, no matter how carefully people try. choice	B. The result is not better explained by another change that happened during the test. correct
C. The side detail decides the issue. choice	D. The newsroom should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, media, d3

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-095 | Level 3 | Answer D

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Riley says, "That means the plan helped weekend farmers market shoppers." Which hidden assumption does Riley's argument need?

A. The side detail decides the issue. choice	B. The farmers market should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Price disputes can never be measured reliably, no matter how carefully people try. choice	D. The measurement is close enough to the goal to show whether the group was helped. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, local commerce, d3

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-096 | Level 3 | Answer C

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. Maya says, "If the plan can reduce noise complaints from guest rooms, then it should be adopted." Which hidden assumption does Maya's argument need?

A. The hotel should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Noise complaints from guest rooms can never be measured reliably, no matter how carefully people try. choice
C. The goal of reducing noise complaints from guest rooms is important enough to help decide what to do. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, hospitality, d3

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

Level 4

Level 4 asks learners to hold more context in mind while applying the same method.

hidden_assumptions-097 | Level 4 | Answer D

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. Avery says, "If the plan can reduce late-shift commute complaints, then it should be adopted." Which hidden assumption does Avery's argument need?

A. The city council should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. Late-shift commute complaints can never be measured reliably, no matter how carefully people try. choice	D. The goal of reducing late-shift commute complaints is important enough to help decide what to do. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, transportation, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-098 | Level 4 | Answer C

Prompt. The school board is weighing a proposal aimed at ninth-grade classrooms: require phone lockers during class. A four-week test with ninth-grade classrooms found that classroom disruption reports fell by 31% compared with the four weeks before the test. Taylor says, "The result will continue if the plan becomes permanent." Which hidden assumption does Taylor's argument need?

A. The school board should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. The improvement seen during the test will continue if the plan becomes permanent. correct	D. Classroom disruption reports can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, education, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-099 | Level 4 | Answer B

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Morgan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Morgan's argument need?

A. The side detail decides the issue. choice	B. The wider group is enough like the test group that the result is a fair clue. correct
C. Missed-dose reports can never be measured reliably, no matter how carefully people try. choice	D. The hospital should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, health, d4

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-100 | Level 4 | Answer A

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Casey says, "The plan caused that result." Which hidden assumption does Casey's argument need?

A. Other changes during the test were not strong enough to explain the result better. correct	B. The company should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The side detail decides the issue. choice	D. Staff resignations can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, workplace, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-101 | Level 4 | Answer D

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. A four-week test with weekly grocery shoppers found that shopper overpayment complaints fell by 27% compared with the four weeks before the test. Jordan says, "That means the plan helped weekly grocery shoppers." Which hidden assumption does Jordan's argument need?

A. The grocery chain should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Shopper overpayment complaints can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. The measurement is close enough to the goal to show whether the group was helped. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, retail, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-102 | Level 4 | Answer C

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. Riley says, "If the plan can increase library card renewals, then it should be adopted." Which hidden assumption does Riley's argument need?

A. Library card renewals can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. Library card renewals matters enough that improving it could be a serious reason for the plan. correct	D. The library should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, public services, d4

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-103 | Level 4 | Answer B

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Maya says, "The result will continue if the plan becomes permanent." Which hidden assumption does Maya's argument need?

A. The side detail decides the issue. choice	B. The four-week result is stable enough to be useful for a longer-term decision. correct
C. The platform should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Admin account takeovers can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, technology, d4

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-104 | Level 4 | Answer A

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Sam argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Sam's argument need?

A. The test setting matches the bigger decision closely enough for the result to matter. correct	B. Reported thefts can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. The neighborhood association should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, public safety, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-105 | Level 4 | Answer D

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Avery says, "The plan caused that result." Which hidden assumption does Avery's argument need?

A. The university should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. Course pass rates can never be measured reliably, no matter how carefully people try. choice	D. The plan is the best explanation of the result, not some other change at the same time. correct

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, education, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-106 | Level 4 | Answer C

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. A four-week test with lunch customers found that dessert orders fell by 16% compared with the four weeks before the test. Taylor says, "That means the plan helped lunch customers." Which hidden assumption does Taylor's argument need?

A. Dessert orders can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The tracked result is a fair way to judge whether the plan helped the people involved. correct	D. The restaurant group should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, nutrition, d4

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-107 | Level 4 | Answer C

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. Morgan says, "If the plan can reduce overdraft fees, then it should be adopted." Which hidden assumption does Morgan's argument need?

A. The side detail decides the issue. choice	B. The bank should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Reducing overdraft fees would matter enough to count in this decision. correct	D. Overdraft fees can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, finance, d4

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-108 | Level 4 | Answer D

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Casey says, "The result will continue if the plan becomes permanent." Which hidden assumption does Casey's argument need?

A. The park service should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. Trail crowding complaints can never be measured reliably, no matter how carefully people try. choice	D. The short-term result will not disappear once the test period ends. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, environment, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-109 | Level 4 | Answer A

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Jordan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Jordan's argument need?

A. The test group is similar enough to the wider group that the result can guide the decision. correct	B. The side detail decides the issue. choice
C. The museum should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Family visits can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, culture, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-110 | Level 4 | Answer B

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Riley says, "The plan caused that result." Which hidden assumption does Riley's argument need?

A. The sports league should reject every alternative before checking any other evidence, even if it is relevant. choice	B. No other major change during the test better explains the result than the plan does. correct
C. The side detail decides the issue. choice	D. Repeat head injuries can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, sports, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-111 | Level 4 | Answer C

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. A four-week test with first-time donors found that donor retention rose by 14% compared with the four weeks before the test. Maya says, "That means the plan helped first-time donors." Which hidden assumption does Maya's argument need?

A. Donor retention can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The measured result is a reasonable sign that the plan helped the target group. correct	D. The nonprofit should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, nonprofit, d4

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-112 | Level 4 | Answer D

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. Sam says, "If the plan can reduce back-injury claims, then it should be adopted." Which hidden assumption does Sam's argument need?

A. Back-injury claims can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The warehouse should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Reducing back-injury claims is important enough to help justify the plan. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, workplace safety, d4

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-113 | Level 4 | Answer A

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Avery says, "The result will continue if the plan becomes permanent." Which hidden assumption does Avery's argument need?

A. The result from the short test will last long enough to matter after the rollout. correct	B. The side detail decides the issue. choice
C. The city sanitation office should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Landfill waste from participating buildings can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, environment, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-114 | Level 4 | Answer B

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Taylor argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Taylor's argument need?

A. The app maker should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The people in the test are enough like the wider group for the result to matter. correct
C. The side detail decides the issue. choice	D. Publicly visible profiles can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, technology, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-115 | Level 4 | Answer A

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Morgan says, "The plan caused that result." Which hidden assumption does Morgan's argument need?

A. Nothing else important changed during the test in a way that better explains the result. correct	B. The side detail decides the issue. choice
C. The clinic should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Patient no-show rates can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, health, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-116 | Level 4 | Answer B

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. A four-week test with domestic flight passengers found that average boarding time fell by 9% compared with the four weeks before the test. Casey says, "That means the plan helped domestic flight passengers." Which hidden assumption does Casey's argument need?

A. Average boarding time can never be measured reliably, no matter how carefully people try. choice	B. The result being measured is the right kind of evidence for whether the plan helped. correct
C. The side detail decides the issue. choice	D. The airline should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, travel, d4

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-117 | Level 4 | Answer D

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. Jordan says, "If the plan can reduce unresolved repair requests, then it should be adopted." Which hidden assumption does Jordan's argument need?

A. The landlord should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. Unresolved repair requests can never be measured reliably, no matter how carefully people try. choice	D. A real change in unresolved repair requests would be valuable enough to matter for the decision. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, housing, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-118 | Level 4 | Answer C

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Riley says, "The result will continue if the plan becomes permanent." Which hidden assumption does Riley's argument need?

A. The cafeteria should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. The test result is not just a temporary bump that fades when the test is over. correct	D. Fruit purchases can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, food, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-119 | Level 4 | Answer B

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Maya argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Maya's argument need?

A. Customer complaint rates can never be measured reliably, no matter how carefully people try. choice	B. The small test is close enough to the real rollout to count as useful evidence. correct
C. The side detail decides the issue. choice	D. The call center should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, customer support, d4

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-120 | Level 4 | Answer A

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Sam says, "The plan caused that result." Which hidden assumption does Sam's argument need?

A. The result is not better explained by another change that happened during the test. correct	B. The side detail decides the issue. choice
C. Average household water use can never be measured reliably, no matter how carefully people try. choice	D. The water utility should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, utilities, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-121 | Level 4 | Answer D

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. A four-week test with patrol officers found that missing-camera-footage reports fell by 35% compared with the four weeks before the test. Avery says, "That means the plan helped patrol officers." Which hidden assumption does Avery's argument need?

A. The police department should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Missing-camera-footage reports can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. Improvement in the tracked result would count as a real sign of help for the group. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, governance, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-122 | Level 4 | Answer C

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. Taylor says, "If the plan can reduce phone calls asking ballot status, then it should be adopted." Which hidden assumption does Taylor's argument need?

A. Phone calls asking ballot status can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The goal of reducing phone calls asking ballot status is important enough to help decide what to do. correct	D. The election office should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, election administration, d4

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-123 | Level 4 | Answer B

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Morgan says, "The result will continue if the plan becomes permanent." Which hidden assumption does Morgan's argument need?

A. The tutoring app should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The improvement seen during the test will continue if the plan becomes permanent. correct
C. Vocabulary retention quiz scores can never be measured reliably, no matter how carefully people try. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, learning, d4

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-124 | Level 4 | Answer A

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Casey argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Casey's argument need?

A. The wider group is enough like the test group that the result is a fair clue. correct	B. The side detail decides the issue. choice
C. The gym should reject every alternative before checking any other evidence, even if it is relevant. choice	D. New-member cancellations can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, fitness, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-125 | Level 4 | Answer D

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Jordan says, "The plan caused that result." Which hidden assumption does Jordan's argument need?

A. Reported minor crashes can never be measured reliably, no matter how carefully people try. choice	B. The insurer should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The side detail decides the issue. choice	D. Other changes during the test were not strong enough to explain the result better. correct

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, insurance, d4

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

hidden_assumptions-126 | Level 4 | Answer C

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. A four-week test with newsletter readers found that reader trust ratings rose by 7% compared with the four weeks before the test. Riley says, "That means the plan helped newsletter readers." Which hidden assumption does Riley's argument need?

A. The side detail decides the issue. choice	B. The newsroom should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The measurement is close enough to the goal to show whether the group was helped. correct	D. Reader trust ratings can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, media, d4

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-127 | Level 4 | Answer A

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. Maya says, "If the plan can reduce price disputes, then it should be adopted." Which hidden assumption does Maya's argument need?

A. Price disputes matters enough that improving it could be a serious reason for the plan. correct	B. Price disputes can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. The farmers market should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, local commerce, d4

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-128 | Level 4 | Answer B

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Sam says, "The result will continue if the plan becomes permanent." Which hidden assumption does Sam's argument need?

A. Noise complaints from guest rooms can never be measured reliably, no matter how carefully people try. choice	B. The four-week result is stable enough to be useful for a longer-term decision. correct
C. The hotel should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, hospitality, d4

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

Level 5

Level 5 is for fluency: the learner should now name the thinking move and explain the elimination path.

hidden_assumptions-129 | Level 5 | Answer C

Prompt. The city council is weighing a proposal aimed at late-shift workers: extend evening bus service until midnight. A four-week test with late-shift workers found that late-shift commute complaints fell by 22% compared with the four weeks before the test. Taylor says, "The result will continue if the plan becomes permanent." Which hidden assumption does Taylor's argument need?

A. Late-shift commute complaints can never be measured reliably, no matter how carefully people try. choice	B. The city council should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The four-week result is stable enough to be useful for a longer-term decision. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, transportation, d5

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-130 | Level 5 | Answer D

Prompt. The school board is weighing a proposal aimed at ninth-grade classrooms: require phone lockers during class. A four-week test with ninth-grade classrooms found that classroom disruption reports fell by 31% compared with the four weeks before the test. Morgan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Morgan's argument need?

A. Classroom disruption reports can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The school board should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The test setting matches the bigger decision closely enough for the result to matter. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, education, d5

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-131 | Level 5 | Answer A

Prompt. The hospital is weighing a proposal aimed at patients over 60: send medication reminder texts before evening doses. A four-week test with patients over 60 found that missed-dose reports fell by 18% compared with the four weeks before the test. Casey says, "The plan caused that result." Which hidden assumption does Casey's argument need?

A. The plan is the best explanation of the result, not some other change at the same time. correct	B. The side detail decides the issue. choice
C. The hospital should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Missed-dose reports can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, health, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-132 | Level 5 | Answer B

Prompt. The company is weighing a proposal aimed at software engineers: test a Monday-through-Thursday workweek. A four-week test with software engineers found that staff resignations fell by 15% compared with the four weeks before the test. Jordan says, "That means the plan helped software engineers." Which hidden assumption does Jordan's argument need?

A. The side detail decides the issue. choice	B. The tracked result is a fair way to judge whether the plan helped the people involved. correct
C. Staff resignations can never be measured reliably, no matter how carefully people try. choice	D. The company should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, workplace, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-133 | Level 5 | Answer C

Prompt. The grocery chain is weighing a proposal aimed at weekly grocery shoppers: add larger unit-price labels on shelf tags. Riley says, "If the plan can reduce shopper overpayment complaints, then it should be adopted." Which hidden assumption does Riley's argument need?

A. The side detail decides the issue. choice	B. Shopper overpayment complaints can never be measured reliably, no matter how carefully people try. choice
C. Shopper overpayment complaints matters enough that improving it could be a serious reason for the plan. correct	D. The grocery chain should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, retail, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-134 | Level 5 | Answer D

Prompt. The library is weighing a proposal aimed at families checking out children's books: waive late fines for children's books. A four-week test with families checking out children's books found that library card renewals rose by 19% compared with the four weeks before the test. Maya says, "The result will continue if the plan becomes permanent." Which hidden assumption does Maya's argument need?

A. The side detail decides the issue. choice	B. Library card renewals can never be measured reliably, no matter how carefully people try. choice
C. The library should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The short-term result will not disappear once the test period ends. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, public services, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-135 | Level 5 | Answer A

Prompt. The platform is weighing a proposal aimed at site administrators: require two-factor login for site administrators. A four-week test with site administrators found that admin account takeovers fell by 44% compared with the four weeks before the test. Sam argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Sam's argument need?

A. The test group is similar enough to the wider group that the result can guide the decision. correct	B. The platform should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Admin account takeovers can never be measured reliably, no matter how carefully people try. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, technology, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-136 | Level 5 | Answer B

Prompt. The neighborhood association is weighing a proposal aimed at residents on Maple Street: add brighter LED streetlights on Maple Street. A four-week test with residents on Maple Street found that reported thefts fell by 12% compared with the four weeks before the test. Avery says, "The plan caused that result." Which hidden assumption does Avery's argument need?

A. The side detail decides the issue. choice	B. No other major change during the test better explains the result than the plan does. correct
C. The neighborhood association should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Reported thefts can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, public safety, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-137 | Level 5 | Answer A

Prompt. The university is weighing a proposal aimed at first-year statistics students: expand peer tutoring in statistics. A four-week test with first-year statistics students found that course pass rates rose by 11% compared with the four weeks before the test. Taylor says, "That means the plan helped first-year statistics students." Which hidden assumption does Taylor's argument need?

A. The measured result is a reasonable sign that the plan helped the target group. correct	B. The university should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The side detail decides the issue. choice	D. Course pass rates can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, education, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-138 | Level 5 | Answer B

Prompt. The restaurant group is weighing a proposal aimed at lunch customers: show calorie labels on printed lunch menus. Morgan says, "If the plan can reduce dessert orders, then it should be adopted." Which hidden assumption does Morgan's argument need?

A. The side detail decides the issue. choice	B. Reducing dessert orders would matter enough to count in this decision. correct
C. Dessert orders can never be measured reliably, no matter how carefully people try. choice	D. The restaurant group should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, nutrition, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-139 | Level 5 | Answer D

Prompt. The bank is weighing a proposal aimed at checking-account customers: send overdraft warning texts before fees post. A four-week test with checking-account customers found that overdraft fees fell by 24% compared with the four weeks before the test. Casey says, "The result will continue if the plan becomes permanent." Which hidden assumption does Casey's argument need?

A. The bank should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. Overdraft fees can never be measured reliably, no matter how carefully people try. choice	D. The result from the short test will last long enough to matter after the rollout. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, finance, d5

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-140 | Level 5 | Answer C

Prompt. The park service is weighing a proposal aimed at weekend trail hikers: use timed-entry passes for weekend trail visits. A four-week test with weekend trail hikers found that trail crowding complaints fell by 33% compared with the four weeks before the test. Jordan argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Jordan's argument need?

A. Trail crowding complaints can never be measured reliably, no matter how carefully people try. choice	B. The park service should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The people in the test are enough like the wider group for the result to matter. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, environment, d5

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-141 | Level 5 | Answer B

Prompt. The museum is weighing a proposal aimed at local families: offer free admission on Fridays. A four-week test with local families found that family visits rose by 29% compared with the four weeks before the test. Riley says, "The plan caused that result." Which hidden assumption does Riley's argument need?

A. Family visits can never be measured reliably, no matter how carefully people try. choice	B. Nothing else important changed during the test in a way that better explains the result. correct
C. The side detail decides the issue. choice	D. The museum should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, culture, d5

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-142 | Level 5 | Answer A

Prompt. The sports league is weighing a proposal aimed at youth soccer players: add mandatory sideline concussion checks. A four-week test with youth soccer players found that repeat head injuries fell by 21% compared with the four weeks before the test. Maya says, "That means the plan helped youth soccer players." Which hidden assumption does Maya's argument need?

A. The result being measured is the right kind of evidence for whether the plan helped. correct	B. The sports league should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Repeat head injuries can never be measured reliably, no matter how carefully people try. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, sports, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-143 | Level 5 | Answer D

Prompt. The nonprofit is weighing a proposal aimed at first-time donors: send donation receipts within one day. Sam says, "If the plan can increase donor retention, then it should be adopted." Which hidden assumption does Sam's argument need?

A. Donor retention can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The nonprofit should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Increasing donor retention is important enough to help justify the plan. correct

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, nonprofit, d5

A feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

hidden_assumptions-144 | Level 5 | Answer C

Prompt. The warehouse is weighing a proposal aimed at warehouse staff: offer monthly lifting-safety and ergonomic training. A four-week test with warehouse staff found that back-injury claims fell by 20% compared with the four weeks before the test. Avery says, "The result will continue if the plan becomes permanent." Which hidden assumption does Avery's argument need?

A. The warehouse should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Back-injury claims can never be measured reliably, no matter how carefully people try. choice
C. The test result is not just a temporary bump that fades when the test is over. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, workplace safety, d5

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-145 | Level 5 | Answer B

Prompt. The city sanitation office is weighing a proposal aimed at apartment residents: place compost bins in apartment lobbies. A four-week test with apartment residents found that landfill waste from participating buildings fell by 17% compared with the four weeks before the test. Taylor argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Taylor's argument need?

A. The side detail decides the issue. choice	B. The small test is close enough to the real rollout to count as useful evidence. correct
C. The city sanitation office should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Landfill waste from participating buildings can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, environment, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-146 | Level 5 | Answer A

Prompt. The app maker is weighing a proposal aimed at new app users: make new user profiles private by default. A four-week test with new app users found that publicly visible profiles fell by 48% compared with the four weeks before the test. Morgan says, "The plan caused that result." Which hidden assumption does Morgan's argument need?

A. The result is not better explained by another change that happened during the test. correct	B. Publicly visible profiles can never be measured reliably, no matter how carefully people try. choice
C. The side detail decides the issue. choice	D. The app maker should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, technology, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-147 | Level 5 | Answer D

Prompt. The clinic is weighing a proposal aimed at primary-care patients: reserve same-day appointment slots. A four-week test with primary-care patients found that patient no-show rates fell by 13% compared with the four weeks before the test. Casey says, "That means the plan helped primary-care patients." Which hidden assumption does Casey's argument need?

A. The side detail decides the issue. choice	B. Patient no-show rates can never be measured reliably, no matter how carefully people try. choice
C. The clinic should reject every alternative before checking any other evidence, even if it is relevant. choice	D. Improvement in the tracked result would count as a real sign of help for the group. correct

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, health, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

hidden_assumptions-148 | Level 5 | Answer C

Prompt. The airline is weighing a proposal aimed at domestic flight passengers: board passengers by seat zone. Jordan says, "If the plan can reduce average boarding time, then it should be adopted." Which hidden assumption does Jordan's argument need?

A. The airline should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Average boarding time can never be measured reliably, no matter how carefully people try. choice
C. A real change in average boarding time would be valuable enough to matter for the decision. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, travel, d5

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-149 | Level 5 | Answer C

Prompt. The landlord is weighing a proposal aimed at apartment tenants: launch an online apartment repair portal. A four-week test with apartment tenants found that unresolved repair requests fell by 26% compared with the four weeks before the test. Riley says, "The result will continue if the plan becomes permanent." Which hidden assumption does Riley's argument need?

A. The side detail decides the issue. choice	B. Unresolved repair requests can never be measured reliably, no matter how carefully people try. choice
C. The improvement seen during the test will continue if the plan becomes permanent. correct	D. The landlord should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, housing, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-150 | Level 5 | Answer D

Prompt. The cafeteria is weighing a proposal aimed at middle-school students: move fruit bowls to the front of the cafeteria line. A four-week test with middle-school students found that fruit purchases rose by 23% compared with the four weeks before the test. Maya argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Maya's argument need?

A. The side detail decides the issue. choice	B. The cafeteria should reject every alternative before checking any other evidence, even if it is relevant. choice
C. Fruit purchases can never be measured reliably, no matter how carefully people try. choice	D. The wider group is enough like the test group that the result is a fair clue. correct

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, food, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

hidden_assumptions-151 | Level 5 | Answer A

Prompt. The call center is weighing a proposal aimed at support agents: give support agents weekly script coaching. A four-week test with support agents found that customer complaint rates fell by 18% compared with the four weeks before the test. Sam says, "The plan caused that result." Which hidden assumption does Sam's argument need?

A. Other changes during the test were not strong enough to explain the result better. correct	B. The call center should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The side detail decides the issue. choice	D. Customer complaint rates can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, customer support, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

B feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-152 | Level 5 | Answer B

Prompt. The water utility is weighing a proposal aimed at local homeowners: send automatic household water-leak alerts. A four-week test with local homeowners found that average household water use fell by 10% compared with the four weeks before the test. Avery says, "That means the plan helped local homeowners." Which hidden assumption does Avery's argument need?

A. The water utility should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The measurement is close enough to the goal to show whether the group was helped. correct
C. The side detail decides the issue. choice	D. Average household water use can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, utilities, d5

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-153 | Level 5 | Answer C

Prompt. The police department is weighing a proposal aimed at patrol officers: send body-camera activation reminders before patrol shifts. Taylor says, "If the plan can reduce missing-camera-footage reports, then it should be adopted." Which hidden assumption does Taylor's argument need?

A. The police department should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The side detail decides the issue. choice
C. The goal of reducing missing-camera-footage reports is important enough to help decide what to do. correct	D. Missing-camera-footage reports can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, governance, d5

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-154 | Level 5 | Answer D

Prompt. The election office is weighing a proposal aimed at mail voters: offer online mail-ballot tracking. A four-week test with mail voters found that phone calls asking ballot status fell by 42% compared with the four weeks before the test. Morgan says, "The result will continue if the plan becomes permanent." Which hidden assumption does Morgan's argument need?

A. The side detail decides the issue. choice	B. Phone calls asking ballot status can never be measured reliably, no matter how carefully people try. choice
C. The election office should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The four-week result is stable enough to be useful for a longer-term decision. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, lasting-result, election administration, d5

A feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-155 | Level 5 | Answer A

Prompt. The tutoring app is weighing a proposal aimed at language learners: send spaced-review prompts for language vocabulary. A four-week test with language learners found that vocabulary retention quiz scores rose by 12% compared with the four weeks before the test. Casey argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Casey's argument need?

A. The test setting matches the bigger decision closely enough for the result to matter. correct	B. Vocabulary retention quiz scores can never be measured reliably, no matter how carefully people try. choice
C. The tutoring app should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, scale-up, learning, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the test is a fair guide to the bigger decision.

B feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

C feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-156 | Level 5 | Answer B

Prompt. The gym is weighing a proposal aimed at new gym members: offer a beginner gym orientation. A four-week test with new gym members found that new-member cancellations fell by 19% compared with the four weeks before the test. Jordan says, "The plan caused that result." Which hidden assumption does Jordan's argument need?

A. The gym should reject every alternative before checking any other evidence, even if it is relevant. choice	B. The plan is the best explanation of the result, not some other change at the same time. correct
C. The side detail decides the issue. choice	D. New-member cancellations can never be measured reliably, no matter how carefully people try. choice

Core explanation. The hidden assumption is that the result came from the plan, not from another cause.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, cause-link, fitness, d5

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the result came from the plan, not from another cause.

C feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

D feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

hidden_assumptions-157 | Level 5 | Answer A

Prompt. The insurer is weighing a proposal aimed at auto-insurance policyholders: send weekly safe-driving feedback. A four-week test with auto-insurance policyholders found that reported minor crashes fell by 8% compared with the four weeks before the test. Riley says, "That means the plan helped auto-insurance policyholders." Which hidden assumption does Riley's argument need?

A. The tracked result is a fair way to judge whether the plan helped the people involved. correct	B. The side detail decides the issue. choice
C. Reported minor crashes can never be measured reliably, no matter how carefully people try. choice	D. The insurer should reject every alternative before checking any other evidence, even if it is relevant. choice

Core explanation. The hidden assumption is that the measured result is a good sign of whether the plan helped.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is A because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, measure-link, insurance, d5

A feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the measured result is a good sign of whether the plan helped.

B feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

hidden_assumptions-158 | Level 5 | Answer B

Prompt. The newsroom is weighing a proposal aimed at newsletter readers: place corrections at the top of articles. Maya says, "If the plan can increase reader trust ratings, then it should be adopted." Which hidden assumption does Maya's argument need?

A. The newsroom should reject every alternative before checking any other evidence, even if it is relevant. choice	B. Reader trust ratings matters enough that improving it could be a serious reason for the plan. correct
C. Reader trust ratings can never be measured reliably, no matter how carefully people try. choice	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is B because it supplies that bridge without adding a much stronger claim than the argument needs.

Tags: hidden_assumptions, assumption, goal-worth, media, d5

A feedback (Distractor): Not quite. Critical thinking does not require rejecting every alternative before looking at evidence. The needed assumption is narrower.

B feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the hoped-for result is important enough to count as a real reason.

C feedback (Distractor): Not quite. This would actually weaken the argument by saying the result cannot be checked. The needed assumption helps the evidence count.

D feedback (Distractor): Not quite. A side detail may be noticeable, but the argument does not need it to be true. A hidden assumption must connect the reason to the conclusion.

hidden_assumptions-159 | Level 5 | Answer D

Prompt. The farmers market is weighing a proposal aimed at weekend farmers market shoppers: require clearer price signs at vendor stalls. A four-week test with weekend farmers market shoppers found that price disputes fell by 28% compared with the four weeks before the test. Sam says, "The result will continue if the plan becomes permanent." Which hidden assumption does Sam's argument need?

A. Price disputes can never be measured reliably, no matter how carefully people try. choice	B. The side detail decides the issue. choice
C. The farmers market should reject every alternative before checking any other evidence, even if it is relevant. choice	D. The short-term result will not disappear once the test period ends. correct

Core explanation. The hidden assumption is that the short test result will last long enough to matter.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is D because it supplies that bridge without adding a much stronger claim than the argument needs.

D feedback (Correct): Correct. This is the missing bridge the argument needs before the conclusion can follow. The hidden assumption is that the short test result will last long enough to matter.

hidden_assumptions-160 | Level 5 | Answer C

Prompt. The hotel is weighing a proposal aimed at overnight hotel guests: send quiet-hours text reminders to hotel guests. A four-week test with overnight hotel guests found that noise complaints from guest rooms fell by 30% compared with the four weeks before the test. Avery argues, "That test is enough reason to use the plan more widely." Which hidden assumption does Avery's argument need?

A. Noise complaints from guest rooms can never be measured reliably, no matter how carefully people try. choice	B. The hotel should reject every alternative before checking any other evidence, even if it is relevant. choice
C. The test group is similar enough to the wider group that the result can guide the decision. correct	D. The side detail decides the issue. choice

Core explanation. The hidden assumption is that the test is a fair guide to the bigger decision.

Process commentary. To uncover the answer, put the stated reason next to the conclusion and ask what bridge must be true between them. The correct choice is C because it supplies that bridge without adding a much stronger claim than the argument needs.
